WATER RIGHT NO. 43-2540B
As Modified by Transfer No. 68892

CONDITIONS OF APPROVAL

1. Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code.
2. The total instantaneous diversion of water from all points of diversion under Rights 43-2540B and 43-13005 shall not exceed .47 cfs, nor total combined annual volume of 105.0 af.
3. Prior to diversion of water under this approval, the right holder shall provide a means of measurement acceptable to the Department from all authorized points of diversion which will allow determination of the total rate of diversion.
4. After specific notification by the Department, the right holder shall measure the diversion or shall enter into an agreement with the Department to determine the amount of water diverted from power records and shall annually report the information to the Department.
5. Commercial use is for a feedlot.
6. The place of commercial use authorized by this approval includes land upon which wastewater may be applied for irrigation purposes to satisfy water quality requirements. Water diverted under this approval shall not be used for irrigation unless the water is first used in the feedlot as authorized by these water rights.
7. The feedlot operation authorized under this approval shall comply with applicable county zoning and use ordinances.
8. Use of water under this approval shall comply with applicable water quality standards of the Department of Environmental Quality.
9. The right holder shall accomplish the change authorized by this transfer within one (1) year of the date of this approval.
10. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
11. Pursuant to Section 42-1412(6), Idaho Code, this water right is subject to such general provisions necessary for the definition of the rights or for the efficient administration of water rights as may be determined by the Snake River Basin Adjudication court at a point in time no later than the entry of the final unified decree.

This water right is subject to all prior water rights and shall be administered in accordance with Idaho law and applicable rules of the Department of Water Resources.

WATER RIGHT NO. 43-13005
As Modified by Transfer No. 68892

CONDITIONS OF APPROVAL

1. Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code.
2. The total instantaneous diversion of water from all points of diversion under Rights 43-2540B and 43-13005 shall not exceed .47 cfs, nor total combined annual volume of 105.0 af.
3. Prior to diversion of water under this approval, the right holder shall provide a means of measurement acceptable to the Department from all authorized points of diversion which will allow determination of the total rate of diversion.
4. After specific notification by the Department, the right holder shall measure the diversion or shall enter into an agreement with the Department to determine the amount of water diverted from power records and shall annually report the information to the Department.
5. Commercial use is for a feedlot.
6. The place of commercial use authorized by this approval includes land upon which wastewater may be applied for irrigation purposes to satisfy water quality requirements. Water diverted under this approval shall not be used for irrigation unless the water is first used in the feedlot as authorized by these water rights.
7. The feedlot operation authorized under this approval shall comply with applicable county zoning and use ordinances.
8. Use of water under this approval shall comply with applicable water quality standards of the Department of Environmental Quality.
9. The right holder shall accomplish the change authorized by this transfer within one (1) year of the date of this approval.
10. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
11. Pursuant to Section 42-1412(6), Idaho Code, this water right is subject to such general provisions necessary for the definition of the rights or for the efficient administration of water rights as may be determined by the Snake River Basin Adjudication court at a point in time no later than the entry of the final unified decree.

This water right is subject to all prior water rights and shall be administered in accordance with Idaho law and applicable rules of the Department of Water Resources.

Re: Transfer Recommendation

This transfer proposes to dry up 21 acres of irrigation, 0.28 cfs, and 63 AF from 43-2540A, convert it to stockwater and commercial use for the expansion of an existing feedlot, and add a new well. (0.19 cfs and 42 AF from 43-2540B will also be combined into this system. My recommendation for 43-2540B reflects previously approved transfer 5573.) These 21 acres were included in my preliminary recommendation of 1339.9 acres, 16.39 cfs and 4856 AF of 43-2540A. (This right was limited to 1214 acres and there was an expansion claim (43-10476) for 125.7 acres.) I recommend approval of this transfer.

MEMO

FROM: Allen Merritt 

DATE: April 5, 2000

TO: Transfer File No. 5573
Water Right(s): T43-02540B

In the Name of: Ida-Gold Farms

SUBJECT: **Review and Recommendation**

This transfer proposes to dry up 14 acres in two pivot corners and convert the water to us in a feedlot. The transfer was processed without protest. SRBA has reviewed the base right and is recommending it in an upcoming director's report (See Robertson memo dated 4/5/00).

Although the corners have been noted not irrigated during SRBA review no clear and convincing evidence of forfeiture has been found. The issue has been raise about the intended use. As drafted the transfer if approved could be a veiled attempt to build a dairy instead of a feedlot without giving notice. To prevent this type of issue the use should be limited to a feedlot.

Recommendation

I recommend that this transfer be approved subject to the following conditions:

- Subject to SRBA.
- Authorized use for stockwater and commercial use is for a beef cattle feedlot which does not include use in a dairy or other type of CAFO.
- Subject to other county, state, and federal requirements as may be appropriate.
- No new well is authorized to be drilled under this approval.

Re: Transfer Review/Recommendation

This transfer proposes to dry up 14 acres from two pivot corners (7 acres in the NWNW and 7 acres in the SWNW, both in Section 30, T10s, R28E. There is a licensed right (43-02540) for 16.58 cfs on 1228 acres on this property. They have also claimed an expansion claim (A43-10476) for 127 acres. I visited this property in July of 1994 and confirmed the location of the wells and acres irrigated. Although these two pivot corners were not being irrigated at that time, the acres were previously licensed and it is our policy to recommend them. I am recommending 1228 acres for 43-02540 and 125 acres for 43-10476 in a PPU of 1353 acres with a combined total of 16.58 cfs and 4912 AF. I have enclosed a copy of the layout map for my recommendation. The two corners are separate polygons, which can easily be deleted if this transfer is approved

I recommend approval of the transfer at this time.

Dear Allen,
I did some calling and although this operation has some feeder cattle, they are primarily a 2000 cow dairy. If they did not put the proper wording in their application/advertisement, I would submit that their application is incomplete, improper, illegal and should be done over completely. Thank you. Lee
