REASONS SUPPORTING EACH BOX CHECKED

In response to Statement of the Objection items 1, 2, 3, 3.a, 3.b, 3.c, 4, 5, 6, 7, 8, 9, 9.a, 11, 12, 12.a, and 14, and all allegations of the objection regarding these items, IDWR responds as follows.

The director's report recommends certain water rights to the objector, as shown in the director's report.

IDWR conducts a limited investigation of small domestic and stockwater claims (as defined by Idaho Code section 42-111). IDWR generally does not field examine small D&S claims; IDWR's recommendations of small stockwater claims to the U.S. Bureau of Land Management established by beneficial use in Basin 34 were based on maps and other documentation provided by BLM.

IDWR generally does not require proof of priority date for small D&S claims based on beneficial use. However, rights to the use of surface water from the Big Lost River and tributaries were adjudicated in Utah Construction Co. v. Abbott, the source of

water for this right is tributary to the Big Lost River, and the United States was a party to that case. The United States is therefore precluded by the doctrine of res judicata from asserting a beneficial use priority the same as or earlier than the date of the decree, March 15, 1923.

Physical diversion is required for an appropriation unless an exception is established by statute. Idaho Code sections 42-113 and 42-114 establish an exception to the diversion requirement for watering of domestic livestock.

The United States submitted a number of claims which stated on a single claim form that the claimed water right was both appropriated under state law and reserved under federal law. Pursuant to Idaho Code section 42-1411, IDWR is required to include a recommendation for claims to water rights appropriated under state law in Part I of the director's report, to include an abstract of claims to water rights reserved under federal law in Part II of the director's report, and to include the claims to water rights reserved under federal law in Part III of the director's report.

To meet the requirements of the statute, IDWR prepared a recommendation for this claim, which is included in the Supplemental Director's Report Part I for Basin 34, and to which this objection is filed. IDWR also prepared an abstract for this claim, which is included in the Director's Report Part II for Basin 34, and which has the same water right number as the contested claim but includes an "A" suffix. The original notice of claim is included in the Director's Report Part III for Basin 34, which was previously filed with the court.

The burden rests with the United States to prove the right, and on the objector to prove the objection, in accordance with these parties' respective burdens of proof.
