RE: AMENDMENT TO 43-4211

Dear Rodney

Enclosed is a modified claim form for 43-4211. After you left yesterday I was cleaning up my desk and marked some paper as outdated. Unfortunately, I also marked the claim form I created and you signed for this right.

Please sign this form and return it to this office.

I apologize for the extra hassle that this creates for you.

Sincerely

Kelly K Christensen
Sr Water Resource Agent

RE: SRBA Claim(s) A43-10454, A43-10456, A43-04209, A43-02281
A43-04211

Dear Mr. and Mrs. Hall:

Pursuant to the change in ownership request that has been submitted to the Department, we have changed the record of current ownership to you. Please find the enclosed copies of the computer record of the claim(s) noting the change in claimant. Review these records and if there is an error, or you have any questions, please contact this office.

There was no confusion on these five water rights, so you are now listed as owner. Just as soon as I receive a warranty deed or Mr. Kunau's signature on the Notice of Change of Water Right Ownership, you will be listed as owner on the other four water rights.

Sincerely,

Trish Fawcett
Technical Records Specialist

RE: Evidence of Priority

RESPONSE DEADLINE
FEBRUARY 3, 1992

Dear Claimant:

The Notice(s) of Claim identified with the number shown above your name on the mailing label has been filed in the Snake River Basin Adjudication (SRBA). The Notice(s) indicate your water usage is based on "Beneficial Use" or a "Statutory Claim". Water rights of this type are established by the historical use of water, dating back to when water was first used for the purpose claimed. The date of first use, known as the priority date, has not been confirmed by a License, Decree or Permit. The Department will soon conduct reviews &/or field exams for the claims in your area. Since the priority date of a beneficial use water right can not be confirmed by field examination, proof must be provided supporting the priority date you have claimed.

The Department will not recommend the Notice(s) be decreed by the court as claimed if no evidence of a priority date is submitted.

Please find enclosed a computer printout of your Notice(s) and the pamphlet entitled "Evidence of Priority". The pamphlet describes the types of evidence required and suggests which documents will fulfill this requirement. I direct your attention to the two sections entitled "What Kind of Evidence is Required" and "Some Examples of Documents Which May Be Evidence of the Priority Date".

Please submit the required evidence supporting the priority date(s) by February 3, 1992, referencing all documents with the corresponding Notice number(s). If you have any questions not covered by this letter or the enclosed pamphlet, please contact this office.

Respectfully submitted,

Allen Merritt, P.E.
Water Rights Supervisor

**SYSTEM ANALYSIS (GROUNDWATER)
KUNAU CLAIMS**

8-7-2001 revision

After reviewing the previous revision Rodney elected to amend his claim to reflect an earlier priority date for fewer acres. He stated that he would rather sacrifice a few acres for priority date. I am recommending the original claimed acres as valid by 1955 (67 acres in sec 24). I am recognizing that the well has the ability to produce an inch per acre for this right and 43-2281.

43-2281 80 ac 1.60 cfs

43-4211 67 ac 1.34 cfs

147 ac * 0.02 = 2.94 cfs

total 147 ac 2.94 cfs

43-4209 was also amended for an earlier priority date and for the smaller historic place of use. The original claim was for 236 acres of which 19 acres overlapped with the place of use for 43-2281, based upon the assumption that the two wells were initially separate systems.

Copied from the original recommendation. See pg 3

The claimed priority date is 1940, however the statutory claim indicates in item 5.B. that the well was deepened in 1955 and a 100-hp motor installed delivering water to the place of use through a pivot and sprinkler system. Assuming the 100 hp, at 70% efficiency, pumping at 100 ft against a 40-psi sprinkler system the system capacity would be 3.20 cfs. My recommendation is for the 1955 priority date at 3.20 cfs as developed at that time. The recommended volume limitation for this right is $217 \text{ ac} * 4 = 868 \text{ afa}$. I am not recognizing the earlier priority date, as the currently available information would indicate that a smaller diversion rate was perfected at that time (limited info available).

