SUBJ: FORFEITURE

THIS LICENSE WAS UNDER THE OLD INDIAN COVE HIGHLINE CANAL WHICH IS NO LONGER USED. AS OF THIS DATE NO CLAIM HAS BEEN FILED FOR THIS RIGHT, AND NO RECORD OF A TRANSFER HAS BEEN FOUND.

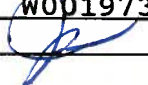

INDIAN COVE IRRIGATION DISTRICT FILED A B/U RIGHT CLAIM FOR THE BALANCE OF THE LAND & WATER NOT COVERED BY 02-2033. THE WATER FOR 02-2050 MAY HAVE BEEN TRANSFERRED PRIOR TO 1969, BUT BECAUSE OF 02-0083, NO MENTION HAS BEEN MADE OF IT. THE WATER RIGHT REPRESENTED BY THIS LICENSE HAS BEEN APPARENTLY FORFEITED (SEE INDIAN COVE DQ-1974) THROUGH MORE THAN FIVE YEARS OF NON-USE. THE PROPOSED FINDING TO THE DISTRICT COURT SHOULD REFLECT SUCH A CONCLUSION.

Dear Mr. Johnson:

Enclosed are two copies each of the irrigation district's Notices of Claim to a Water Right as referenced above. One copy is for your signature and one copy is for you to keep for the district's records.

These claims were completed based on Sherl Chapman's drafts which were completed during the Owyhee County claims filing in 1989. We have been unable to locate any original signed claims, however, the fees for these claims were paid timely and once the signed claims are returned, our records will be complete.

If you have any questions concerning the content of these claims, please feel free to contact me.

DEAR SHERL:

ENCLOSED ARE CLAIMS NUMBERED A02-00083 AND A02-02033.

A02-00083 LISTS 1149 ACRES OF IRRIGATED LANDS AND A DIVERSION RATE OF 8.07 CFS BASED ON BENEFICIAL USE. THIS DEPARTMENT HAS ON RECORD A NOTICE OF CLAIM DATED 11/19/1981 (COPY ENCLOSED) LISTING 1,495.15 ACRES AS BEING IRRIGATED WITH A TOTAL DIVERSION RATE OF 19.35 CFS CLAIMED. A SUBSEQUENT REVIEW BY THIS DEPARTMENT ON 08/23/1984 FOUND 1028 ACRES IRRIGATED AS OF 1974, USING ORTHOPHOTOQUAD MAPS.

A FIELD EXAM OF THE IRRIGATION SYSTEM ON 04/21/1983 FOUND THE TOTAL DIVERSION CAPACITY AT 32.77 CFS.

DEPARTMENT STAFF HAD EARLIER DETERMINED THAT A DIVERSION RATE OF 0.03 CFS WAS NECESSARY TO DELIVER SUFFICIENT WATER TO THE LANDS WITHIN THE DISTRICT. THUS 1028 ACRES TIMES 0.03 CFS/ACRE = 30.84 CFS

LICENSE 02-02033 WAS ISSUED FOR 25.5 CFS, LEAVING 5.34 CFS AS BEING RECOMMENDED FOR THE 11/19/1981 CLAIM (02-00083). 25.5 CFS PLUS 5.34 CFS = 30.84 CFS.

PROBLEM: IF THE 1028 ACRES THAT WAS FOUND TO BE IRRIGATED IN 1974 HAVE BEEN EXPANDED TO THE PRESENT 1149 ACRES AS CLAIMED IN THE RETURNED SNAKE RIVER BASIN ADJUDICATION CLAIM A02-00083, THEN IT WOULD BE ADVISABLE FOR THE DISTRICT TO SUBMIT AN APPLICATION FOR PERMIT FOR THE EXPANDED ACREAGE (121 ACRES) IN ADDITION TO A02-00083 FOR 5.34 CFS. IF THE TOTAL CAPACITY OF THE DISTRICTS DIVERSION SYSTEM NOW EXCEEDS 32.77 CFS, THE ADDITIONAL AMOUNT COULD ALSO BE MADE IN THE APPLICATION FOR PERMIT.

A02-02033 ALSO LISTS 1149 ACRES AS BEING IRRIGATED AND IS BASED ON A LICENSE ISSUED BY THE STATE RECLAMATION ENGINEER ON 01/19/1945. THE REPORT OF THE ENGINEER ON 11/01/1924 LISTED APPROXIMATELY 1275 ACRES UNDER CULTIVATION, HOWEVER THE ORTHOPHOTOQUAD MAP SHOWED 1028 ACRES UNDER CULTIVATION IN 1974.

