AFFIDAVIT

I Roger C. Neddo of Malta, Idaho 83342
do hereby affirm that I have personal knowledge of the well located in the
NW 1/4 SW 1/4, Section 20, Township 135, Range 27 E, commonly known as
the # 4 well. The following information is accurate to the best of my
recollection.

Well # 4 belonging to Rodney Hall and originally located in the NW 1/4, SW
1/4, Section 20 Township 135, Range 27 E was dug in 1947 after I returned
home from the navy and before I went on my mission.

The farm was sold by my father in the early 1950.s. Therefore, it was dug well
before 1957.

Roger C Neddo
Signature

State of Idaho

County of Cassia

Subscribed and sworn to before me this 25th day of July, 2001.

Dear Mr. Chapman:

In response to your letter of May 26, 1989 and the reasons given therein for the late filing of the above mentioned Adjudication claims.

This letter is a denial of Extension of Time for the filing of the above referenced Notice of Claims to a Water Right. The original filing deadline for the claims is June 8, 1989. The extension is denied on the basis the claimant has not shown diligence in preparing these claims.

This extension is denied under the authority of §42-1409 (10), Idaho Code.

Signed this 1st day of June, 1989.

RE: Evidence of Priority

RESPONSE DEADLINE
FEBRUARY 3, 1992

Dear Claimant:

The Notice(s) of Claim identified with the number shown above your name on the mailing label has been filed in the Snake River Basin Adjudication (SRBA). The Notice(s) indicate your water usage is based on "Beneficial Use" or a "Statutory Claim". Water rights of this type are established by the historical use of water, dating back to when water was first used for the purpose claimed. **The date of first use, known as the priority date, has not been confirmed by a License, Decree or Permit.** The Department will soon conduct reviews &/or field exams for the claims in your area. Since the priority date of a beneficial use water right can not be confirmed by field examination, **proof must be provided supporting the priority date you have claimed.**

The Department will not recommend the Notice(s) be decreed by the court as claimed if no evidence of a priority date is submitted.

Please find enclosed a computer printout of your Notice(s) and the pamphlet entitled "Evidence of Priority". The pamphlet describes the types of evidence required and suggests which documents will fulfill this requirement. I direct your attention to the two sections entitled **"What Kind of Evidence is Required"** and **"Some Examples of Documents Which May Be Evidence of the Priority Date"**.

Please submit the required evidence supporting the priority date(s) by **February 3, 1992**, referencing all documents with the corresponding Notice number(s). If you have any questions not covered by this letter or the enclosed pamphlet, please contact this office.

Respectfully submitted,

Allen Merritt, P.E.
Water Rights Supervisor

**NOTICE OF ERROR
REPLY**

Please type or print clearly, fill out this form completely and mail.

Return this reply form to IDWR by the deadline date printed below if you want IDWR to change your recommendation or you want to let IDWR know that you agree with its recommendation.

YOUR DEADLINE FOR RETURNING A NOTICE OF ERROR REPLY IS: June 15, 2001

Water right number: 43-4121

DORIS J HALL
PO BOX 631
MALTA ID 83342
Telephone Number: (208)645-2517

RODNEY N HALL
PO BOX 631
MALTA ID 83342
Telephone Number: (208)645-2517

1. Describe the portion of the proposed recommendation with which you disagree (e.g. priority date, period of use, source):

Priority date Diversion rate

2. Describe the changes you wish to make in the proposed recommendation:

Priority date should be 1947 not 1957. Why was the Diversion Rate cut from the claimed 1.2 CFS?

3. Give a brief explanation as to why you disagree with these portions:

The date of priority should be 1947 not 1957. The farm was sold by George W Neddo to S. Devard Hall in about 1952. The well was there when the farm was sold.

☐ I AGREE with this proposed recommendation; no changes need to be made.

