RAFT RIVER RANCHES/OTT/MOSS

Dear Mr. and Mrs. Moss:

Pursuant to notification that you presently own the property in which the above referenced Adjudication Claims are appurtenant, the Department has changed the records of the current owner as you requested. Please find enclosed copies of the computer records of the claims noting the changes in claimant. As I mentioned when you were in the office last week, these claims do not match the water rights from which they were derived and will be corrected during the adjudication process.

Please review the records and if you have any corrections or questions, please feel free to call this office.

Sincerely,

Jeanie Robertson

Ap. I am still checking on these

Dear Water Right Holders:

Rights Not sure if all correct

IDWR has been notified the address presently in our records is incorrect. Although we have reached you at the address above, we need your written confirmation this is your correct mailing address before we can change our records. Future notices related to your water right can be sent only to the address on your water right or as otherwise changed by you.

Please sign your name at the bottom of this letter and return it to this office. Make corrections to your name and address if necessary and **list any other water rights you may have** before returning this letter by February 20, 2001. Thank you for your help.

If your mail delivery address changes in any form, please contact us in writing so we can update our records.

If there has been a change in ownership of the property connected with the water rights referenced above, please call this office toll-free at 1-800/451-4129 to obtain a form to make this required change to the water right record.

Sincerely,

Sally Sherman

Change of Address

pp. I am still checking on these

Dear Water Right Holders:

Rights Not sure if all correct

IDWR has been notified the address presently in our records is incorrect. Although we have reached you at the address above, we need your written confirmation this is your correct mailing address before we can change our records. Future notices related to your water right can be sent only to the address on your water right or as otherwise changed by you.

Please sign your name at the bottom of this letter and return it to this office. Make corrections to your name and address if necessary **and list any other water rights you may have** before returning this letter by February 20, 2001. Thank you for your help.

If your mail delivery address changes in any form, please contact us in writing so we can update our records.

If there has been a change in ownership of the property connected with the water rights referenced above, please call this office toll-free at 1-800/451-4129 to obtain a form to make this required change to the water right record.

Sincerely,

Sally

NOTICE OF COMPLETED ADMINISTRATIVE PROCEEDING

IDWR has completed the following administrative proceeding:

- ☒ Address change
- ☐ Substitution of Party
- ☐ IC § 42-222 transfer
- | | |
|---|--|
| ☐ Point of diversion | ☐ Place of use |
| ☐ Period of use | ☐ Nature of use |
| ☐ Split of water right | ☐ Change in ownership |

IDWR certifies that it has completed its investigation into the changes to the elements of the water rights listed above as set forth in the attached *Amended Director's Report(s)* for said water right(s). No other changes have been made to the elements of these water rights except as set forth above.

IDWR has served copies of the *Notice of Completed Administrative Proceeding* and *Amended Director's Report(s)* on the claimant(s), prior claimant(s) and all parties in the subcases affected, if any, as reflected on the attached certificate of mailing.

DATED: 3/27/02

Gis Place of Use Presentation
1987/1988 Napp Photography
Prepared by Jeanie Robertson

Dan Moss

A total of 915 acres were claimed and ⁹⁴⁹948 acres appeared to be irrigated per GIS and the 1987 aerial photography. This leaves a difference of 33 acres. There are two claims based on licenses and four based on statutory claims. I have reviewed them according to priority date as follows:

There is good documentation on microfiche for the development of these rights for priority date and pumping capacities. I reduced the diversion rates to give them a proportionate share of the water for the acres irrigated and recommend a permissible place of use of 948 acres. This allows a total of 2.3 cfs on 165 acres, or 0.014 cfs/ac.

A43-04014C	7/1/52	1.7 cfs	165 ac
R43-04014C	7/1/52	0.98 cfs	165/ ⁹⁴⁹ 948 ac ppu
A43-04014E	6/1/54	2.3 cfs	165 ac
R43-04014E	6/1/54	1.32 cfs	165/ ⁹⁴⁹ 948 ac ppu

There are also two claims based on licenses for 750 acres. I have reduced the diversion rates based on their proportionate share of the licenses. This allows a total of 13.39 cfs on 750 acres, or 0.017 cfs/ac.

A43-02574C	7/19/63	25.3 cfs	750 ac
R43-02574C	7/19/63	8.03 cfs	750/ ⁹⁴⁹ 948 ac ppu
A43-02576C	3/24/64	16.86 cfs	750 ac
R43-02576C	3/24/64	5.36 cfs	750/ ⁹⁴⁹ 948 ac ppu

There is another statutory claim, A43-04013A, for .58 cfs which was claimed on the 750 licensed acres. It was actually developed on sections 3, 10, & 15, which are owned by Preston Allen. He claimed 8.55 cfs on this right, leaving 1.45 cfs and 75 acres from the original statutory filing. I am recommending the .58 cfs as an accomplished transfer toward the 33 acre difference between the claims and GIS findings. This eliminates the need for an expansion claim and allows volume to be calculated for the entire 948 place of use. This will amount to 0.017 cfs/ac for the 33 acres. (The priority date was changed to 6/15/63 to match the original statutory filing.)

