RE: A51-00130, A51-00131 & A51-10348

Dear Mr. & Mrs. Drown:

I'm currently preparing for the final recommendations of the water right claims you filed in the Snake River Basin Adjudication. I need your assistance on several matters before I complete the recommendations.

As a general policy, we do not include in our recommendations what appears to be the irrigation of BLM land as part of a privately owned water right. My initial review of the place of use for A51-00131 & A51-10348 revealed that you may be irrigating a few acres of BLM land in the NWNE, S29, T15S, R12E. Do you want me to include or exclude these acres in my recommendation?

Enclosed is a copy of a map that uses infra-red imagery that shows land in T16S, R12E, Section 4. This area relates to your claim A51-00130. The yellow dot is my projection for the point of diversion from Deadwood Creek. It is not clear from the information I have in file where the ditch system is located and what land is irrigated by the system. Please draw on the map the location of the ditches and outline the land you irrigate. The information I have at this time indicates the only private land in the entire Section are the following parcels: NWNW, SENW, NESW, SESW and the SWSE. All of the rest of the Section is BLM land. If you want us to recommend any BLM land in the recommendation for A51-00130 let me know.

I need the information requested above by May 15th. If you want to discuss this matter in more detail call me at the number below.

Sincerely,

Mel Schulte

RE: NOTICE OF CLAIM NO: A51-00130

Dear Mr. or Mrs. Drown;

We are currently in the process of preparing the above referenced Notice of Claim for court decree in the Snake River Basin Adjudication. During this review certain questions arose concerning the claim listed above. All claims with an A51 prefix number are being reviewed at this time. **If you have other claims with this prefix, that are not shown here, we may be contacting you again if questions should arise during their review.** The above claim requires the information or changes listed:

Place of Use

On September 7, 1993, I conducted a field exam on the property irrigated from Deadwood creek. Mr. Harlan accompanied me on this exam. At this time he indicated that the upper diversion point from the creek conveyed water by ditch to lands north of the homesite which were not included on the above claim. This is the diversion site where the spring is diverted by ditch and has the outflow into the creek through the pipeline. I am enclosing a copy of the map showing the diversion point and the place of use in question. Please review this for accuracy.

If you find that there is, in fact, more acreage irrigated than what was claimed, you may want to do one of the following:

1. Amend your claim to include the unclaimed portions.
2. File an additional claim to include the unclaimed portions.
3. File an application for permit, or
4. File a transfer to represent the changes in use.

The decision about which of these options is appropriate is dependent on the nature of your existing right and the date the additional use was initiated. Although an application for permit can be filed at any time, an amended claim or additional claim must be filed promptly for the claim to be considered in this adjudication.

Page 2
October 8, 1993

Also, are you considering the spring as a source of water for any of your irrigated acreage? If so, a claim will need to be filed on this usage.

Please review this information and advise me by November 15, 1993, as to how you would like to proceed. Without such the unverified portions of your right will not be recommended. Feel free to contact me if you have any questions.

Sincerely,

Linda A. Werner

RE: Claim(s) filed in the Snake River Basin Adjudication.

Dear Claimant:

The Department of Water Resources will be conducting beneficial use and water right claim verification examinations in your area beginning in August. An examination is needed to verify your water use in order to issue a water right license and/or decree.

Information on your permit or claim which may need to be verified includes source of water, type of usage, amount of water used, number of acres irrigated, and legal descriptions of the point of diversion and/or place of use.

In order to expedite these field examinations, which need to be completed this season, we request that you contact our office at 334-2190 within two weeks to make an appointment at a time convenient for you. The amount of time required to conduct these exams depends on the number of water rights you have filed. An approximate time can be given when you call for an appointment.

Although it is not mandatory that you accompany the field examiner, it does insure that an accurate description of your system will be made. If either yourself, or someone familiar with the system, could accompany the examiner it would be beneficial.

To make an appointment, or if you have any questions or problems with scheduling the exam verification, please contact me as soon as possible.

Sincerely,

Linda A. Werner