7-26-2001 revision

Revised recommendation based upon information supplied on 7-26-2001. Rodney Hall described the system for the Kunau property that he purchased as follows. The wells were in in the early 1940s and irrigation was through a flood system. He did not know just when the system was modified by piping water from each well westerly to a common point on the surface water ditch system. From that point water could supply water to any portion of the place of use. He stated that the system was in place by 1962, thus the recommended priority date for the statutory claims from the groundwater sources. As either claim could supply water to all of the place of use by the claimed priority date, the place of use limitations were modified to reflect that change. 43-4211 shares the point of diversion with 43-2281

and as 43-2281 has an earlier priority date, the elements for that right have been reduced to reflect the elements of 43-2281. The systems were open discharge and Rod did not know the system capacity as of 1962 but he thought that it might have been 60 hp on each well. With open discharge and pumping from approximately 15 ft, the system capacity would exceed the 4.00 cfs amended diversion rate for the statutory claims.

The current system is a common pipeline tying groundwater and surface water together to irrigate a permissible place of use (PP/U) found to be 405 acres. The groundwater system does not cover all of the ground included in the surface water rights. Two wells exist within this system and they were claimed through three different rights.

Claims A43-02281 and A43-04211 claim the well located in 13S, 27E, Sec 19, NWNW. Claim A43-04209 claims the well in 13S, 27E, Sec 19, EWNW.

ANALYSIS OF A43-02281

This claim matches the licensed right as transferred. A transfer was filed to correctly identify the point of diversion. A season of use of 3-15 to 11-15 was assigned to this right at that time. All of the claimed and licensed plus additional acreage is irrigated; therefore this right is recognized for its licensed place of use of 80 acres. In reviewing the documents in the microfiche, it appears that the system was developed in 1932 (see Proof of Beneficial use) for the licensed place of use. All information also points to only the licensed acres as being irrigated as of June of 1940.

ANALYSIS OF A43-04211

This claim is from the same well as A43-02281 but is for acres in the adjoining section to the west. That claim identifies 67 acres as the place of use. Within the two forties identified as the place of use I found 65 irrigated acres. Those 65 acres includes a dirt access road as part of the irrigated place of use. It does exclude the Raft River Rural Electric easement property.

The claim indicates a 1940 priority date. Circumstantial evidence on microfiche for 43-2281 would indicate that that ground was not irrigated in 1940. Further the licensing field exam would indicate that the capacity for the system in 1941 was approximately the licensed rate (a Parma water lifter rated at 2.00 cfs). The statutory claim states in item 5.B. that there was a hand dug well in 1940 and the well was deepened in the early 1950s. The assumption is that the current 150-hp motor was installed at that time. Based upon the information currently before me, I am recommending this right with a 1955 priority date, and at 1 inch per acre for the additional acres.

The system in 1955 is not known. Currently I found a 150-hp pump operating a sprinkler system. Lifting from 100 ft and against 40 psi would produce approximately 4.80 cfs at 70% efficiency. The combined diversion rates for 43-2281 and 43-42111 are 3.00 cfs. This is less than the theoretical calculation. Recommended rate is $65 \text{ ac} * 0.02 = 1.30 \text{ cfs}$ and the volume limitation is $65 \text{ ac} * 4 = 260 \text{ afa}$.

43-04209

This is the third groundwater right that is tied into the system. This well is located approximately ¼ mile south of the well described above. The original statutory claim described a place of use in the north ½ NW ¼ of sec 19 and the west ½ NW ¼ of sec 18. There is necessarily some overlap with the claimed place of use for 43-02281 based upon the number of acres claimed in the north ½ NW ¼ of sec 19.

