Dear Carter:

Attached are water claims A43-04164 and A43-4160 belonging to properties 504-4944 and 504-4898 respectively. These were returned as they had not been notarized and then copies were sent to you, or at least we believe they were. We hope these will be adequate and your records and ours will be correct.

If more need to be done please let us know.

Sincerely,

Ronald C. Johnson

RE: Evidence of Priority

RESPONSE DEADLINE
FEBRUARY 3, 1992

Dear Claimant:

The Notice(s) of Claim identified with the number shown above your name on the mailing label has been filed in the Snake River Basin Adjudication (SRBA). The Notice(s) indicate your water usage is based on "Beneficial Use" or a "Statutory Claim". Water rights of this type are established by the historical use of water, dating back to when water was first used for the purpose claimed. **The date of first use, known as the priority date, has not been confirmed by a License, Decree or Permit.** The Department will soon conduct reviews &/or field exams for the claims in your area. Since the priority date of a beneficial use water right can not be confirmed by field examination, **proof must be provided supporting the priority date you have claimed.**

The Department will not recommend the Notice(s) be decreed by the court as claimed if no evidence of a priority date is submitted.

Please find enclosed a computer printout of your Notice(s) and the pamphlet entitled "Evidence of Priority". The pamphlet describes the types of evidence required and suggests which documents will fulfill this requirement. I direct your attention to the two sections entitled "What Kind of Evidence is Required" and "Some Examples of Documents Which May Be Evidence of the Priority Date".

Please submit the required evidence supporting the priority date(s) by **February 3, 1992**, referencing all documents with the corresponding Notice number(s). If you have any questions not covered by this letter or the enclosed pamphlet, please contact this office.

Respectfully submitted,

Allen Merritt, P.E.
Water Rights Supervisor

4-25-01

CD

43-04164 Malta Meetinghouse

1954 - 1970 approximately 600 members

Malta 1st Ward 1995 - 2000 Average 380 members

Malta 2nd Ward 1995 - 2000 Average 341 members

Average 721 members

Allow 15 gallons per member @ 1 day per week

15 gallons x 600 members = 9000 gallons/week

9000 gallons/week x 52 weeks/year 468,000 gallons/year

$\frac{468,000 \text{ gallons/year}}{325,850 \text{ gallons/AF}} = 1.4 \text{ AF/year for domestic}$

Pumping rate = 55 gpm

$\frac{55 \text{ gpm}}{448.8 \text{ gpm/cfs}} = 0.12 \text{ cfs}$

Irrigation = 0.03 cfs (1 acre) and 4.0 AF

Domestic = 0.09 cfs (Meetinghouse) and 1.4 AF
0.12 cfs 5.4 AF

Evidence submitted supports a 1954 priority date. Church was moved north of original location, but amount of irrigation remained the same.

***** END OF REPORT *****

MALTA, IDAHO, WARD MEETINGHOUSE # 504-4944

Follow up on State of Idaho Water Resources Department request for number of people using the Malta Ward Meeting House in earlier years. R. William Nelson [(801) 240-1984] obtained from Church Historical Department microfilm #LR 5204 2 in Salt Lake City, Utah, the following:

1. Oct. 21, 1956, minutes of Malta Ward Conference, "there were 185 in attendance", minutes signed by Tell Taylor, Ward Clerk, and J. Henry Thompson, Bishop of Malta Ward.
2. Nov. 15, 1959, minutes of Malta Ward Conference "179 present", minutes signed by Tell Taylor, Ward Clerk, and J. Henry Thompson, Bishop of Malta Ward.
3. December 20, 1964, minutes of Malta Ward Conference, "approximately 175 were present", minutes signed by Reid C. Allred, Ward Clerk, and Harvey J. Wright, Bishop of Malta Ward.

In the Ward conference Minutes, the attendance is for a Sunday Sacrament Meeting, one of three congregational meetings held each Sunday. It does not include any week day attendance numbers, such as for Young Men, Young Women and Relief Society Meetings.

Also obtained were total Malta Ward membership numbers as of Dec. 31 of each year given below. Not all total ward members would have used the church house, so the actual use was likely more than the three Sunday numbers and less than the number of member listed below.

Malta Ward Membership on December 31 of Each Year

<u>Year</u>	<u>Number of Members</u>
1954	594
1955	555
1956	554
1957	560
1958	535
1959	542
1960	526
1961	540
1962	587
1963	593
1964	608
1965	592
1966	551
1967	548
1968	530
1969	587
1970	609

Note: There was only one Ward using the Meetinghouse during the years listed above. More recently both the Malta 1st Ward and Malta 2nd Ward have shared the Malta, Idaho Meetinghouse.