43-10636	Aj P/D	⊖	⊖	⊖	⊖	⊖	Combined right				
	Wr P/D					Φ	License & Statutory Claims	45 ac	45 ac	1.70 cfs	0.90 cfs
							License totals only	526 ac	633 ac PP/U		7.86 cfs
I am recommending 633 acres as the permissible place of use. Of that place of use, 526 acres were irrigated with 7.86 cfs. 633 acres at one inch per acre requires 12.66 cfs							Rate at 1" per acre = 12.66 cfs Licensed <u>7.86 cfs</u> Difference 4.80 cfs				
The system has been modified many times over the years with the specific capacity of an individual well going up and down for various reasons. The best information is that the system had the capability to deliver 1" per acre by 1963 (mandatory permit statutes). Historical pumping capacity is currently not available for the statutory claims. Lacking any data, I have recommended the statutory claims on a percentage basis for the balance of the diversion rate exceeding the combined licensed rates up to one inch per acre based upon my understanding of the historical irrigated place of use.											
The recommended place of use consists of 633 acres which includes all groundwater rights and previously decreed surface water rights. The surface water rights are 43-145 and 43-324											
Different system ↓↓											
43-2306A	P/D					⊖	License, Claimed as B/U		0.80 cfs	0.80 cfs	

Claims 43-04119, 43-04120, & 43-04121 identified wells 1 thru 4 as the point of diversions for each claim. The original statutory claims identified each claim with only one well as shown in the table above. The basis of the adjudication analysis starts with the use as identified in the statutory claims and then expands based upon additional information as provided by the adjudication claim and owner. The 400 acres claimed under the statutory claims are represented by Raft River water under 43-00324 for ground in Sec 19 & 20 and Cassia Creek

water under 43-00145 for the ground in Sec 18. Neither acres by quarter/quarter or total acres are given in the Jobe Adams decree.

ANALYSIS BY INDIVIDUAL CLAIM

43-04119 identified **well # 1** as the original source with a priority date of 4-1-1921. Charles Pulsiphor submitted an affidavit in 1948 and an additional 3 affidavits were submitted in 1981, with the statutory claim, that indicate that Charles Pulsiphor drilled the well in 1921 and then put it to beneficial use that year. The 1948 affidavit identified a place of use of approximately 240 acres. The subsequent affidavits enlarged the claimed place of use to 400 acres. The original well was an 'open pit' lined with orange berg. Hall indicated that the well water was delivered to the place of use via a parma water lifter and a gravity ditch system. The well and delivery system has changed several times over the years. Currently there is a 100-hp motor on the well. See the table above for rate and acre limitations.

43-04120 identified **well # 3** as the original source with a priority date of 4-1-1941. Affidavits submitted with the statutory claim indicate that the well was drilled in 1940 and that beneficial use first occurred in 1941. At this time the original delivery system is unknown. When 43-02373 was licensed, this well was included in the P/D listing. The licensing field exam identified a 10 Hp motor and a layne-bowler pump with 8 inch discharge on the well and that the delivery rate was 1.68 cfs. Hall identified the 4 quarters to the west and north of the well location as the original place of use. I believe that the current motor on the well to be 100 Hp. See the table above for rate and acre limitations.

43-04121 identified **well # 4** (in Section 18) as the original source with a priority date of 4-1-1957 (on the claim itself). The affidavits indicate that the well is in Section 20. I believe that the affidavits are incorrect and that the claim form itself represents what the affidavits were identifying. Affidavits submitted with the statutory claim indicate that the well was drilled in 1957 and that beneficial use first occurred in that year. The original pumping system was not identified in the statutory claim or the attached affidavits but the affidavits identified the diversion rate at 1.20 cfs. Hall identified the NE $\frac{1}{4}$ of sec 18 as the original place of use. I am therefore recommending this claim for the found 40 acres and at 0.80 cfs (one inch per acre). The statutory claim and the adjudication claim identified 400 acres as the place of use. This well was also part of 43-02424.

43-04122 identified **well # 2** as the original source with a priority date of 4-1-1933. Affidavits submitted with the statutory claim indicate that the well was drilled in 1933 and that beneficial use first occurred in that year. The original pumping system was not identified in the statutory claim or the attached affidavits but the affidavits identified the diversion rate at 2.0 cfs. This well is located at the southern end of the recommended place of use and the natural flow for the property is basically south to north. The historical irrigated place of use may have been smaller than the claimed place of use. However, as it is physically possible to irrigate all or nearly all of the claimed place of use under a gravity system from the original well, I am recognizing the currently irrigated acres within the claimed place of use (398 acres).

