Total Acres: 41

Conditions of Approval:

1. P01 No lawful appropriation shown.
2. P11 No lawful appropriation shown: There are a number of circumstances in which a claim is proposed to be disallowed on this basis. This is most commonly included for a claim based on beneficial use or posted notice that is proposed to be disallowed because the right claimed is not within an exception to the mandatory permit statute, and beneficial use of water prior to the mandatory permit statute was not confirmed. This is also included where a claim is proposed to be disallowed because the claim is to water that is not public water subject to appropriation. This is also included where a right was determined not to exist in a prior adjudication.

**STATE OF IDAHO  
DEPARTMENT OF WATER RESOURCES  
ADJUDICATION FIELD REPORT**

**Prior to Field Exam**

- ☐ Copy of Claim, claim has been signed, sealed, and dated by notary?
- ☐ Check fees paid
- ☐ Well logs (if needed)
- ☐ Copy of topo or NAPP
- ☐ Check of Govt. Lots, if needed, Govt. Plat/Tax lot information
- ☐ Check POD & POU overlap, see below – include overlapping right for exam
- ☐ Evidence of Priority – if none, talk with claimant

**CLAIMANT INFORMATION – verify contact information is complete**Claim No(s) 3-4014Owner: Roger Hendon Phone No. \_\_\_\_\_

Current Address: \_\_\_\_\_

- ☐ No change NAME IS THE SAME
- ☐ NEW OWNER
- ☐ No change Address
- ☐ NEW ADDRESS
- ☐ How long owned property? \_\_\_\_\_

Accompanied by: \_\_\_\_\_

**PRIORITY DATE**

- ☐ No change – Complete evidence submitted or not necessary
- ☐ Incomplete – Claimant should be asked when water was first used and submit proof of date.
- ☐ Priority date is acceptable/within mandatory filing dates?

Priority date, per claimant, is: \_\_\_\_\_

(If priority date, based on your exam, seems questionable, explain below.)

## Priority Date Data Entry Form

Claim Number 3-4014

Claimed Priority Date: 3/15/1950

Claimed Basis: Statutory Claim

☐ Use Claimed Priority Date and Basis as Recommended Priority Date and Basis

Water Right Priority Date: 3/15/1950

Water Right Basis: Statutory Claim

Recommended Priority Date 11/15/1956Recommended Basis Beneficial Use

Document the evidence submitted/reviewed for the priority date claimed, include your analysis of the evidence:

Affidavits from Paul Johanek and Charles Johanek  
who are longtime neighbors state seeing irrigation  
since 1956.

Based upon conversations with Charles Johanek and  
Paul & Peter McCabe, Charles would have been a  
teen in 1956 and his father Paul would have  
been in his 30's or older. They have lived in the  
area ~~back~~ since the 1950's. This is a reasonable  
priority date

## INSTRUCTIONS FOR IRRIGATION FLOW RATE QUESTIONNAIRE

The information required in this questionnaire will describe your water delivery system and irrigation methods. This information is essential in order for staff of IDWR to evaluate your irrigation water requirements. Much of the information is technical, and you may wish to contact the Soil Conservation Service or other professionals for assistance with this form.

Please provide your name, address, and phone number where you may be contacted for further information or clarification. Include the claim number(s) for those claims where the irrigation flow rate is more than 0.02 cfs (1 miner's inch) per acre.

1. provide the total number of acres irrigated for the claims listed.
2. provide a breakdown in acres of the types of crops grown in a typical irrigation season for each of your irrigation system types.

Items 3 through 8 must be completed for each of the irrigation system types you specified in item 2. This information must be completed as accurately as possible. All information must be based on peak water use during the irrigation season.

### **inflow -**

this is the flow of water applied to an individual furrow, border, ditch, etc.; proper evaluation requires good accuracy

### **spacing or width -**

this is the distance between individual furrows, border ridges, sprinkler laterals, etc.

### **length -**

this is the maximum length of run of furrows, corrugations, borders etc.

### **field slope -**

this is the slope of the field in the direction of the run of furrows, borders, etc.; specify in percent or give units if specified otherwise

### **set time -**

this is the number of hours that water is applied during an irrigation set

### **frequency -**

this is the number of days between irrigation start times of the same set of furrows or border(s) etc.