	NWNW	NENW
<u>Actual acres Lot 1</u>	<u>48.8 ac</u>	<u>39.6 ac</u>
<u>Irrigated acres</u>	<u>47.5</u>	<u>39.6</u>
43-02281	30.0	10
43-04211	28.0	40
total claim acres	58	50

Although the NWNW quarter is over claimed by a minimum of 10.5 acres and the NENW quarter by 10.4 acres, the historical overlap of the systems is not known. It is my understanding that the original systems were independent of each other as far as the ditch systems used irrigated different lands. I am therefore recommending the irrigated acres within the claimed place of use less the 40 acres previously recognized under 43-2281 located in the N½NW¼ of sec 19. The found and recommended place of use is 217 acres. This recognizes acre shifting between quarter/quarters from the claimed place of use to the recommendation.

The claimed priority date is 1940, however the statutory claim indicates in item 5.B. that the well was deepened in 1955 and a 100-hp motor installed delivering water to the place of use through a pivot and sprinkler system. Assuming the 100 hp, at 70% efficiency, pumping at 100 ft against a 40-psi sprinkler system the system capacity would be 3.20 cfs. My recommendation is for the 1955 priority date at 3.20 cfs as developed at that time. The recommended volume limitation for this right is 217 ac * 4 = 868 afa. I am not recognizing the earlier priority date as the currently available information would indicate that a smaller diversion rate was perfected at that time (limited info available).

43-31 & 43-144B (CASSIA CREEK)**43-10554 & 43-4210 (RAFT RIVER)****SYSTEM ANALYSIS (SURFACE WATER)****KUNAU CLAIMS**

All three claims identify a common place of use that includes two separate locations. A change of ownership has been submitted that identifies a portion of the claimed place of use. The 'north' portion of the place of use claimed at 345 acres is identified as being sold to Rodney Hall and Glen Kunau maintains the 'south' portion ownership claimed at 126 acres. No information identifying the desired splitting of the rights has been submitted, therefore the claims are being recommended in Glen's name only.

The 'north' place of use includes the decreed place of use for 43-31 and 43-143 and other ground claimed from groundwater sources. The 'southern' place of use does not have any recorded license or decreed rights appurtenant to any of the place of use. Only the three surface water rights are claimed on that ground. After reviewing the 1962 and 1968 aerial photography in arcview, it appears to me that the development of that ground occurred after 1968. My recommendation excludes the entire southern portion of the claimed place of use.

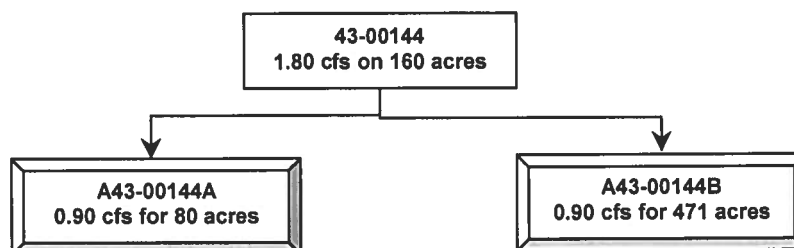

ANALYSIS OF 43-31 (CASSIA CREEK)

The original decreed place of use is entirely within the northern portion of the claimed PP/U and there are no other claims against this right. Transfer 544 removed 43-30, and 43-32 from the same decreed place of use. The decreed season of use is April 1 thru July 1.

The historical place of use includes the Raft River stream channel. The channel has been straightened through the entire PP/U. The farmed ground around the channel has been increased since the channel was straightened. Some of the ground outside the historical fields may have been irrigated with tail water and beneficial use obtained through the increase in ground cover. I am recommending that this claim be limited to the found 165 irrigated acres within the decreed place of use. The PPU is 405 acres and includes both groundwater and surface water rights. The decreed rate of 0.80 cfs is less than one inch per acre for the found place of use and is therefore recommended as claimed.

ANALYSIS OF 43-00144B (CASSIA CREEK)

Two different claimants have claimed this right.