A43-04013A	3/13/63	0.58 cfs	750 ac
R43-04013A	6/15/63	0.58 cfs	33/ ³⁴ 949 ac ppu

There was one more claim based on statutory claim 43-04012. Evidence on the fiche suggests that this right went with Preston Allen when the property was split. I have recommended all of 43-04012 to Preston Allen and will disallow this claim to it. The total recommended diversion rate of 16.27 cfs on 948 acres is 0.017 cfs/ac.

Claimed = 915 Ac.
GIS = 949 Ac.
Lic = 750 Ac.
B.U. = 165 Ac.
A.U. = 34 Ac.

RAFT RIVER RANCHES, INC.

Department of Water Resources

WATER RIGHTS ANALYSIS

The following water rights (Licenses and Claims) are pertinent to the Raft River Ranches property.

License G-31818, 24.0 second feet, 3360 acres
License G-31956, 36.0 second feet, 3360 acres

Claim 43-4012, 7.0 second feet, 485 acres
Claim 43-4013, 10.0 second feet, 518 acres
Claim 43-4014, 4.0 second feet, 287 acres
Claim 43-4015, 0.6 second feet, 313 acres

Based on the property sold to Allen Ranches, Inc. as evidenced by Exhibit A, it is recommended that as a practical and equitable apportionment of the combined licensed rights that wells No. 7, 10, and 12 totaling a measured flow of 15.5 cubic feet per second for the irrigation of 910 acres be designated to the Allen property. In addition wells Nos. 1 and 2 as provided in claim 43-4013 likewise be allocated to the Allen purchase as well as wells Nos. 3 and 3A as evidenced by Claim 43-4012 and wells No. O-1 and O-2 as evidenced by Claim 43-4015 be allocated to the Allen property. This would result in a total claimed water right of 33.1 cubic feet/second for 2226 acres or an average of 67.2 acres per cfs.

It is further recommended that 44.5 cfs of the combined 60 cfs right under licenses G-31818 and G-31956 be retained on Raft River Ranches. These quantities would involve the retention of well No. 3, 5, 6, 4, 8, 9, and 11 for a total of 44.5 cfs to serve 2450 acres. It is further recommended that 4.0 cfs for well E-4 as evidenced by claim 43-4014 likewise be retained for Raft River Ranches. This division of water rights would be consistent with the real property involved and the title changes brought about by the sale. Inasmuch as there is no change in the place and nature of use it is not mandatory that any segregations or transfer of water rights be filed with the Department of Natural Resources for the State of Idaho. The sales contracts and the legal descriptions govern, and in this case are consistent with the above recommendations. In the interest of

HAROLD CALDER, being first duly sworn on his oath,
deposes and says:

Affiant is the claimant who executed and caused to be
filed with the Department of Reclamation, State of Idaho, on
November 25, 1968 that certain claim dated November 19, 1968
entitled "Claim To A Water Right" (Claim No. 43-4014), consisting
of five pages including attachments and exhibits;

Affiant has read said claim, including said attachments
and exhibits thereto, knows the contents thereof, and that the
same are true and correct as he verily believes;

Affiant authorizes and requests said Department to attach
this Affidavit to said Claim No. 43-4014, and claimant hereby
incorporates herein by reference all of the statements and
information contained in said claim, including all attachments
and exhibits thereto, as if set forth herein verbatim.

Harold Calder

Claim No. _____

REMARKS (continued)

Well No. E4 was drilled during the early spring of the year by Emil Meyer & Associates, comprising eight individuals who joined together under a partnership agreement for carrying out the general farming and ranching business on essentially the same lands as now comprise the Calder Ranch owned by claimant. Said well was drilled with a rig owned by the partnership to a reported depth of 175 feet as stated in Geological Water Supply Paper 1587, with the reported well log as stated on page 114 thereof as follows:

11S-27E-22cb2

Material	Thickness (feet)	Depth (feet)
Soil	45	45
Clay, sandy	15	60
Clay, sandy with some sandstone	10	70
Clay, sandy, yellow; layers of black pea gravel	8	148
Clay, sandy, yellow	22	170
Clay, yellow, sticky	5	175

Initially Well No. E4 was equipped with a 60 H.P. pump. In 1954 the partnership deepened Well No. E4 to a depth of 275 feet, cased with 16 inch diameter pipe. No log is available of the deepened well to claimant's knowledge.

At the time claimant acquired the Calder Ranch in August, 1962 Well No. E4 was equipped with a worn out 60 H.P. water lubricated pump and an old motor which had been severed from the pump shaft and the switch boxes had been removed by persons unknown. In the early spring of 1963 claimant equipped Well No. E4 with a 75 H.P. three-phase 440 volt Charleroi motor and deep well turbine pump (made in Belgium), style 12NM, No. 13609-89460.

