Change of Address

all records modified 10-23-97.

Dear Water Right Holder:

IDWR has been notified the address presently on our records is incorrect. Although we have reached you at the address above we need your written confirmation this is your correct mailing address before we can change our records. Future notices related to your water right can be sent only to the address on your claim or as otherwise changed by you.

Please sign your name at the bottom of this letter and return it to this office postmarked by October 22, 1997. Make corrections to your name and address if necessary before returning this letter. Thank you for your help.

If your mail delivery address changes in any form, please contact us in writing so we can update our records.

If there has been a change in ownership of any of the properties connected with the water right referenced above, please call this office toll-free at 1-800-451-4129 to obtain a form to make this required change to the water right records.

Yours truly,

Danni M. Smith

Danni M. Smith

RE: Notices of Error

Dear Tony,

I think we pretty much discussed your questions and concerns regarding the Notices of Error on your Preliminary Director's Report Recommendations for all the **Preston Allen water rights** when you were in the office the other day.

I did promise to look over the acre question (2165 or 2147) one last time and get back to you. I went through Transfer #2651 again and all I can say is that it looks like there was a clerical error in the **addition** when the transfer was prepared. Mr. Chapman took all the rights at their face value and combined them into a **permissible place of use**. The individual rights add up to 2147 acres and 37.99 cfs, not 2165 acres and 38.86 cfs as he came up with. A transfer cannot enlarge rights and that is what would be happening if we allowed the 2165 acres and 38.86 cfs. The best I can do is to allow you 2147 acres within a 2165 acre permissible place of use.

Please let me know if that is what you desire before we send out the Director's Report in a month or so. Give me a call if you'd like a copy of the transfer to review or if you'd like to set up another appointment.

Sincerely,

Jeanie Robertson
Sr. Water Resource Agent

05/07/2001

HAROLD CALDER, being first duly sworn on his oath,
deposes and says:

Affiant is the claimant who executed and caused to be
filed with the Department of Reclamation, State of Idaho, on
November 25, 1968 that certain claim dated November 19, 1968
entitled "Claim To A Water Right" (Claim No. 43-4012), consisting
of eight pages including attachments and exhibits;

Affiant has read said claim, including said attachments
and exhibits thereto, knows the contents thereof, and that the
same are true and correct as he verily believes;

Affiant authorizes and requests said Department to attach
this Affidavit to said Claim No. 43-4012, and claimant hereby
incorporates herein by reference all of the statements and
information contained in said claim, including all attachments
and exhibits thereto, as if set forth herein verbatim.

Claim No. 11.3 11.12

REMARKS (continued)

Well No. 3 was drilled during the early spring of the year 1952 by Emil Meyer & Associates, comprising eight individuals who joined together under a partnership agreement for carrying out the general farming and ranching business on essentially the same lands as now comprise the Calder Ranch owned by claimant. Said well was drilled with a rig owned by the partnership to a reported depth of 135 feet as stated in Geological Water Supply Papers 1587 and 1619CC with the reported log as stated on page 114 of WSP 1587 as follows:

11S-27E-15bb1

Material	Thickness (feet)	Depth (feet)
Soil	3	3
Clay, sandy	17	20
Gravel, coarse, and sand	10	30
Clay, sandy, gray; some coarse gravel	65	100
Clay, brown, and sand, black; some coarse gravel	35	135

Initially Well No. 3 was equipped with a 30 H.P. pump as stated in Water Supply Paper 1619CC at page CC19. In 1954 the partnership deepened Well No. 3 to a depth of 250 feet and cased the same to a depth of 230 feet with 20 inch pipe. No log is available of the deepened well to claimant's knowledge.

At the time claimant acquired the Calder Ranch in August, 1962 the old motors which drove the well pumps had been removed by persons unknown. In the early spring of 1963 claimant re-equipped Well No. 3 and the present installation consists of a 20 H.P. three-phase 440 volt Fairbanks Morse Uni-drive electric motor, Type QZO, Frame No. 1665PV, Serial No. F-130281. The motor is connected to a Western pump (deep well turbine) No. 14RF110C.

Well No. 3A was drilled in the early spring of 1952 immediately after Well No. 3 had been drilled to its initial depth. At that point the casing in Well No. 3 was snagged and bent in. Thereupon the well rig was moved from Well No. 3 approximately 300 feet easterly to the site of Well No. 3A and drilling immediately commenced thereon. No log is available for Well No. 3A to claimant knowledge. It was initially equipped with a 60 H.P. pump.