MALTA 1st WARD WHICH USES MALTA, IDAHO MEETINGHOUSE #504-4944

Form No. 243
9/81

Claim No.

2/3-4/16/4

504-4944

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

CLAIM TO A WATER RIGHT

Under the provisions of Section 42-243, Idaho Code, any person using or claiming rights to the public waters of Idaho established by diversion and application to a beneficial use must file a claim with the Department of Water Resources on or before June 30, 1983. Exempted from this filing are single family domestic uses as defined in Section 42-230(d), Idaho Code. Also exempted are rights represented by a permit, license, decree, adjudicated right, or a previously filed claim.

The filing of this claim does not confirm the water right claimed but failure to file may result in forfeiture of a water right.

Notice is hereby given that LDS Church, Malta Ward
(Name of Claimant)

40 Leo W. Hurst, Declo, ID 83323
(Mailing Address) (Zip Code)

Telephone No. 654-2685

claims a right to the diversion and beneficial use of the surface or ground water. The extent and nature of said claim is as follows:

- (1) Date of priority: (When was the water first applied to a beneficial use)

MAY 1, 1938

A claim is not acceptable on a ground water source with a priority later than March 26, 1963 or on a surface water source with a priority later than May 30, 1971. An exception is that a claim may be filed on single family domestic use from a ground water source.

- (2) Describe the source of water: (Name of stream, lake, spring, etc., or ground water)

Groundwater tributary to

- (3) Describe the purpose for which the water has been used and the time during the year when you have used the right claimed:

Quantity	(cfs, af)	Use	(Domestic, Irrigation, Stock, Etc.)	(Both dates inclusive)	
				(Mo., Day)	(Mo., Day)
Quantity <u>0.20</u>		Use <u>Domestic</u>		Period of Use From <u>1/1</u>	To <u>12/31</u>
Quantity <u>0.02</u>		Use <u>Irrigation</u>		Period of Use From <u>2/15</u>	To <u>11/15</u>
Quantity _____		Use _____		Period of Use From _____	To _____
Quantity _____		Use _____		Period of Use From _____	To _____
Quantity _____		Use _____		Period of Use From _____	To _____

- (4) 0.20 TOTAL QUANTITY USED.
(cfs, af)

- (5) A) Point of diversion: (Location of point where water is diverted from its source)

NW 1/4 NW 1/4, Sec. 12 Twp. 13S Rge. 26E B.M., County of Cassia

Additional points of diversion:

B) Describe means of diversion of water: (Pump and pipeline, well, diversion dam, reservoir, length of ditch and field, etc.). Give sizes and capacities; be as specific as possible. Describe any changes in the system and give the date of the change. 8 inch well - 81 ft deep, 3 HP pump

(6) A) Describe location of use by listing number of irrigated acres within each 40-acre tract in appropriate box. If use is not for irrigation, place an "X" in appropriate box to show location.

T	R	SEC.	NE¼				NW¼				SW¼				SE¼				TOTAL
			NE¼	NW¼	SW¼	SE¼	NE¼	NW¼	SW¼	SE¼	NE¼	NW¼	SW¼	SE¼	NE¼	NW¼	SW¼	SE¼	
135	26E	12																	1

No. of acres 1

B) If water is used for other than irrigation, fully describe that use, being as specific as possible:

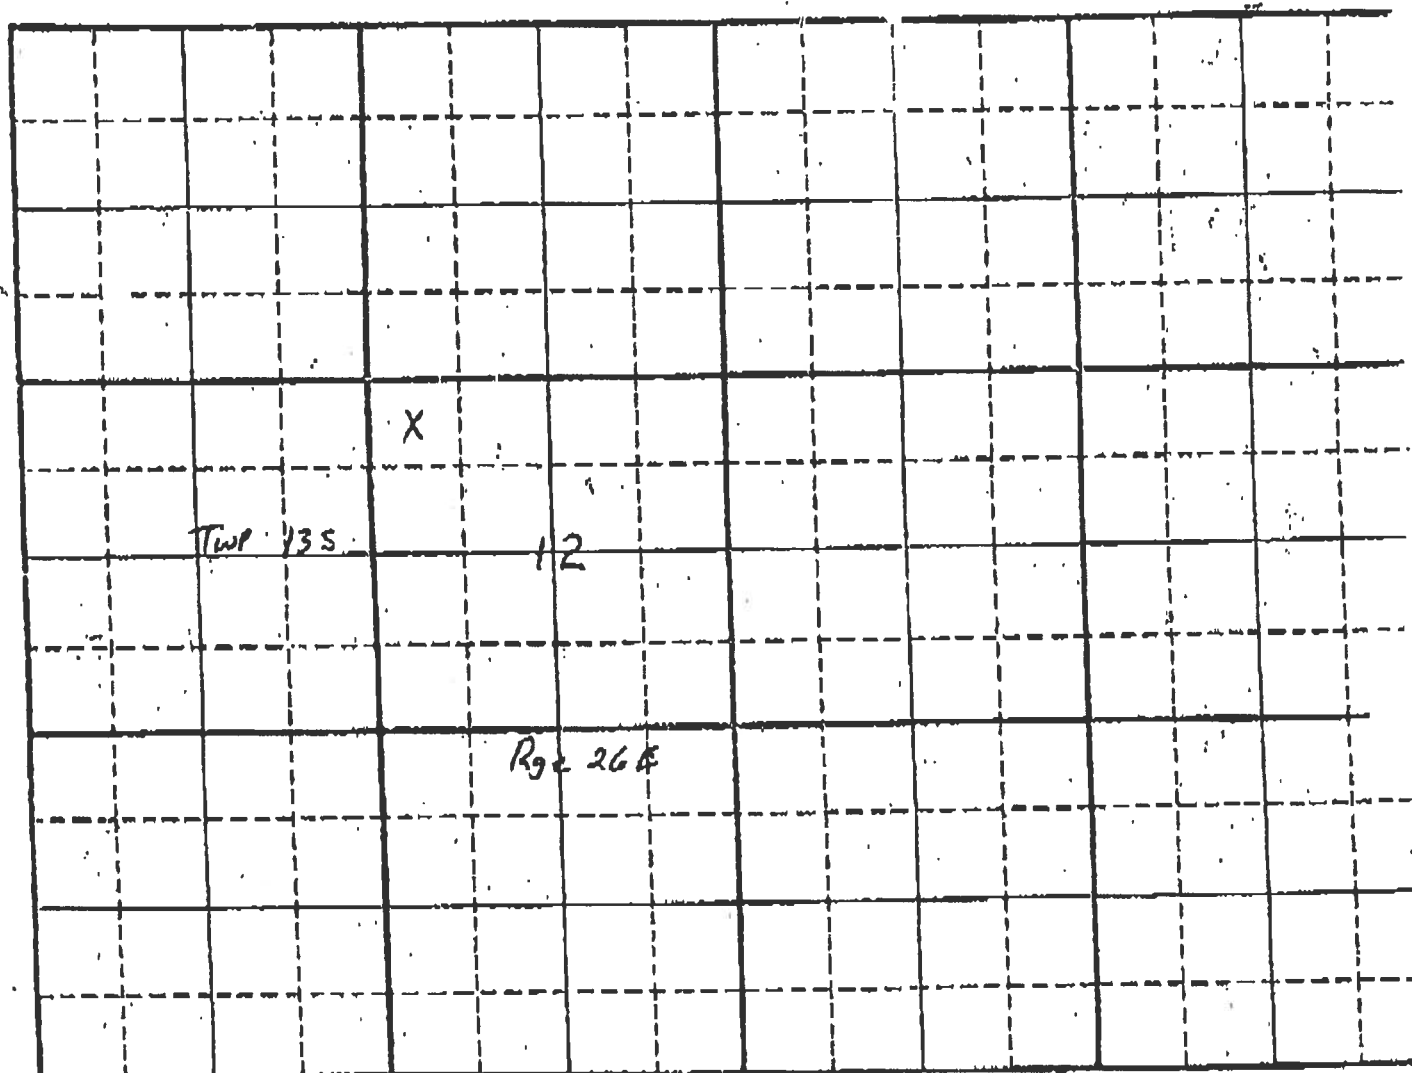

Domestic use in church building serving 250 people

NOTE: Include here the type and number of stock watered:

(7) If you are claiming water as a member of an organization, list name of organization:

LOS Church, DeLeon, stake

(8) Remarks Original Church was constructed in 1938. Present building
& well were constructed in 1979

Scale: 2 inches equal 1 mile.

Map should show the location of the point of diversion and the place of use of the water by 40-acre subdivisions, section, township and range of the public land survey system.

Data Submission for Estimating Well Pumping Capacity

This form is for documenting historic flow rate from a well based on available information including: flow measurements, pump curves or specifications, system characteristics such as motor horsepower, depth to water, discharge pressure, and irrigation system characteristics. The department is attempting to quantify the maximum rate of flow diverted and put to beneficial use in the years prior to November 1987.

If you have any questions regarding this data request, please contact either Scott King (208) 327-7897 or Cindy Bird (208) 327-5450. You may also dial the adjudication hotline (1-800-451-4129) and ask for Scott or Cindy. If you prefer to discuss these questions with us instead of completing the form, your call is welcomed. We can also be contacted by e-mail at sking@idwr.state.id.us and cbird@idwr.state.id.us

1) Rate of Flow measurements: 37 ~~(cfs)~~ or gpm)

Please give approximate date, person or entity performing measurement, description of measuring device and any other applicable data. Examples may include measurements made as part of an energy efficiency survey, which are often provided as a service through your electric utility.