Upon completion of Well No. E4 to its reported depth of 175 feet in the early spring of 1952 it produced 765 G.P.M. (1.7 cfs) as stated in Water Supply Paper 1587 at page 125. The water so produced was diverted into ditches and was used with at least one complete irrigation turn by July 1, 1952 to irrigate the lands herein described. Upon deepening Well No. E4 in 1954 the production thereof increased an additional 115 miner's inches (2.3 cfs) and the total of 200 miner's inches (4.0 cfs) of water was used therefrom during the early part of the irrigation season, i.e. by June 1, 1954, for the irrigation of the lands herein described. Well No. E4 was test pumped at 210 miner's inches in August, 1965 by the Layne Pump Company. The existing equipment on Well No. E4 now produces 200 miner's inches

RECEIVED

NOV 25 1968

Department of Reclamation

(4.0 cfs) under normal operating conditions and the waters therefrom together with the supplemental waters from Warm Creek are, and have been used to irrigate the full 287 acres of land described herein. The waters from Well No. E4 are, and have been discharged through 15½ feet of 8 inch I.D. pipe to the south and discharged into a concrete box 5½ feet x 5½ feet x 28 inches deep equipped with one 12 inch I.D. concrete outlet to the east and one 12 inch I.D. concrete outlet to the southwest, from either or both of which the waters are discharged into earthen ditches and are used to irrigate the lands herein described. Of the total 287 acres irrigated, 239 acres thereof are irrigated as a sole supply and 48 acres are supplemented with water from Warm Creek as shown on the accompanying map marked Exhibit "1" and being more particularly described as follows:

Township 11 South, Range 27 East, B.M.

	Total Irrigated	Sole Supply	Supp. from Warm Creek
Section 21			
NE¼ NE¼	38		
NW¼ NE¼	15	38	
SW¼ NE¼	14		15
SE¼ NE¼	39		14
NE¼ SE¼		39

Section 22			
NE¼ NW¼	37		
NW¼ NW¼	39	37	
SW¼ NW¼	32	39	
SE¼ NW¼	12	32	
NW¼ SW¼		12	
Total acres	287	239	48

The total annual quantity of water claimed herein from all of the sources combined is 1148 acre feet based upon a duty of 4 acre feet per acre for the 287 acres. However, claimant does claim the right to irrigate the total 287 acres from Well No. E4 at a diversion rate of 200 miner's inches (5.0 cfs) as the primary source of supply since the waters from Warm Creek are supplemental to 48 acres thereof.

The water rights claimed herein are based upon the "constitutional method" of diversion and beneficial use which were commenced during the early spring of 1952 and completed during the early spring of 1954, being long prior to the effective date of the 1963 amendment to Idaho Code, Section 42-229, i.e. March 25, 1963, and under the express provisions of said amendment an appropriation commenced by diversion and application to beneficial use prior to the effective date of the amendment may be perfected under such method of appropriation.

STATE OF IDAHO
DEPARTMENT OF RECLAMATION
CLAIM TO A WATER RIGHT

Established by Diversion and Application to Beneficial Use

Under the provisions of Section 42-225a, Idaho Code, a person may file a claim to a right to use water which has been established by diversion and application to beneficial use. The filing of this claim does not confirm the water right but will serve for information purposes only. It may, however, become the basis for future adjudication of the water right by the Court.

(Please refer to the instructions on the back of this form)

1. Name of claimant Harold Calder
Post office address 2290 South Orchard Drive, Bountiful, Utah 84010
2. The point of diversion is in NW $\frac{1}{4}$ of SW $\frac{1}{4}$ Section 22 Township 11 South
Range 27 East B.M. located on subterranean
(name of source)
tributary to _____ in Cassia County
3. Dates of priority claimed. List the priority for each separate quantity that you claim. Priority dates should be based upon the earliest diversion of the water which has resulted in continued beneficial use since that time. If there has been an interval of five years or greater when the water was not beneficially used for the same purpose as originally appropriated, the priority that you claim should date from the time that the water was again beneficially applied following the period of non-use.
 - a. Date of priority claimed

<u>July 1, 1952</u>	amount	<u>1.7</u>	c.f.s. or	<u>731</u>	acre feet
<u>June 1, 1954</u>	amount	<u>2.3</u>	c.f.s. or	<u>417</u>	acre feet
	amount		c.f.s. or		acre feet
Total claimed <u>4.0</u> c.f.s. or <u>1148</u> acre feet					
 - b. Explain the purpose for which the water has been used and the time during the year when you have used the right claimed.

use <u>irrigation</u>	period of use from <u>April 1</u>	to <u>November 1</u>	(both dates inclusive)
use <u>stockwatering</u>	period of use from <u>January 1</u>	to <u>December 31</u>	(both dates inclusive)
use _____	period of use from _____	to _____	(both dates inclusive)
use _____	period of use from _____	to _____	(both dates inclusive)
4. Description of diverting works.
 - a. Surface water diversion dam and/or headgate. Material is composed of _____
length is _____ feet height is _____ feet
width at bottom is _____ feet width at top is _____ feet explain any increase in diversion capacity since structure was first built giving dates and estimated capacities if known