Since the old motors which drove the pumps had been removed by persons unknown when claimant acquired the Calder Ranch in August, 1962, claimant then equipped Well No. 3A in the early spring of 1963 with a 100 H.P. three-phase 440 volt General Electric motor, Model

RECEIVED

MAY 25 1968

Department of Reclamation

5K, No. 6276XC19A. The motor is connected to a Layne & Bowler Verti-Line turbine pump, Serial No. D03140, equipped with 14 inch bowls.

Upon completion of Well No. 3 to its reported depth of 135 feet in the early spring of 1952 it produced 540 G.P.M. (1.2 cfs) as shown by the estimated discharge thereof on October 19, 1952, as stated in Water Supply Paper 1587 at page 124. Claimant is informed that upon completion of Well No. 3A in the spring of 1952 it first pumped large quantities of sand, causing caving, and approximately 40 loads of gravel were dumped into the well. Thereafter Well No. 3A was again pumped and produced 130 miner's inches (2.6 cfs). Thereupon the 1.2 cfs from Well No. 3 and the 2.6 cfs from Well No. 3A were used to irrigate the lands described herein. One complete irrigation was completed by July 1, 1952. However, claimant is informed that because of the lateness of the first irrigation a partial crop failure resulted in 1952, although the type of crops raised at that time is unknown to claimant. Claimant is further informed that during the following year and in the years thereafter the lands were successfully irrigated with good yields of crops.

Upon deepening Well No. 3 in 1954 the production thereof increased an additional 70 miner's inches (1.4 cfs) and the total 130 miner's inches (2.6 cfs) of water was used therefrom during the early part of the irrigation season, i.e. by June 1, 1954, for the irrigation of the lands herein described. The existing equipment on Well No. 3 now produces 100 miner's inches (2.0 cfs) under normal operating conditions and the waters therefrom together with the water from Well No. 3A and the supplemental waters from Shirley Creek, Ten Creek and Eleven Draw are, and have been used to irrigate the full 485 acres of land described herein.

Well No. 3A was test pumped on March 13, 1963 by Mel Brown Company at a maximum discharge of 3050 G.P.M. (6.7 cfs or 337 miner's inches) as shown by the attached Exhibit marked Exhibit "1". At the beginning of the irrigation season of 1963, i.e. April 1, 1963, Well No. 3A was pumped at 250 miner's inches (5.0 cfs) and the waters therefrom together with the waters from Well No. 3 and the supplemental waters from Shirley Creek, Ten Creek and Eleven Draw were, and have been used to irrigate the full 485 acres of land described herein. Well No. 3A has continued to produce 250 miner's inches (5.0 cfs) under its normal operating conditions.

The water from Well No. 3 is, and has been discharged through 11½ feet of 6 inch I.D. pipe northeasterly into an earthen ditch and conveyed thereby approximately 30 feet to a concrete headgate situated in an earthen head ditch, from which the water is conveyed west and/or northeasterly and is used to irrigate the lands herein described. The waters from Well No. 3A are, and have been discharged to the north through 12 feet of 9½ inch I.D. pipe into a wooden flume 14 inches wide and 1 foot deep. A headgate is located at the up-stream end of the flume, from which the waters in whole or in part are either turned into a natural draw and conveyed thereby approximately 300 feet into the head ditch described above to irrigate the lands described herein or the waters are, and have been conveyed through said flume into an earthen canal 5 miles long having a bottom width of 4 feet, being 3½ feet deep with 1 to 1 side slopes, coursing in a northeasterly direction, from which canal said waters are and have been released at various points to irrigate the lands described herein. Said canal also picks up the supplemental waters from Ten Creek and Eleven Draw at the respective points of crossing.

RECEIVED

Department of Reclamation

The total 485 acres are supplemented with waters from Shirley Creek, Ten Creek and Eleven Draw as shown on the accompanying map marked Exhibit "2", and being more particularly described as follows:

Township 11 South, Range 27 East, B.M.

Totals	485	0	485	377	58

The total annual quantity of water claimed herein from all of the above sources combined is 1940 acre feet based upon a duty of 4 acre feet per acre for the 485 acres. However, claimant does claim the right to irrigate the total 485 acres from Wells Nos. 3 and 3A at the combined diversion rate of 350 miner's inches (7.0 cfs) as the primary source of supply since the waters from Shirley Creek, Ten Creek and Eleven Draw are supplemental thereto.

