NOTE: The fees for these rights were computed by Don Shaff subtracting the fees previously paid in the Snake or Adjudication. The fees previously paid for each right were: 02-00029 - \$1,212, 02-00203 - \$10, 02-02034 - \$10, 51-02250E - \$10, & 51-02250F - \$10, for a total of \$1,252. The fee now due in the SRBA is \$6,863 for the no. of acres plus \$50 per claim - 250 = 7,113. If you subtract the previously paid fees of \$1,252 from \$7,113 you get \$5,861 left to pay - this receipt covers this.

MEMO

TO: File 02-0203
FROM: Don Shaff 
DATED: 10-18-84
SUBJ: Review Analysis

The district filed this claim to enter the pending court action with as strong a Claim to Water Right as possible. This claim, based on a water right decreed in the Bruneau River action, nearly duplicated the permit and eventual licenses issued to the district under No. 559/51-2250. The staff concurs with the district and recommends that a water right originally developed in the Bruneau River is 150 cfs diverted at the C.J. Strike Dam.

With the construction of C. J. Strike Dam, the diversion point developed by the district was inundated by the reservoir. The district signed an agreement with Idaho Power Company that moved the district's point of diversion down to the left abutment of the dam and eliminated the necessity of maintaining a pump downstream below the dam. The C.J. Strike Power Plant stream measurement records for the canals show the company consistently diverts greater than 150 cfs from the reservoir pool. The water right is conditioned by the requirement that the maximum diversion under this right shall not exceed the flow that would be available in the Bruneau River should a diversion by the district still take place from that source.

The staff assisted the district in preparing the claims that it has filed and is aware that the 6863 acres claimed by the district is all the land between the district canal and the river. After deducting non-irrigated areas of bare land, highways and roads, the district delivers to 5701 acres of irrigated land. The 150 cfs diversion represents a duty greater than 1

miner's inch per acre but the 1.3 ~~1~~ miner's inch per acre, is not excessive when allowing for the conveyance lost in the canal. Calculations in the Idaho Power Company's Agreements Filed in this office showed that the 31% canal loss is reasonable.

RE: Snake River Adjudication
Grand View Adjudication

Dear Mr. Ringert:

This letter is in response to your question about Bruneau River flows raised in our telephone conversation last week. The enclosed photocopied map shows the location of the U.S. Geological Survey gaging station that is used as the source of information. The recorder is denoted by a circular symbol in Section 34 above the Buckaroo Dam and the Harris Dam which on the map is in the lower right-hand corner.

The assumed conditions for the situations below are use of every water right prior to the District's 1904 decreed water right (51-0001) and the absence of return flows. The prior water rights exclude two water rights for 3.2 cfs with a place of use now under C.J. Strike Reservoir and four water rights for the entire flow of some springs. With those conditions satisfied, the water rights preceeding the District's right require 186.6 cfs. The flow of the Bruneau River was above this amount after the run off started until August 2, 1982, and July 6, 1977, using two years of record near the opposite ends of the spectrum. The District's 150 cfs water right was fully available until July 19, 1982, and June 25, 1977.

