RE: Notices of Error

Dear Tony,

I think we pretty much discussed your questions and concerns regarding the Notices of Error on your Preliminary Director's Report Recommendations for all the **Preston Allen water rights** when you were in the office the other day.

I did promise to look over the acre question (2165 or 2147) one last time and get back to you. I went through Transfer #2651 again and all I can say is that it looks like there was a clerical error in the **addition** when the transfer was prepared. Mr. Chapman took all the rights at their face value and combined them into a **permissible place of use**. The individual rights add up to 2147 acres and 37.99 cfs, not 2165 acres and 38.86 cfs as he came up with. A transfer cannot enlarge rights and that is what would be happening if we allowed the 2165 acres and 38.86 cfs. The best I can do is to allow you 2147 acres within a 2165 acre permissible place of use.

Please let me know if that is what you desire before we send out the Director's Report in a month or so. Give me a call if you'd like a copy of the transfer to review or if you'd like to set up another appointment.

Sincerely,

A handwritten signature in cursive script that reads 'Jeanie'.

Sr. Water Resource Agent

MEMORANDUM

TO: Loren Holmes
FROM: Jim Johnson
DATE: November 18, 1983
RE: Transfer Application on Rights 43-4012, 4013, 4015, 2576,
2321, and 2574

This transfer application has been around for a long time without approval because of some questions concerning land list discrepancies and reduction of acres within 40-acre tracts under claimed water rights.

It appears that a field exam is going to be required to determine the number of acres actually irrigated prior to the receipt of the application for transfer.

The field exam, however, should only cover the lands that are covered by the claimed water rights, particularly the lands on which the transfer purposes to reduce the acres originally claimed. See the land list attachment which shows lands from which water is removed.

Also, the land ownership of those 40-acre tracts should be checked.

There appears to be two typo's in the place of use description in Section 10 (SLNW & NWSE).

In addition to the above, there should be a record in the file that shows that an overlap with other water rights review has been made.

I talked to Bob Fleenor about this transfer and it is his belief that the transfer approval of claimed water uses does place some validity in the water use claimed. Therefore, when a field inspection of the place of use of a claim is made the examiner should document his findings with the same amount of precision as is done on a field exam of a water right permit, i.e., the field exam should have the acres found irrigated carefully documented and should be accompanied with aerial photos. Please refer to the Administrative Memo dated 4-7-1975 for additional information.
