I. FINDINGS OF FACT

A notice of claim was filed for each of these water rights pursuant to I.C. § 42-1409. The Director of the State of Idaho Department of Water Resources examined the water system for this reporting area. The *Director's Report* contained recommendations for the elements of these water rights.

Objections and Responses were filed by various parties. A *Motion to File Amended Notice of Claim* was filed on August 19, 2010 by multiple claimants to assert a recovered water/recharge theory (hereafter "rec/rec"). That theory and the related *Amended Claims* were later withdrawn by the claimants in consolidated subcase 00-92020.

Subsequently, IDWR reviewed its *Director's Reports* for the rec/rec subcases to insure that it had included the elements from prior decrees, licenses and transfers. These subcases were identified by IDWR as some of the 30 subcases in round three which needed changes due to omission of elements from prior decrees, licenses, or transfers.

A Status Conference was held on April 4, 2012 in subcase 00-92020. At the hearing, the parties agreed to resolve all *Objections and Responses* to the 30 subcases by oral *Stipulation* on the record.

The parties agreed that these subcases be recommended and decreed with the elements of the *Amended Director's Reports* previously sent to the parties by IDWR.

A. Digital Boundary

The place of use for each of these rights is a digital boundary and is illustrated by the map overlay attached to the *Recommendations for Partial Decree*. The digital boundary for the place of use is described on a CD-Rom filed with the court.

II. CONCLUSIONS OF LAW

Therefore, based on the file and record herein, IT IS RECOMMENDED that these water rights be **decreed** with the elements set forth in the attached *Special Master's Recommendation for Partial Decrees*.

DATED: September 7, 2012.