Although the claim A43-00144B indicates a 471-acre place of use, that portion of the place of use within the decreed place of use found irrigated is 77 acres. The diversion rates claimed between the two rights equals the original decreed right. I accept that the two claims do not enlarge or change the place of use for the original right so long as part B is limited to the found 77 acres within the PP/U. These 77 acres include a feedlot that covered 12 acres in 1987 but has historically been irrigated and is therefore included in the recommended place of use. No season of use was given in the decree.

43-10554 identified as 43-00143 (RAFT RIVER)

CLAIM VS DECREE COMPARISON.

Priority date	Diversion rate	Season of use	Place of use	
4-1-1883	3.40 cfs	4-1 to 10-1	471 acres within sections 18 & 19 in 13S, 27E and sections 24 & 25 in 13S, 26E	
4-1-1883	3.40 cfs	4-1 to 10-1	13S, 27E, Sec 19	Lt 2, W½NE¼, SE¼NW¼

As the claimed information agrees with the decreed information for most of the elements I am recognizing this right as being based upon 43-143.

The point of diversion was not decreed. The claimed place of use is a PP/U that includes the decreed place of use although the claimed place of use for government lots within Sec 18 and 19 are less than the lot acreage found to be irrigated.

Raft River runs south to north through two forty-acre tracts of the decreed place of use. The river channel has been straightened out since 1987. Although some additional acreage may have been added to the system of cultivated ground along the river channel, the number of 'new' acres have not been identified. I found 163 irrigated acres within the original decreed place of use and this is the limitation for this right.

A43-04210

This claim is for Raft River water and is supplemental to other rights. The claim indicates that the water is piped to separate locations. Rodney Hall indicated that this right should be split between Kunau and Hall. As of the date of this review I have not received direction as to how the right should be split.

Evidence of priority was not submitted for this claim. The statutory claim indicates a 1940 priority date but as previously noted the 'southern' portion of the claimed place of use was not irrigated in 1968. Not enough information exists for me to recommend this right at this time.

43-02281, 43-04209, & 43-04211

**SYSTEM ANALYSIS (GROUNDWATER)
KUNAU CLAIMS**

Revised recommendation based upon information supplied on 7-26-2001. Rodney Hall described the system for the Kunau property that he purchased as follows. The wells were in in the early 1950s and irrigation was through a flood system. He did not know just when the system was modified by piping water from each well westerly to a common point on the surface water ditch system. From that point water could supply water to any portion of the place of use. He stated that the system was in place by 1962, thus the recommended priority date for the statutory claims from the groundwater sources. As either claim could supply water to all of the place of use by the claimed priority date, the place of use limitations were modified to reflect that change. 43-4211 shares the point of diversion with 43-2281 and as 43-2281 has an earlier priority date, the elements for that right have been reduced to reflect the elements of 43-2281. The systems were open discharge and Rod did not know the system capacity as of 1962 but he thought that it might have been 60 hp on each well. With open discharge and pumping from approximately 15 ft, the system capacity would exceed the 4.00 cfs amended diversion rate for the statutory claims.

The current system is a common pipeline tying groundwater and surface water together to irrigate a permissible place of use (PP/U) found to be 405 acres. The groundwater system does not cover all of the ground included in the surface water rights. Two wells exist within this system and they were claimed through three different rights.

Claims A43-02281 and A43-04211 claim the well located in 13S, 27E, Sec 19, NWNW. Claim A43-04209 claims the well in 13S, 27E, Sec 19, WNW.

ANALYSIS OF A43-02281

This claim matches the licensed right as transferred. A transfer was filed to correctly identify the point of diversion. A season of use of 3-15 to 11-15 was assigned to this right at that time. All of the claimed and licensed plus additional acreage is irrigated; therefore this right is recognized for its licensed place of use of 80 acres. In reviewing the documents in the microfiche, it appears that the system was developed in 1932 (see Proof of Beneficial use) for the licensed place of use. All information also points to only the licensed acres as being irrigated as of June of 1941.

