From: Vikie Hancock

12/15/99

Regarding: Claim A43-02542

This claim is based upon and elements agree with, license 43-02542. Season of use is not stated in the license and will be recommended to current IDWR standards.

An accomplished transfer of place of use has occurred, as claimant does not restrict his use of this water to the original legal subdivisions licensed. This claim will be recommended as a permissible place of use of 317 acres limited to the original licensed number of 277 acres irrigated within any one season.

Expansion claim A43-10601 will be disallowed as no actual increase in the number of acres irrigated by this license occurred. See field exam notes.

Claimant also has shares of Almo Water Company water, that he uses on this same place of use.

Field Exam Notes

Field Exam Date: 12-10-99

Claim No: A43- 02542, A43-02532A, A43-10601, -10602

Agent: Vikie Hancock

This field exam consisted of a meeting with the claimant at his home. There was no actual examination of the place of use or points of diversion. Notations were taken on the GIS print out to show the irrigation system and actual irrigated acres.

Claimant Douglas Ward uses groundwater from two wells and surface water supplied by Almo Water Company to irrigate most of his 320 acres. According to the claimant he irrigates the entire farm. We did not discuss the area immediately surrounding the homes, shed and equipment yard, which I observed was not irrigated.

Groundwater is diverted from a well located in the NWNW $\frac{1}{4}$ Section 25 to a sprinkler system that covers his higher ground. This well was licensed for 1.85 cfs and 277 acres. The place of use has changed somewhat from the POU as licensed because he now typically uses less water from this source in the N $\frac{1}{2}$ NW $\frac{1}{4}$ of section 25, and more water from this source in the NE $\frac{1}{4}$ and SENW $\frac{1}{4}$. Claimant agreed that the total acres irrigated from this well is probably still approximately 277 acres in an irrigation season, but that he changes the configuration of his sprinkler system depending on how much surface water is available from Almo Water Company.

Surface water delivered from Almo Water Company is used to flood the meadows along Almo Creek, which runs easterly through his farm. He also uses water from a well located in the SESE Section 22 to flood the lower ground in the NWNW $\frac{1}{4}$, and the meadows. This water is diverted from the well into Almo Creek, transported southeast in the Almo Creek channel, then re-diverted into a ditch in the NENE of section 26 just west of claimant's property line, and conveyed east to Claimant's POU. The use of water from this well is based upon a license for .04 cfs on 32 acres. Claimant says that this is still an artesian well that is not capped, and is allowed to run all year long. There are other water rights with Adjudication claims on this same well. Tracy Inc/ William Tracy holds all the other rights on the well except for a portion transferred to Arlo Lloyd in Elba. Tracy and Ward rotate the use of the entire flow of the well during the irrigation season. Both have claimed year round stockwater from the well, also.

Doug Ward sometimes incorporates water from the artesian well, as well as surface water delivered by Almo Water Company, into the sprinkler system. He typically does not use groundwater from the well in the NENE section 25 to flood irrigate. Mr. Ward filed expansion claims on both the licensed wells,

claiming that the water from both wells were used to irrigate the entire 320 acres. After discussing his claims and water usage, he agreed that his intention was more likely described as a permissible place of use, with each right limited to the original licensed number of acres within the total 320 acres he irrigates. He felt that would give him the flexibility he needed to adjust his irrigation system when the available water from each source fluctuated year to year.

Re: Douglas Ward: License 43-2542, John Hedges: Permit 43-7104

Dear Mr. Whipple:

In August, 1988 you contacted this office regarding possible interference with a well owned by Mr. Ward under water license 43-2542 from a well owned by Mr. Hedges under permit 43-7104.

In researching the file, I find that permit 43-7104 lapsed on August 12, 1987, and is of no further force or effect.

Any use of the Hedges well may be subject to action by the department under section 42-351 of the Idaho Code.

I am forwarding the information received from you to our state office for inclusion in file 43-2542.

If this office can be of any further assistance, please contact us.

Very Truly yours,

RE: John Hedge, Permit No. 43-7104

Dear Mr. Holmes:

Please remember our telephone conversation of earlier this week in which I indicated that Douglas Ward, heir of Harold K. Ward, wishes to protest the use and development of John Hedge's well, as found in permit No. 43-7104.

