RE: Evidence of Priority

RESPONSE DEADLINE
FEBRUARY 3, 1992

Dear Claimant:

The Notice(s) of Claim identified with the number shown above your name on the mailing label has been filed in the Snake River Basin Adjudication (SRBA). The Notice(s) indicate your water usage is based on "Beneficial Use" or a "Statutory Claim". Water rights of this type are established by the historical use of water, dating back to when water was first used for the purpose claimed. **The date of first use, known as the priority date, has not been confirmed by a License, Decree or Permit.** The Department will soon conduct reviews &/or field exams for the claims in your area. Since the priority date of a beneficial use water right can not be confirmed by field examination, **proof must be provided supporting the priority date you have claimed.**

The Department will not recommend the Notice(s) be decreed by the court as claimed if no evidence of a priority date is submitted.

Please find enclosed a computer printout of your Notice(s) and the pamphlet entitled "Evidence of Priority". The pamphlet describes the types of evidence required and suggests which documents will fulfill this requirement. I direct your attention to the two sections entitled "What Kind of Evidence is Required" and "Some Examples of Documents Which May Be Evidence of the Priority Date".

Please submit the required evidence supporting the priority date(s) by **February 3, 1992**, referencing all documents with the corresponding Notice number(s). If you have any questions not covered by this letter or the enclosed pamphlet, please contact this office.

Respectfully submitted,

Allen Merritt, P.E.
Water Rights Supervisor

RE: Notice of Error Reply – 43-4051

Dear Mr. Taylor,

Thank you for your reply. I have looked into the claim files to get a better understanding of the various filings. Claim 43-4051 was developed in about 1962, from the northeastern-most of the two wells, for use on about 145 acres. The 1962 aerial photo shows about 15 acres that was not irrigated in the area that could have been served by this well under gravity irrigation methods. As a result the reviewer recommended 1 Miners Inch per acre for 145 acres, or 2.90 cfs – this is the maximum allowed by law. I do not plan to adjust the recommendation with the information available at this time. If you other evidence please provide it at your earliest opportunity – time is running out before we complete the Final Director's Report.

Claim 43-4050 records the other well, in the SW corner of the property. Its flow rate is based on the well's capacity, 1.2 cfs, as measured in the mid-1960s.

I did notice that your land in Sec 31 does not have a ground water claim supplementing the decreed rights. If ground water was used on land in Sec 31 **before 1987** then you may need to file an expansion claim on this use. This will not provide flow rate or diversion volume, but could authorize spreading the existing right on other land. If ground water is not used there, then no further action is needed on your part.

Please contact this office if you have questions or need additional assistance.

Sincerely,

A handwritten signature in black ink, appearing to read 'Douglas Jones', with a stylized flourish at the end.

Douglas Jones, PE
Water Rights Supervisor
Southern Adjudication Unit

**NOTICE OF ERROR
REPLY**

Please type or print clearly, fill out this form completely and mail.

Return this reply form to IDWR by the deadline date printed below if you want IDWR to change your recommendation or you want to let IDWR know that you agree with its recommendation.

YOUR DEADLINE FOR RETURNING A NOTICE OF ERROR REPLY IS: June 15, 2001

RECEIVED

JUN 18 2001

**Department of Water Resource
Southern Region**

1. Describe the portion of the proposed recommendation with which you disagree (e.g. priority date, period of use, source):

Amount of water

2. Describe the changes you wish to make in the proposed recommendation:

According to our records the pump originally put out 6.4 CFS

3. Give a brief explanation as to why you disagree with these portions:

The pump doesn't lift as much water as it used to. As I can afford to do so I would like to upgrade the pump to the former amount.

☐ I AGREE with this proposed recommendation: no changes need to be made.

FROM: Cindy E. Bird

REF: Cassia Creek water

January 25, 2001 I met with the renters (Harry and Jody) of Cedric Taylor's property. The property is located in Cassia County within three adjacent townships; 12 south, 26 east, section 36, 12 south, 27 east, section 31 and 13 south, 26 east, section 1, of the Boise Meridian. Property boundaries are outlined in green below. The overall slope of the land falls in a northeasterly direction. Water used to irrigate the property is both Cassia Creek and well water.