 - b. Underground water diverting works is well flowing or pumped pumped depth of well is _____
250 feet diameter of well is 16 inches type of pump is Charleroi
capacity of pump is 1890 g.p.m. name and address of well owner (See remarks)

6. Do you get water through a ditch owned by several users?

If yes, give the name of the ditch
The other users and their respective

interests in the ditch are (if known)

6. Where water is used for stock watering, give number of each kind of stock watered **2000 head cattle**

7. Where water is used for domestic or municipal purposes give number of families served

Name of town supplied

8. Where water is used for other purposes not above enumerated, give the nature of use, the extent of use, and any details regarding the initiation of the right or subsequent later expansion. Be as specific as possible, giving dates and quantities

9. Remarks: please explain any details of your claim which you feel need clarification or additional explanation
**Claimant's designation of the well herein covered is Well No. E4,
also designated in U.S.G.S. Water Supply Paper 1587 as 11S-27E-22cb2.
(see attached sheet)**

BE IT KNOWN that the undersigned hereby makes claim to a water right as described above together with all attached information and certifies that all statements are true and accurate to the best of his knowledge.

Total acres	<u>287</u>	<u>239</u>	<u>48</u>

The total annual quantity of water claimed herein from all of the sources combined is 1148 acre feet based upon a duty of 4 acre feet per acre for the 287 acres. However, claimant does claim the right to irrigate the total 287 acres from Well No. E4 at a diversion rate of 200 miner's inches (5.0 cfs) as the primary source of supply since the waters from Warm Creek are supplemental to 48 acres thereof.

The water rights claimed herein are based upon the "constitutional method" of diversion and beneficial use which were commenced during the early spring of 1952 and completed during the early spring of 1954, being long prior to the effective date of the 1963 amendment to Idaho Code, Section 42-229, i.e. March 25, 1963, and under the express provisions of said amendment an appropriation commenced by diversion and application to beneficial use prior to the effective date of the amendment may be perfected under such method of appropriation.

Dear Mike:

Enclosed you will find an application for transfer of water right for Raft River Ranches, Inc. I think everything is in order and as you will see from the claim all we are trying to accomplish in this transfer is to provide more flexibility for the irrigation system on Raft River Ranches. We have added a number of points of diversion but have not expanded the water right either through additional flow or additional land irrigated.

If you have any questions on the application, please feel free to contact me at any time.

Sincerely yours,

Sheri L. Chapman

MEMORANDUM

To: FILES

From: Helen Harrington-Thornton

Date: January 22, 1993

Subject: Claims Originally Filed in Fosha vs. Dunn Adjudication
=====

This claim was originally filed in the Fosha vs. Dunn Adjudication which has subsequently been consolidated with the SRBA. Claimants in Fosha vs. Dunn were not required to file a new claim in the SRBA. In some cases, however, claimants may have filed an amended claim in the SRBA.

The original claims consist of both an original white copy with the original signature and a yellow carbon. Both of these forms must be retained in the IDWR files. The original form included a green carbon which is the claimant's copy. As stated above, there may also be an amended claim.

The review of this claim initially occurred in 1985/1986 by IDWR Adjudication staff. The review process included field examination by IDWR Southern Region Staff (Loren Holmes and Allen Merritt) in 1985 and additional review by IDWR State Office staff (Don Shaff, John Noyes and Forrest Luthy). The claim review documents include:

- Not final // ~~Final~~ ^{See next memo (2/8/93)} recommendation - shown on zeroxed copy of claim, with recommendation shown in RED
- // Adjudication Claim Analysis Sheet (consider this a replacement for the currently used Claims Verification Report (CVR))
- // Map
- // Correspondence, Memos to File, etc.
- // Zerox of original receipts (this is because the original receipt was hand written, prior to the computer receipting). However, in most instances, a voided receipt has been created in the computer in order to update the record to the Host Master.

I have reviewed the claim at this time in order to evaluate the completeness of the original review and have it meet current standards. ~~I have created an R record and verified the recommendation when possible.~~ Generally, the review is based on information available at the time of the original review in 1985/86. Unless there is a discrepancy, additional information of more recent origin has not been added to the review process.

2/9 I did not create an R record due to the probable recombining of this claim w/ A43-04014A.