9. complete the appropriate items for the main ditch from the point of diversion to the farm; if this ditch is shared by other water users a more complete description of the system will be required

Items 10, 11, 12, and 13 see questionnaire.

## IRRIGATION FLOW RATE QUESTIONNAIRE

THIS INFORMATION IS REQUIRED FOR ANY ADJUDICATION CLAIM(S) FOR WHICH THE IRRIGATION FLOW RATE CLAIMED IS MORE THAN 0.02 CFS PER ACRE (ONE EXCEPTION IS THAT 0.03 CFS PER ACRE MAY BE ALLOWED FOR IRRIGATION OF UP TO 5 ACRES).

Governor

KARL J. DREHER  
Director

June 16, 2006

Dear Water Right Claimant(s):

The Idaho Department of Water Resources (IDWR) has completed its initial investigation of your water right claim(s) in the Snake River Basin Adjudication (SRBA). We have enclosed a printout showing our preliminary recommendation for reporting your claim(s) to the SRBA District Court later in 2006.

Please review the preliminary recommendation carefully. If there is any information on the printout that you believe is inaccurate, please fill out the enclosed reply indicating what changes you believe should be made. Further instructions to assist you with review are enclosed. For water rights with an irrigation water use, a Geographic Information System (GIS) computerized image of the place of use for your water right is also enclosed.

You may return this reply in person to us at the public meetings IDWR will be conducting in your area **on Thursday, June 22, 2006 in the Payette Senior Center, 137 North Main Street, Payette, beginning at 7:00 p.m.** Please plan to attend the public meeting, where you will have an opportunity to find out more about the SRBA process and speak with a department staff member should you have questions regarding your water right claim(s). Please bring any and all information you have which will help the Department understand your claim(s) and describe them accurately.

This process is intended to ensure IDWR recommends your water right accurately to the SRBA District Court. This is the easiest and least costly means for you to identify corrections you believe should be made to our recommendation. Completion of this process is an important step toward the overall success of the adjudication in Idaho. Your participation is necessary for and appreciated by IDWR to provide accurate information to the SRBA District Court.

We look forward to hearing from you. Please direct any telephone inquiries to 208-800-451-4129 or 208-287-4910.

