NAME:

CHLOE WHITE

CAMEIN

RE:

CLAIMS IN SOUTH COTTONWOOD

SHE BROUGHT IN SOME PROOFS ON HER RIGHTS AND MAPS TO SHOW THE LOCATIONS. AFTER DESCRIBING HER LANDS AND USES IT APPEARS SHE HAS FILED ON ALL THE CURRENT USES OF HER WATER RIGHTS FOR THE TRUST. I PROVIDED HER WITH A PROOF REPORT ON 45-10197 WHICH SHE DID NOT HAVE. SHE HAD COPIES OF 43-02600, 45-10204, 45-02117.

SHE ALSO POINTED OUT ON ANOTHER PROOF, 45-02120A HIGLEY, THAT HE HAS CLAIMED USES ON HER LANDS AND CLAIMED PORTIONS OF HER RIGHT. I DID NOT CONFIRM THE BASIS OF THE LICENSE BUT IT DID SEEM CLEAR HE HAS CLAIMED USES ON HER LANDS UNDER THIS CLAIM. I TOLD HER THIS CAN BE CLEARED UP BY IDWR WHEN THE SRBA REVIEW IS COMPLETED AND I WILL INCLUDED THIS NOTE OF OUR DISCUSSION.

SHE IS OF ILL HEALTH AND IS CONCERNED SHE MAY NOT BE ABLE TO ADDRESS THESE ISSUES DURING OUR LATER TIME SCHEDULE. SHE HAS DOCUMENTED ALL THE ABSTRACTS FOR THE LANDS AND WATER RIGHTS FROM THE ORIGINAL HOMESTEADERS TO PRESENT. I TOLD HER THE LICENSES SHOULD CLEARLY DOCUMENT THE DEVELOPMENT AND USES OF THE RIGHTS SHE HAS CLAIMED.

SHE ALSO DESCRIBED THE USE OF A SMALL SPRING THAT IS BEING DEVELOPED AND SHE WAS AWARE THERE IS NOT CURRENTLY A WATER RIGHT FOR THAT USE; THEY PLAN TO FILE AT A LATER DATE.

RECOMMENDATION NOTES

From: Vikie Hancock

7/21/00

Regarding: Claim numbers **43-02117, 43-02600, 43-02153**

These three claims are based upon licenses on Granite Creek. 129 total acres were included in the combined licenses, and 139 acres are found marginally irrigated in 1987 by calculations using ArcView GIS. There have been some changes in place of use.

Generally, there are less acres irrigated in the N½ NE section 31 as licensed by 43-02600 and more acres irrigated in the S½ NE section 31 as were identified during the field exam for license 43-02153. The entire place of use of license 43-02117 was moved prior to 1987 from the SWNE to the NWNE & NENE of section 31 as an accomplished transfer.

Because all three licenses share the same source and much of the same delivery system, water representing the different priority dates is co-mingled and would best be recommended as a permissible place of use. The total licensed delivery amount is 2.58 cfs from Granite Creek.

NOTE TO FILE

From: Vikie Hancock

7/14/00

Regarding: Claim number VARIOUS Fred Bullers Trust

Chloe White came into the office to discuss the various claims and issues regarding irrigation on the ranch she owns with her brother in Junction Valley. She had not yet received my letter and exhibits sent to her July 11, 2000, so the first thing she did was read a copy of the letter in the claim file, and look over the GIS exhibits also in the file.

Chloe has been in the process of documenting the history of her father's ranch for some time now. There are many archeological sites from Indian activities, and the Applegate Cutoff of the California Trail cut through the valley as well. She has amassed the homestead patents of the various settlers and subsequent deeds documenting the history of ownership of the various portions of the ranch. I believe that she is interested in preserving the actual record of development on the ranch and that the observations she related to me in regard to the dates of first water use and the locations of water use are correct to her best knowledge. The trust is also in the process of reconstructing some of the irrigation works and may possibly need to transfer some of the water as they are attempting to restore some habitat or may want to use water to irrigate the old cemetery. According to Chloe, one of their problems involves the spring sources of the unnamed streams, as there has been much degradation by cattle.

We went over a 1987 NAPP photo of the ranch and Chloe pointed out the fields that were dry farmed and those that were historically irrigated. Much of the ranch has been in Brohm grass and rye grass in the past, and some of it is meadowland irrigated by sub-waters from the streams and draws. Some of the ranch has been in and out of the CRP. It was determined, however, that there are irrigated acres for which no water right claim had been filed.

Thirty-seven irrigated acres were licensed under **43-2153**, a valid license not claimed in the adjudication, and Chloe filed a claim based upon that license this date. There were two accomplished transfers of licensed rights noted. The 20 acre POU of license **43-2117** was moved from the SWNE Sec 31 north into the NWNE & NENE Section 31. The original POU was no longer irrigated. The 18 acre place of use for water right license **43-2120** (original combined claim filed as 43-10204) in sections

29 and 30 was moved to the SESE section 19. The three acre original POU in section 30 was a garden that is no longer cultivated, and the 15 acres in section 29, just east of the Yonk homestead, have not been irrigated for years. This transfer also represents an accomplished change of source. The place of use of **43-2600** remains basically as licensed, as does the place of use of **43-2599** (original combined claim filed as 43-10204). Three additional beneficial use claims were filed for acres irrigated: **43-11230**, priority date 1950, **43-11231**, priority date 1924, **43-11232**, priority date 1924. Proof of priority documents were submitted at the time of filing. See GIS layouts with claims.

