Payne Creek begins with a 29' high dam in the SWNE, S34, T 13S, R3E which results in the Payne Creek Reservoir with a capacity of 728 AF for on-stream storage. Water is then rediverted at several points along Payne Creek. The comingling with Squaw Creek and actually some Basin 51 rights (not being recommended in this report) occurs when the ditch from Squaw Creek (carrying Squaw Creek, Mary Creek and Alder Reservoir water) diverts from Squaw Creek in the NWSW, S22, T. 14S, R3E, flows in a Northerly direction and injects into Payne Creek in the NWSE, S8, T14S, R3E. At that point all 4 sources comingle and are rediverted from Payne Creek to irrigate the lands in Sections 8, 17, 18, 19, 20 & 30, T14S, R3E. All irrigation is small diversion dams, dikes, ditches and gravity irrigation.

WATER RIGHT LICENSE

License of Water Right No. R-1055/55-2181 Priority Nov. 7, 1959 Amount 895 acre feet

THIS IS TO CERTIFY, that NANCY & PETER JACKSON

of Bruneau, Idaho, has complied with the terms and conditions of Permit No. R-1055/55-2181 issued pursuant to Application for Permit dated November 4, 1959, and has submitted proof to the Department of Water Resources on March 11, 1974 (late proof), that he has applied water to a beneficial use; an examination by the Department indicates that the works have a capacity for the storage of 895 acre feet of water from Squaw Creek, tributary to Blue Creek, and that the permit holder has applied to a beneficial use and established a right to use water as follows:

Beneficial Use	Period of Use	Rate of Diversion	Annual Volume
Storage for Irrigation	from <u>Jan. 1</u> to <u>Dec. 31</u>	at <u>n/a</u> cfs and	<u>895 acre feet</u>

RE: Snake River Basin Adjudication (SRBA)
Owyhee County - #A55-02210, #A55-02181, and #A55-07002

Dear Mr. and Mrs. Jackson:

Thank you for taking my phone call last week. As I explained, I have been assigned to review the SRBA notices of claim submitted by you and by Riddle Ranches. During my initial desktop review of your notices of claim, I have concluded that I should do field exams to verify some of your water uses. I will call you to arrange times for these exams. During each visit I would appreciate the assistance of someone who is familiar with your irrigation operations. I am looking forward to working with you over the next few months to get your water right recommendations exactly correct.

Meanwhile, I have also noted some issues which we may resolve through the mail. First, I noticed that IDWR issued water right license #55-02210 to you last month with a place of use of 406 acres. And yet, your corresponding SRBA claim, #A55-02210, lists a place of use of only 330 acres. I cannot recommend this right to the court for more acres than you have claimed. Therefore, you may choose to amend your notice of claim to match the place of use on the license. To do this, you should review the enclosed amended claim form which I have drafted, fix any errors by crossing out the incorrect information and inserting the correct information, sign the notice before a notary public, and return the notice to IDWR with the appropriate fee. In this case, the fee is \$18.00 to cover acres not previously covered by this or any other notice of claim.

Second, license #55-02181 covers water from the same source and delivery system as #55-02210. If you wish to have this right recommended with the same 406-acre place of use, you should amend this notice of claim also. I have enclosed an amended notice of claim form for #A55-02181, which you may complete as described above. Because the acreage added to this claim will have already been covered by #A55-02210, no amendment fee is necessary.

Third, license #55-07002 was issued to Riddle Ranches in 1990 with a 1262 acre place of use. However, notice of claim #A55-07002 was filed with a place of use of only 1166 acres. Therefore, notice of claim #A55-07002 must also be amended in

Nancy and Peter Jackson
August 12, 1992
Page 2 - Owyhee County

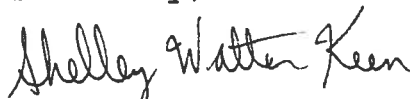

order for me to recommend the entire licensed place of use. The fee for this amendment, as I have drafted it, is \$96.00 to cover acres not previously claimed by this or any other notice of claim.

To assist you, I have enclosed printouts showing each of the three licenses and the three corresponding notices of claim as they appear in our database.

In order to expedite the claims review process, please submit your amendments as soon as possible, but not later than September 9, 1992. If you do not wish to amend your notices of claim, please let me know in writing.

If you have any questions, please contact me at 327-7934 in Boise.

Sincerely,

Shelley Walter Keen

6. ☐ **Instream Flow Description**

Should be: _____

7. ☐ **Purpose(s) of Use**

Should be: _____

8. ☐ **Period of Year**

Should be: _____

9. ☒ **Place of Use**

Should be: 1) adjusted to account for the acreage occupied by non-irrigated lands, such as the land occupied by Highway 51, ponds, buildings, and roads on the Riddle Ranches' property.
2) revised to reflect the actual acreage irrigated or evidence provided that the IDWR GIS delineation is correct.

11. I object because:

☐ This water right should not exist.

☐ This water right was not recommended, but should be recommended with the elements described above.

E. REASONS SUPPORTING OBJECTION(S):

1) The 1987 NAPP photography and IDWR's GIS acreage delineation shows that the acreage recommended as a place of use includes Highway 51, ponds, buildings, and roads on the Riddle Ranches' property. The irrigated acreage also includes the canals and diversion structures. For example, Township 14S, 3E, Sections 16, 20, and 21 contain significant amounts of non-irrigated lands that are considered irrigated under the recommended place of use acreage.

2) While the 1987 NAPP photography suggests some irrigation occurs in Township 14S, Range 3E, Section 25 in the NW of the NE and the NE of the SW, the delineation of the acreage in this section and several other sections appears relatively arbitrary. Non-irrigated lands adjacent to the "irrigated" areas appear to be identical and IDWR's GIS delineation of acres could not be reproduced based on the 1987 NAPP photo. Additionally, the IDWR GIS delineated acreage does not follow geographic features, such as contours, as one would expect, and actually crosses contours in some instances.
