claimed in the SRBA, although the adjudication of small D&S rights may be deferred as provided by order of the SRBA District Court.

The United States submitted a number of claims which stated on a single claim form that the claimed water right was both appropriated under state law and reserved under federal law. Pursuant to Idaho Code section 42-1411, IDWR is required to include a recommendation for claims to water rights appropriated under state law in Part I of the director's report, to include an abstract of claims to water rights reserved under federal law in Part II of the director's report, and to include the claims to water rights reserved under federal law in Part III of the director's report.

To meet the requirements of the statute, IDWR prepared a recommendation for this claim, which is included in the Supplemental Director's Report Part I for Basin 34, and to which this objection is filed. IDWR also prepared an abstract for this claim, which is included in the Director's Report Part II for Basin 34, and which has the same water right number as the contested claim but includes an "A" suffix. The original notice of claim is included in the Director's Report Part III for Basin 34, which was previously filed with the court.

The burden rests with the United States to prove the right, and on the objector to prove the objection, in accordance with these parties' respective burdens of proof.