Sincerely,

Karl J. Dreher  
Director

IDAHO DEPARTMENT OF WATER RESOURCES  
PRELIMINARY RECOMMENDATION OF WATER RIGHTS ACQUIRED UNDER STATE LAW

---

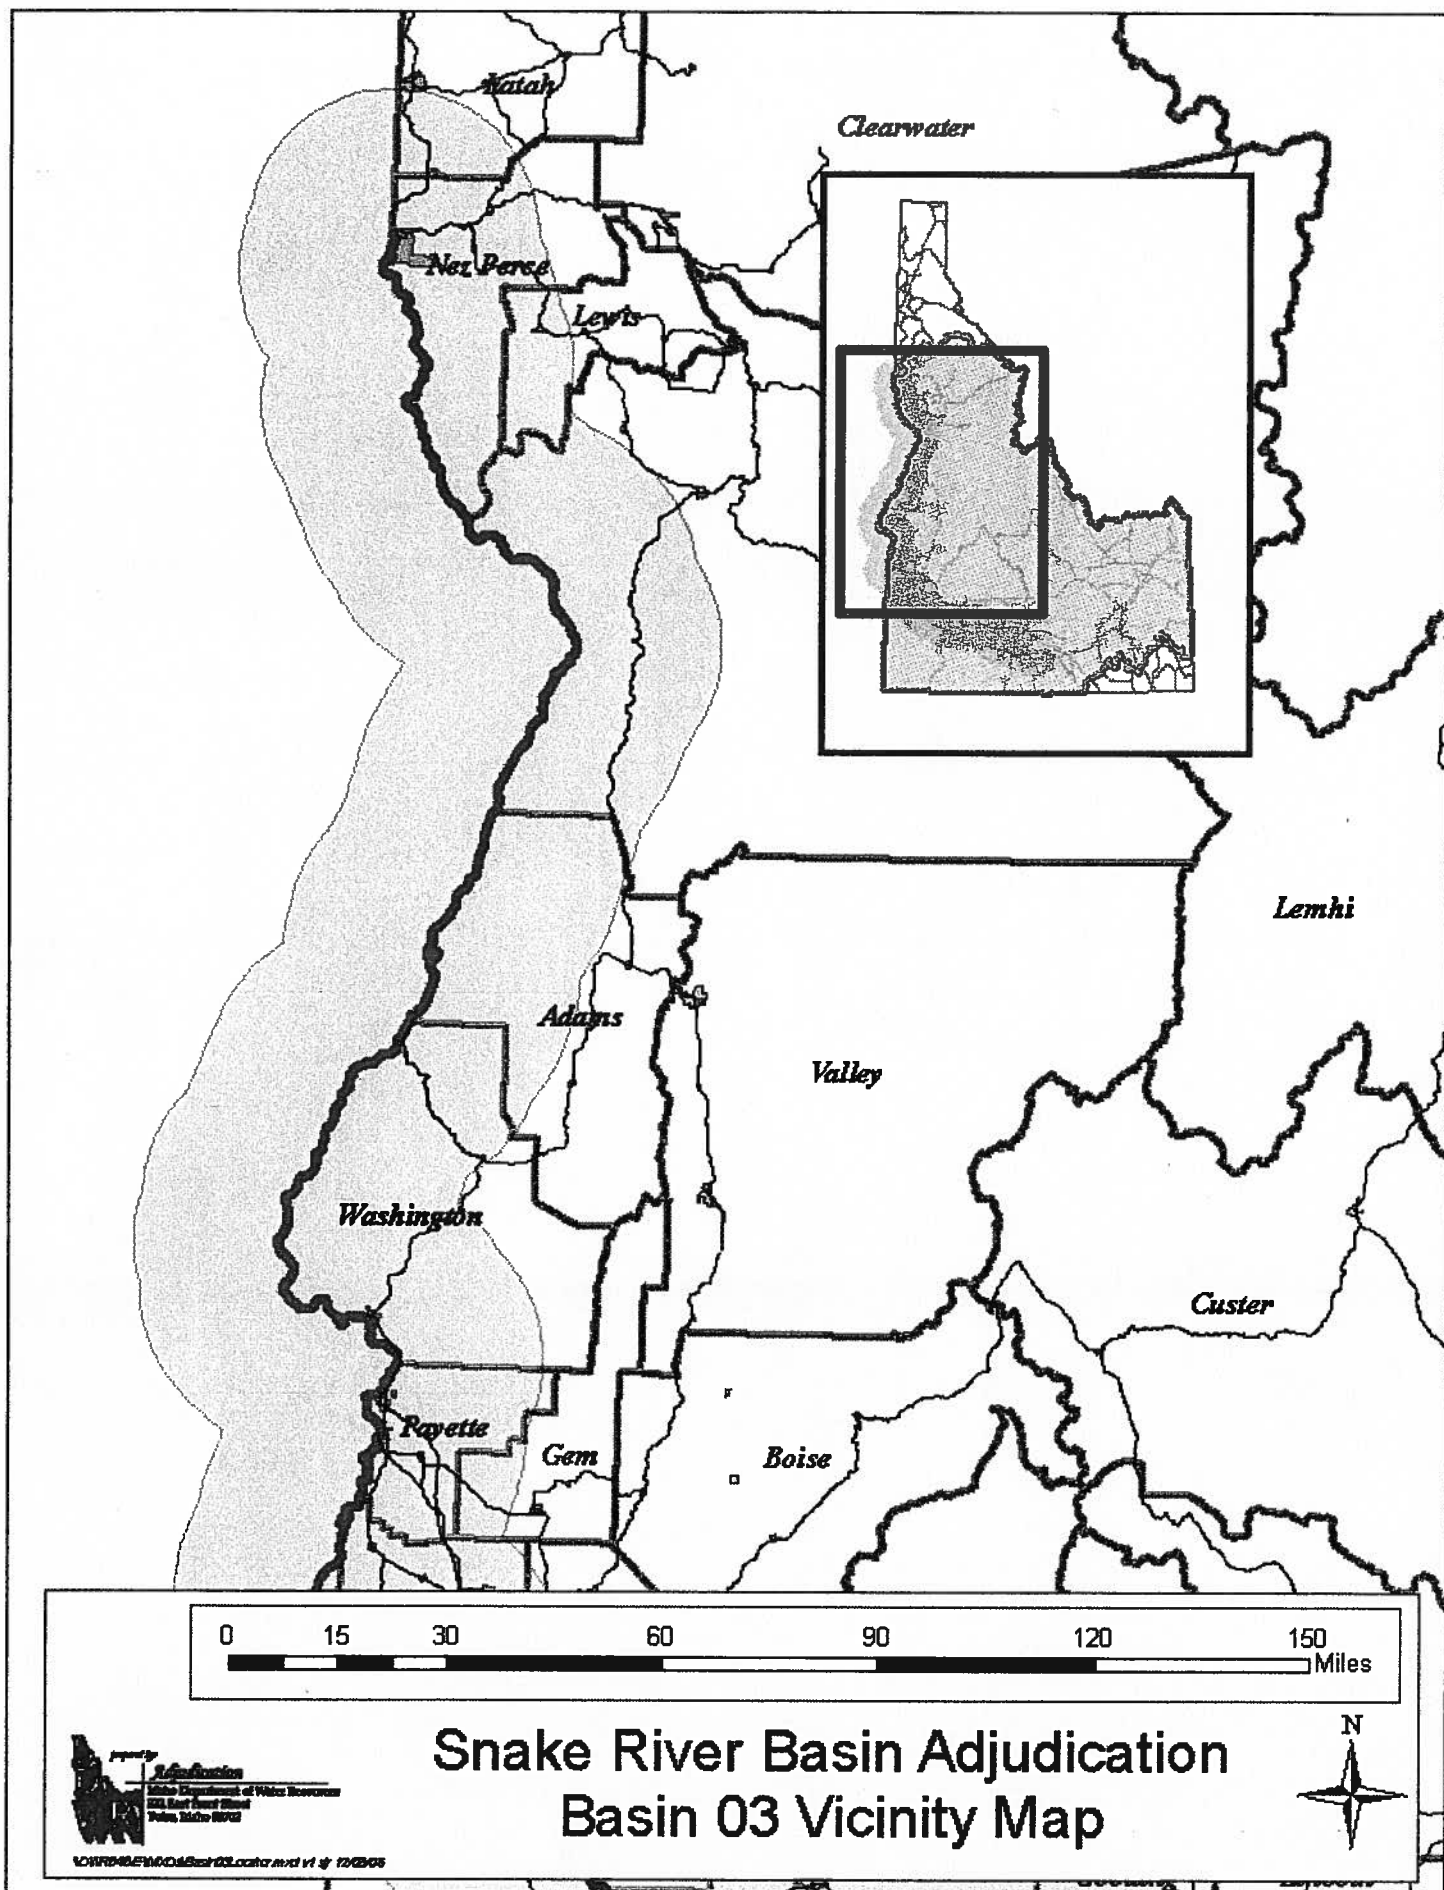

RIGHT NUMBER: 3-4014

NAME AND ADDRESS: DOUGLAS S DORSING  
716 S 1ST ST  
FRUITLAND ID 83619

DISALLOWED: No lawful appropriation shown.

EXPLANATORY MATERIAL:

No lawful appropriation shown: There are a number of circumstances in which a claim is proposed to be disallowed on this basis. This is most commonly included for a claim based on beneficial use or posted notice that is proposed to be disallowed because the right claimed is not within an exception to the mandatory permit statute, and beneficial use of water prior to the mandatory permit statute was not confirmed. This is also included where a claim is proposed to be disallowed because the claim is to water that is not public water subject to appropriation. This is also included where a right was determined not to exist in a prior adjudication.

