Dear Mr. Webb:

Pursuant to the change in ownership request that has been submitted to the Department, we have changed the record of current ownership on the above listed claims **except A43-10353** to you. Upon comparison of the lands listed in the claims against the lands listed on the warranty deed, it was discovered the legal description of the place of use in claim A43-10353 was not included in the warranty deed as being conveyed to you.

If you could forward to me the proof this particular property has been sold to Webb Brothers, I will update the ownership of claim A43-10353. I am enclosing a copy of the claim for your reference.

Please find the enclosed copies of all the other computer records of the claim(s) noting the change in claimant. Review these records and if there is an error, or you have any questions, please contact this office.

Sincerely,

A handwritten signature in cursive script, appearing to read 'Trish Fawcett'.

Figure 1 is a hierarchical tree diagram showing the classification of 43-04060A through 43-04064F. The tree starts with a root node 43-04060, which branches into 43-04060A and 43-04060B. 43-04060A further branches into 43-04060C and 43-04060D. 43-04060B branches into 43-04060E and 43-04060F. The tree continues with similar branching patterns for 43-04061, 43-04062, 43-04063, and 43-04064, ending with 43-04064F. Each node is labeled with its ID and a value in 'ac' (e.g., 124 ac, 1317 ac, 2309 ac, 372 ac, 496 ac).

SPLIT RIGHT CALCULATIONS

All claims are based upon the identical 1441 irrigated acres included in each of the "C" extension claims.

All splits are for the same 124 acres from each claim. Only the diversion rates vary from one claim to another, therefore one base proportional calculation will apply to all claims.

All original claims have the same "C" extension and as another owner of a different system (originally split from the water right "B" extension rights) has claimed his portion under some of the "D" extension.

This split will separate all "C" extension claims into two parts, one with an "E" extension to be owned by Cleft of Rock Farms and the other with a "F" extension to be owned by Neibaur.

(note: there will be some of the claim numbers with no "D" extension claims filed)

PROPORTIONATE SHARE CALCULATIONS

Acres to be split = 124
Base acres = 1,441

for "E" extension claims $\frac{124}{1,441} = 0.08605$

for "F" extension claims $\frac{1,317}{1,441} = 0.9139$

A43-02417E -- OWNER -- CLEFT OF ROCK FARMS

RE: Evidence of Priority

RESPONSE DEADLINE
FEBRUARY 3, 1992

Dear Claimant:

The Notice(s) of Claim identified with the number shown above your name on the mailing label has been filed in the Snake River Basin Adjudication (SRBA). The Notice(s) indicate your water usage is based on "Beneficial Use" or a "Statutory Claim". Water rights of this type are established by the historical use of water, dating back to when water was first used for the purpose claimed. **The date of first use, known as the priority date, has not been confirmed by a License, Decree or Permit. The Department will soon conduct reviews &/or field exams for the claims in your area. Since the priority date of a beneficial use water right can not be confirmed by field examination, proof must be provided supporting the priority date you have claimed.**

The Department will not recommend the Notice(s) be decreed by the court as claimed if no evidence of a priority date is submitted.

Please find enclosed a computer printout of your Notice(s) and the pamphlet entitled "Evidence of Priority". The pamphlet describes the types of evidence required and suggests which documents will fulfill this requirement. I direct your attention to the two sections entitled "What Kind of Evidence is Required" and "Some Examples of Documents Which May Be Evidence of the Priority Date".

Please submit the required evidence supporting the priority date(s) by **February 3, 1992**, referencing all documents with the corresponding Notice number(s). If you have any questions not covered by this letter or the enclosed pamphlet, please contact this office.

