

IN THE DISTRICT COURT OF THE FIFTH JUDICIAL DISTRICT OF THE STATE OF IDAHO,
IN AND FOR THE COUNTY OF TWIN FALLS

IN RE THE GENERAL ADJUDICATION
OF RIGHTS TO THE USE OF WATER FROM
THE SNAKE RIVER BASIN WATER SYSTEM.

CIVIL CASE NUMBER: 39576

Ident. Number: A43-10235
Date Received: 5/24/1989
Receipt No: 5007309
Received By: Ad

NOTICE OF CLAIM TO A WATER RIGHT
ACQUIRED UNDER STATE LAW

1. Name: ART WHITAKER 208-645-2292
Address: P.O. BOX 64
MALTA, ID 83342

AND/OR
Name: LARENE WHITAKER 208-645-2292
Address: P.O. BOX 64
MALTA, ID 83342

2. Date of Priority: MAY 01, 1983

3. Source: EIGHTMILE CREEK Trib. to: SINKS

4. Point of Diversion:

Township	Range	Section	1/4 of	1/4 of	1/4	Lot	County
15S	28E	5	SW	NE	SE		CASSIA

5. Description of diverting works:
EARTH DAM TO BURIED PLASTIC PIPELINE TO SPRINKLERS

6. Water is used for the following purposes:

Purpose	From	To	C.F.S.	(or)	A.F.A.
IRRIGATION	03/15	11/15	2.280		

7. Total Quantity Appropriated is:
2.280 C.F.S. (and/or) A.F.A.

8. Total consumptive use is 285.0 Acre Feet Per Annum.

9. Non-irrigation uses:
NONE

10. Place of Use:

Township	Range	Section	1/4	of	1/4	Lot	Use	Acres
15S	28E	5	NW		SW		IRR	1.0
			SW		SW		IRR	15.0
			SE		SW		IRR	5.0

CONCERNING THE MATTER OF:
Adjudication claim for expanded acres
Water Right #A43-10235
Art & LaRene Whitaker

I Leland Gunnell am a resident of Cassia County and have been for quite a few years. Being a neighbor and friend of Art Whitaker and living on the Six Mile Ranch located south east of the Eight Mile Ranch, I have seen the new developments on his property at Eight Mile. In 1983 & 1984 there was an underground pipeline and sprinkler system installed on the Eight Mile Ranch. At this time and for several years after, I saw Art irrigate and raise crops on approximately 250 acres of ground. The drought that has been in this area for the past few years has cut down on a few of the acres that Art has been able to irrigate and the amount of crops raised on this property.

Dated this 29th day of January, 1992.

Leland Gunnell

On this 29th day of January 1992 before me a notary public in and for said State, personally appeared Leland Gunnell known to me to be the person whose name is subscribed to the within instrument and acknowledged to me that he executed the same.

Barbara Anderson
Notary Public

Residing at Albion, Idaho
My commission expires 7/23/93

RE: Evidence of Priority

RESPONSE DEADLINE
FEBRUARY 3, 1992

Dear Claimant:

The Notice(s) of Claim identified with the number shown above your name on the mailing label has been filed in the Snake River Basin Adjudication (SRBA). The Notice(s) indicate your water usage is based on "Beneficial Use" or a "Statutory Claim". Water rights of this type are established by the historical use of water, dating back to when water was first used for the purpose claimed. The date of first use, known as the priority date, has not been confirmed by a License, Decree or Permit. The Department will soon conduct reviews &/or field exams for the claims in your area. Since the priority date of a beneficial use water right can not be confirmed by field examination, proof must be provided supporting the priority date you have claimed.

The Department will not recommend the Notice(s) be decreed by the court as claimed if no evidence of a priority date is submitted.

Please find enclosed a computer printout of your Notice(s) and the pamphlet entitled "Evidence of Priority". The pamphlet describes the types of evidence required and suggests which documents will fulfill this requirement. I direct your attention to the two sections entitled "What Kind of Evidence is Required" and "Some Examples of Documents Which May Be Evidence of the Priority Date".

Please submit the required evidence supporting the priority date(s) by February 3, 1992, referencing all documents with the corresponding Notice number(s). If you have any questions not covered by this letter or the enclosed pamphlet, please contact this office.

Respectfully submitted,

Allen Merritt, P.E.
Water Rights Supervisor

RECOMMENDATION NOTES

From: Vikie Hancock

1/11/00

Regarding: Claim numbers: A43-04118 & A43-10235

Claim A43-04118 is based upon a statutory claim for 135 acres and 2.7 cfs, filed in 1981 by the claimant's mother in law, Sarah Wight - priority date 1917. Claim A43-10235 is for an expansion of 114 acres and an additional 2.28 cfs, based upon beneficial use and reflects an increased number of irrigated acres due to the construction of a reservoir and upgrade to a gravity flow sprinkler system by the claimant - priority 1983. An approved permit number 43-07213, for an additional 1 cfs for irrigation and storage rights - priority date 1985 - is not included in the Adjudication.

Claimant states that *all the water* available in Eightmile Creek has always been used on the ranch since the ranch began, and this is substantiated by documents in the file. He had no measurement data on the creek. My measurement, done in Jun 1999, totaled 2.7 cfs. Claimant states that there is usually more water coming down the creek later in the season.

The claim for 135 acres with a priority date of 1917 agrees with the statutory claim as filed, and is substantiated by affidavits and abstract of title in that claim file. Topography observed also lends credence to 135 acres being flood irrigated at an early date. Affidavits in claim file 43-10235 substantiate the upgrade to gravity sprinkler with additional acres irrigated in 1983. Because of Idaho's mandatory permit statute for surface water, no additional diversion amount can be recommended for claim 43-10235.