2) Pump characteristic curves or specifications: Please include copy of pump curve, or state designed pumping capacity, rated flow and head, and approximate year of pump installation. Other helpful items may include the pump manufacturer, model number, and number of stages.

Pump - Grundfos

Model - 405 50 12 5 hp

Submitted to Id State 1/24/2000
Paul Schaper, FM group Mgr., completed forms

3) Pumping system characteristics:

Diversion rate can be determined by using power, pumping lift, discharge pressure, and estimated pumping efficiency. If the system has changed over time, you can provide information for several system configurations.

Year	Well pump motor horsepower	-Booster pump(s) motor horsepower	Depth to water, pump off (ft)	Depth to water, pump on (ft)	Discharge pressure (psi)
	5		35'	189'	40-50

4) Irrigation System:

Please provide description of the water delivery system. State number of lines and birds, nozzle size, and operating pressure(s) of impact-type sprinkler systems; designed rated flow for pivot systems. As above, if various systems have been used through the years, provide year as well Example:

1963 to 1974 - Well pump open discharges to ditches for flood irrigation using 50 siphons per set. Siphons were 1.5 inch diameter, 5 feet long.

1975 to 1984 - Six wheel lines with 32 birds per line, 5/32 inch nozzles operating at 60 to 70 psi at the sprinklers.

1985 to present - Eight tower center pivot with impact sprinklers and end gun, no corner catcher, designed for 1150 gpm. Also solid set hand lines in corners which operate separate of the pivot, operating a total of 250 birds per set, 9/64 inch nozzles operating at 65 to 75 psi at the sprinklers.

Design Parameters - 2" pipe - 50 GPM

5) Other information:

Please also include any other information that you feel may indicate maximum historic diversion rate for your well.

MEMORANDUM

TO: Files 43-2296B, 43-4005, 43-4208; 43-4160; 43-4161; 43-4164

FROM: Douglas Jones

DATE: 3/15/01

RE: Appt w/ Grant Cooper, Evidence of Priority

On 3/14/01 I met with Grant Cooper, a real estate and farm specialist for the LDS Church, about several different topics. Initially we talked about the LDS's portions of the several licenses recently split down in an owner change. We also conceptually discussed the Skaggs/BYU system and potential transfer plans, copies of some water right records were provided to Cooper.

The main topic of the meeting, for purposes of this memo, was to explain the need for evidence of priority on the above listed beneficial use rights. The first three rights are for the Stake Welfare Farm. Rights 43-4005 and -4208 appear to have dubious validity and identify a large flow rate for the described acres. Mr. Cooper was asked to develop information on how and when the system evolved, with particular emphasis on capacity changes. I also explained the supplemental conditions on license 43-2296B and the absence of claim filings on the Raft River decreed rights for the farm. Without surface water rights the ground water right may be disallowed, although it is currently drafted for recommendation as licensed. There is a means to store and distribute the surface rights, but it is uncertain where the water is diverted from Raft River. The ground water system capacity (~1300 to 1500 gpm) is currently much greater than the existing license allocates.

Right 43-4160 is for the Elba Ward acre of irrigation. The claim identifies a priority from ground water in the 1950's. No documentation has been provided and the recommendation is drafted for disallowal.

Right 43-4161 is for the Malta Ward recreational field. Right 43-4164 is for the ward building and surrounding grass areas. Neither have had evidence of priority submitted.

Mr. Cooper understood completely the need for the evidence of priority and consequences for not supplying the information. He also verbally confirmed the need to file claims on the some or all of the surface water rights for the Stake Farm. He was provided sheets for each of the surface rights that laid out the proportion of each right and the season of use. I also provided a brochure on Evidence of Priority. The time frame for submittal was discussed – our Preliminary Report is a couple or three weeks away, though anytime up to mid-Summer would be ok (Notice of Error time).

RE: Request for information on historic pumping rates

DEC 13 1999

The Idaho Department of Water Resources (IDWR) is preparing to recommend claims to water rights to the Snake River Basin Adjudication (SRBA) court for irrigation uses in the Raft River Basin. To facilitate this process, we are requesting data from you in order to estimate historic irrigation well pumping capacities. Specifically, we are requesting information regarding pumping flow rate for wells that have not been previously measured for water right licensing.