MICROFILMED
AUG 10 1994

PROBLEM: IT IS PROBABLE THAT THERE HAS BEEN AN EXPANSION OF ACTUAL ACRES IRRIGATED BETWEEN 1974 AND THE PRESENT TIME OF APPROXIMATELY 121 ACRES. AGAIN, IT WOULD BE ADVISABLE TO FILE FOR THIS EXPANSION IN A APPLICATION FOR PERMIT.

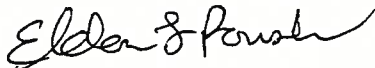

ONE APPLICATION FOR PERMIT WOULD SUFFICE TO COVER THE ADDITIONAL 121 ACRES OF IRRIGATION AND THE ADDITIONAL DIVERSION RATE NEEDED TO PROPERLY IRRIGATE 1149 ACRES.

IT APPEARS THAT THE ONLY LIMITING FACTOR WILL BE THE CAPACITY OF THE PUMPS AND AVAILABILITY OF WATER FOR APPROPRIATION.

ENCLOSED ARE BLANK NOTICE OF CLAIMS AND A APPLICATION FOR PERMIT FOR YOUR USE IF YOU DECIDE TO REFILE. IF YOU DO NOT WISH TO REFILE, RETURN THE CLAIMS WITH A LETTER SO STATING.

Re: Review Analysis

Date: 8/22/84

COPY

In the past the Department has reviewed the soil and climatic conditions in the Indian Cove area for licensing water rights for West Indian Cove Irrigation Co. (West Indian Cove). As late as 1975 the staff of the Department determined a diversion requirement of .03 cfs per acre was necessary to deliver sufficient water to the lands of West Indian Cove via a gravity system of canals and ditches. With the same conditions existing for Indian Cove Irrigation District (District), a total diversion requirement of .03 cfs per acre would be appropriate for the lands in the District also.

The lands irrigated by the District have diminished from the time the District was organized. Originally the District canal extended eastwardly across to the lands of what is now West Indian Cove, which has its separate delivery system. The District may contain 1,495 acres within its boundary, but the 1974 orthophotoquads show only 1,028 acres irrigated. The history provided by the District with its claim supporting the expansion of its diversion capacity would seem adequate to recommend the priority date claimed for 02-0083.

Recommending the water right for 02-2033 presents very little problem due to the supporting basis of the license. The number of irrigated acres is reduced to 1,028 as cited above. The diversion rate and priority date are the same as those appearing on the license.

The water right recommended for 02-0083 acknowledges only an expansion of the diversion rate and not an enlargement of the irrigated area. At (1,028 acres X .03 cfs/acre) - 25.5 cfs, the amount recommended for 02-0083 is 5.34 cfs. Part of discrepancy in place of use is the private use of 02-2402 on lands that ~~were~~ *may have been* ~~once irrigated by~~ District water. This land in the NESE Sec. 2 and N1/2SW Sec. 1 are in part or whole irrigated by this private diversion from the Snake River. Any remaining irrigated land in the tracts has been recommended as the District's water rights.

ATTACHMENT A

The Indian Cove Irrigation District has been in existence since the early 1900's. Upon initial development of the irrigation district, application for permit #14452 was filed which has now been renumbered 02-2033. The original district encompassed over 3,603 acres as were described on the original permit. This permit was licensed with a priority date of November 14, 1919 in the amount of 25.5 cubic feet per second for irrigation of 1,275 acres of land. Irrigation of that land has been claimed in this adjudication on the amended claim I.D. number 02-2033.

The irrigation district was modified in the early 1930's and the boundaries changed significantly. While the overall size of the irrigation district decreased, the irrigated land retained within the Indian Cove Irrigation District was expanded in 1935. That expansion of irrigated land is covered by this claim. The irrigation district now has 1,495.15 irrigated acres within its boundaries.

The character of both the Indian Cove Irrigation District highline and lowline canals is such that canal loss is great. Current meter measurements made on June 2, 1981 of the highline canal shows 14.93 cfs at the canal heading, 6.41 cfs at the midpoint, and 4.84 cfs at the lower end. Headgate diversions account for a reduction in flow of 13.19 cfs which accounts for an overall canal transmission loss of 12%. However, loss between the midpoint and the end of the canal is approximately 20%, demonstrating the extreme variability of the canal foundation and bank structure.