Claim **43-10204** was filed as a combination of license 43-2599 with a priority date 1942, and license 43-2120 priority date 1912. The claim listed a 1912 priority date. In order to preserve the priority date of license 43-2120, the claim will be split with each portion representing the licensed right or licensed right as transferred per IC 42-1425.

RE: Snake River Basin Adjudication (SRBA)
Claim Nos.: A43-02117, A43-02600, A43-10204

Dear Chloe:

As follow-up to our phone conversation of yesterday, I am sending you a copy of a computer generated layout using 1987 NAPP Aerial photos of your ranch. The 1987 photos are used in the Adjudication because, as you are probably aware, the Department of Water Resources was charged by the Idaho Legislature to inventory water uses occurring in the Snake River Basin as of November 1987.

Super-imposed on the layout are the approximate original locations of the four licenses that you have based your Adjudication claims upon. In addition, I discovered a license that, according to our database, was appurtenant to your ranch property but which you forgot to claim. This license is #43-2153, and was issued for 0.74 cfs of Granite Creek for use on 37 acres in the SWNE and SENE of Section 31, as shown. I have included a profile report of this water right as it appears in our database, and would encourage you to file an Adjudication claim based upon this license.

As you can see by the enclosed layout, there are significant acres that you appear to be irrigating that are not covered by any of your current Adjudication claims, nor by any of the old original licenses. I need to meet with you, or your brother, to determine which acres you dry farm and which acres you irrigate. It may be necessary for you to file a claim, or claims, for a water right based upon *beneficial use* to assure that all the acres you have historically irrigated have water rights associated with them. You mentioned that a court decision gave your ranch a right to all the water in Granite Creek, but a water right includes an amount of water and a specific number of acres the water can be applied to. At this time, only a small number of the acres you own have any water rights filed upon them.

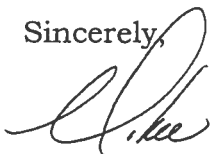

Claims to a water right based upon beneficial use require proof of the date that water was first put to beneficial use. Should you decide to file a claim, some research will be required on your part to provide us with evidence to support the date you claim as date of priority. Typically, on properties this large, the water use is developed over time. For example, one of the licenses in

our file indicates that, at the time of the field exam in 1913, there were a small number of surrounding acres being irrigated by Charles Yonk that were not included in his Application for Permit, therefore not included in the License. It would seem, then, that there were acres already being irrigated in 1913 for which there was no license, and to which a beneficial use claim may apply. On unrelated licensing documents, it is shown that Chester Bullers had intended to develop more acres than actually licensed, indicating that at the time of the field exam in 1942, 168 of the 220 intended acres were not yet being irrigated. It appears that some of those acres were subsequently developed prior to 1987, and a beneficial use claim with a priority date after 1942 may be appropriate.

In his 1998 memo to the file, agent Steve Clelland mentioned that you talked to him about a spring that you were in the process of developing but had not yet obtained a water right. Please be aware that only water developed for irrigation before November 1987 and in accordance with Idaho statutes may be claimed for irrigation in the Adjudication. Any subsequent water development must go through the appropriate administrative processes of the IDWR Allocation Bureau if a water right is to be obtained. In addition, any changes in source, point of diversion or place of use accomplished after 1987 must be approved by the Allocation Bureau.

All of the Department's records are available to you, if you need them. I believe your suggestion of meeting first here at the office, and then possibly at the ranch, is a good one. Please let me know when you may be in the area and we can make an appointment to meet. In the meantime, let me know if you wish to file on the unclaimed license, and I can send you the proper forms in the mail. The fees for each new claim are \$50.00 for filing and \$1.00 for each acre claimed for irrigation.

Sincerely,

A handwritten signature in dark ink, appearing to read 'V. Hancock', written in a cursive style.

Subject: RE: License 43-02600

Vikie,

I checked the original documents. The reference to Range 22 East in the place of use description on license 43-02600 certainly appears to be a typographical error. As you noted, the permit, field report, and the license cover letter all indicate that the place of use is actually in Range 23 East.

Subject: License 43-02600
Shelly,

I have found a license in basin 43 that I believe was licensed incorrectly. This was back in 1914, before they could blame all their screw-ups on computers. The p/d was correctly located in T16s R22 E section 36, but when they licensed the POU in sections 30 and 29, they should have been in R23 E. It is correct on the application for permit, and on the Engineer's Report, as far as I can tell from our fuzzy microfilm here. Only the actual license states a POU in R22E.

I was hoping that you could investigate the license, and verify my findings (or not), so that there wouldn't be any question as to the intended place of use of the water right as originally licensed. I thank you, much.

Vikie, at Southern

State of Idaho

License and Certificate of Water Right

Water License No. 19283

Amount 1.44 second feet

Water District No.

