RE: Evidence of Priority

RESPONSE DEADLINE
FEBRUARY 3, 1992

Dear Claimant:

The Notice(s) of Claim identified with the number shown above your name on the mailing label has been filed in the Snake River Basin Adjudication (SRBA). The Notice(s) indicate your water usage is based on "Beneficial Use" or a "Statutory Claim". Water rights of this type are established by the historical use of water, dating back to when water was first used for the purpose claimed. **The date of first use, known as the priority date, has not been confirmed by a License, Decree or Permit. The Department will soon conduct reviews &/or field exams for the claims in your area. Since the priority date of a beneficial use water right can not be confirmed by field examination, proof must be provided supporting the priority date you have claimed.**

The Department will not recommend the Notice(s) be decreed by the court as claimed if no evidence of a priority date is submitted.

Please find enclosed a computer printout of your Notice(s) and the pamphlet entitled "Evidence of Priority". The pamphlet describes the types of evidence required and suggests which documents will fulfill this requirement. I direct your attention to the two sections entitled "What Kind of Evidence is Required" and "Some Examples of Documents Which May Be Evidence of the Priority Date".

Please submit the required evidence supporting the priority date(s) by **February 3, 1992**, referencing all documents with the corresponding Notice number(s). If you have any questions not covered by this letter or the enclosed pamphlet, please contact this office.

Respectfully submitted,

Allen Merritt, P.E.
Water Rights Supervisor

I called Mr. Erickson in response to his NOE received 6-11-01. I explained to him that my recommendation that his creeks were tributary to Taters Creek was based upon the USGS Maps that show the creeks running into Taters Creek. I said that it was a geographic description, but not necessarily a hydrologic description at the current time.

He said that he just wanted to have it strait in the file the relationship between the creeks so that someone couldn't come up there from Raft River and dig a ditch to his creeks to get the water. I told him that his NOE would be put into the permanent paper file for any future reference.

He indicated that other than that, he saw nothing wrong with the water rights.

It appears that Tater's Creek is formed by waste water from Center, South, Chokecherry and Waterfall Creeks. Therefore Tater's Creek starts at the Eastern end of my property.

All water from South, Center, Chokecherry and Waterfall Creeks basically sink on my property. Therefore, either waste water or springs form Tater's Creek.

Perhaps I misunderstand meaning of Source and tributary. Please give me a call at 208 824 5555 to further discuss the matter.

Regarding: Claim 43-4154

This claim is based upon a statutory claim of the same number. This claim includes multiple small stream sources that are co-mingled to flood irrigate roughly 500 acres of pasture. In an average year, all the streams usually dry up in August. Most of this ranch was homesteaded by claimant's grandfather. The eastern portion was subsequently purchased from the original homesteader, Durfee.

No measurement of the small streams was attempted at the time of the field exam. The recommended diversion amount for this right is based upon the number of acres found irrigated from the sources. Irrigation from the small streams begins in the middle of section 3, as indicated on the statutory and SRBA claims, however, I did locate some acres in the NW ¼ section 3 that were not claimed. Irrigation from Almo Creek & Blacksmith Creek begins in section 4 and extends west into the rest of the ranch in sections 3 and 2. These sources are claimed under license 43-2186. Claimant also owns shares in, and receives water through, Almo Water Company, from Almo Creek.

The points of diversion recommended are those found during my field exam. There has been some adjustment of POD since the license and the original stat claim filing.