DISTRICT COURT  
SNAKE RIVER BASIN ADJUDICATION  
STATE OF IDAHO

JOHN M. MELANSON  
PRESIDING JUDGE

FAX (208) 736-2121

SRBA CHAMBERS  
P.O. BOX 2707  
TWIN FALLS, IDAHO 83303-2707

Dear Water Right Claimant:

To help you with your water right claim(s) in the Snake River Basin Adjudication, this letter of explanation is being sent to you along with information sent by the Idaho Department of Water Resources (IDWR). Included are the following important documents which I ask you to please read carefully because they give you the opportunity to save a great deal of time and money:

1. **Preliminary Recommendation.** This is IDWR's *initial* finding and conclusion about your water right and how it should be reported to the SRBA Court. This preliminary recommendation is not filed with the court, but is provided to you to help correct errors or resolve any disagreement you may have over its content. This document has been prepared following IDWR's investigation and may be different than the claim(s) you actually filed.

Therefore, please review this preliminary recommendation carefully to find any errors or disagreements you have with IDWR's findings.

2. **Error Correction/Settlement Process.** This preliminary recommendation is a special service provided to you by IDWR to help you correct errors and resolve any other disagreement you have before the actual recommendations are ultimately filed with the court.

A description of how to work with IDWR is included. Our experience in the SRBA shows that by working in cooperation with IDWR most errors and differences can be addressed before coming into court. It's well worth your time to take full advantage of IDWR's helpful service. If your disagreement cannot be resolved, you will be able to file an objection to IDWR's actual recommendation when it is filed in court and have the final decision made by the Presiding Judge.

This error correction service is an important opportunity for you to work together with IDWR to make sure your water right claim(s) are decreed accurately. There is no cost to you other than your time reviewing the preliminary recommendation and talking to IDWR about any problem you see. Of course, you may always employ the services of an attorney if you wish.

The goal of the SRBA is to see that your water right(s) are decreed by the court as accurately and fairly as possible. It is important to me that this is done efficiently in order to reduce your costs and present you with your decree.

I strongly encourage you to take full advantage of this opportunity to use the fine and courteous services provided by IDWR.

Sincerely yours,

A handwritten signature in black ink, appearing to read "John M. Melanson".

Re: Previous correspondence regarding claim 3-4014

Dear Mr. Hendon:

As we discussed yesterday, I am sending you a copy of the information that has been provided to Mr. Dorsing. Enclosed is a copy of a letter to Mr. Dorsing dated March 24, 2006. This letter addresses two elements of the claim 3-4014 which need additional information in order to be reviewed by IDWR. I recently had some informal conversation with an attorney representing Mr. Dorsing that suggested a diversion rate analysis will be needed in order to prove the need for diversion beyond 0.82 cfs. It may be of value to speak with Mr. Dorsing to see if this analysis has been completed. I have enclosed copies of this information if you decide to pursue this.

With regard to verifying the priority date, Mr. Dorsing may also have information that may be of use as evidence. If he has no information the enclosed pamphlet may be of use. If you decide to use statements of individuals as evidence, please refer to the following guidelines. Generally proof provided is in the form of an affidavit from someone with first hand knowledge of the use. The affidavit should include: 1) date, 2) extent of use (number and location of acres irrigated), and 3) how the affidavit writer gained first hand knowledge. Please encourage those giving statements to be specific.

Additionally, this past week an information packet containing a preliminary recommendation for this claim was sent to Mr. Dorsing. The information includes some general information about the Snake River Basin Adjudication (SRBA). It also contains the preliminary recommendation for claim 3-4014. The preliminary recommendation for this claim is that it be disallowed because no proof of the priority date has been submitted. This is likely what will be submitted to the courts in the next few weeks if no additional information is submitted. I have enclosed copies of the information that was sent out with the preliminary recommendation. Please review this material and let me know if there are any questions.

Please submit the required evidence supporting the priority date and the historic use by July 21, 2006. This is the same deadline as for the Notice of Error reports that were sent with the preliminary recommendation information packet. Please reference all documents with the corresponding claim number. Send the documents in the enclosed envelope or mark your envelope with "ATTN: SRBA Claim Number 3-4014" to assure it arrives at the correct location. If you have questions not covered by this letter or the enclosed pamphlet, please contact this office. If you wish to call, our toll free number is 1-800-451-4129. You may reach me directly at (208) 287-4918.

