MEMO TO FILE

January 27 1995
Transfer No. 4521 - Spratling Farms
Employee: Jeanie Robertson
Water Right Agent, Adjudication

I have visited this property several times and confirmed the areas irrigated with ASCS maps and verified the location of the wells. There are two wells located in the NWSE Section 7, one is not in use at this time. The pump has been pulled from this well but they did indicate that they may put it back into use. I support the acres found to be irrigated on the maps and intend to recommend them that way.

SUBJECT: Spratling Farms Transfer App.

FROM: Jim Stanton

DATE: 12-14-94

I am reviewing this transfer prior to advertising. As filed, the transfer showed a well in the NE/SW S. 7, but there is no log or other records of this well. Mr. Spratling was in today with proof of ownership, so I asked him about this. He indicated that the well location was incorrect, and that it is actually east of the well now in use near the center of the section. The mis-located well is not in use now, but will probably be rehabilitated so that it can be put back into service.

The SRBA staff is presently doing verification work on this property. So far, they have looked at the wells and marked the existing P/U on aerial photos. The well locations have been verified. No flow determinations have been made. Pivot corners are in CRP protection now, so would probably be recommended by SRBA. If this transfer is approved, most of the corners would no longer be irrigated. With SRBA work in progress, probably to be completed next summer, I do not plan to visit the property. As long as future irrigation on this farm does not exceed the 1092 acres as proposed, the transfer should not result in expansion of water usage. Water rights are ultimately subject to SRBA findings, of course.

RE: Evidence of Priority

RESPONSE DEADLINE
FEBRUARY 3, 1992

Dear Claimant:

The Notice(s) of Claim identified with the number shown above your name on the mailing label has been filed in the Snake River Basin Adjudication (SRBA). The Notice(s) indicate your water usage is based on "Beneficial Use" or a "Statutory Claim". Water rights of this type are established by the historical use of water, dating back to when water was first used for the purpose claimed. **The date of first use, known as the priority date**, has not been confirmed by a License, Decree or Permit. The Department will soon conduct reviews &/or field exams for the claims in your area. Since the priority date of a beneficial use water right can not be confirmed by field examination, **proof must be provided supporting the priority date you have claimed.**

The Department will not recommend the Notice(s) be decreed by the court as claimed if no evidence of a priority date is submitted.

Please find enclosed a computer printout of your Notice(s) and the pamphlet entitled **"Evidence of Priority"**. The pamphlet describes the types of evidence required and suggests which documents will fulfill this requirement. I direct your attention to the two sections entitled **"What Kind of Evidence is Required"** and **"Some Examples of Documents Which May Be Evidence of the Priority Date"**.

Please submit the required evidence supporting the priority date(s) by **February 3, 1992**, referencing all documents with the corresponding Notice number(s). If you have any questions not covered by this letter or the enclosed pamphlet, please contact this office.

Respectfully submitted,

Allen Merritt, P.E.
Water Rights Supervisor

Dear Mr. Spratling:

As we discussed over the telephone a few days ago, I continued my research into the water rights appurtenant to the land you described for me over the phone. Water rights appurtenant to the land in the W/2, Sec. 17, T11S, R28E, were reviewed both before and after the transfer initiated by Farm Credit Services in April, 1987. The water rights appurtenant to that land include the following:

- 43-2417 - License
 - 43-2418 - License

The water right numbers denoted as licenses are for water rights following the statutory procedure for appropriation of water under existing Idaho law. The water rights denoted as claims are those where a claim to water right has been made pursuant to the constitutional method of diversion of water to a beneficial use. This was the ordinary means of establishing a water right for ground water purposes prior to March 25, 1963. After that date, all ground water rights are required to have been established by filing a permit which then goes to license after the construction of the works has been completed. Based on my research, it appears that the claims are valid water rights even though they have not yet been adjudicated which is the last formal procedure before they become a vested water right. That process is presently going on as the Snake River Basin Adjudication but it will be next year before the water right claims under the adjudication process must be filed for Cassia County.

