RE: Evidence of Priority

RESPONSE DEADLINE
FEBRUARY 3, 1992

Dear Claimant:

The Notice(s) of Claim identified with the number shown above your name on the mailing label has been filed in the Snake River Basin Adjudication (SRBA). The Notice(s) indicate your water usage is based on "Beneficial Use" or a "Statutory Claim". Water rights of this type are established by the historical use of water, dating back to when water was first used for the purpose claimed. **The date of first use, known as the priority date, has not been confirmed by a License, Decree or Permit.** The Department will soon conduct reviews &/or field exams for the claims in your area. Since the priority date of a beneficial use water right can not be confirmed by field examination, **proof must be provided supporting the priority date you have claimed.**

The Department will not recommend the Notice(s) be decreed by the court as claimed if no evidence of a priority date is submitted.

Please find enclosed a computer printout of your Notice(s) and the pamphlet entitled "Evidence of Priority". The pamphlet describes the types of evidence required and suggests which documents will fulfill this requirement. I direct your attention to the two sections entitled "What Kind of Evidence is Required" and "Some Examples of Documents Which May Be Evidence of the Priority Date".

Please submit the required evidence supporting the priority date(s) by **February 3, 1992**, referencing all documents with the corresponding Notice number(s). If you have any questions not covered by this letter or the enclosed pamphlet, please contact this office.

Respectfully submitted,

Allen Merritt, P.E.
Water Rights Supervisor

A F F I D A V I T

STATE OF IDAHO)
 :
COUNTY OF CASSIA)

Elbert L. Durfee, being first duly sworn, deposes and says: that he was a resident of Almo, County of Cassia, State of Idaho, during the years from February 12, 1906 to the date of this affidavit. During the summer of 1942 I dug a trench from the spring in the west side of the Northeast Quarter of the Southeast Quarter (NE 1/4 SE 1/4) in Section Sixteen (16), Township fifteen (15) South, Range twenty-four (24) East of the Boise Meridian. I laid a four (4) inch orange burg pipe. I began using the water in my milk barn in September 1942 and the next year and subsequent years thereafter used the water for my garden and livestock. The spring flows .280 cubic feet per second.

Field Exam Notes

Field Exam Date: 08-26-1999

Claim No: A43-04116

Agent: Vikie Hancock

Claimant Bruce Durfee accompanied me on the Field Exam.

This claim is for irrigation and domestic use from a spring. The point of diversion was found in the NENESE Section 16 as claimed. It consists of a mound of dirt underneath which, according to the claimant, lies the head of the conveyance pipe. There was no other evidence of a spring or pipeline, as it is buried all the way to the place of use.

The primary place of use is the homestead to the east of the county road, in the NW SW section 15. It was originally used to cool milk in the barn and for the irrigation of the orchard, extensive vegetable garden and lawn around the house, as well as to supplement Almo Water Company share water in the pastures directly adjacent to the house on the south and east. It is still used on the lawn and pastures and to a marginal extent on the garden and orchard area. Claimant's mother now lives alone at the house and no longer plants a large garden, but claimant irrigates the property for her. The 4-inch pipe from the source first surfaces outside the barn in what is the garden and orchard area. It can then be directed to the pasture to the east, the lawn and the pasture to the south. The lawn is currently flooded using 2-inch plastic pipe around the perimeter, with valved openings at regular intervals. He is in the process of installing a small pump so that the lawn can be more easily irrigated by sprinkler.