The water rights claimed herein are based upon the "constitutional method" of diversion and beneficial use which were commenced during the early spring of 1952 from both Wells Nos. 3 and

RECEIVED

Department of Reclamation

3A and were completed during the early spring of 1963, being prior to the effective date of the 1963 amendment to Idaho Code, Section 42-229, i.e. March 25, 1963, and under the express provisions of said amendment an appropriation commenced by diversion and application of beneficial use prior to the effective date of the amendment may be perfected under such method of appropriation.

MEMORANDUM

TO: File

FROM: David R. Tuthill DRT

RE: Claims 43-4012 & 43-4013

DATE: June 28, 1976

Both of the claims in question have rights with priorities after March 25, 1963. This raises a question as to their possible validity as beneficial use rights.

A close inspection of Sec. 42-229 (Methods of Appropriation), Idaho Code, reveals that "All proceedings commenced prior to the effective date of this act for the acquisition of rights to the use of ground water under the provisions of Sections 42-201 - 42-225, Idaho Code, may be completed under the provisions of said section and rights to the use of ground water may thereby be required." Therefore, the validity of the claims in question is not definitely negated by their proposed dates of priority.

Of course, as with any Claim to a Water Right, the validity of the claim must be determined by an adjudication procedure.

Department of Water Resources
State of Idaho
Statehouse
Boise, Idaho 83720

Attention: David R. Tuthill, Jr.
Water Resource Analyst

Dear Mr. Tuthill:

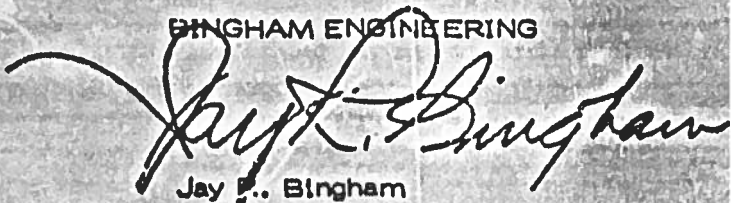

This will acknowledge your letter of June 29, 1976 concerning the priority dates of claims 43-4012 and 43-4013. We appreciate the determination made by your department that the priorities of the claims as filed will be maintained and the rights to use of groundwater may be affected under those priority dates.

As discussed with you recently by telephone I am enclosing as information for your files with due respect to the rights and claims pertinent to the Raft River Ranches a division of the water rights and claims that would correspond with a change in the ownership of the property. As you will note, part of the property is being acquired by Allen Ranches, Inc. of Soda Springs, Idaho.

Thanks again for your efficient and courteous performance.

Very truly yours,

BINGHAM ENGINEERING

WATER RIGHTS ANALYSIS

The following water rights (Licenses and Claims) are pertinent to the Raft River Ranches property.

A43-02574
A43-02576

License G-31818, 24.0 second feet, 3360 acres
License G-31956, 36.0 second feet, 3360 acres

Claim 43-4012, 7.0 second feet, 485 acres *Allen*
Claim 43-4013, 10.0 second feet, 518 acres *Allen*
Claim 43-4014, 4.0 second feet, 287 acres *RR*
Claim 43-4015, 0.6 second feet, 313 acres *Allen*

Based on the property sold to Allen Ranches, Inc. as evidenced by Exhibit A, it is recommended that as a practical and equitable apportionment of the combined licensed rights that wells No. 7, 10, and 12 totaling a measured flow of 15.5 cubic feet per second for the irrigation of 915 acres be designated to the Allen property. In addition wells Nos. 1 and 2 as provided in claim 43-4013 likewise be allocated to the Allen purchase as well as wells Nos. 3 and 3A as evidenced by Claim 43-4012 and wells No. O-1 and O-2 as evidenced by Claim 43-4015 be allocated to the Allen property. This would result in a total claimed water right of 33.1 cubic feet/second for 2226 acres or an average of 67.2 acres per cfs.

It is further recommended that 44.5 cfs of the combined 60 cfs right under licenses G-31818 and G-31956 be retained on Raft River Ranches. These quantities would involve the retention of well No. 3, 5, 6, 4, 8, 9, and 11 for a total of 44.5 cfs to serve 2450 acres. It is further recommended that 4.0 cfs for well E-4 as evidenced by claim 43-4014 likewise be retained for Raft River Ranches. This division of water rights would be consistent with the real property involved and the title changes brought about by the sale. Inasmuch as there is no change in the place and nature of use it is not mandatory that any segregations or transfer of water rights be filed with the Department of Natural Resources for the State of Idaho. The sales contracts and the legal descriptions govern, and in this case are consistent with the above recommendations. In the interest of