MEMORANDUM

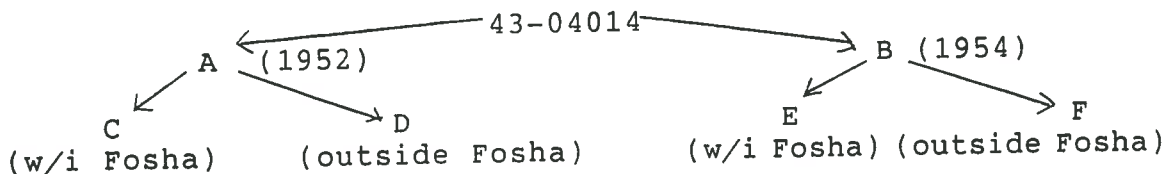

To: File A43-04014 and splits
From: Helen Harrington-Thornton
Date: February 8, 1993
Subject: Split Background

=====

See Memorandum to Files 43-04014C and 43-04014E, from Don Shaff, dated 6/5/86, re: Review Analysis (copy attached). The last paragraph of the memo describes splits of 43-04014 which occurred for two reasons:

1. The place of use included lands both within and outside the lands described in the Fosha vs. Dunn Adjudication (Sec. 19, 20, 21, 28, 29, 30, 31, 32, 33, T11S, R27E);
2. The original statutory claim described two different priority dates (1952 and 1954).

Per that discussion, the following splits were expected:

The 'C' and 'E' portions were created and reviewed as a part of the Fosha vs. Dunn review. See those files for the background on that review.

The 'D' and 'F' portions were not filed until the SRBA. Although the claims were filed in 1989, data entry was not completed.

Since Fosha vs. Dunn Adj. was consolidated into the SRBA, there is no reason to leave the portions separate under each priority date. Therefore, I have data entered the claims for portions outside the Fosha vs. Dunn POU as the main portions ('A' and 'B'), rather than 'D' and 'F'. The purpose in this action is to allow for the recombination of the portions into 'A' and 'B' in the final recommendation of these claims.

MAR 19 1993

MEMORANDUM

TO: 43-4014C & 43-4014E
FROM: Don Shaff *DS*
Water Rights Supervisor
DATE: June 5, 1986
RE: Review Analysis

The water right claimed by Raft River Ranches is well documented and appears reasonably accurate. The statutory claim filed in 1968 and subsequent transfer complicated the review of this water right, and resulted in recommended findings different than the water right claimed in the adjudication. The recommended findings are limited to the area of the current case.

The diversion rates for these water rights were reduced to reflect the notion that the total amounts claimed may be used on additional lands outside the area investigated. The amounts recommended were calculated by dividing the full amount in cfs claimed by the total number of acres described on the 1968 claim. This diversion rate per acre was multiplied times the 165 acres found irrigated with this

MICROFILMED

MAR 19 1993

water right within the investigated area.

The diversion points claimed corresponded to the points described in the transfer. For purposes of this adjudication, the diversion points recommended were limited to the points within the investigated area. The period of use was expanded to reflect the freeze period identified by the department in water right administration.

The following is an attempt to describe the procedure to enumerate these water rights from the original 1968 claim. Two priority dates with two amounts of water for the same land were described on the 1968 claim. These two priority dates were split into parts A and B. Part A was further split into the water right within the investigated area (Part C) and the part that may lay outside the uninvestigated area (Part D). Correspondingly Part B was split into Part E which is within the investigated area and a Part F that may lie outside the investigated area. The result will be Parts C and E that will be decreed presumably and Parts D and F that will remain as claimed, unconfirmed water rights.

RE: Water District 57-R

Dear Reynolds Creek Basin Water User:

The director of the Department of Water Resources has set a budget and selected a watermaster for Water District 57-R for the 1986 irrigation season. You should have received the director's order dated April 9th that established Water District 57-R to replace water districts 57-A and 57-J.

Kenneth Downing of Homedale has been selected to serve as watermaster with a budget of \$5,525 to operate for about 65 days. The budget compensates Mr. Downing at \$40 per day plus 20.5 cents per mile. Included in the budget is pay and mileage expenses to hire Connie Brandau as an assistant watermaster if such a position would be advantageous to the water district.

The budget has been sent to the Owyhee County auditor's office for collection through the county offices. If you have questions about the budget or the water district in general, please feel free to call me.

Before the director can instruct the watermaster to begin delivering water, he must receive a letter signed by at least three water users who believe the watermaster's services are required. As that time quickly approaches, I solicit your cooperation and patience in this first year of Water District 57-R.

Regards,

DON SHAFF
Water Rights Supervisor

114 WATER RESOURCES OF RAFT RIVER BASIN, IDAHO-UTAH

Material	Thick- ness (feet)	Depth (feet)
----------	--------------------------	-----------------

11S-26E-35cc2

[Casing: 14-in. steel to 275 ft; perforated from 75 ft to bottom]

Clay, sandy. Struck water at 39 ft	39	39
Sand, fine	5	44
Sand and clay	26	70
Clay, sandy, yellow	26	96
Clay, blue	9	105
Hardpan, sand, and clay	23	128
Sand and gravel, caved, water-bearing	4	132
Clay, yellow	7	139
Sand and fine gravel, water-bearing	44	183
Clay, yellow, soft, sticky	4	187
Gravel and sand	3	190
Clay, yellow, sticky	4	194
Sand and gravel; water-bearing	14	208
Clay, sandy, soft, layered	12	220
Gravel and sand, caved; maximum diameter about half an inch	12	232
Clay and sand	8	240
Sand and gravel, cemented, with some clay; very poorly water-bearing	35	275