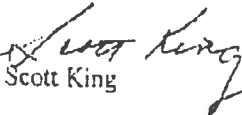

This request is made so that IDWR may estimate historic flow rate based on available information including past flow measurements, pump curves or specifications, system characteristics such as motor horsepower, depth to water, discharge pressure, and irrigation system characteristics. The department understands that water levels throughout much of the Raft River Basin have been declining for many years, most often reducing the water users' ability to divert at the same rate as previously able. The department is attempting to quantify the maximum rate of flow diverted and put to beneficial use in the years prior to November 1987.

IDWR will use the information you submit to make recommendations to the SRBA court for your water right claims. Specifically, recommendations will be made for diversion rate (cfs). The enclosed form will help us reach conclusions pertaining to water quantity recommendations for adjudication claims based on historic beneficial use rather than a decree or license.

The goal of this project is to determine historic maximum diversion rates. It is expected that many irrigation systems change over time. Please detail the system configuration that produced the highest flow put to beneficial use. Since this is a general form, some parts may not apply to your system. Include any additional detail that may help in determining historic flow rates. If you have any questions regarding this data request, or if you prefer to discuss these questions with us instead of completing the form, your call is welcomed. Contact either Scott King at (208) 327-7897 or Cindy Bird at (208) 327-5450. You may also dial the adjudication hotline (1-800-451-4129) and ask for Scott or Cindy. We can also be contacted by e-mail at sking@idwr.state.id.us and cbird@idwr.state.id.us

Please take a moment to complete the form or to give Cindy or I a telephone call. It would be most helpful if we could have this information by December 22, 1999.

Sincerely,

Scott King

Subject: WELL/WATER INFORMATION
Date: January 18, 2000

DEAR ALICE,

WE ARE ENCLOSING THE REQUESTED WELL AND WATER INFORMATION ON THE MALTA 1,2 LDS WARD AND ELBA LDS WARD. PLEASE NOTE THAT WE DO NOT HAVE IN OUR POSSESSION THE WELL LOG ON THE MALTA BALLFIELD. ALSO THERE IS NO UNDERGROUND SPRINKLER LAYOUT ON THIS PROPERTY BECAUSE THEY USE HAND LINES TO IRRIGATE WITH.

THERE ARE TWO COPIES OF EACH PROPERTY INCLUDED. WOULD YOU PLEASE FORWARD TO THE STATE THE NECESSARY COPIES.

THANK YOU

Data Submission for Estimating Well Pumping Capacity

This form is for documenting historic flow rate from a well based on available information including: flow measurements, pump curves or specifications, system characteristics such as motor horsepower, depth to water, discharge pressure, and irrigation system characteristics. The department is attempting to quantify the maximum rate of flow diverted and put to beneficial use in the years prior to November 1987.

If you have any questions regarding this data request, please contact either Scott King (208) 327-7897 or Cindy Bird (208) 327-5450. You may also dial the adjudication hotline (1-800-451-4129) and ask for Scott or Cindy. If you prefer to discuss these questions with us instead of completing the form, your call is welcomed. We can also be contacted by e-mail at sking@idwr.state.id.us and cbird@idwr.state.id.us

1) Rate of Flow measurements: 37 ~~feet~~ or gpm

Please give approximate date, person or entity performing measurement, description of measuring device and any other applicable data. Examples may include measurements made as part of an energy efficiency survey, which are often provided as a service through your electric utility.

2) Pump characteristic curves or specifications: Please include copy of pump curve, or state designed pumping capacity, rated flow and head, and approximate year of pump installation. Other helpful items may include the pump manufacturer, model number, and number of stages.