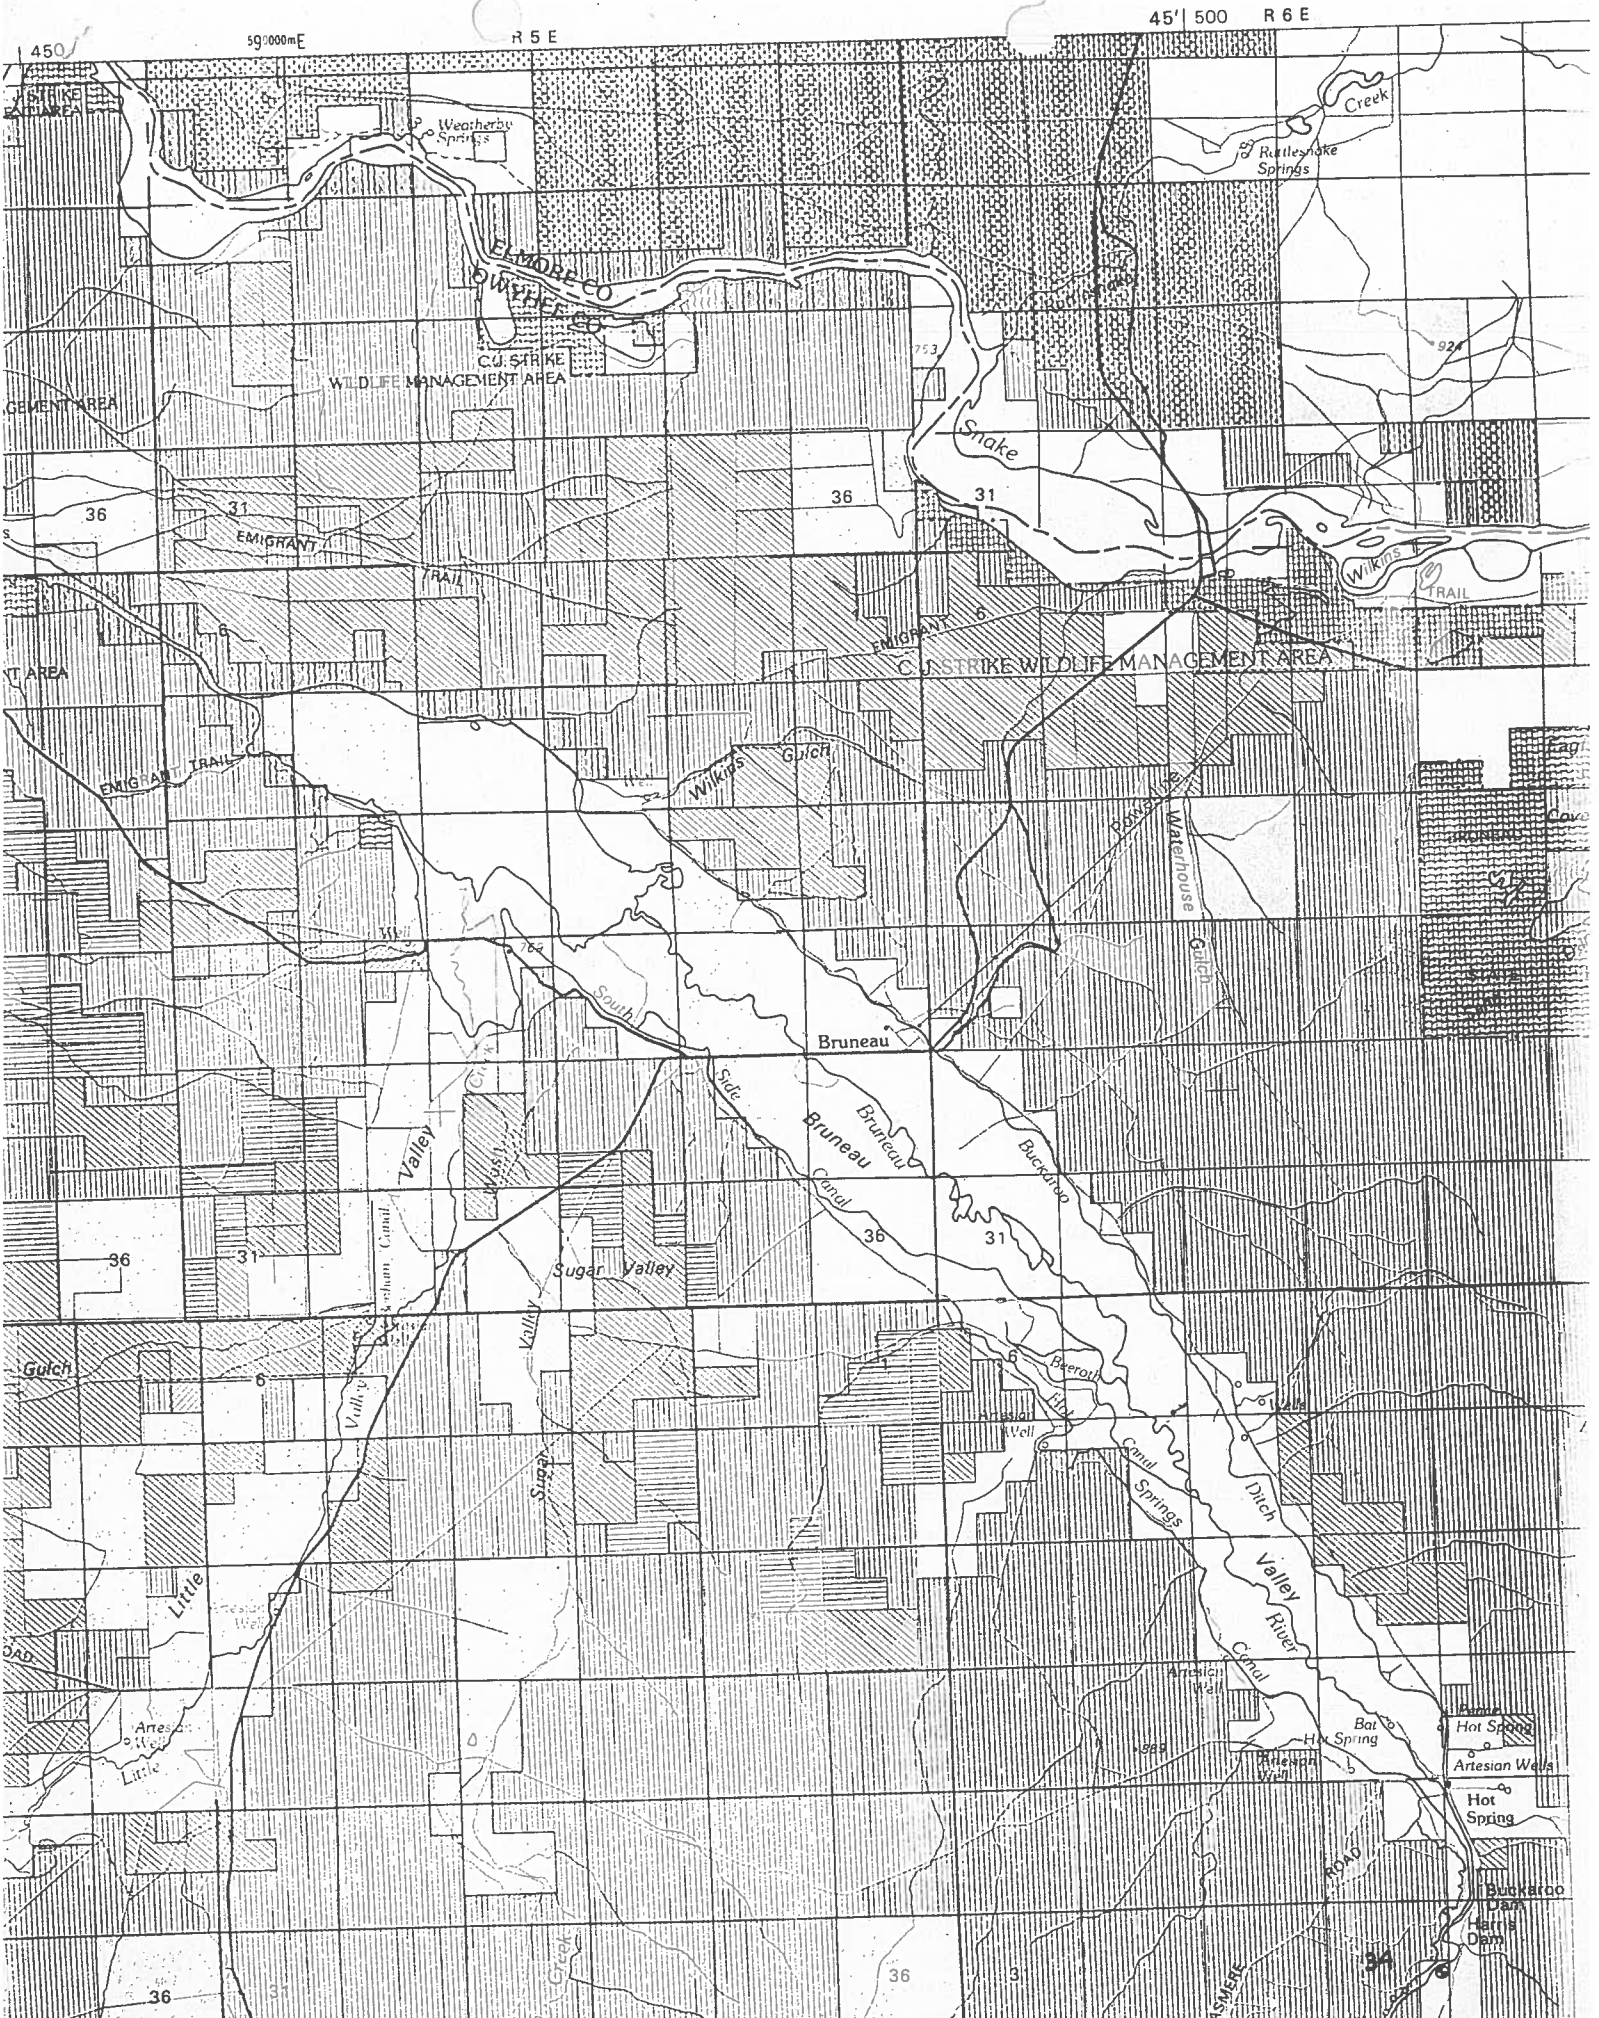

I hope you find this information clear, meaningful and helpful. Do not hesitate to contact me if you have any questions.

