418 ACRES TOTAL

The rights listed below are limited to the irrigation of a combined total of 438 acres in a single irrigation season. Combined Right Nos.: 02-00071, 02-04027, 02-07344, 57-02304C, 57-02304D, 57-02327, 57-04000, 57-04106, 57-07226, & 57-07449.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

EXPLANATORY MATERIAL: BASIS OF CLAIM - Beneficial Use

Right No. 2-07344 is also diverted through point of diversion described above.

2-00071

Seems that the agreement doesn't show beneficial use on the land, therefore, unless the agreement (Book 57, page 344, 23 Sept 1964) gives evidence of irrigation the claim must be disallowed due to no lawful appropriation found

Owner: Same as taxlot info

Priority date: agreement of said date as per claim in old 02 adjudication (7/1/1964)

POD: agreement to use pump at said POD

Source: POD on Snake River

POU: as per 1974 orthophoto quad of Grand View

Use: irrigation (as per 1974 photo)

Period: can be recommended as standard

Quantity: as per 1964 agreement for 0.5 cfs

No mention of this water in affidavits for 2-4027 signed in 1978.

Same POD as 2-07344

2-04027

Affidavits from 1978 state that by "personal knowledge" these people know that irrigation on the land began in 1962. Seems reasonable, but the question "how do you know?" is never answered in the statement, are the affidavits sufficient?

As per conversation with Don Shaff 7/11/05 it is sufficient to show priority date, additional evidence needed to verify quantity, POD, POU

Owner: claimant matches taxlot data

Priority date: recommended as claimed due to 3 affidavits in the statutory claim file describing the pou, pod, and quantity

POD: recommended as per 2-2405 field report (supported by affidavits)

Source: recommended as per 2-2405 field report (same as POD)

POU: recommended as per 2-7344 field report (supported by affidavits)

Use: recommended as per 2-7344 field report (supported by affidavits)

Period: recommended as per standard

Quantity: recommended as per agreement for 5 cfs (supported by affidavits), ability to divert shown in 2-2405 field report

2-07344

Recommended as claimed, no volume limit added because license leads to combined use limits rather than volume limit on this water right.

Included minimum stream flow condition WB9, may need to be looked at, additional legal advice pending

SUBJECT: REVIEW

The land for Meaker is covered by three water rights from the Snake River. One of the diversions is from the Idaho Power Canal; the other two from the reservoir itself. Other water rights for this land are apparently from Shoofly Creek or tributaries to it.

The irrigated acres for 02-0071, and 02-4027, were determined with the 1974 orthophoto quad of Grand View. The additional irrigated land under 02-7344 was identified in the 1981 field exam utilizing a 1979 ASCS aerial photograph. The period of use for 02-4027 from the Idaho Power Canal is limited ~~in period of use~~ by the Idaho Power Agreement.

Although the diversion rate from the Idaho Power Canal was measured in 1981 and the earlier measurement in 1968 showed a larger diversion, the 1968 measurement is more acceptable because it was a measurement in the canal as opposed to a measurement at the discharge. The latter technique was used in <sup>the</sup> 1981 inspection. The 100 horsepower Westinghouse motor with Johnson vertical pump that is used by Meaker is the same pump and motor identified in the Department's April 29, 1969 letter of the 1968 examination. In 1968 this pump and motor had a discharge of 10.1 cfs. Under the existing agreement Meaker is to receive one-half of the discharge from this pump and motor. As such, the amount of 5.0 cfs claimed for 02-4027 is acceptable.

Meaker apparently has an additional agreement still operating for the right of .5 cfs. This amount of water is apparently pumped by another water user in exchange for a right of way through the land Meaker now owns. This amount is also acceptable.

To Meaker Files 02-0071, 02-4027, 02-7344

The additional duty from the Snake River for this land is picked up by 02-7344. Although the system used by Meaker has a diversion capacity of 4.34 cfs, the amount recommended and licensed for this right is 2.86 cfs. To date this would bring Meaker's water rights to 418 acres and 418 miners inches from the Snake River.

The claimant has apparently developed the water rights from the Snake River for this land in stages. The predecessor for this land was Owyhee Grazing Association which received a portion of permit 02-2176. An examination was done for this right but proof of beneficial use was never submitted. Consequently the permit was cancelled. The exam did, however, verify that water was used on this land May 1, 1972.

The transfer of the permit 02-2176 carried with it a privilege to operate one of the three pumps in the Idaho Power Canal in Section 33, Twp. 5S, Rge. 4E in the amount of 5.0 cfs. This amount was to have been a 50% share in that pump. A field examination for 02-2176 showed that more than 10.0 was diverted. Therefore, 5.0 cfs is recommended for 02-4027.

The number of acres for 02-4027 was determined by using a field exam for 57-2327. The aerial photo used for that examination showed 323 acres were irrigated at the time of the aerial photo. As a result that number of acres is recommended for 02-4027.

Apparently through another contractual agreement the claimant is the successor to a privilege to have .5 cfs from the Snake River in the same canal. The time of this agreement would be such that the same 323 acres would have been irrigated.

Finally, the third right, 02-7344, brings the present allotment of water to the acreage now irrigated. The earlier rights totalled less than 1 inch<sup>7</sup> per acre. As a result this third right includes water on 95 acres that was not heretofore irrigated and about .1486 inches per acre for the previous 323 acres. A work sheet in file 02-4027 illustrates the recently irrigated 95 acres. The amount of water for 02-7344 will therefore be 2.86 cfs.

The total diversions from the Snake River then for these rights would be 418 inches for 418 acres.
