NOTES:

This report includes land upon which some Creek & Spring water has accumulated with some of the components of the water. This is explained in the description of the water body - of which a copy of the component water body is attached to explain. There are some areas that only can be irrigated by some Creek (132), however, all 3900 acres with some Creek (132) (Maurice's Water Spring) water. The 3900 acres (132) (Maurice's Water) are used for the 3900 acres due to the water contained between all 3 sources. The 3900 acres ~~are~~ recommended are entirely irrigated using (some) Maurice's Water Spring water. Some Creek cannot get to Dec. 16 lands, it is not D.I. 17, and lands in the south of some Creek, until it enters some Creek.