11S-26E-35dc2

[Casing: 16-in. wrought-iron to 224 ft; perforated from 110 to 224 ft]

Soil	12	12
Gravel, cemented; some water	26	48
Sand; stands during drilling	32	80
Clay, yellow	10	90
Clay, blue	16	106
Gravel, water-bearing	6	112
Gravel, pea gravel, and sand	14	126
Clay, yellow. Drilled easily	6	132
Clay, gray	5	137
Gravel	68	205
Clay	15	220
Gravel, cemented	5	225
Clay, sandy	7	232
Gravel, cemented	11	243
Clay, yellow, sticky	2	245

11S-27E-15bb1

Soil	3	3
Clay, sandy	17	20
Gravel, coarse, and sand	10	30
Clay, gray, sandy	5	35
Clay, sandy, gray; some coarse gravel	65	100
Clay, brown, and sand, black; some coarse gravel	35	135

11S-27E-22cb2

Soil	45	45
Clay, sandy	15	60
Clay, sandy with some sandstone	10	70
Clay, sandy, yellow; layers of black pea gravel	8	148
Clay, sandy, yellow	22	170
Clay, yellow, sticky	5	175

Material	Thick- ness (feet)	Depth (feet)
----------	--------------------------	-----------------

11S-27E-31dd1

[Casing: 20-in. steel perforated from 0 to 185 ft. with Mills knife; slots about 7/16 in. wide and 2 1/4 to 3 in. long in horizontal rows of 12 slots at 8-in. vertical intervals]

Topsoll	9	9
Gravel, dirty	11	20
Clay and sand	33	53
Sandstone, white	1	115
Clay	20	135
Gravel and clay	2	137
Clay and sandstone	11	148
Sandstone	4	152
Clay	33	185

11S-27E-33dd1

Topsoll	20	20
Clay	48	68
Gravel, fine-grained, and clay, sandy	42	110
Gravel	40	150
Clay; thin layers of fine gravel	40	190
Gravel; thin layers of clay	18	208

11S-27E-35ad1

Topsoll	12	12
Clay and gravel	100	112
Rock, loose	18	130
Clay, sandy; thin layers of water-bearing sand	70	200

11S-27E-36ad1

[Casing: 20-in. wrought-iron to 30 ft]

Soil, gravel, and clay	100	100
Rock, red, hard; reported to be quartzite	148	248

12S-26E-1bb1

[Casing: 14-in. wrought-iron to 195 ft; perforated from 109 to 195 ft]

Soil	17	17
Soil and small amount of gravel	13	30
Clay, yellow	15	45
Gravel, water-bearing	6	51
Clay, sandy	29	80
Clay, blue, sticky. Struck more water at 92 ft	12	92
Gravel, coarse	23	115
Clay, light-gray	5	120
Gravel	24	144
Gravel, cemented; drilled hard. Struck good flow of water at 150 ft	6	150
Gravel, coarse	6	156
Not recorded	39	195

[Casing: 16-in. steel to 275 ft; perforated from 75 ft to bottom]

Topsoll
Clay, brown; gravel
Gravel, fine, and struck water
Clay, brown
Clay, gray, sticky
Sand and gravel; clay; struck water
Sand and gravel
Sand; caved
Gravel and sand
Gravel, coarse
Clay, brown
Gravel
Gravel, cemented
Gravel, cobble 3 in. in diameter

[Casing: 16-in. steel to 275 ft; perforated from 75 ft to bottom]

Soil, sand, and Sand, fine-grained
Clay
Sand, and about 10 ft thick
Sand and clay

[Log obtained]

Volcanic ash
Gravel
Clay, yellow
Clay, gray, sandy
Gravel; clean
Clay, sandy
Clay, yellow
Clay, brown
Gravel, clean
Clay, yellow
Gravel, clean
Clay, brown
Gravel, clean
Clay, yellow
Gravel, clean
Clay, yellow
Gravel

[Log obtained]

Soil
Clay
Sand
Basalt, broken
Sand, soft
Clay, brown
Sand, coarse
pea
Clay, sandy

APPLICATION FOR TRANSFER OF WATER RIGHT
to Change the Point of Diversion and for the Place of Use

APPROVED

43-4014

Name of applicant Raft River Ranches, Inc.Phone 801-532-7700Post office address P. O. Box 11503, Salt Lake City, Utah 84147

A. DESCRIPTION OF RIGHT AS RECORDED

1. Right evidenced by:

a. Decree to

(Name)

in case of

vs

dated

in

county of

(Name of court)

b. License No.

