RE: 93-7362

Dear Mr. Seaton:

We are returning your Notice of Claim. We understand that your water right is for the following:

1. Ground water use from a well that supplies two households and ½ acre of irrigation. It also supplies stock water for 200 head of stock. The amount of water for the stock water use was listed as 0.13 cfs which is the amount that we recommend for dairy cattle. The amount of 0.05 cfs is water we recommend for range cattle.
2. Surface water use from two developed springs and instream stock watering for the cattle.

This will require two claims, one for the well and one for the surface. We completed two claims for your use based on this information. We listed the date of priority for the well as May 1, 1997. The date of priority on the surface water is blank. When a new diversion of surface water is started after May 20, 1971, an appropriation permit had to be obtained first. The date of priority is the date the water was first used regardless of who owned the property. If the water was first used after May 20, 1971, then you need to file an application to secure water rights.

Please list the priority date on the surface water claim, sign the claims and return them to office.

Thank you,

Kenneth Knoblock
Water Resources Supervisor