ANALYSIS OF A43-04211

This claim is from the same well as A43-02281 but is for acres in the adjoining section to the west. That claim identifies 67 acres as the place of use. Within the two forties identified as the place of use I found 65 irrigated acres. Those 65 acres includes a dirt

Analysis revised passed upon information received 7-26-2001

access road as part of the irrigated place of use. It does exclude the Raft River Rural Electric easement property.

The claim indicates a 1940 priority date. Circumstantial evidence on microfiche for 43-2281 would indicate that that ground was not irrigated in 1940. Further the licensing field exam would indicate that the capacity for the system in 1941 was approximately the licensed rate (a Parma water lifter rated at 2.00 cfs). The statutory claim states in item 5.B. that there was a hand dug well in 1940 and the well was deepened in the early 1950s. The assumption is that the current 150-hp motor was installed at that time. Based upon the information currently before me, I am recommending this right with a 1955 priority date, and at 1 inch per acre for the additional acres.

The system in 1955 is not known. Currently I found a 150-hp pump operating a sprinkler system. Lifting from 100 ft and against 40 psi would produce approximately 4.80 cfs at 70% efficiency. The combined diversion rates for 43-2281 and 43-42111 are 3.00 cfs. This is less than the theoretical calculation. Recommended rate is $65 \text{ ac} * 0.02 = 1.30 \text{ cfs}$ and the volume limitation is $65 \text{ ac} * 4 = 260 \text{ afa}$.

43-04209

This is the third groundwater right that is tied into the system. This well is located approximately ¼ mile south of the well described above. The original statutory claim described a place of use in the north ½ NW ¼ of sec 19 and the west ½ NW ¼ of sec 18. There is necessarily some overlap with the claimed place of use for 43-02281 based upon the number of acres claimed in the north ½ NW ¼ of sec 19.

	NWNW	NENW
<u>Actual acres Lot 1</u>	<u>48.8 ac</u>	<u>39.6 ac</u>
<u>Irrigated acres</u>	<u>47.5</u>	<u>39.6</u>
43-02281	30.0	10
43-04211	28.0	40
total claim acres	58	50

Although the NWNW quarter is over claimed by a minimum of 10.5 acres and the NENW quarter by 10.4 acres, the historical overlap of the systems is not known. It is my understanding that the original systems were independent of each other as far as the ditch systems used irrigated different lands. I am therefore recommending the irrigated acres within the claimed place of use less the 40 acres previously recognized under 43-2281 located in the N½NW¼ of sec 19. The found and recommended place of use is 217 acres. This recognizes acre shifting between quarter/quarters from the claimed place of use to the recommendation.

The claimed priority date is 1940, however the statutory claim indicates in item 5.B. that the well was deepened in 1955 and a 100-hp motor installed delivering water to the place of use through a pivot and sprinkler system. Assuming the 100 hp, at 70% efficiency, pumping at 100 ft against a 40-psi sprinkler system the system capacity would be 3.20 cfs. My recommendation is for the 1955 priority date at 3.20 cfs as developed at that time. The recommended volume limitation for this right is $217 \text{ ac} * 4 = 868 \text{ afa}$. I am not recognizing the earlier priority date as the currently available information would indicate that a smaller diversion rate was perfected at that time (limited info available).

**43-31 & 43-144B (CASSIA CREEK)
43-10554 & 43-4210 (RAFT RIVER)**

**SYSTEM ANALYSIS (SURFACE WATER)
KUNAU CLAIMS**

All three claims identify a common place of use that includes two separate locations. A change of ownership has been submitted that identifies a portion of the claimed place of use. The 'north' portion of the place of use claimed at 345 acres is identified as being sold to Rodney Hall and Glen Kunau maintains the 'south' portion ownership claimed at 126 acres. No information identifying the desired splitting of the rights has been submitted, therefore the claims are being recommended in Glen's name only.