Pump - Grundfos

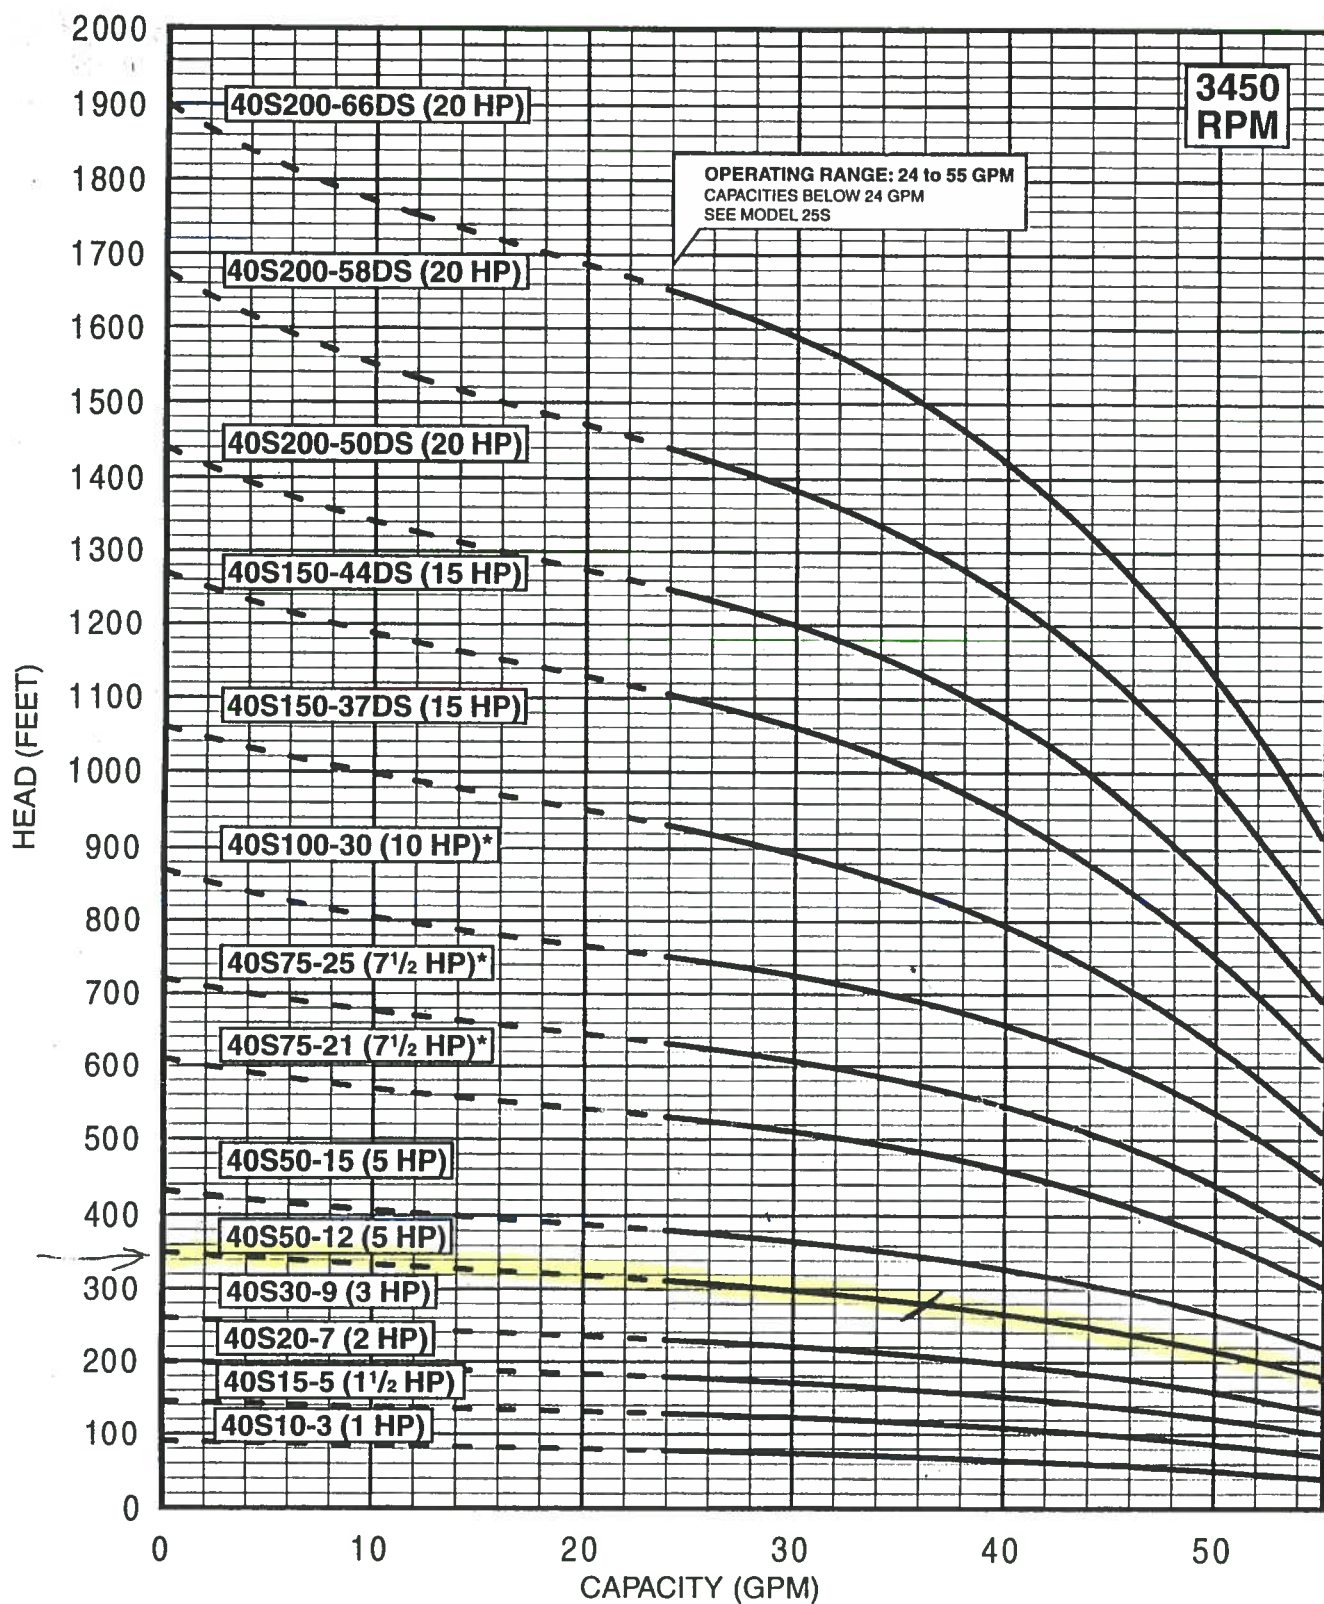

Model - 405 50 12

5 hp

FLOW RANGE: 24 - 55 GPM

OUTLET SIZE: 2 " NPT

NOMINAL DIA. 4"

SPECIFICATIONS SUBJECT TO CHANGE WITHOUT NOTICE.

4" MOTOR STANDARD, 1-10 HP/3450 RPM.

6" MOTOR STANDARD, 15-20 HP/3450 RPM.

* Also available with 6" motor.

Performance conforms to ISO 2548 Annex B
@ 5 ft. min. submergence.

3) Pumping system characteristics:

Diversion rate can be determined by using power, pumping lift, discharge pressure, and estimated pumping efficiency. If the system has changed over time, you can provide information for several system configurations.

Year	Well pump motor horsepower	-Booster pump(s) motor horsepower	Depth to water, pump off (ft)	Depth to water, pump on (ft)	Discharge pressure (psi)
	5		35'	189'	40-50

4) Irrigation System:

Please provide description of the water delivery system. State number of lines and birds, nozzle size, and operating pressure(s) of impact-type sprinkler systems; designed rated flow for pivot systems. As above, if various systems have been used through the years, provide year as well. Example:

1963 to 1974 - Well pump open discharges to ditches for flood irrigation using 50 siphons per set. Siphons were 1.5 inch diameter, 5 feet long.

1975 to 1984 - Six wheel lines with 32 birds per line, 5/32 inch nozzles operating at 60 to 70 psi at the sprinklers.

1985 to present - Eight tower center pivot with impact sprinklers and end gun, no corner catcher, designed for 1150 gpm. Also solid set hand lines in corners which operate separate of the pivot, operating a total of 250 birds per set, 9/64 inch nozzles operating at 65 to 75 psi at the sprinklers.