Priority May 31, 1943

THIS IS TO CERTIFY that CHESTER BULLERS of Oakley, Idaho made application for a permit to appropriate the public waters of the State of Idaho, dated April 10, 1943; that Permit No. 19283 was issued under said application; that Certificate of Completion of works, with a carrying capacity of 3 second feet, was issued thereunder on May 15, 1943, showing that said works were completed on the 18th day of May, 1943; and that on the 20th day of June, 1944,

CHESTER BULLERS

of Oakley, State of Idaho, made proof to the satisfaction of the State Reclamation Engineer of Idaho, of the right to use the waters of Granite Creek, a tributary of Cottonwood Creek, for the purpose of irrigation, under Use Permit No. 19283 of the Department of Reclamation, and that said right to the use of said waters has been perfected in accordance with the laws of Idaho, and is hereby confirmed by the Commissioner of Reclamation of Idaho and entered of record in Volume 9 of Licenses, at page 4245 on the 26th day of February, 1945;

The right hereby confirmed dates from May 31, 1943;

The Point of Diversion is located 1000 ft. from Southwest corner Sec. 34, T. 16 S., R. 22 E., S. 2 E. in the NE 1/4 SW 1/4 Sec. 34, T. 16 S., R. 22 E., S. 2 E. Cassia County

That the amount of water to which such right is entitled and hereby confirmed, for the purposes aforesaid, is limited to an amount actually needed and beneficially used for said purposes, and shall not exceed 1.44 second feet per second.

Description and location of use:

Twp.	Range	Sec.	Forty-acre Tract	No. Acres Described in Permit	No. Acres Actually Irrigated
16 S.	22 E.	30	SW 1/4 SW 1/4	16	7
		32	SW 1/4 SW 1/4	16	10
			NE 1/4 NE 1/4	40	-
			SE 1/4 NE 1/4	40	-
			SW 1/4 NE 1/4	40	-
		31	NE 1/4 SE 1/4	40	30
			SE 1/4 SE 1/4	40	25
Number of Acres Actually Irrigated -					72

The right to the use of the water aforesaid hereby confirmed is restricted to the lands or place of use herein described, as provided by the laws of Idaho.

State Reclamation Engineer

WITNESS the seal and signature of the Commissioner of Reclamation, affixed at Boise, Idaho, this 4th day of February, 1945.

DEPARTMENT OF RECLAMATION
BOISE, IDAHO

REPORT OF ENGINEER

Permit No. 19283

This proof is for Beneficial use In Water District No. _____

1. Name of applicant Chester Billars, Oakley, Idaho (or Moulton, Idaho)

2. Source of water supply: Granite Creek

3. Location of point of diversion: Is in the NE $\frac{1}{4}$ SE $\frac{1}{4}$ of Section 36

T. 16 S. R. 22 E. County of Cassia

4. Describe works as they exist, giving dimensions and capacities of same: Diversion works
consist of a ditch two feet wide, and one foot deep; no head works attached,
or necessary.

5. Water is used for: Irrigation

6. State whether or not water has been turned into works of diversion: Yes

7. List legal subdivisions of lands to be irrigated. If proof is for beneficial use, give exact number of acres under cultivation in each forty-acre tract. (Describe manner and place of use if for other than irrigation):

SE $\frac{1}{4}$ SE $\frac{1}{4}$ Section 30;

NW $\frac{1}{4}$ NE $\frac{1}{4}$, NE $\frac{1}{4}$ NW $\frac{1}{4}$ Section 32;

NE $\frac{1}{4}$ NE $\frac{1}{4}$ Section 31;

All in Twp. 16 South, Range 23 East, E....

(Submit map on attached plat, showing location and details of above description)

8. What large stream would the water here appropriated finally reach? Snake River, via Raft River

Remarks

This examination was made on the

26th

day of

October

NOTICE FOR PUBLICATION
**NOTICE OF PROOF APPLICATION OF WATER
 TO BENEFICIAL USE**

Notice is hereby given that at 11:30 A. M. on the 28th day of June 1944
 at Oakley County of Cassia State of Idaho, before
Charles Larson, Notary Public, proof will be submitted of the
 application to beneficial use of Two (2) cubic feet per second of the waters of Granite Creek
 in accordance with the terms and conditions of Permit No. 19283
 heretofore issued by the Department of Reclamation of the State of Idaho.

The name and postoffice address of the person or corporation holding said permit are
Chester Ballars, Oakley, Idaho

The use to which said water has been applied is Irrigation

The amount applied to beneficial use is Two (2) second feet

The place where said water is used (if for irrigation, give full and accurate description of the
 lands irrigated) S&SE1 Section 30; NW1 NE1, NE1 NW1 Section 32; NE1 NE1 Section 31,
Township 16 South, Range 23 East, B. M.

The name of the canal or ditch or other works by which said water is conducted to such place
 of use is Unnamed

The right to take water from such works is based upon Permit No. 19283

The source of supply from which such water is diverted is Granite Creek

The date of priority which said user is prepared to establish is April 10, 1942

W. L. WELP

RECORDED BY RECLAMATION
 at the Reclamation Office