Conveying Cassia Creek: Cassia Creek is diverted from the NESENW of section 12, township 13 south, range 25 east of the Boise Meridian and flows north to the SWNWSE corner of the property located in section 1. From there, it can flow in three directions. One path is due east along the south property line to SENESE corner. Secondly to the pivot, and finally, north to the north corner of the SWNE quarter-quarter of section 1. At the north corner it goes due east one-quarter mile and joins with the water from the pivot. At that point it can go to the pond or north along the property line to section 36. On the north half of the SESE it flows due east to Cassia Creek where it jogs north to the quarter-quarter line and proceeds due east to the end of the property in section 31, township 12 south, range 27 east of the Boise Meridian.

System:

The system uses a combination of open ditches, handlines, flood irrigation, a 1/4 mile pressurized pivot and 2 deep wells to irrigate. One deep well is located in the SW corner of the property in section 1. This deep well has a 30-hp pump serial number RSJ410312, and model number 5K4326XG2. The other deep well has a 75-hp pump and is located in the center of the pivot, serial number SWJ511134 and model number SK6267XC15A.

Once the surface waters enters the property it's conveyed through open ditches north or east. After a short distance due east the water can flow northeasterly to the center of the pivot and dumps into a concrete collection box, 3-feet by 3-feet and 8 feet deep. A pump at the collection box conveys the water to the quarter mile pivot. This 60-hp pump was rewound to 30-hp, serial number JNJ914354, model number 5K6254XM501A. The pressurized pivot was installed in 1980.

When Cassia Creek water is no longer available the deep well is pumped into the collection box and conveyed to the pivot. From the pivot the water flows in an open ditch north along the west line of the SENE quarter-quarter approximately 1200 feet and then goes into an underground pipe to the pond.

The pond is located in the SENENE corner of section 1. From the pond, the water can go north to irrigate the land in sections 36 and 31 or east to a mainline. A PTO conveys the water east to the mainline that runs to the end of the property. The handlines run north and south. They will pick up the NE corner of the pivot and the land east of the house.

Alternately, if the water goes north, a concrete ditch runs along the property line into another collection box. From there, a 10" mainline runs north to section 36 (SENE), then turns east with an 8" mainline, narrowing to 6" and then decreasing to a 4" mainline in the SESW of section 31. Again, the handlines run north and south through the land in sections 36 and 31.

From the collection box to the elbow in section 36, there are 25 risers. From the elbow east, there are approximately 85 risers to the edge of the property in section 31. Harry uses both 5/32 and 11/64-inch birds on the handlines. But most frequently uses 11/64th because of the trash in the water (tires, signs, dead animals, and just about anything else you can think of).

The 30 hp deep well in section 1 is also used for irrigation when the creek water is gone.

Pond: Harry and Jody had the pond engineered in 1996 to capture the water and convey it to the lands in sections 31 & 36. The pond is 10 feet deep with side slopes of 2:1. Harry thought the volume was 2.8 ac-ft of water. But stated that it could be filled in less than one day with creek water. Two-foot diameter concrete lined culvert going from Cassia Creek to the pond.

Crops: barley, alfalfa, corn, wheat, pastures and fall triticale (wheat and rye mix). Crops are rotated in all fields.

Stockwater: Watering of 60 hogs and 65 dairy cows is occurring from the domestic well. The domestic well also services two homes. See 43-10488 & 43-10489.

STATE OF IDAHO
DEPARTMENT OF RECLAMATION
CLAIM TO A WATER RIGHT

Established by Diversion and Application to Beneficial Use

Under the provisions of Section 42-225a, Idaho Code, a person may file a claim to a right to use water which has been established by diversion and application to beneficial use. The filing of this claim does not confirm the water right but will serve for information purposes only. It may, however, become the basis for future adjudication of the water right by the Court.