1-17-92

Based on my review of water rights, the Farm Credit Services transferred to your land water rights in the amount of 1.92 cubic feet per second (862 gallons per minute) for stockwater purposes and 2.85 cubic feet per second (1,279 gallons per minute) for irrigation of 248 acres of land. The well location (point of diversion) for this water is in the SW/4 NW/4, Sec. 17, T11S, R28E, and the transfer was made in April, 1987. All of the water right transfers are identical for each one of the above listed water rights and the total diversion rate for both stock and irrigation are not cumulative, therefore, the 1.92 cfs and 2.85 cfs are the maximum rate of diversion allowed for all of the water rights together.

RALPH BOWLER, being first duly sworn on his oath, deposes and says:

The affiant is a partner in the Power County Implement Company of American Falls, Idaho. The affiant states that he personally was aware of and supervised the installation of pumping equipment that was purchased by Heglar Ranches (formerly Taylor Land Company) on a well located in the NW/4, NW/4, Section 6, T11S, R28E.

The affiant attests to the fact that the equipment was installed in the spring of 1954 and that water was first placed to use in 1954 to irrigate lands in the general vicinity. The affiant further states that the pumping equipment installed was designed and was capable of producing 5.2 c.f.s. and the affiant has observed that amount of water in his best judgement produced and used when the equipment was at maximum efficiency.

Substance of Communication while performing a field exam on a well in the middle of Section 7 for Colleen Van Winkle, Mr. Spratling came out to see what I was doing. He told me he had purchased the property in the Spring from ^{Travelers} Fred Neibauer. I told him I was doing some verifying for a drought assistance application that Mr. Neibauer had applied for on this well. He told me that well had been drilled in 1992 and that he thought they had used the pumps and motors from an abandoned site nearby. He said he thought the Neibauer's had only made one interest payment on the property and then let it go back to Traveler's, from whom he purchased it. I got my

MEMORANDUM

TO: Files 43-2418/2417/4060/4061/4062/4063/4064
FROM: Jim Johnson
DATE: July 29, 1987
RE: Transfer Review

During the review of Transfer Application No. 3315, it became apparent that the water rights contained in the transfer had been expanded by a previously approved transfer.

For example, Right 43-2417 was originally appurtenant to only 997 acres, however, upon approval of Transfer No. 2030, this water right became appurtenant to 2556.5 acres. Six other water rights were treated similarly.

The rationale for allowing this to occur was due to the presentation that several rights were used jointly in one delivery system containing several wells that were all inter-connected.

The means for irrigation have, however, changed over the years and presently circular systems have been utilized. With the irrigation system changes, other changes have also occurred, such as ownership of the land within the original system, drilling of additional wells, and relocation of acres irrigated. There is not sufficient evidence provided to determine if increases in the volume of water or increases in rate of diversion have occurred from these changes. The present transfer applicant states there have not been.

The purposes of the present transfer application is to show which lands, originally covered by the seven water rights, are no longer owned by the applicant. Since Transfer No. 2030 made each of the seven rights appurtenant to the entire 2556.5 acres, the present transfer requires the splitting of each of the seven rights into parts A & B. Unfortunately, this approach continues to misrepresent the water rights and continues to allow the expansion of the rights.

To take corrective action would require complete restructuring of the transfer application. The merits for restructuring the transfer application and correcting the water right descriptions in light of the fact that five (5) of the seven water rights are claims, is probably not justified. Future adjudication would be required within the Raft River Critical Groundwater Area before the water use on this ground would be regulated. Therefore, it is reasonable to conclude that no further corrective action is required at this time.

RE: Heglar Ranch, Inc. -- Transfer 2267

Gentlemen:

Enclosed is an Application for Transfer, submitted by Farm Credit System Capital Corporation, as successor to Heglar Ranch, Inc. This letter is submitted in an attempt to clarify the situation.

Idaho Livestock PCA submitted a Transfer Application in May of 1985. That Application should be disregarded.

Transfer 2030 was approved in 1976. That Transfer made all the water rights appurtenant to all 2556.5 acres. In 1978, Heglar Ranch sold 320 acres in Section 17 to John and Janice Spratling, with no mention of water rights. Presumably Spratlings received a proportionate share of the ranch's water rights described in Transfer 2030.

In 1978, Heglar Ranch submitted an Application for Transfer, approved as No. 2267. This Transfer did not pick up the sale to Spratlings, but added a point of diversion in Section 31.