Sincerely,

Jennifer Dean

3-4014

Re: Irrigation Diversion Rate Requirements, Evidence of Priority Date

Dear Mr. Dorsing:

The Notice of Claim to a Water Right (claim) identified with the number shown above your name has been filed in the Snake River Basin Adjudication (SRBA). In this claim you have identified your diversion rate as 1.23 cubic feet per second (cfs). The diversion rate you have claimed is higher than can be recommended under normal circumstances. Typically the maximum diversion for a water right in the State of Idaho is 1 miners inch or 0.02 cfs per acre. For the acreage you have claimed this would equate to 0.82 cfs.

In a telephone conversation between you and IDWR Adjudication agent Jennifer Wilson on December 8, 2005, you said that in a previous meeting with IDWR you were promised 1.23 cfs. As she mentioned, there is no record of this agreement on file with IDWR. If you have documentation supporting this agreement, please submit this by the date shown above.

If documentation supporting the agreement cannot be found and you are still seeking diversion beyond 0.82 cfs, an irrigation diversion rate analysis needs to be performed on your fields. This analysis has been designed to evaluate irrigation practices in order to determine if there is need for greater diversion rates than normal. Your answers to the enclosed questionnaire will enable IDWR to perform the analysis, thereby determining if your soil type and irrigation practices merit the use of more water than would normally be recommended.

Instructions for answering the questionnaire are included. Please note that the Natural Resources Conservation Service (formerly known as the Soil Conservation Service) and other professionals may be of assistance in helping you understand the technical questions contained in this form.

In addition to verifying your diversion rate, the historical use of your claim must be confirmed. The claim indicates your water usage is based on "Beneficial Use" or a "Statutory Claim." Water rights of this type are established by the historic use of water, dating back to when water was first used for the purpose claimed. The date of first use, known as the priority date, has not been confirmed. **Proof must be provided by the claimant supporting the priority date claimed and the historic use of the water.**

Enclosed you will find a computer printout of your claim and the pamphlet entitled "Evidence of Priority." The pamphlet describes the types of evidence required and suggests which documents will fulfill this requirement. If you choose to submit statements from individuals as evidence, the statement should be in the form of a notarized affidavit. A form is provided for your convenience.

March 24, 2006

DOUGLAS S DORSING

**PLEASE NOTE: If no evidence of priority date is submitted, IDWR will recommend the SRBA Court decree the claim be disallowed. If no information regarding increased diversion rate is submitted, the claim will be recommended with a diversion rate of 0.82 cfs.** It will be to your advantage to provide clear and convincing evidence. Because some of the requested documents take some time to obtain, it is in your best interest to begin immediately collecting evidence that may be submitted to support your priority date and increase in diversion rate.

Finally, the address above is not the current address on file with the department. In order to assist us in contacting you, please submit the enclosed change of address form with a current address. The address on file is listed on the enclosed copy of the Notice of Claim to a Water Right.

Please submit the required evidence supporting the priority date and the increased diversion rate by the date shown above, referencing all documents with the corresponding claim number. If you should decide to return the materials in anything other than the enclosed mailer, please include the notation "ATTN SRBA Claim Number 3-4014" on the front of the mailer. If you have any additional questions, please contact this office. If you wish to call, our toll free number is 1-800-451-4129. You may reach me directly at (208) 287-4918.

Sincerely,

Jennifer Dean

Re: Irrigation Diversion Rate Requirements, Evidence of Priority Date

Dear Mr. Dorsing:

The Notice of Claim to a Water Right (claim) identified with the number shown above your name has been filed in the Snake River Basin Adjudication (SRBA). In this claim you have identified your diversion rate as 1.23 cubic feet per second (cfs). The diversion rate you have claimed is higher than can be recommended under normal circumstances. Typically the maximum diversion for a water right in the State of Idaho is 1 miners inch or 0.02 cfs per acre. For the acreage you have claimed this would equate to 0.82 cfs.

In a telephone conversation between you and IDWR Adjudication agent Jennifer Wilson on December 8, 2005, you said that in a previous meeting with IDWR you were promised 1.23 cfs. As she mentioned, there is no record of this agreement on file with IDWR. If you have documentation supporting this agreement, please submit this by the date shown above.

