From: Jennifer Dean
Subject: Land Survey

For this island in the Snake River the most recent federal land survey is Snake River Island, Mineral Survey No. 1831. When the license for this POU was issued this survey was used to describe the location of the licensed acres. The 4 sections of the survey were labeled for licensing purposes as Lots A-D.

The claim describes the POU by a theoretical quarter quarter. These quarter quarters are the extensions of the Geographic Coordinate Database (GCDB) lines on the Idaho mainland. Most of the quarter quarters are claimed for 10 acres. This is surprising because only 170 acres are claimed out of the 309 that were licensed. There are several quarter quarters where the license covered additional acres beyond what were claimed. The claim also seems odd because there are several places where more acres are claimed than can be found for that particular theoretical quarter quarter.

Because of the claim, I went ahead and found the GIS acres for each of the theoretical quarter quarters. For any of the quarter quarters where there were fewer than the number of acres claimed, I recommended the number of acres that I found using GIS. The remaining acres that were claimed in these quarter quarters were then used to recommend additional acres in quarter quarters that were part of the same lot that was used in the licensing process. When determining the split of these acres, I tried to maintain some proportionality with the number of acres found by GIS for the new quarter quarter. The following pages may be helpful.

With regard to maintaining the Snake River Island, Mineral Survey No. 1831 as part of the legal description, I added the following remark to the recommendation: This right authorizes the irrigation of 170 acres within Snake River Island, Mineral Survey No. 1831.