Respectfully submitted,

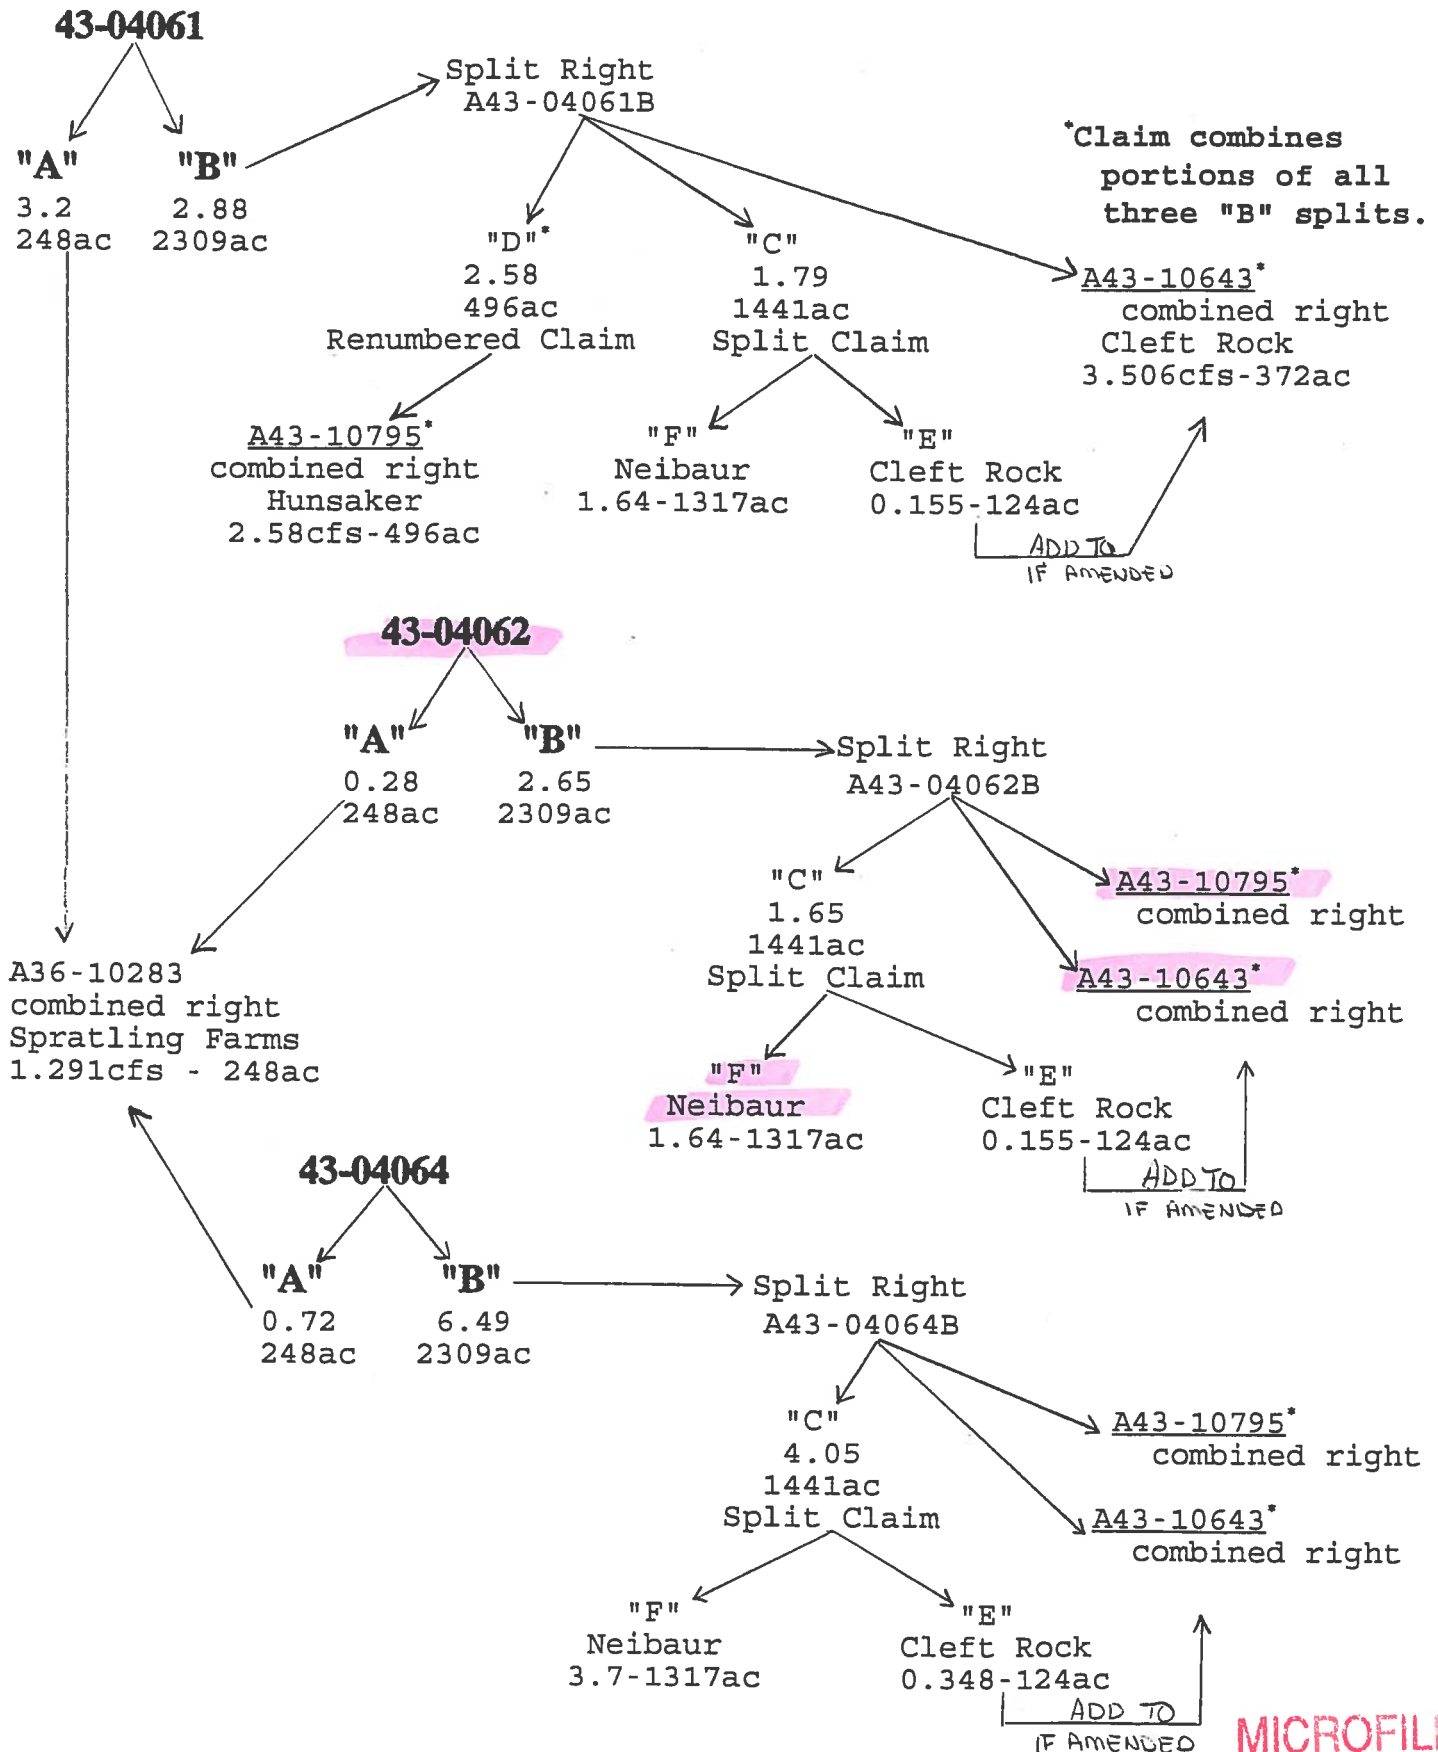

Allen Merritt, P.E.
Water Rights Supervisor

WELL #3 REMARKS

The below signed, representing the claimant corporation has been associated with the development of the lands that have benefited from the drilling of the well described in Section 12 since development first began, and has been familiar with the use of the irrigation water from the well since its first use. To my knowledge, the material found within the claim and the associated exhibits describe as accurately as possible the development that has occurred.

The primary purpose for filing the claim is to describe fully the uses and therefore the associated rights that have been made and established with respect to the well located in the SE/4, NE/4, Section 12, T11S, R27E. There has already been established a licensed water right for the use of this well and is referred to as water right license #G-25400 and is made a part of this claim for informational purposes as Exhibit C. The well has been used to irrigate a maximum of 997 acres of land in connection with a second well located in Section 12, T11S, R27E. The well referred to in this claim is referred to by the owner as well #3 and the other well located in the SE/4, SE/4, Section 12 is referred to by the owner as well #4.

The prime purpose for filing this claim is to describe the maximum flow of water that has been diverted from this well and placed to beneficial use prior to 1963 and the change of the ground water laws in the State of Idaho. Attached as Exhibit B are two pages of an engineering report prepared by an employee of the then Idaho Department of Reclamation, Mr. Loy Johnson. The field examinations referred to in the report were made on May 9, 1962, but the undersigned did not accompany Mr. Johnson as he made these observations. At the time that well #3 was measured, the well was not producing the maximum flow of water that has been capable of producing and has produced. Therefore, this claim is for 2.93 c.f.s. The