Idaho Livestock PCA acquired the property in 1983, and transferred it to Farm Credit Services Capital Corporation in 1986. In 1986, FCSCC sold a portion, 235 irrigated acres, to John and Janice Spratling, but without water rights.

By this Application, FCSCC seeks to amend the amount of the right remaining to it, and to amend the land list to omit the two Spratling transfers. In addition, it seeks to change a point of diversion and place of use of the right from the land sold in the second Spratling sale to land in Section 36 and Section 1. There is no increase in total irrigated acreage.

Page - 2

Technically, perhaps a Transfer isn't the way to do all of this, since a portion of the water right is still appurtenant to Section 17, even though the land is now in different ownership. However, this requested transfer will serve to memorialize the transfer of that ground to Spratlings, which took place prior to No. 2267, and therefore, correct the description of the remaining water right, which was incorrect in that Transfer.

If you have any questions, feel free to call.

Yours very truly,

Thomas G. Nelson

RE: Water Right Licenses 43-2417, 43-2418 & Claims 43-4060,
43-4061, 43-4062, 43-4063, 43-4064

Dear Mr. Jones:

The above listed rights have been the subject of transfers which changed the points of diversion and places of use of the water rights to agree with changes which have been made in the irrigation system.

Transfer No. 2267, which was approved on August 24, 1978 reflects the current status of the rights.

An application for transfer filed in the name of Idaho Livestock PCA, filed on May 5, 1985 has been recommended for approval by this office but has not yet received final action.

A water right license is prima facie evidence of the water right. The amount of water and land area described in a license has been confirmed by the Department prior to issuance of the license.

Water right claims are not prima facie evidence. The claim is the claimant's affidavit that the right described in the claim was established by diversion and beneficial use.

The Department maintains records of claims, but the final determination of a claim's validity is left to the District Court.

If you need additional information or if we can be of further assistance, please let us know.

Very truly yours,

Loren D. Holmes, P.E.
Southern Region Supervisor

Transfer No. 4521 - Spratling Farms

Employee: Jeanie Robertson

Water Right Agent, Adjudication

I have visited this property several times and confirmed the areas irrigated with ASCS maps and verified the location of the wells. There are two wells located in the NWSE Section 7, one is not in use at this time. The pump has been pulled from this well but they did indicate that they may put it back into use. I support the acres found to be irrigated on the maps and intend to recommend them that way.

MEMO TO FILE

September 9 1994

File No. A43-02512

Employee: Jeanie Robertson

Water Right Agent, Adjudication

On August 30, 1994, I performed an inspection of a well in T11S, R28E, in the NWSE of Section 7, Cassia County. I found this well to be located on 350S, approximately .1 mile to the east of the intersection of 350S and 2900E, where an abandoned well is located. There was a Layne Bowler Pump, model #14RM, serial #D03627; a 300 H.P. G.E. Motor, model #5K6287XH16B, serial #BLJ219123; with an Aurora Booster Pump, serial #76-3302; and a 150 H.P. U.S. Motor, #C67172 304 82 1153. Brad Neibaur had applied for Drought Assistance on this well. A Mr. John Spratling now owns the property and he told me the well was drilled in 1992 and that the pump and motor were moved to the new well from the site of an another abandoned well, approximately .1 mile to the East of the new one. He also said he thought that Brad had only made one interest payment on the property and then had let it go back to Travelers Insurance, from whom Mr. Spratling purchased it in the Spring of 1994. The cement slab at the well site was inscribed with the words: New Well Marker 1992. I also talked with a Mr. Newt McNeill, who runs the farm for Neibaur, and he confirmed that the well Brad had applied for the assistance on was the one in Section 7.

SLR-reflex

Spratling:

- when was this drilled?
- when Trav. took it back?
- how long did Brad have?
- is pump from abandoned well?

Newt - is this well Brad's applying for in Sect. 7?

To: Loren Holmes

Dear Mr. Holmes,

In the spring of 1993, I had a well go dry on my farm. I called High Plains Drilling in Peaburg and had them drill a new well to replace the old one.

I know that a permit is needed for new well. However, I was not aware that one would be needed for an old one. I apologize for this error, and would like get a permit in force now.

Thank you in advance for your help, and I apologize again for my ignorance.

Sincerely,

Brad Ventura