RE: Snake River Adjudication
Grand View Irrigation District

Dear Mr. Ringert:

The enclosed copy of a letter sent to the Grand View Irrigation District is brought to your attention. The first matter involves changing the status and supplementing the claims to Snake River water rights for the District. At the end of the letter you will see this course if adopted by the District entails a sizeable expense outlay. For this reason, the board may want to confer with you.

The second matter may deserve a meeting between you, Senator Walter Yarbrough and myself. Walt and I talked three years ago about the water right (02-2069) he uses via a pump for his land. I suggested erroneously at the time that by describing the pump diversion point and the District's diversion point at C.J. Strike Dam, the District could claim this water right for land that falls within the District's boundary. The District concurred with the suggestion at later discussions and filed an adjudication claim for this water right.

Mr. William F. Ringert
March 1, 1984
Page 2

To correct the record, I believe Yarbrough and Hanson who may be in the same situation at the other end of the District, should claim the water rights. I have written to Walt about this. The District could withdraw its claim or let the matter stand. I do not believe this point is critical.

I stand ready to respond to your queries on this matter. Please call me if necessary.

Grand View Irrigation District

Grand View, ID 83624

Dear Kay:

Would you bring a matter in the Snake River Adjudication to the attention of the board of directors? About three years ago, this staff assisted the board in filing several claims in the adjudication process. I have found the District might be in a better position if it claimed the water right decreed in the Bruneau River Adjudication in the 1920's. That water right, set out on the enclosed claim form is for 150 cfs (7500 inches) of water with a February 22, 1904 date of priority. The water right licenses issued before the decree totaled less water and had one with a later priority date.

The next issue may cause more debate and is not quite so clear cut. By the District gaining the Snake River water right (02-2034) in 1920 for 60 cfs (3000 inches), the point was clear that the Bruneau River water right was not enough to carry the District through the irrigation season. This means the Bruneau River water right, although taken at C.J. Strike Dam now, may be conditioned to allow the exercise of a 1904 priority date against other water users only as long as the flows in the Bruneau River would support such a water right. Under this restricted condition the only water right the District would have left in the Snake River after a 1904 Bruneau River right is dry would be the 60 cfs license under the current adjudication filings.

The picture should be obvious to all other water users (and your Idaho Power agreement support this) that the District began a full season use of water from the Snake River beyond the 60 cfs when water was turned into the existing diversion works of C.J. Strike Dam. The C.J. Strike weir records show the District has consistently diverted 158.7 cfs. I have enclosed another claim form to file this water right in the adjudication.

Kay Garsja, Secretary
March 1, 1984
Page 2

If the District claims the Bruneau River decreed right, the board should consider withdrawing its claim to the licensed rights (51-2250E and 51-2250F) which precede the decreed right in terms of document chronology. Such a move would result in a \$20 fee refund credit.

I have also notified Carl Rau and his successor, Hanson, and Walt Yarbrough to suggest they individually claim two pump water rights (02-2052 and 02-2069) that the District claimed. As I understand the conditions there the District has nothing to do with the operation of these individual pumps. The individuals in this case should be recognized as the water right holders. If all parties are agreeable to this change, another \$20 fee refund credit would result to the District.

Now, the reason for dwelling on fees and dollars is the filing of the two enclosed forms. For filing the Bruneau River decreed right (51-0001), the fee is \$10. To file and claim the amount of water shown on the form for the late Snake River water right, the fee is \$1212.

Of course I would be happy to discuss these matters with the board, if the members wish. Mr. Ringert has been supplied a copy of this letter and copies of the claims in question. Please keep me informed of the board's action on this matter.

IDAHO DEPT OF WATER RESOURCES

I have approximately 58 acres of irrigated land about 4 miles east of Grand View, Idaho.

It has been suggested that I contact the State Dept of Water Res. to confirm the water rights on this land. The legal description is as follows :

That part of the southeast quarter of the southwest quarter of section 30 ,Township 5 South,Range 4 East, Boise Meridian, lying north of the county road intersecting such subdivision at the southwest corner thereof, containing 38 acres, more or less, AND Lot no. 7 of same section, containing 20 acres.

The 38 acre piece was annexed into the Grand View Irrigation District in 1972. The 20 acre lot was already a part of the district.

✓A copy of an aerial photo of the land is attached. I have farmed and irrigated this land since 1972.