issued by the Idaho Department of Water Resources

c. Claim No. 43-4014

on file with the Idaho Department of Water Resources

2. If applicant is not the original holder of this right, explain how it was acquired and attach a copy of the deed or other evidence of ownership of the land to which the right is appurtenant purchase of lands to which the water is appurtenant.3. Source of water ground water

tributary to

4. Date of priority July 1, 1952 and June 1, 1954 (see original claim 43-4014)

5. Water is used for the following purposes:

amount 4.0for Irrigationpurposes from April 1 to November 1amount 4.0for Stock wateringpurposes from January 1 to December 31

amount

for

purposes from

to

(month, day - both dates inclusive)

6. Total amount of water 4.0

cubic feet per second

b. 1148

acre feet per annum

7. Location of original point of diversion is NW

SW

1/4 of Section 22Township 11 SouthRange 27 EastTwp. in Cassia

County

Additional points of diversion, if any None

8. Lands irrigated or place of use:

C-1c Description of diverting works

The diversion works for the ground water to be developed and utilized under this transfer originates from 19 wells at the present time equipped with vertical turbine pumps, steel and aluminum main lines, with a combination of sprinkler and gravity irrigation to a lesser degree. The entire irrigation system for the lands owned and operated by Raft River Ranches, Inc., is operated as a single, flexible, system with all wells providing capability for irrigation of any or all of the ground covered under this license, other licenses, and claims.

C-1d Reasons for change

The purpose of filing this application is to improve the efficiency of the irrigation system now existing on the property as outlined on the map under this right and others appurtenant to this ground. In addition, certain of the wells on the property are declining in yield due to sand and other problems and it is the intent of the applicant to replace the water lost by drilling one or two replacement wells at the additional points of diversion as listed under C-1b. There will be no enlargement of the water right either in the total quantity of water diverted or the land irrigated as described under the original right. As indicated, these lands are irrigated in combination with other water rights previously established through the appropriate procedure and constitutional use method by the Department of Water Resources. The wells and diversion works are described in detail in the attachment to application for transfer of water right #1598 approved by the Department of Water Resources on May 12, 1969. In addition, the proof of beneficial use for license 31956 and license 31818 describe the points of diversion on lands irrigated in detail. Information regarding the diversion structures, wells, pumping systems, and lands may be obtained by referencing this information now on file with the Department of Water Resources.

MINUTES OF A SPECIAL MEETING OF
THE DIRECTORS OF
RAFT RIVER RANCHES, INC.

A special meeting of the Directors of Raft River Ranches, Inc. was held on the 9th day of May, 1978. All of the Directors were represented at the meeting.

Upon motion duly made and seconded, it was unanimously

RESOLVED, that Leo A. Jardine as Secretary for the Corporation is hereby authorized to execute any and all applications for transfer of water rights to be filed with the Department of Water Resources, State of Idaho.

FURTHER RESOLVED, that any and all such applications which may heretofore been executed by the said Leo A. Jardine as Secretary for the Corporation be and are hereby ratified, confirmed and approved and all such applications shall be deemed validly executed for and on behalf of the Corporation.

There being no further business to come before the meeting, the same was adjourned.

Approved:

Layton P. Ott, President

The undersigned, Layton P. Ott, being the President of Raft River Ranches, Inc. does hereby certify that the

STATE OF IDAHO
 DEPARTMENT OF RECLAMATION
 CLAIM TO A WATER RIGHT

Established by Diversion and Application to Beneficial Use

Under the provisions of Section 42-225a, Idaho Code, a person may file a claim to a right to use water which has been established by diversion and application to beneficial use. The filing of this claim does not confirm the water right but will serve for information purposes only. It may, however, become the basis for future adjudication of the water right by the Court.

(Please refer to the instructions on the back of this form)

1. Name of claimant Harold Calder
 post office address 2290 South Orchard Drive, Bountiful, Utah 84010

2. The point of diversion is in NW $\frac{1}{4}$ of SW $\frac{1}{4}$ Section 22 Township 11 South
 Range 27 East B.M. located on subterranean
(name of source)

tributary to _____ in Cassia County.

3. Dates of priority claimed: list the priority for each separate quantity that you claim. Priority dates should be based upon the earliest diversion of the water which has resulted in continued beneficial use since that time. If there has been an interval of five years or greater when the water was not beneficially used for the same purpose as originally appropriated, the priority that you claim should date from the time that the water was again beneficially applied following the period of non-use.

a. Date of priority claimed:

July 1, 1952 amount: 1.7 c.f.s. or 731 acre feet
June 1, 1954 amount: 2.3 c.f.s. or 417 acre feet
 _____ amount: _____ c.f.s. or _____ acre feet
 Total claimed 4.0 c.f.s. or 1148 acre feet.

b. Explain the purpose for which the water has been used and the time during the year when you have used the right claimed:

use irrigation period of use from April 1 to November 1 (both dates inclusive)
 use stockwatering period of use from January 1 to December 31 (both dates inclusive)
 use _____ period of use from _____ to _____ (both dates inclusive)
 use _____ period of use from _____ to _____ (both dates inclusive).