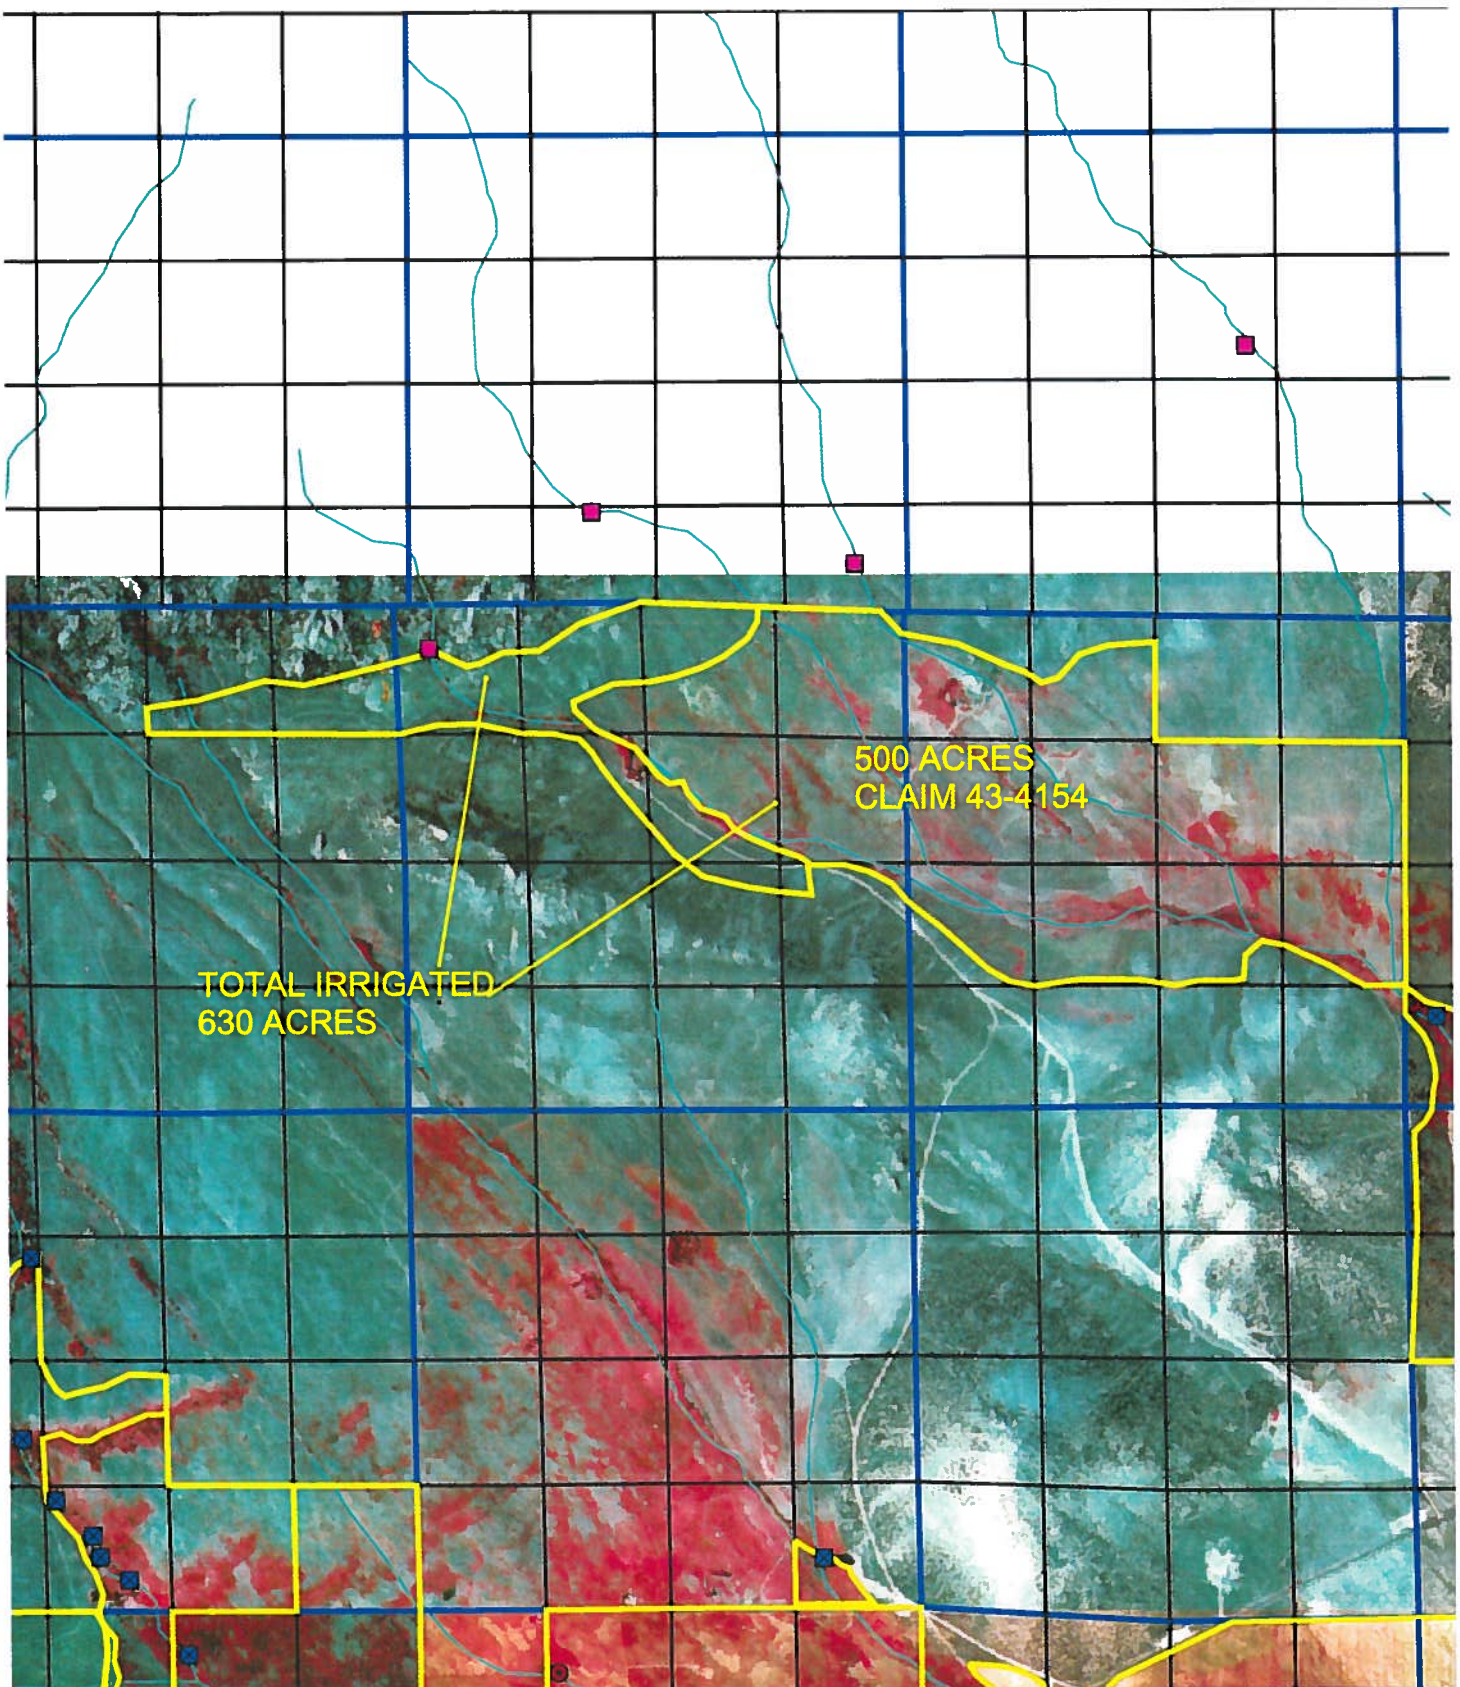

Priority date for irrigation use from the various small streams is substantiated by affidavits in file dated 1935 and 1940.

This right when combined with 43-2186 is limited to a total of 630 irrigated acres and 12.6 cfs.