(Please refer to the instructions on the back of this form)

1. Name of claimant TELL TAYLOR
post office address P. O. Box 25, Malta, Idaho 83342
2. The point of diversion is in NW $\frac{1}{4}$ of SE $\frac{1}{4}$ Section 1 Township 13S
Range 26E B.M. located on none (ground waters)
(name of source)
tributary to _____ in Cassia County.
3. Dates of priority claimed: list the priority for each separate quantity that you claim. Priority dates should be based upon the earliest diversion of the water which has resulted in continued beneficial use since that time. If there has been an interval of five years or greater when the water was not beneficially used for the same purpose as originally appropriated, the priority that you claim should date from the time that the water was again beneficially applied following the period of non-use.
 - a. Date of priority claimed:
March 15, 1962 amount: 6.4 c.f.s. or _____ acre feet
_____ amount: _____ c.f.s. or _____ acre feet
_____ amount: _____ c.f.s. or _____ acre feet
Total claimed 6.4 c.f.s. or _____ acre feet.
 - b. Explain the purpose for which the water has been used and the time during the year when you have used the right claimed:
use irrigation period of use from March 15 to October 15 (both dates inclusive)
use _____ period of use from _____ to _____ (both dates inclusive)
use _____ period of use from _____ to _____ (both dates inclusive)
use _____ period of use from _____ to _____ (both dates inclusive).
4. Description of diverting works:
 - a. Surface water diversion dam and/or headgate: material is composed of _____
_____ ; length is _____ feet; height is _____ feet;
width at bottom is _____ feet; with at top is _____ feet; explain any increase in diversion capacity since structure was first built, giving dates and estimated capacities if known _____

 - b. Underground water diverting works: is well flowing or pumped pumped ; depth of well is 550 feet; diameter of well is 20" inches; type of pump is 75 hp
capacity of pump is _____ g.p.m.; name and address of well driller is Guy W. Sunberg
_____ ;

43 4051

attach well logs if available; has there been any change in pump or motor since well was first completed _____; if so, give dates and explain _____

- c. Conveying works: length of ditch to place of use is _____ feet; width of ditch at top is _____ feet; width of bottom of ditch is _____ feet; depth of water is _____ feet; grade of ditch per 1000 feet is _____ feet; material through which ditch passes is _____; maximum length of pipe line to first place of use is _____ feet; diameter of pipe line is _____ inches; type of pipe _____; grade of pipe per 1000 feet is _____.
- Please explain any changes or increase in size of conveying system since water was first appropriated, giving date and dimensions if possible _____

Conveyancing works include complicated network of ditches which serve a total of 280 acres of a 440 acre ranch. This well water commingles with other water but will only serve 160 acres.

- d. If water is stored: name of reservoir _____; total capacity of reservoir is _____ acre feet; active capacity of reservoir is _____ acre feet; year construction commenced _____; year completed _____; date first used _____; period of storage is from _____ to _____; is reservoir drained each year _____; is reservoir on or off stream _____ explain _____

if feeder canal is used give maximum carrying capacity _____ c.f.s.; if reservoir is off stream, describe location of reservoir by 40-acre subdivisions _____

has there been any enlargement of the reservoir since it was first built _____, if so, give dates and describe _____

5. a. Where water is used for irrigation, describe area irrigated by 40-acre subdivisions and give total acres:

TWP.	RANGE	SEC.	NE 1/4				NW 1/4				SW 1/4				SE 1/4				TOTALS
			NE 1/4	NW 1/4	SW 1/4	SE 1/4	NE 1/4	NW 1/4	SW 1/4	SE 1/4	NE 1/4	NW 1/4	SW 1/4	SE 1/4	NE 1/4	NW 1/4	SW 1/4	SE 1/4	
12S	26E	36													40			40	80
13S	26E	1	40			40													80

Total number of acres to be irrigated 160

Explain any significant increase in area irrigated since first use, give dates and acreages if known None

b. Do you get water through a ditch owned by several users? no If yes, give the name of the ditch
_____. The other users and their respective
interests in the ditch are (if known) _____

6. Where water is used for stock watering, give number of each kind of stock watered 65 milk cows,
10 heifers, 30 heifer cows with calves

7. Where water is used for domestic or municipal purposes give number of families served _____
name of town supplied not applicable

8. Where water is used for other purposes not above enumerated, give the nature of use, the extent of use,
and any details regarding the initiation of the right or subsequent later expansion. Be as specific as possible,
giving dates and quantities _____

9. Remarks: please explain any details of your claim which you feel need clarification or additional explanation

Claimant has Cassia Creek water decreed to the ranch

and uses water from this well and another to supplement
the flow and after claimant's ^{decreed} rights are cut off.