4. Description of diverting works:

a. Surface water diversion dam and/or headgate: material is composed of _____
 _____; length is _____ feet; height is _____ feet;
 width at bottom is _____ feet; with at top is _____ feet; explain any increase in diversion capacity since structure was first built, giving dates and estimated capacities if known _____

b. Underground water diverting works: is well flowing or pumped pumped; depth of well is 250 feet; diameter of well is 16 inches; type of pump is Charleroi
 capacity of pump is 1890 g.p.m.; name and address of well driller is (See remarks)

MICROFILMED

Harold Calder

Claim No. _____

REMARKS (continued)

Well No. E4 was drilled during the early spring of the year by Emil Meyer & Associates, comprising eight individuals who joined together under a partnership agreement for carrying out the general farming and ranching business on essentially the same lands as now comprise the Calder Ranch owned by claimant. Said well was drilled with a rig owned by the partnership to a reported depth of 175 feet as stated in Geological Water Supply Paper 1587, with the reported well log as stated on page 114 thereof as follows:

11S-27E-22cb2

<u>Material</u>	<u>Thickness (feet)</u>	<u>Depth (feet)</u>
Soil	45	45
Clay, sandy	15	60
Clay, sandy with some sandstone	10	70
Clay, sandy, yellow; layers of black pea gravel	8	148
Clay, sandy, yellow	22	170
Clay, yellow, sticky	5	175

Initially Well No. E4 was equipped with a 60 H.P. pump. In 1954 the partnership deepened Well No. E4 to a depth of 275 feet, cased with 16 inch diameter pipe. No log is available of the deepened well to claimant's knowledge.

At the time claimant acquired the Calder Ranch in August, 1962 Well No. E4 was equipped with a worn out 60 H.P. water lubricated pump and an old motor which had been severed from the pump shaft and the switch boxes had been removed by persons unknown. In the early spring of 1963 claimant equipped Well No. E4 with a 75 H.P. three-phase 440 volt Charleroi motor and deep well turbine pump (made in Belgium), style 12NM, No. 13609-89460.

Upon completion of Well No. E4 to its reported depth of 175 feet in the early spring of 1952 it produced 765 G.P.M. (1.7 cfs) as stated in Water Supply Paper 1587 at page 125. The water so produced was diverted into ditches and was used with at least one complete irrigation turn by July 1, 1952 to irrigate the lands herein described. Upon deepening Well No. E4 in 1954 the production thereof increased an additional 115 miner's inches (2.3 cfs) and the total of 200 miner's inches (4.0 cfs) of water was used therefrom during the early part of the irrigation season, i.e. by June 1, 1954, for the irrigation of the lands herein described. Well No. E4 was test pumped at 210 miner's inches in August, 1965 by the Layne Pump Company. The existing equipment on Well No. E4 now produces 200 miner's inches

MICROFILMED

MAR 19 1993

(4.0 cfs) under normal operating conditions and the waters therefrom together with the supplemental waters from Warm Creek are, and have been used to irrigate the full 287 acres of land described herein. The waters from Well No. E4 are, and have been discharged through 15½ feet of 8 inch I.D. pipe to the south and discharged into a concrete box 5½ feet x 5½ feet x 28 inches deep equipped with one 12 inch I.D. concrete outlet to the east and one 12 inch I.D. concrete outlet to the southwest, from either or both of which the waters are discharged into earthen ditches and are used to irrigate the lands herein described. Of the total 287 acres irrigated, 239 acres thereof are irrigated as a sole supply and 48 acres are supplemented with water from Warm Creek as shown on the accompanying map marked Exhibit "1" and being more particularly described as follows:

Township 11 South, Range 27 East, B.M.

	<u>Total Irrigated</u>	<u>Sole Supply</u>	<u>Supp. from Warm Creek</u>
Section 21			
NE¼ NE¼	38	38

Section 22			
NE¼ NW¼	37	37	
NW¼ NW¼	39	39	
SW¼ NW¼	32	32	
SE¼ NW¼	12	12	
NW¼ SW¼	<u>2</u>	<u>2</u>	
Total acres	287	239	48

The total annual quantity of water claimed herein from all of the sources combined is 1148 acre feet based upon a duty of 4 acre feet per acre for the 287 acres. However, claimant does claim the right to irrigate the total 287 acres from Well No. E4 at a diversion rate of 200 miner's inches (5.0 cfs) as the primary source of supply since the waters from Warm Creek are supplemental to 48 acres thereof.

The water rights claimed herein are based upon the "constitutional method" of diversion and beneficial use which were commenced during the early spring of 1952 and completed during the early spring of 1954, being long prior to the effective date of the 1963 amendment to Idaho Code, Section 42-229, i.e. March 25, 1963, and under the express provisions of said amendment an appropriation commenced by diversion and application to beneficial use prior to the effective date of the amendment may be perfected under such method of appropriation.