The 'north' place of use includes the decreed place of use for 43-31 and 43-143 and other ground claimed from groundwater sources. The 'southern' place of use does not have any recorded license or decreed rights appurtenant to any of the place of use. Only the three surface water rights are claimed on that ground. After reviewing the 1962 and 1968 aerial photography in arcview, it appears to me that the development of that ground occurred after 1968. My recommendation excludes the entire southern portion of the claimed place of use.

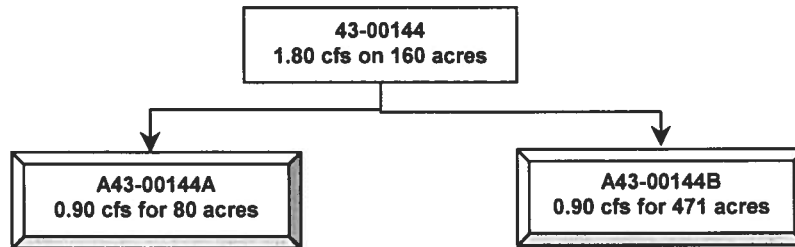

ANALYSIS OF 43-31 (CASSIA CREEK)

The original decreed place of use is entirely within the northern portion of the claimed PP/U and there are no other claims against this right. Transfer 544 removed 43-30, and 43-32 from the same decreed place of use. The decreed season of use is April 1 thru July 1.

The historical place of use includes the Raft River stream channel. The channel has been straightened through the entire PP/U. The farmed ground around the channel has been increased since the channel was straightened. Some of the ground outside the historical fields may have been irrigated with tail water and beneficial use obtained through the increase in ground cover. I am recommending that this claim be limited to the found 165 irrigated acres within the decreed place of use. The PPU is 405 acres and includes both groundwater and surface water rights. The decreed rate of 0.80 cfs is less than one inch per acre for the found place of use and is therefore recommended as claimed.

ANALYSIS OF 43-00144B (CASSIA CREEK)

Two different claimants have claimed this right.

Although the claim A43-00144B indicates a 471-acre place of use, that portion of the place of use within the decreed place of use found irrigated is 77 acres. The diversion rates claimed between the two rights equals the original decreed right. I accept that the two claims do not enlarge or change the place of use for the original right so long as part B is limited to the found 77 acres within the PP/U. These 77 acres include a feedlot that covered 12 acres in 1987 but has historically been irrigated and is therefore included in the recommended place of use. No season of use was given in the decree.

43-10554 identified as 43-00143 (RAFT RIVER)

CLAIM VS DECREE COMPARISON.

Priority date	Diversion rate	Season of use	Place of use	
4-1-1883	3.40 cfs	4-1 to 10-1	471 acres within sections 18 & 19 in 13S, 27E and sections 24 & 25 in 13S, 26E	
4-1-1883	3.40 cfs	4-1 to 10-1	13S, 27E, Sec 19	Lt 2, W½NE¼, SE¼NW¼

As the claimed information agrees with the decreed information for most of the elements I am recognizing this right as being based upon 43-143.

The point of diversion was not decreed. The claimed place of use is a PP/U that includes the decreed place of use although the claimed place of use for government lots within Sec 18 and 19 are less than the lot acreage found to be irrigated.

Raft River runs south to north through two forty-acre tracts of the decreed place of use. The river channel has been straightened out since 1987. Although some additional acreage may have been added to the system of cultivated ground along the river channel, the number of 'new' acres have not been identified. I found 163 irrigated acres within the original decreed place of use and this is the limitation for this right.

A43-04210

This claim is for Raft River water and is supplemental to other rights. The claim indicates that the water is piped to separate locations. Rodney Hall indicated that this

right should be split between Kunau and Hall. As of the date of this review I have not received direction as to how the right should be split.

Evidence of priority was not submitted for this claim. The statutory claim indicates a 1940 priority date but as previously noted the 'southern' portion of the claimed place of use was not irrigated in 1968. Not enough information exists for me to recommend this right at this time.

