Subject: Opaline Irrigation District WR 2-2072

Don,

The attached shape file illustrates historically irrigated acres identified by the District. These acres are in addition to the areas identified by IDWR in their preliminary recommendation. IDWR identified 2057 acres of irrigated lands in their recommendation. The District identified an additional 468 acres that have been irrigated for a total of 2525 acres.

The licensed water right and the original beneficial use exam was for a total of 2517 acres.

The District understands that any historically irrigated areas are protected and that the recommendation from IDWR should be for a total of 2517 acres.

Thank you for your assistance and please let me know if you have any questions.

1. Describe the portion of the proposed recommendation with which you disagree (e.g. priority date, period of use, source):

Place of Use

2. Describe the changes you wish to make in the proposed recommendation:

The total number of irrigated acres within the District should be limited to 2516 acres. The recommendation has a limit of only 2057 acres.

3. Give a brief explanation as to why you disagree with these portions:

Proof of Beneficial Use and License issued for 2516 acres.

The district boundary shown on IDWR records appears to be inaccurate.

The 1987 adjudication photo does not accurately represent the true irrigated acres.

 I AGREE with this proposed recommendation: no changes need to be made.

The use of water for irrigation under this right may begin as early as March 1 and may continue to as late as November 15, provided other elements of the right are not exceeded. The use of water before April 1 and after October 31 under this remark is subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier than the date a partial decree is entered for this right.

PLACE OF USE:

2057 ACRES TOTAL

Place of use is within the area served by Opaline Irrigation District.

The boundary encompassing the place of use for this water right is described with a digital boundary as defined by I.C. Section 42-202B(2) and authorized pursuant to I.C. Section 42-1411(2)(h). The data comprising the digital boundary are incorporated herein by reference and are stored on a CD-ROM disk issued in duplicate originals on file with the SRBA District Court and the Idaho Department of Water Resources. A map depicting the place of use is attached hereto to illustrate the place of use described by the digital boundary.

This right is limited to the irrigation of 2057 acres within the place of use described above in a single irrigation season.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Dear Mr. Bohner:

The Director of the Department of Water Resources has reviewed the protest you filed on behalf of Bob Flynn, objecting to the approval of a transfer filed by the Opaline Irrigation District. In the protest, you requested immediate issuance of a cease and desist order.

The Director has decided not to issue a cease and desist order at this time. Notice of the transfer will be published according to the statutory scheme, and a hearing will be scheduled on Mr. Flynn's protest following publication.

Dear Ms. Jensen:

As per our conversations, I am sending you two maps with the approximate location of Opaline's Place of Use. On the map, each full forty acre tract is represented by a square one half of an inch on a side. Within each square is a white spot within which is the number of acres as claimed during the Snake River Adjudication in 1981. I have attempted to depict the Districts Irrigated acreage after interpreting the attached lands list and our aerial photos and highlighted my interpretations on the map. I am very confident that results are close to what we would find in the field but you or one of the members of the board may wish to peruse the information and verify it.

After looking at the information, if you are satisfied, please return the map such that we can enter it in your files. If you have any changes to make, please indicate them on the map.

There is also a \$4.00 copy fee for the maps please send the fees, the map and any future correspondence to this office at my attention. Please call if you have any questions or concerns.

MEMORANDUM

TO: 02-2072
FROM: Don Shaff *DS*
DATE: March 29, 1983
RE: Diversion Rate Recommendations

The field work and review showed the claimant was irrigating 2,139 acres instead of the 2,516 acres shown on the license issued in 1960. Recommending a water right for the claimant at one miners inch per acre would not take into consideration the on-farm efficiency and conveyance efficiency inherent in the system. The diversion capacity and license already issued for 50.32 cfs allows the flexibility to consider these other factors.

Most of the soils in the area of the irrigation district are greenleaf-nyssaton-garbutt soils which are well drained silt loams on lake terraces and alluvial fans. There are some areas of moulton-bran-baldock soils which are somewhat poorly drained and moderately well drained fine sandy loams to silt loams on low lands. In addition, there are small areas of turbyfil-~~encove~~-feltham soils which are well drained and somewhat excessively drained fine sandy loams and loamy fine sands *on fans and* terraces. Alfalfa grown in this area would have a water requirement of .6875 miners inches per acre. With an assumed field application of efficiency of 60 percent the field headgate requirement would be 1.146 miners inches per acre. The canal system is a concrete lined ditch approximately five miles long in a northerly and again in a southerly direction. Consulting the figure 5 in the Water Users Handbook, second edition, a percentage seepage rate of .04 percent per mile

MICROFILMED

AUG 10 1994

is found. Calculating the two efficiencies together, shown below, equals a diversion requirement of 49.83 cfs for 1.17 miners inches per acre.

In light of the existing license in the very small degree of possible error in efficiencies, the licensed amount of 50.32 cfs or 1.18 miners inches per acre will be recommended for this water right.

~~CONFIDENTIAL~~ MEMORANDUM

DATE 3/18/83

FILE RT # 02-2072

NAME OF PARTY Opaline Irrigation District

EMPLOYEE John K. Noyes

RE: obtained irritable area from the NSECs
office aerial photos. assessed acres from
M.R. a ranchowner & Opaline Irrigation
District secretary.

There has been considerable changes in
ownership of land within the district and the
names appearing on the land list may be in
error, however the farm numbers are listed on
the NSEC records.

There is a difference of five acres between the
acres listed on the ownership tabulation and the
land description form. Will except the land
description acreage. Error in acreage is
probably due to the rounding of the 10th of acres
listed on the maps for individual farms.

The farms can not be recognized
as receiving district water as there is no
means of diversion. These farms are
namely Reed, Bubokoch & Ryzka.

Re: Boundary changes for our irrigation district.

Dear Ms. Walker:

Enclosed you will find a copy of an order for a change of boundaries for the Opaline Irrigation District, bringing in portions of the lands of three separate property owners. This document has been filed with the Owyhee County Records Office.

Please note that this in no way implies the need for additional water for our district, but rather a movement of allotted water within the district boundaries.

For your convenience, our Water Right No. is A02-02072.

If your office does not handle irrigation district boundary changes we would appreciate it if you would pass this along to the right place within the Department of Water Resources.

If there are any questions, please feel free to call the number listed below.

Sincerely,

Angela L. Jensen

RE: Notice of Claim to a Water Right No. A02-02072

Opaline Irrigation District
Attn: Mrs. Angela L. Jensen
P.O. Box 331
Marsing, ID 83639

Dear Mrs. Jensen:

I have just completed the data entry of the land list that you sent to us in November. We hope this delay has not caused you any inconvenience.

Enclosed for your files is a copy of the "Amended" Notice of Claim to Water Right No. A02-02072. Please note that this land list contains 2,539 acres. When the irrigation district originally filed their adjudication claim they paid fees for the irrigation of 2,500 acres. Upon review of the fees paid by Opaline, I find that we must request the submittal of an additional \$29.00. Below is a summary of the fees that have been paid.

12/7/88	Adjudication filing fee paid \$2,550. (Claim fee = \$50., Acreage Fee = \$2,500.)
6/12/81	Prior Snake 02 Adjudication fee \$10. Credited
4/3/91	Amended Acreage Fee = \$2,539.
AMOUNT DUE = \$29.00 - Rec'd 5/17/91 #W013324 FW	

Please submit this fee at your earliest convenience. Also, please look over the enclosed claim. If you have any questions or find any errors on the form, please let me know at your earliest convenience. You will also find Departmental Receipt No. W012880 in the amount of \$4.00 enclosed, which covers the fee for the orthophotoquads that were sent to you.

Sincerely,