Design Parameters - 2" pipe - 50 GPM

5) Other information:

Please also include any other information that you feel may indicate maximum historic diversion rate for your well.

Estimated Pumping Rate Documentation Form

Flow Analysis Performed by: **Scott King**Date: **2/2/2000**

Page 1 of 1

Record ID	255	Measured Flow:	
Water Right No.	A43-04164	Designed Flow:	0.08 cfs
Name	LDS Church	HP/Eff Flow:	0.13 cfs <---Max
pod	13S26E12NWNW	Sprinkler Flow:	
year:		Pivot/System Flow:	0.10 cfs
Flow Measurement:		gpm	=
Curve/Pump Design:	37	gpm	= 0.08 cfs per pump curve at indicated design point
Horsepower / Efficiency Method			
Horsepower	5	hp	
PWL	130	ft	estimate, sking (pump set at 189', driller meas 130')
Disch Psi	50	psi	per form
PUMP Eff Estimate	0.73	%	
TDH	246	ft	
OHP	3.65	hp	
Flow	59	gpm	= 0.13 cfs
System Method:			
No Lines			Nozzle Equation: $Q=C*A*\sqrt{2*g*h} / \sqrt{1-r^4}$
Birds per line			C= 1.00 Nozzle coefficient; typical 0.97 to 1.00
Ttl no nozzles	0		r= 0.0000 ft Nozzle radius
Nozzle size		in	A= 0.00000 ft^2 Nozzle area
Nozzle pressure		psi	h= 0 ft Head
Flow per nozzle	0.00	gpm	g= 32.2 ft/sec^2 Gravitational constant
Sprinkler Flow	0	gpm	Q= 0.000 cfs Flow per nozzle
Percent Leaks		%	= 0.000 gpm Flow per nozzle
Total Flow	0	gpm	=
Pivot / System rating	45	gpm	= 0.10 cfs typical from sprinkler design plan

Comments / Data Supplied:

2/2/2000 snk

Per returned form:

Well deepened in 1994 per included driller's report. Tested at 60 gpm, pumping level 130', 1 hour.