43-02373 identified **wells 1, 2 & 3** as the original licensed points of diversion. The priority date for this right is 1-25-1952. The license indicated a 291-acre place of use within the 400-acre place of use identified in statutory claims 43-04119 thru 43-04122. The licensing field examination identified the permitted acres as part of the irrigated place of use on item 7 of the report but excluded a significant portion of the permitted place of use on the section grid layout. The E $\frac{1}{2}$ NW $\frac{1}{4}$ of sec 20 is BLM property and was irrigated at that time, but according to Rodney Hall the effort to obtain ownership of that ground fell through and was therefore excluded from this right. The ground is not currently being irrigated. The NESE of Sec 19 was also excluded from the recommended place of use. Well # 2 is located in the SW corner of that quarter/quarter and according to Rodney Hall, ditches ran both north and east from this well. As the other forty acre tracts 'down hill' from this point were recommended it is unlikely that this tract was dry. Why it was excluded from the recommendation is not clear in the field examination. The same general circumstance exists for half of the NENE of Sec 19 and the SENE of Sec 18. From Raft River east for generally $\frac{1}{2}$ mile the irrigated ground is flat with little slope. Beyond the $\frac{3}{4}$ mile range the slope increases and that ground is not irrigated.

Based upon the information currently available I believe that the majority of the 400 acre place of use was irrigated prior to the licensing field exam for 43-02373 and can be recognized under the statutory claims.

43-02424 was licensed from **well # 4** and has a priority date of 4-4-1955. The original licensed place of use included portions of the NENE and SWNE of Sec 18 and additional ground in Sec 7. Mr. Hall filed an application

for transfer in 1992. The application was not accepted as Glen Saxton noted that the actual change in place of use occurred prior to 1987 and therefore could be recognized through the adjudication process. The change was to move the irrigation from the ground in Sec 7 to ground in the W $\frac{1}{2}$ NW $\frac{1}{4}$ and the NWSW of Sec 17

ANALYSIS OF A43-10636 WITH A CLAIMED PRIORITY DATE OF 4-1-1946

This claim claims all 5 points of diversion but identifies only 45 acres in the W $\frac{1}{2}$ NE $\frac{1}{4}$ of Sec 18 as the place of use. As filed, this claim represents a combination of the following rights 43-2306 (a portion), 43-04117 and 43-04231.

43-02306 was licensed with a priority date of 2-5-1948. The claimed priority date is 4-1-1946. Evidence of priority supporting the 1946 date was submitted. This right was licensed for 85 acres at 1.70 cfs. The licensed place of use was split through an ownership change for a portion of the property in 1979. Hitt retained 40 acres and 0.80 cfs and Hall obtained 45 acres and 0.90 cfs. Subsequently the Hitt property was purchased by Hall (change of ownership submitted in 1999) but was placed in the name of Valley River Farms LLC and is recommended as 43-2306A. It is not recommended within the permissible place of use covered by a majority of the Hall claims.

This claim (43-10636) is being recommended for the 45 claimed and previously licensed acres that were identified in the original license 43-2306. The statutory claims identified in the original claim are not recognized under this right. I am recommending the 4 wells identified under the other rights but not the well recommended under 43-2306A. That well was owned by Hitt until the 1990s and was not part of the Hall system at the commencement of the adjudication.

Claims identifying **Sec 18 NENE** as the place of use.

The statutory claim **43-04117** shows a priority date of 4-1-1952 as the date that water from **well # 5** was applied to 15 acres in the NENE of Sec 18.

The statutory claim **43-04231** shows a priority date of 4-1-1953 and lists **wells 1, 2, 3, and 4** as the diversion points. The place of use is listed as 34 acres within the NENE of Sec 18. A statement on the statutory claim form indicates that 6 acres in the NE corner of that quarter/quarter is irrigated from a different system.