Prepared by Kelly K Christensen

43-02281, 43-04209, & 43-04211

SYSTEM ANALYSIS (GROUNDWATER)
KUNAU CLAIMS

The current system is a common pipeline tying groundwater and surface water together to irrigate a permissible place of use (PP/U) found to be 405 acres. The groundwater system does not cover all of the ground included in the surface water rights. Two wells exist within this system and they were claimed through three different rights.

Claims A43-02281 and A43-04211 claim the well located in 13S, 27E, Sec 19, NWNW. Claim A43-04209 claims the well in 13S, 27E, Sec 19, SWNW.

ANALYSIS OF A43-02281

This claim matches the licensed right as transferred. A transfer was filed to correctly identify the point of diversion. A season of use of 3-15 to 11-15 was assigned to this right at that time. All of the claimed and licensed plus additional acreage is irrigated; therefore this right is recognized for its licensed place of use of 80 acres. In reviewing the documents in the microfiche, it appears that the system was developed in 1932 (see Proof of Beneficial use) for the licensed place of use. All information also points to only the licensed acres as being irrigated as of June of 1941.

ANALYSIS OF A43-04211

This claim is from the same well as A43-02281 but is for acres in the adjoining section to the west. That claim identifies 67 acres as the place of use. Within the two forties identified as the place of use I found 65 irrigated acres. Those 65 acres includes a dirt access road as part of the irrigated place of use. It does exclude the Raft River Rural Electric easement property.

The claim indicates a 1940 priority date. Circumstantial evidence on microfiche for 43-2281 would indicate that that ground was not irrigated in 1940. Further the licensing field exam would indicate that the capacity for the system in 1941 was approximately the licensed rate (a Parma water lifter rated at 2.00 cfs). The statutory claim states in item 5.B. that there was a hand dug well in 1940 and the well was deepened in the early 1950s. The assumption is that the current 150-hp motor was installed at that time. Based upon the information currently before me, I am recommending this right with a 1955 priority date, and at 1 inch per acre for the additional acres.

The system in 1955 is not known. Currently I found a 150-hp pump operating a sprinkler system. Lifting from 100 ft and against 40 psi would produce approximately 4.80 cfs at 70% efficiency. The combined diversion rates for 43-2281 and 43-4211 are 3.00 cfs. This is less than the theoretical calculation. Recommended rate is $65 \text{ ac} * 0.02 = 1.30 \text{ cfs}$ and the volume limitation is $65 \text{ ac} * 4 = 260 \text{ afa}$.

43-04209

This is the third groundwater right that is tied into the system. This well is located approximately ¼ mile south of the well described above. The original statutory claim described a place of use in the north ½ NW ¼ of sec 19 and the west ½ NW ¼ of sec 18. There is necessarily some overlap with the claimed place of use for 43-02281 based upon the number of acres claimed in the north ½ NW ¼ of sec 19.

		NWNW	NENW
Actual acres	Lot 1	48.8 ac	39.6 ac
Irrigated acres		47.5	39.6
43-02281		30.0	10
43-04211		28.0	40
total claim acres		58	50

Although the NWNW quarter is over claimed by a minimum of 10.5 acres and the NENW quarter by 10.4 acres, the historical overlap of the systems is not known. It is my understanding that the original systems were independent of each other as far as the ditch systems used irrigated different lands. I am therefore recommending the irrigated acres within the claimed place of use less the 40 acres previously recognized under 43-2281 located in the N½NW¼ of sec 19. The found and recommended place of use is 217 acres. This recognizes acre shifting between quarter/quarters from the claimed place of use to the recommendation.

The claimed priority date is 1940, however the statutory claim indicates in item 5.B. that the well was deepened in 1955 and a 100-hp motor installed delivering water to the place of use through a pivot and sprinkler system. Assuming the 100 hp, at 70% efficiency, pumping at 100 ft against a 40-psi sprinkler system the system capacity would be 3.20 cfs. My recommendation is for the 1955 priority date at 3.20 cfs as developed at that time. The recommended volume limitation for this right is 217 ac * 4 = 868 afa. I am not recognizing the earlier priority date as the currently available information would indicate that a smaller diversion rate was perfected at that time (limited info available).