SWL per driller's report at 55 ft.

Grundfos pump curve included, 5-hp, rated 24 to 55 gpm (0.05 to 0.12 cfs). Based on this curve and the pumping level obtained by the driller, the pump could pump 55 gpm at 20 psi, 130 ft pwl.

"Design Parameters - 2" pipe - 50 gpm"

Final recommendation: capacity of pump = 55 gpm = 0.12 cfs.

MEMORANDUM

DATE: February 26, 2001

TO: Carter Fritschle

FROM: Cindy E. Bird

REF: Claims 43-4161 and 43-4164

PURPOSE: Determine the location listed on the claims.

February 21, 2001 I visited the Church of Jesus Christ Latter Day Saints property in Malta and spoke with one on the Church members. She clarified that claim 43-4164 is for the Church and 43-4161 is for the Malta Ballpark. The 1987-88 NAPP Photograph in figures 1 below shows the LDS Church site on the corner of Third Street N. and First Street W. and the Malta Ward Ball Field one block south on Second Street N. and First Street W.

Figure 1. 1987-88 NAPP Photography showing the LDS place of use for claims 43-4164 and 43-4161.

The legal description of the church is the SENWNW of section 12, township 13 south, range 26 east of the Boise Meridian.

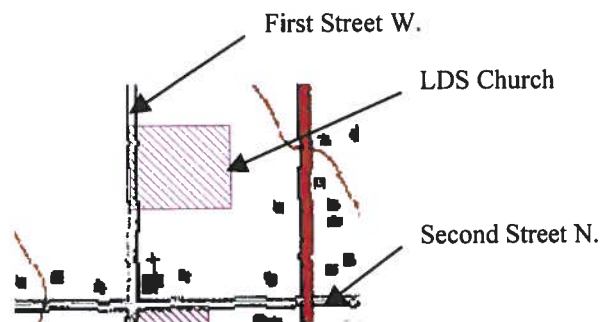

Figure 2. LDS Church claim 43-4164

Photo 1. Looking southeasterly at the claimed place of use for claim 43-4164.

Photo 2. Looking northwesterly at the southeast corner.

Malta Ward Ball Field, claim 43-4161, is located behind Raft River Electric in Malta as illustrated in figure 3 below. The property described is located in the NESWNW of section 12, township 13 south, range 26 east of the Boise Meridian.

The ball field has three sets of bleachers on the north end by Second Street N. The point of diversion (POD) is located on west side of the field approximately 100 feet from the intersection of Second Street N. and First Street W. in the locked green building shown in photo 4.

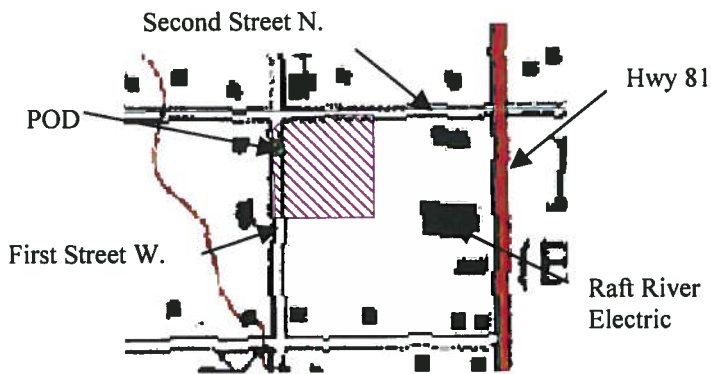

Figure 3. Malt Ward Ball Field

Photo 4. Malta Ward Ball Field POD.

Photo 5. Looking west at picnic area.

South of the point of diversion is a picnic area with restroom shown in photo 5. A small sandbox play area is located in the southeast corner of the park. Otherwise, the rest of the park area is planted in grass.

The Cassia County Assessors office lists a total of 3.5 acres for the LDS Church, which includes both the Church and ballpark. The Church has a large parking area to the south and east of the building. From the ArcView imagery the Church irrigates roughly 0.65 acres and

approximately 1.7 acres at the ballpark.

A contact for the LDS Churches in Idaho is Paul Schafer of Burley. The Burley phone directory lists a Paul O. Schafer, 520 Riverside Dr., Burley, Idaho, (208) 678-1246. Another contact in the Malta area is Todd Harris, with HARRIS AG. His home/work phone number is (208) 645-2382 and his cell phone number is 863-5663. At the time of my visit Todd Harris was out of the country and was expected back in week.
