	)	21-12911, and 21-12919

I. FINDINGS OF FACT

A notice of claim was filed for each of these water rights pursuant to I.C. § 42-1409. The Director of the State of Idaho Department of Water Resources examined the water system for this reporting area. The *Director's Report* contained recommendations for the elements of these water rights.

Objections and Responses were filed by various parties. A *Motion to File Amended Notice of Claim* was filed on August 19, 2010 by multiple claimants to assert a recovered water/recharge theory (hereafter "rec/rec"). That theory and the related *Amended Claims* were later withdrawn by the claimants in consolidated subcase 00-92020.

A. Rec/Rec

Subsequently, IDWR reviewed its *Director's Reports* for the rec/rec subcases to insure that it had included the elements from prior decrees, licenses and transfers. These subcases were identified by IDWR as needing changes and were placed on the list of rec/rec subcases set for trial.

Amended Director's Reports were filed for these water rights on May 30, 2012. The *Amended Director's Reports* were placed on the Docket Sheet. No objections were filed to the *Amended Director's Reports*, and the time for filing such objections has now expired. In addition, a Status Conference was held on July 18, 2012. The parties agreed that these subcases be recommended and decreed with the elements of the *Amended Director's Reports*.

B. Digital Boundary

The place of use for these rights is a digital boundary and is illustrated by the map overlay attached to the *Recommendations for Partial Decree*. The digital boundary for the place of use is described on a CD-Rom filed with the court.

II. CONCLUSIONS OF LAW

Therefore, based on the file and record herein, IT IS RECOMMENDED that these water rights be **decreed** with the elements set forth in the attached *Special Master's Recommendations for Partial Decree*.

DATED: July 31, 2012.
