REASONS SUPPORTING EACH BOX CHECKED

In response to Statement of the Objection items 3 and 3.a, and all allegations of the objection regarding these items, IDWR responds as follows.

This portion of the objection seeks to add wildlife as a purpose of use to an instream stockwater appropriation, and also seeks to add an additional amount for wildlife purposes. Physical diversion is required for an appropriation unless an exception is established by statute. Idaho Code sections 42-113 and 42-114 establish an exception for watering of domestic livestock, but no exception is provided for appropriations by the United States for

wildlife purposes. IDWR denies this portion of the objection and any allegations regarding this portion of the objection not expressly admitted herein.

In response to Statment of the Objection items 5, 9, and 9.a, and all allegations of the objection regarding these items, IDWR responds as follows.

The notice of claim filed with IDWR by the United States described a stream segment located in sections 8, 16, and 17. The portion of the claimed stream segment located in section 16 was not recommended because IDWR is informed and believes that these lands are not owned by the United States. The description of point of diversion and place of use of the right should, however, be corrected as shown in the attachment entitled "Recommended Water Rights Acquired Under State Law." This will include a stream segment in section 17 that was claimed by the United States that was not included in the IDWR's recommendation.

IDWR denies this portion of the objection and all allegations regarding this portion of the objection except as expressly admitted herein.