Claim A43-10636 was amended on 2-6-1992 to delete the claimed 40 acres in Sec 18 NENE. Remarks state that those 40 acres were being claimed under A43-02424. Although the place of use was reduced by 40 acres a corresponding reduction in the diversion rate was not made.

Because both 43-04117 and 43-04231 both specifically identified the NENE of Sec 18 and no other acres the inference is that they should no longer be considered relevant to this claim.
That leaves 43-02306 as the basis for this claim.

Available information does not indicate that all 5 wells were tied together in 1946 nor does the licensing information indicate that there was a combined system as of the field verification conducted on 8-1-1951. Proof of Completion of Works signed and dated 12-5-1950 by Grant Hitt. That proof included a statement that ground on the other side of the river was not watered by this well. The sale and splitting of the water right in 1979 indicates that the lands were to be irrigated independently. Hall did not obtain ownership of the entire licensed place of use until the 1990s.

STATE OF IDAHO

Section 42-225a, Idaho Code

CLAIM TO A WATER RIGHT

Under the provisions of Section 42-225a, Idaho Code, a person may file a claim to a right to use water which has been established by diversion and application to beneficial use. The filing of this claim does not confirm the water right but will serve for information purposes only. It may, however, become the basis for future adjudication of the water right by the Court.

Notice is hereby given that Rodney Hall (name of claimant)
of Malta, Idaho (mailing address) claims a right to the diversion and beneficial use of
the public water of the State of Idaho

The extent and nature of said claim is as follows:

- (1) Describe source of water: (name of stream, lake, spring, etc., or ground water) Ground Water
_____, tributary to _____
- (2) Describe the purpose for which the water has been used and the time during the year when you have used the right claimed:

Amount <u>1.2 cfs</u>	Use <u>Irrigation</u>	Period of Use: From <u>3-15</u> To <u>11-15</u>
Amount _____	Use _____	Period of Use: From _____ To _____
Amount _____	Use _____	Period of Use: From _____ To _____
(cfs, gpm or a/l)	(dom., irri., stock, etc.)	(both dates inclusive)

- (3) Total quantity of water claimed: 1.2 cubic feet per second, or _____ acre feet per annum, and/or _____ gallons per minute.

- (4) Priority claimed: (the date water was first applied to beneficial use) April 1, 1957

A claim is not acceptable on a ground-water source with a priority later than March 25, 1963 or on a surface-water source with a priority later than May 20, 1971. An exception to this rule is that a claim may be filed on domestic use from a ground-water source.

- (5) A) Point of diversion: (give location of point where water is diverted from its source) Well #4
SW ¼ NE ¼, Sec. 18, Twp. 13S Rgn 27E B. M. County of Cassia
Additional points of diversion:

B) Describe means of diversion of water: (pump and pipeline, well, diversion dam, reservoir, length of ditch and field, etc.) Give sizes and capacities; be as specific as possible. Well equipped with electric pump and motor.

- (6) A) Describe location of use by listing number of irrigated acres within each 40-acre tract in appropriate box. If use is not for irrigation, place an "X" in appropriate box to show location.

[illegible]

Total No. of acres 400

- B) If the water is used for other than irrigation, fully describe that use, being as specific as possible. N/A

- (7) If you are claiming water as a member of an organization, list name of organization: N/A

(8) Remarks This claim is an effort to clarify the water rights as established through diversion of water to beneficial use in the past. Many wells were hand dug or drilled at different times to provide water to the lands as described. The aggregate quantity of water is within the statutory limit as set by the State of Idaho.

Scale: 2 inches equal 1 mile.

Map should show the location of the point of diversion and the place of use of the water by 40-acre subdivisions, section, township and range of the public land survey system.

State of Idaho)
County of Ada)

Be it known that the undersigned, being duly sworn, deposes and says that he, she, they subscribed the foregoing claim to a water right, together with all attached information, and that the contents and facts therein are true to the best of the affiant's knowledge.

Sworn to before me this 3rd day of August, 19 81.