It is my understanding that the Hedge's well has had very little use since its construction in 1982. Mr. Ward has indicated that in the last six years the well has only been operated for a couple of weeks altogether. It is now Mr. Ward's understanding that Mr. Hedge is attempting to sell his well, which greatly concerns Mr. Ward.

Therefore, we hereby request that the Department of Water Resources investigate the situation and see if the Hedge's well is, or would, interfere with the Ward well and if so, that appropriate action be taken to restrict the Hedge's well. I have enclosed photocopies of the Ward's water right, plus an outline prepared by Doug Ward as to the impact the Hedge's well has had on his well.

Your assistance is very much appreciated, if you need additional information, please contact me. I look forward to hearing from you.

Sincerely,

Douglas R. Whipple

John Hedges drilled a well in the north-west corner of his ranch. It was tested and the temperature of his well water and ours were the same. He let Bill Tracy use it sometime during the summer of 1982. Our well started surging during that time, and that was the first time it was known to surge. I contacted Bill and he shut off Hedges well. Ours quit surging shortly after, within 24 hours or so. Bill turned Hedges well back on, after two days within 24 hours ours was surging again. Bill turned Hedges well off and left it off.

The next year John Hedges built weirs by my pump so it could be measured. Zen Taylor who was the watermaster at that time measured 60 inches of water on September 18, 1983.

August 31, 1985

Buddy Ward who was the watermaster measured .63 inches and noted a steady stream from an eight inch discharge pipe, running a little under half full. Bill Tracy witnessed.

September 15, 1986

Buddy Ward, still watermaster measured 60 inches. Jerry Udy employed at Raft River Rural Electric also measured the well using their measuring device and measured 65 inches.

July 1988

Bill Tracy contacted me and told me to have my water measured as he was going to turn Hedges well back on. He also said he would like to witness this.

July 30, 1988

Buddy Ward measured 62 inches of water, and Bill witnessed.

August 2, 1988

Bill Tracy started Hedges well. That evening I took Boyd Richins out to my pump, we noted a steady stream from the discharge pipe. I measured the water, it measured the same as Buddys measurement. The next day Bill checked my pump and noted that it had started to surge.

August 3, 1988

Boyd, Bill, and I checked the well this evening and it was still surging. It still however measured the same amount of inches as it had before. Bill turned Hedges well off. My well continued to surge thru the week, but remained measuring the same.

August 7, 1988

The well measurement has dropped to 50 inches.

August 9, 1988

Today I could only measure 48 inches.

August 10, 1988

I talked to Bill in the Almo Store, and told him, and asked if he would like to see it measured. He agreed and came down to my pump thru Hedges feild. On his way he met John Hedges in the lower end of his field spraying thistles, and I suppose he told John what I was doing, but John must of not been interested in it as he did not come to watch.

I measured 50 inches of water and we noted that the well was still surging. I wrote this down and Bill and I both signed it. I turned my well off that day and left it off for two days.

August 12, 1988

I turned my pump back on this evening and it has quit surging, but it only measured 50 inches.

RE: SRBA Claim

Dear Claimant:

Please find enclosed your claim and your check # 1042 for \$ 201.80 which you submitted to our office. I am returning these pursuant to rule 10,4 of the Department's Adjudication Rules and Regulations. In checking your claim it appears that the following items need clarification:

- () Item #2 Priority date (day/month/year)
- (✓) Item #4 Point of Diversion Legal Description-you have indicated instream flow on 2 of the claims.
- () Item #6 Uses descriptions
- () Item #9 Description of Non-irrigation uses
- (✓) Item #10 Place of Use Legal Description-NEED 1/4-1/4 Descriptions
- () Item #16 Signature & Notarization
- (✓) Improper fee (THE CORRECT FEE IS \$??) w/ Acres irrigated
- () Other or Remarks

00338 Irv. Robinson
00339 Spring
00340 Spring
00341 Spring

If you will make the necessary corrections and return your claim with the correct fee and a copy of this letter within 30 DAYS of the date of this letter, your filing will be considered timely and will not be assessed and additional late fee of \$ 50.00.

Sincerely,

Steve Clelland