well had produced much more in the past and on May 9, 1962, when Mr. Johnson measured the well, it was only producing 2.87 c.f.s. The well pump, and more particularly the associated bowles occasionally needed to be reworked to keep the well at maximum production and the well was not at maximum production at the time of the visit by Mr. Johnson. Affidavits are attached by others who are familiar with the maximum production from the well to document the right for this increased flow.

The purpose of this claim is to show that an increased flow right should be granted since the well has produced significantly more than the amount measured by Mr. Johnson. The water right previously granted was limited by the amount filed for. Therefore, even though more water was measured and produced from well #3 and #4, a license was issued only for 5.0 c.f.s. The total produced by these two wells at one time is 12.3 c.f.s. or 7.3 c.f.s. more than licensed. This is the increased flow claimed over the license in this claim and a claim filed on well #4. This claim therefore, is to document the water right for increased flow over and above the 5 c.f.s. No change in acreage location or amount is claimed.

G. T. MATTHEWS, being first duly sworn on his oath, deposes and says:

The affiant personally observed the development of wells and land in Section 12 and 13, T11S, R27E. The affiant was aware that a well was first drilled and used to irrigate land in the Section in 1957 as the affiant is a land owner, rancher-farmer in the immediate area of the lands described in the Raft River Valley. The affiant on occasion traded work with the developers of the land in Section 12 and 13 and so on occasion had opportunity to participate in the early development and irrigation of the lands described. The affiant attests to the fact that crops of potatoes, hay, grain, beets and beans have been successfully raised on the lands described on several years by the use of irrigation from the well located in the SE/4, NE/4, Section 12, T11S, R27E.
