Re: Order requiring measuring devices and headgates in Water District
73, Pahsimeroi River and Tributaries

Dear Sir,

Our headgate and measuring device is a contracted rectangular weir
located in Sec 35 T14N R22E. The GPS site ID # is A0011839. The
water source is The Pahsimeroi River, Grant Hamilton Diversion.

The structure is 42" wide X 60" high flush mount rectangular slide gate
with 6' self contained frame. Waterman R-5 or equivalent. Gate is
mounted to the existing concrete structure according to the
manufacturers recommendations.

Thank you,

Doug Robins

Subject: Furey Lane, Pahsimeroi River Fish Screen Structure, Headgate, and Measuring Device

Dear Mr. and Mrs. Robins:

Per your request, we are writing to express U.S. Fish and Wildlife Service's interest in working with you to install a fish screen, along with ensuring the existence of a properly functioning head gate and measuring device on the Furey Lane point of diversion. The point of diversion is on the Pahsimeroi River, which is located on lands administered by the Bureau of Land Management. We have obtained Fisheries Restoration Irrigation Mitigation Act (FRIMA) funding to consolidate the diversions and provide a new screen structure, headgate, and flow measuring device. Upgrades to the splitter box may also be made. We intend to work with Idaho Department of Fish and Game (IDFG), through Mike Larkin, to measure flow rates this spring after turn on to determine cfs for future screening purposes. We will complete design, construction, and implementation of the fish screen structure, head gate, and measuring device as soon as possible with a target date of summer or fall of this year. The actual fish screen will not be implemented until a fish population has returned to the area. Actual engineering designs are currently underway for the headgate, measuring device, and fish screen structure, and we will provide you with copies when they are completed. We hope this letter serves your needs to document that you are working with us to design and install a screen and associated diversion structures as soon as possible. We appreciate your cooperation in conserving bull trout and other species.

We understand you may use this information concerning communications with Idaho Department of Water Resources (IDWR). If you have any questions, please contact Tamara Wagner of my staff at (208) 685-6958.

Sincerely,

Jeff Foss, Acting Field Office Supervisor