43-31 & 43-144B (CASSIA CREEK)**43-10554 & 43-4210 (RAFT RIVER)****SYSTEM ANALYSIS (SURFACE WATER)****KUNAU CLAIMS**

All three claims identify a common place of use that includes two separate locations. A change of ownership has been submitted that identifies a portion of the claimed place of use. The 'north' portion of the place of use claimed at 345 acres is identified as being sold to Rodney Hall and Glen Kunau maintains the 'south' portion ownership claimed at 126 acres. No information identifying the desired splitting of the rights has been submitted, therefore the claims are being recommended in Glen's name only.

43-10554 identified as 43-00143 (RAFT RIVER)

CLAIM VS DECREE COMPARISON.

Priority date	Diversion rate	Season of use	Place of use	
4-1-1883	3.40 cfs	4-1 to 10-1	471 acres within sections 18 & 19 in 13S, 27E and sections 24 & 25 in 13S, 26E	
4-1-1883	3.40 cfs	4-1 to 10-1	13S, 27E, Sec 19	Lt 2, W $\frac{1}{2}$ NE $\frac{1}{4}$, SE $\frac{1}{4}$ NW $\frac{1}{4}$

As the claimed information agrees with the decreed information for most of the elements I am recognizing this right as being based upon 43-143.

The point of diversion was not decreed. The claimed place of use is a PP/U that includes the decreed place of use although the claimed place of use for government lots within Sec 18 and 19 are less than the lot acreage found to be irrigated.

Raft River runs south to north through two forty-acre tracts of the decreed place of use. The river channel has been straightened out since 1987. Although some additional acreage may have been added to the system of cultivated ground along the river channel, the number of 'new' acres have not been identified. I found 163 irrigated acres within the original decreed place of use and this is the limitation for this right.

A43-04210

This claim is for Raft River water and is supplemental to other rights. The claim indicates that the water is piped to separate locations. Rodney Hall indicated that this right should be split between Kunau and Hall. As of the date of this review I have not received direction as to how the right should be split.

Evidence of priority was not submitted for this claim. The statutory claim indicates a 1940 priority date but as previously noted the 'southern' portion of the claimed place of use was not irrigated in 1968. Not enough information exists for me to recommend this right at this time.

RECOMMENDATION: DISALLOW - P01, NO LAWFUL APPROPRIATION SHOWN

Department of Water Resources
Southern District Office

30 JUN 68

Claim No 44-4211

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

CLAIM TO A WATER RIGHT

Under the provisions of Section 42-243, Idaho Code, any person using or claiming rights to the public waters of Idaho established by diversion and application to a beneficial use must file a claim with the Department of Water Resources on or before June 30, 1983. Exempted from this filing are single family domestic uses as defined in Section 42-230(d), Idaho Code. Also exempted are rights represented by a permit, license, decree, adjudicated right, or a previously filed claim.

The filing of this claim does not confirm the water right claimed but failure to file may result in forfeiture of a water right.

Notice is hereby given that **GLEN R. KUNAU**

1941 Miller, Burley, Idaho
(Mailing Address)

(Name of Claimant)

83318

Telephone No 678-5310

(Zip Code)

claims a right to the diversion and beneficial use of the surface or ground water. The extent and nature of such claim is as follows:

(1) Date of priority (When was the water first applied to a beneficial use) **August 7, 1940**

A claim is not acceptable on a ground water source with a priority later than March 25, 1963 or on a surface water source with a priority later than May 20, 1971. An exception is that a claim may be filed on single family domestic use from a ground water source.

(2) Describe the source of water (Name of stream, lake, spring, etc., or ground water)

Groundwater

(c) Describe the purpose for which the water has been used and the time during the year when you have used the right claimed.