If documentation supporting the agreement cannot be found, an irrigation diversion rate analysis needs to be performed on your fields. This analysis has been designed to evaluate irrigation practices in order to determine if there is need for greater diversion rates than normal. Your answers to the enclosed questionnaire will enable IDWR to perform the analysis, thereby determining if your soil type and irrigation practices merit the use of more water than would normally be recommended.

Instructions for answering the questionnaire are included. Please note that the Natural Resources Conservation Service (formerly known as the Soil Conservation Service) and other professionals may be of assistance in helping you understand the technical questions contained in this form.

In addition to verifying your diversion rate, the historical use of your claim must be confirmed. The claim indicates your water usage is based on "Beneficial Use" or a "Statutory Claim." Water rights of this type are established by the historic use of water, dating back to when water was first used for the purpose claimed. The date of first use, known as the priority date, has not been confirmed. **Proof must be provided by the claimant supporting the priority date claimed and the historic use of the water.**

Enclosed you will find a computer printout of your claim and the pamphlet entitled "Evidence of Priority." The pamphlet describes the types of evidence required and suggests which documents will fulfill this requirement. If you choose to submit statements from individuals as evidence, the statement should be in the form of a notarized affidavit. A form is provided for your convenience.

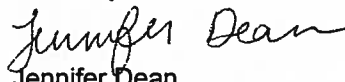

February 22, 2006

DOUGLAS S DORSING

**PLEASE NOTE:** If no evidence of priority date is submitted, IDWR will recommend the SRBA Court decree the claim be disallowed. If no information regarding increased diversion rate is submitted, the claim will be recommended with a diversion rate of 0.82 cfs. It will be to your advantage to provide clear and convincing evidence. Because some of the requested documents take some time to obtain, it is in your best interest to begin immediately collecting evidence that may be submitted to support your priority date and increase in diversion rate.

Please submit the required evidence supporting the priority date and the increased diversion rate by the date shown above, referencing all documents with the corresponding claim number. Send the documents in the enclosed envelope to assure it arrives at the correct location. If you have questions not covered by this letter or the enclosed pamphlet, please contact this office. If you wish to call, our toll free number is 1-800-451-4129.

Sincerely,

Re: Irrigation Diversion Rate Requirements, Claim Number 03-04014

Dear Claimant(s):

The Notice of Claim to a Water Right (claim) identified with the number shown above your name has been filed in the Snake River Basin Adjudication (SRBA). In this claim you have identified your diversion rate as 1.23 cubic feet per second (cfs). The diversion rate you have claimed is higher than can be recommended under normal circumstances. Typically the maximum diversion for a water right in the State of Idaho is 1 miner's inch or 0.02 cfs per acre. For your water right this would equate to 0.82 cfs.

In order to justify your claimed diversion rate, an irrigation diversion rate analysis needs to be performed on your fields. This analysis has been designed to evaluate irrigation practices in order to determine if there is need for greater diversion rates than normal. Your answers to the enclosed questionnaire will enable IDWR to perform the analysis, thereby determining if your soil type and irrigation practices merit the use of more water than would normally be recommended.

Instructions for answering the questionnaire are included on the first page. Please note that the Natural Resources Conservation Service (formerly known as the Soil Conservation Service) and other professionals may be of assistance in helping you understand the technical questions contained in this form.

The results of the irrigation diversion rate analysis are important in recommending your water right as claimed, therefore, completing and submitting this information is a matter of urgency. Please submit the enclosed questionnaire to IDWR no later than November 25, 2005. If you should decide to return the materials in other than the enclosed mailer, please include the notation "ATTN SRBA Claim Number 03-04014 on the front of the mailer.

If you have any questions, please contact this office. Our toll free number is 1-800-451-4129. It will help speed things along if you have your claim number, 03-04014, handy when you call.

Dear Linda -

Enclosed you'll find a check for \$136.00 (\$45<sup>00</sup> Payette River, \$91<sup>00</sup> Snake River). I also want to again thank you for your assistance and patience while "walking" me through our water rights filing.

So frequently "government employees" leave their kindness at home that I become defensive when I have an "official" problem. Your kindness and helpfulness was a pleasant surprise and I thank you so much.

Sincerely  
Doug Dorsing