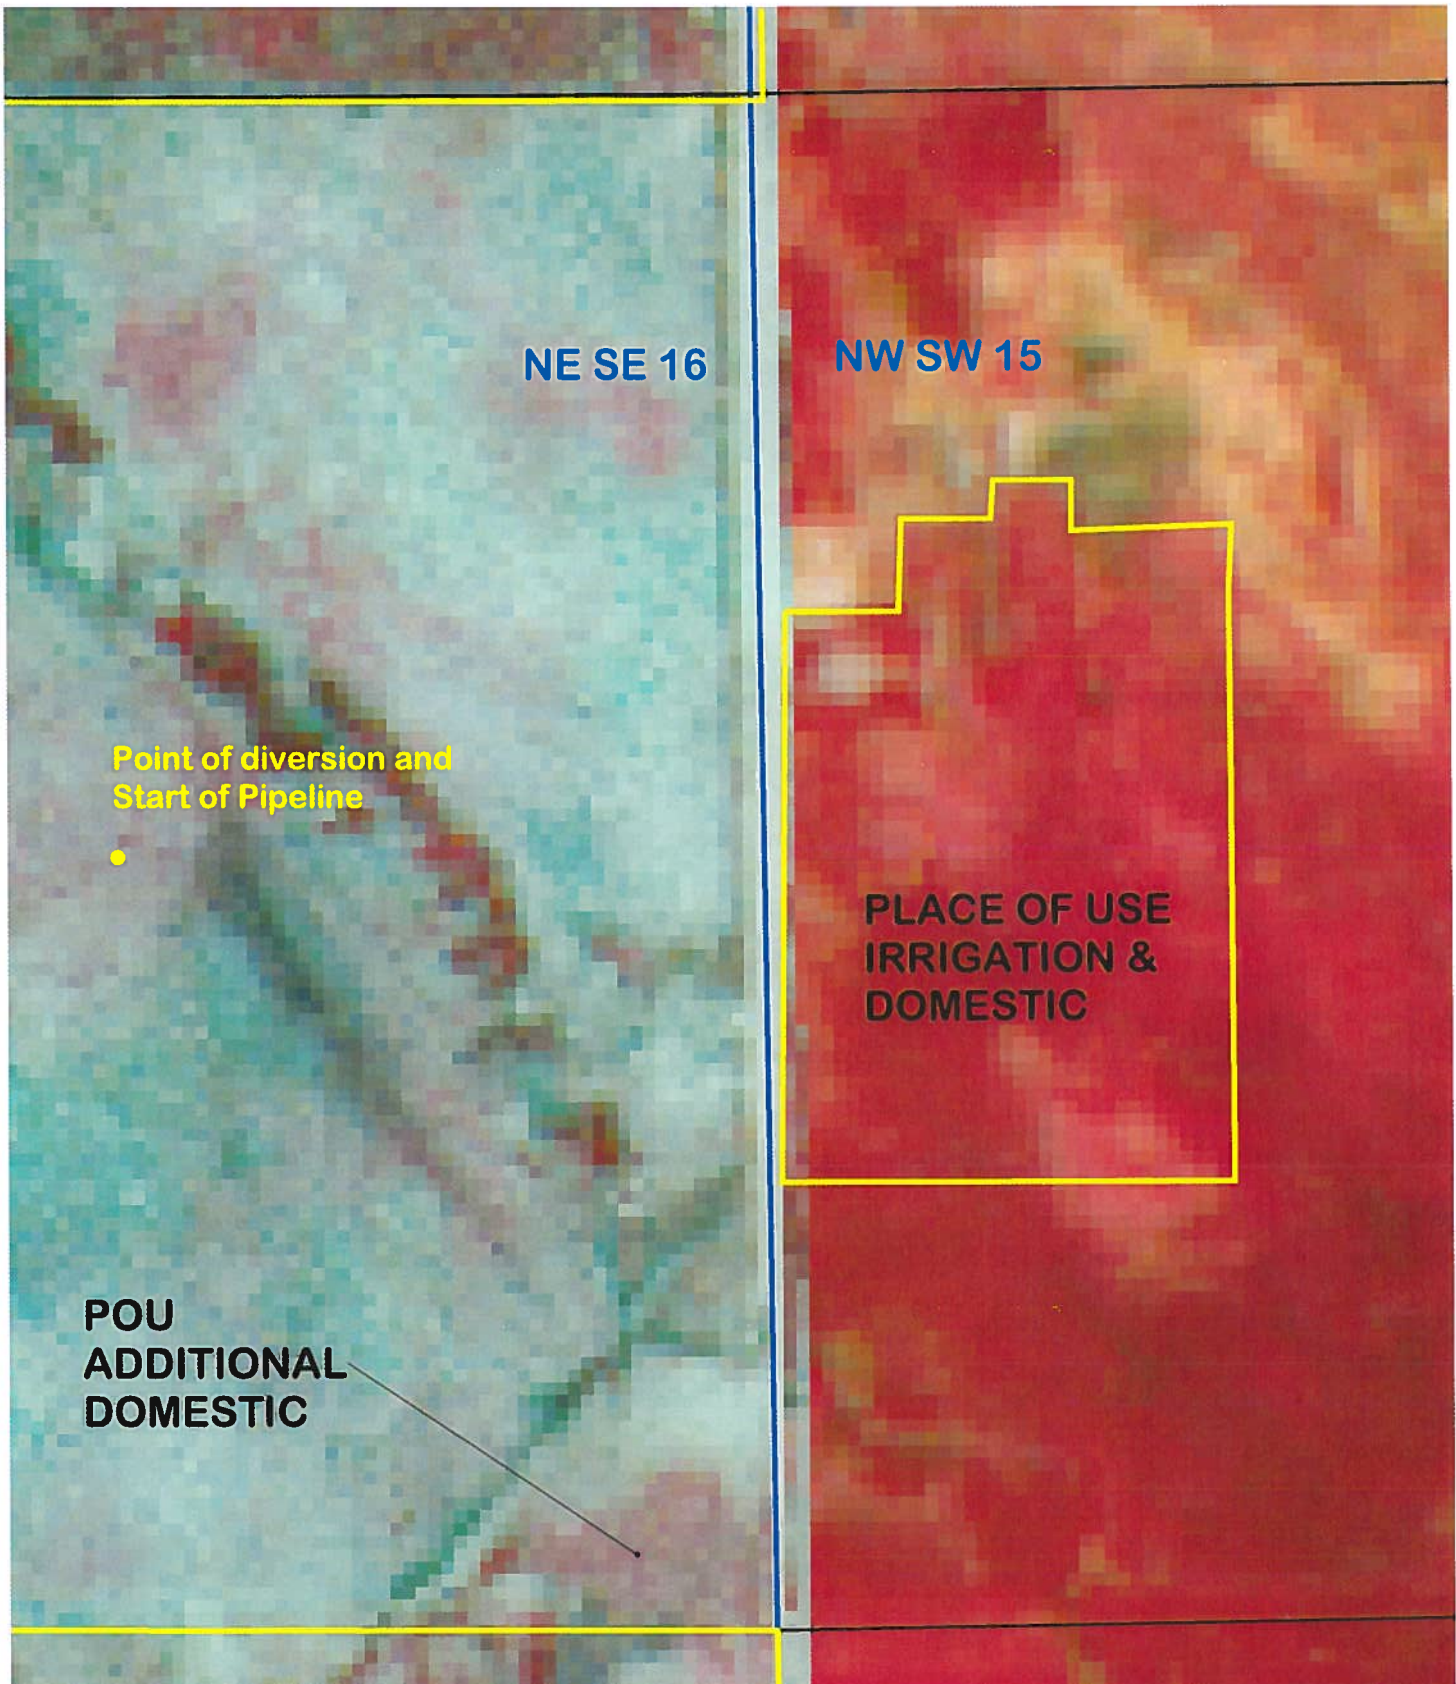

Claimant states that the 4-inch pipe runs full in the early spring and diminishes steadily throughout the summer. The pipe was about ½ full when I was there.

Water from the spring is also used to irrigate the lawn of a rental house across the road in the NE SE Section 16. Bruce Durfee's brother Kent lived in this house 25 years ago and the water was used for drinking. Now it is only used to water the lawn, which is less than ½ acre. This use was identified in the Statutory Claim filed by Bruce's father Elbert Durfee in 1981, but was not included in the AJ claim filed in 1989. Perhaps a claim for domestic use with a priority date circa 1974 is needed to protect this portion of the stat claim, if it is still being used.

	4	Spring head - looking North. Start of buried pipe here.

Audio tape # GRS R082620A

Notes: Spring found by claimant Bruce Durfee's father, who dug into a wet place in the pasture & ~~found~~ buried perforated pipe to capture the water. 4" pipe conveys the water beneath Almo Creek channel & the county road East to the place of use. Originally used in barn to cool milk & irrigate yard & orchard around house in Section 15. 25 yrs ago it was also used as drinking water at the house across the road in Section 16. It is still used for ~~the~~ lawn irrigation at this house for less than 1/2 acre. House is owned by claimant & rented out.

No portion of the pipeline could be seen until it surfaced at the pool. ~~Also~~ No sign of it was seen at the point where it crossed under the Almo Creek channel.