Based upon the high canal transmission loss and the justification statement provided by the Soil Conservation Service, this claim is filed for 1.5 miners inches per acre as a beneficial use.

Noe is soil survey leader mapping this area from Mountain Home office.

Like West Indian Cove the soils in this District are Davey and Royal (formerly Turbyfill) series. These soils are uniform, deep, sandy soils with high indicate rates. Any Marsing or Cencove soils (gravels) are sporadic or non-existent on this land.

Re: Review Analysis

Date: 8/22/84

In the past the Department has reviewed the soil and climatic conditions in the Indian Cove area for licensing water rights for West Indian Cove Irrigation Co. (West Indian Cove). As late as 1975 the staff of the Department determined a diversion requirement of .03 cfs per acre was necessary to deliver sufficient water to the lands of West Indian Cove via a gravity system of canals and ditches. With the same conditions existing for Indian Cove Irrigation District (District), a total diversion requirement of .03 cfs per acre would be appropriate for the lands in the District also.

The lands irrigated by the District have diminished from the time the District was organized. Originally the District canal extended eastwardly across to the lands of what is now West Indian Cove, which has its separate delivery system. The District may contain 1,495 acres within its boundary, but the 1974 orthophotoquads show only 1,028 acres irrigated. The history provided by the District with its claim supporting the expansion of its diversion capacity would seem adequate to recommend the priority date claimed for 02-0083.

Recommending the water right for 02-2033 presents very little problem due to the supporting basis of the license. The number of irrigated acres is reduced to 1,028 as cited above. The diversion rate and priority date are the same as those appearing on the license.

The water right recommended for 02-0083 acknowledges only an expansion of the diversion rate and not an enlargement of the irrigated area. At (1,028 acres X .03 cfs/acre) - 25.5 cfs, the amount recommended for 02-0083 is 5.34 cfs. Part of discrepancy in place of use is the private use of 02-2402 on lands that ^{may have been} ~~were~~ *designated for* ~~once irrigated by~~ District water. This land in the NESE Sec. 2 and N1/2SW Sec. 1 are in part or whole irrigated by this private diversion from the Snake River. Any remaining irrigated land in the tracts has been recommended as the District's water rights.

We are calling attention to the fact that in answering No. 12 we said that the time required for completion of works will be 2 years; this is not a true situation: the works are now completed and what we intend to convey is that it will possibly require this length of time for the district to acquire the works now constructed. Attached is plat of the district and system showing the location of the pumping station, canals, ditches, etc., and also the arrangement and location of the land proposed to be irrigated; the dimensions of the canals are shown on this application. You will note from the plat that the canals are within one mile of each legal subdivision of the land proposed to be reclaimed.

Mr. Warren G. Swendsen,
Commissioner of Reclamation,
Boise, Idaho.

Dear Sir:

Herewith please find application for permit also plat and our check for \$8.10 for which we are seeking to secure permit for the appropriation of water out of Snake River for and on behalf of the Indian Cove Irrigation District, whose postoffice address is Hammett, Idaho, and whose directors are as shown on the application, the undersigned being the attorneys for the Indian Cove Irrigation District.

Several years ago there was taken out a permit No. 7651, covering the same lands but we are informed that that right under said permit has been forfeited by virtue of failure to comply with the terms and conditions. The district and the settlers upon the lands in the district find themselves in the situation of having works already constructed capable of supplying waters for the lands (although they are in need of considerable overhauling) and yet they are without any water right other than such as has been acquired by three or four of the settlers by virtue of the application of water to a beneficial use; this permit is sought for the purpose of acquiring the right to divert water from the Snake River for all of the lands within the district. In taking out this permit the district does not do so for the purpose of selling such right but desire to acquire the water right for the benefit of the settlers on the project. The district in turn contemplates to exercise its right under the Eminent Domain act to acquire the works and has already instituted proceedings looking to that end.

We trust that the plat and the information contained in the application will be sufficiently complete to justify the issuance of the permit at an early date.

If, however, any additional information is required we would appreciate it if you would telephone us in order that we may avoid any unnecessary delay as it is especially desired that the permit would be granted at an early date in order that any of the settlers who have not as yet secured patents from the Federal government may be in a position to show a water right through the district and thus secure their patent. This is especially important in order that the assessment lien may be enforceable.

Again thanking you for giving this your prompt attention, we are

Yours very truly,