If and when a license is issued for an additional 1 cfs with a priority date of 1985 and an irrigated place of use of 245 acres, any high water from Eightmile creek will be allocated to the ranch. At such time, it should be noted that the three combined rights are not to exceed 245 acres or 3.7 cfs.

RE: Snake River Basin Adjudication (SRBA)
A43-04118, A43-10235

Dear Art,

I just thought I'd let you know that, once I looked at your weir again, I determined that it wasn't going to give me an accurate measurement. The bed of the weir pool is filled in, and not slowing the velocity of the water down as it goes through the crest. I used a current meter and conducted a flow measurement just where the path crosses at the Forest Service boundary. I measured 2.78 cfs there. My staff gauge at your weir indicated there was 1.26 cfs, a relatively big difference.

Now that I have the raw data, I'll be going on to other claims and get back to the paperwork on yours later in the season. If I come up with any questions, I'll get back to you then. Don't hesitate to call me if you have any further information you think would help me with my recommendation on your claims.

Sincerely,

A handwritten signature in cursive script, appearing to read 'V. Hancock'.

Vikie Hancock
Water Resource Agent

Field Exam Notes

Claim No: A43-04118, A43-10235
Art Whitaker Claims

6/11/1999

Agent: Vikie Hancock

I returned to the Whitaker ranch to verify the weir measurement and to determine where the water was going while the sprinklers were not running. I observed that water is running through a trough and then into 2" black plastic pipe which runs under the fence, close by a small travel trailer situated under one of the trees, and then out into the pasture below the trees, where it floods out onto the ground. There were other troughs scattered about the upper part of the pasture, but no water was being diverted to them at the time.

Mr. Whitaker came by, and said that part of the pivots have been delivered and when it stops raining and his road dries up sufficiently, they should get the pivots up and running. He said he had not been able to find the table that was given to him by the Forest Service to compute the weir measurement. I told him I would go up and use our staff gauge.

Upon further observation of the weir, I determined that the weir was not standard, as the bed of the weir pool had filled in to the point that the velocity of the water going over the crest was abnormally swift. I conducted an open channel discharge measurement with the Swiffer current meter downstream of the weir, at the point where the stream crosses the Forest Service boundary. See measurement notes and calculation in file.

Field Exam Notes

Claim No: A43-04118, A43-10235
Art Whitaker Claims

5/24/1999

Agent: Vikie Hancock

Mr Art Whitaker met me at the farm. He told me a little of the history of the place.

8mile creek is fed from one large spring approximately 2 miles upstream of the reservoir, on Forest Service land. Runoff and snowmelt does not seem to effect the spring, and in fact, usually the highest flows occur in the fall. Since the time that the farm was homesteaded, the entire flow of 8mile creek has been appropriated, as evidenced in the deeds and abstracts included in our files. He also provides as evidence the fact that a pure strain of Yellowstone Cutthroat trout exists in the creek, showing that the creek has not had contact with the rest of the watershed below. Fish and Game put a barrier structure in the creek upstream of his reservoir to prevent any accidental introduction of species from the reservoir, and Mr. Whitaker now limits sportsman access to his property.

Prior to his purchase, the farm belonged to his father-in-law, who had flood irrigated from ditches. When Mr. Whitaker took over, he began to improve the irrigation methods, and put in sprinkler lines. He also constructed a reservoir upstream of the homestead, which he said will hold about 5 days worth of water at the present time. Directly after the reservoir was constructed and more ground was put under cultivation by sprinkler, the drought years of the early 1990's hit, and there was not as much water available from 8mile creek as there had been, historically. Mr. Whitaker said that the flow rate of the creek has increased over the years, but still is not back to the amount that was available to him when our NAPP photos were taken in 1987. He is going to put in two pivot systems with handlines in the corners, and will continue to irrigate as much land as he has water for. He estimates that it takes 6 gpm per acre to irrigate his land. He hopes that the department can preserve his right to all the water of 8mile creek, even though the measurement done this day may not be the most that has been, or ever will, be available from the creek.

$$\frac{69\text{gpm}(244.6\text{ac})}{448.8} = 3.27 \text{ cfs}$$

$$245 \times .02 = 4.9 \text{ cfs}$$

+ - - Other Rights for Same Use -

..... Remarks

THIS PERMIT IS SUBJECT TO REVIEW UNDER THE PROVISIONS OF SECTION 4-2-203D, IDAHO CODE, AS DETERMINED NECESSARY BY THE DIRECTOR IN COMPLIANCE WITH PERTINENT ADOPTED RULES, REGULATIONS & STATUTES.

```
+ - - - - - Old Water Right Numbers - -  
- - - - - No Old Water Right Numbers found.
```

Conditions of Approval

- devices in such a manner that the amount of water entering the reservoir and the amount of water released from the reservoir can be measured.

- 188 - The storage of water under this right is contingent upon the certification of the dam and authorization of storage per the dam safety provisions of the Idaho Code.

026 - Permit holder shall commence the excavation or construction of
 - diverting works within one year of the date this permit is issued
 - and shall proceed diligently until the project is complete.

005 - Use of water under this right is subject to control by the
- watermaster of State Water District No. 43B.
016 - See remarks for additional conditions of approval.

E. NARRATIVE/REMARKS/COMMENTS

FROM: Georgia Satterlee
DATE: 22 September 1998
RE: 43-07213

The examination is to verify the irrigated acres for the permit, 43-07213 with a priority date of 06/28/1985. Proof of Beneficial Use was filed 04/25/1992. I utilized previous dam safety inspections (1991 and 1997) and viewed ASCS flights, hard copies (1987 and 1992) and slides (1996, 1997). Although I did not visit the site, I feel IDWR Dam Safety Personnel appropriately verified the storage facility and point of diversion. Also, I am confident the compilation of the ASCS flight data will verify the place of use element.

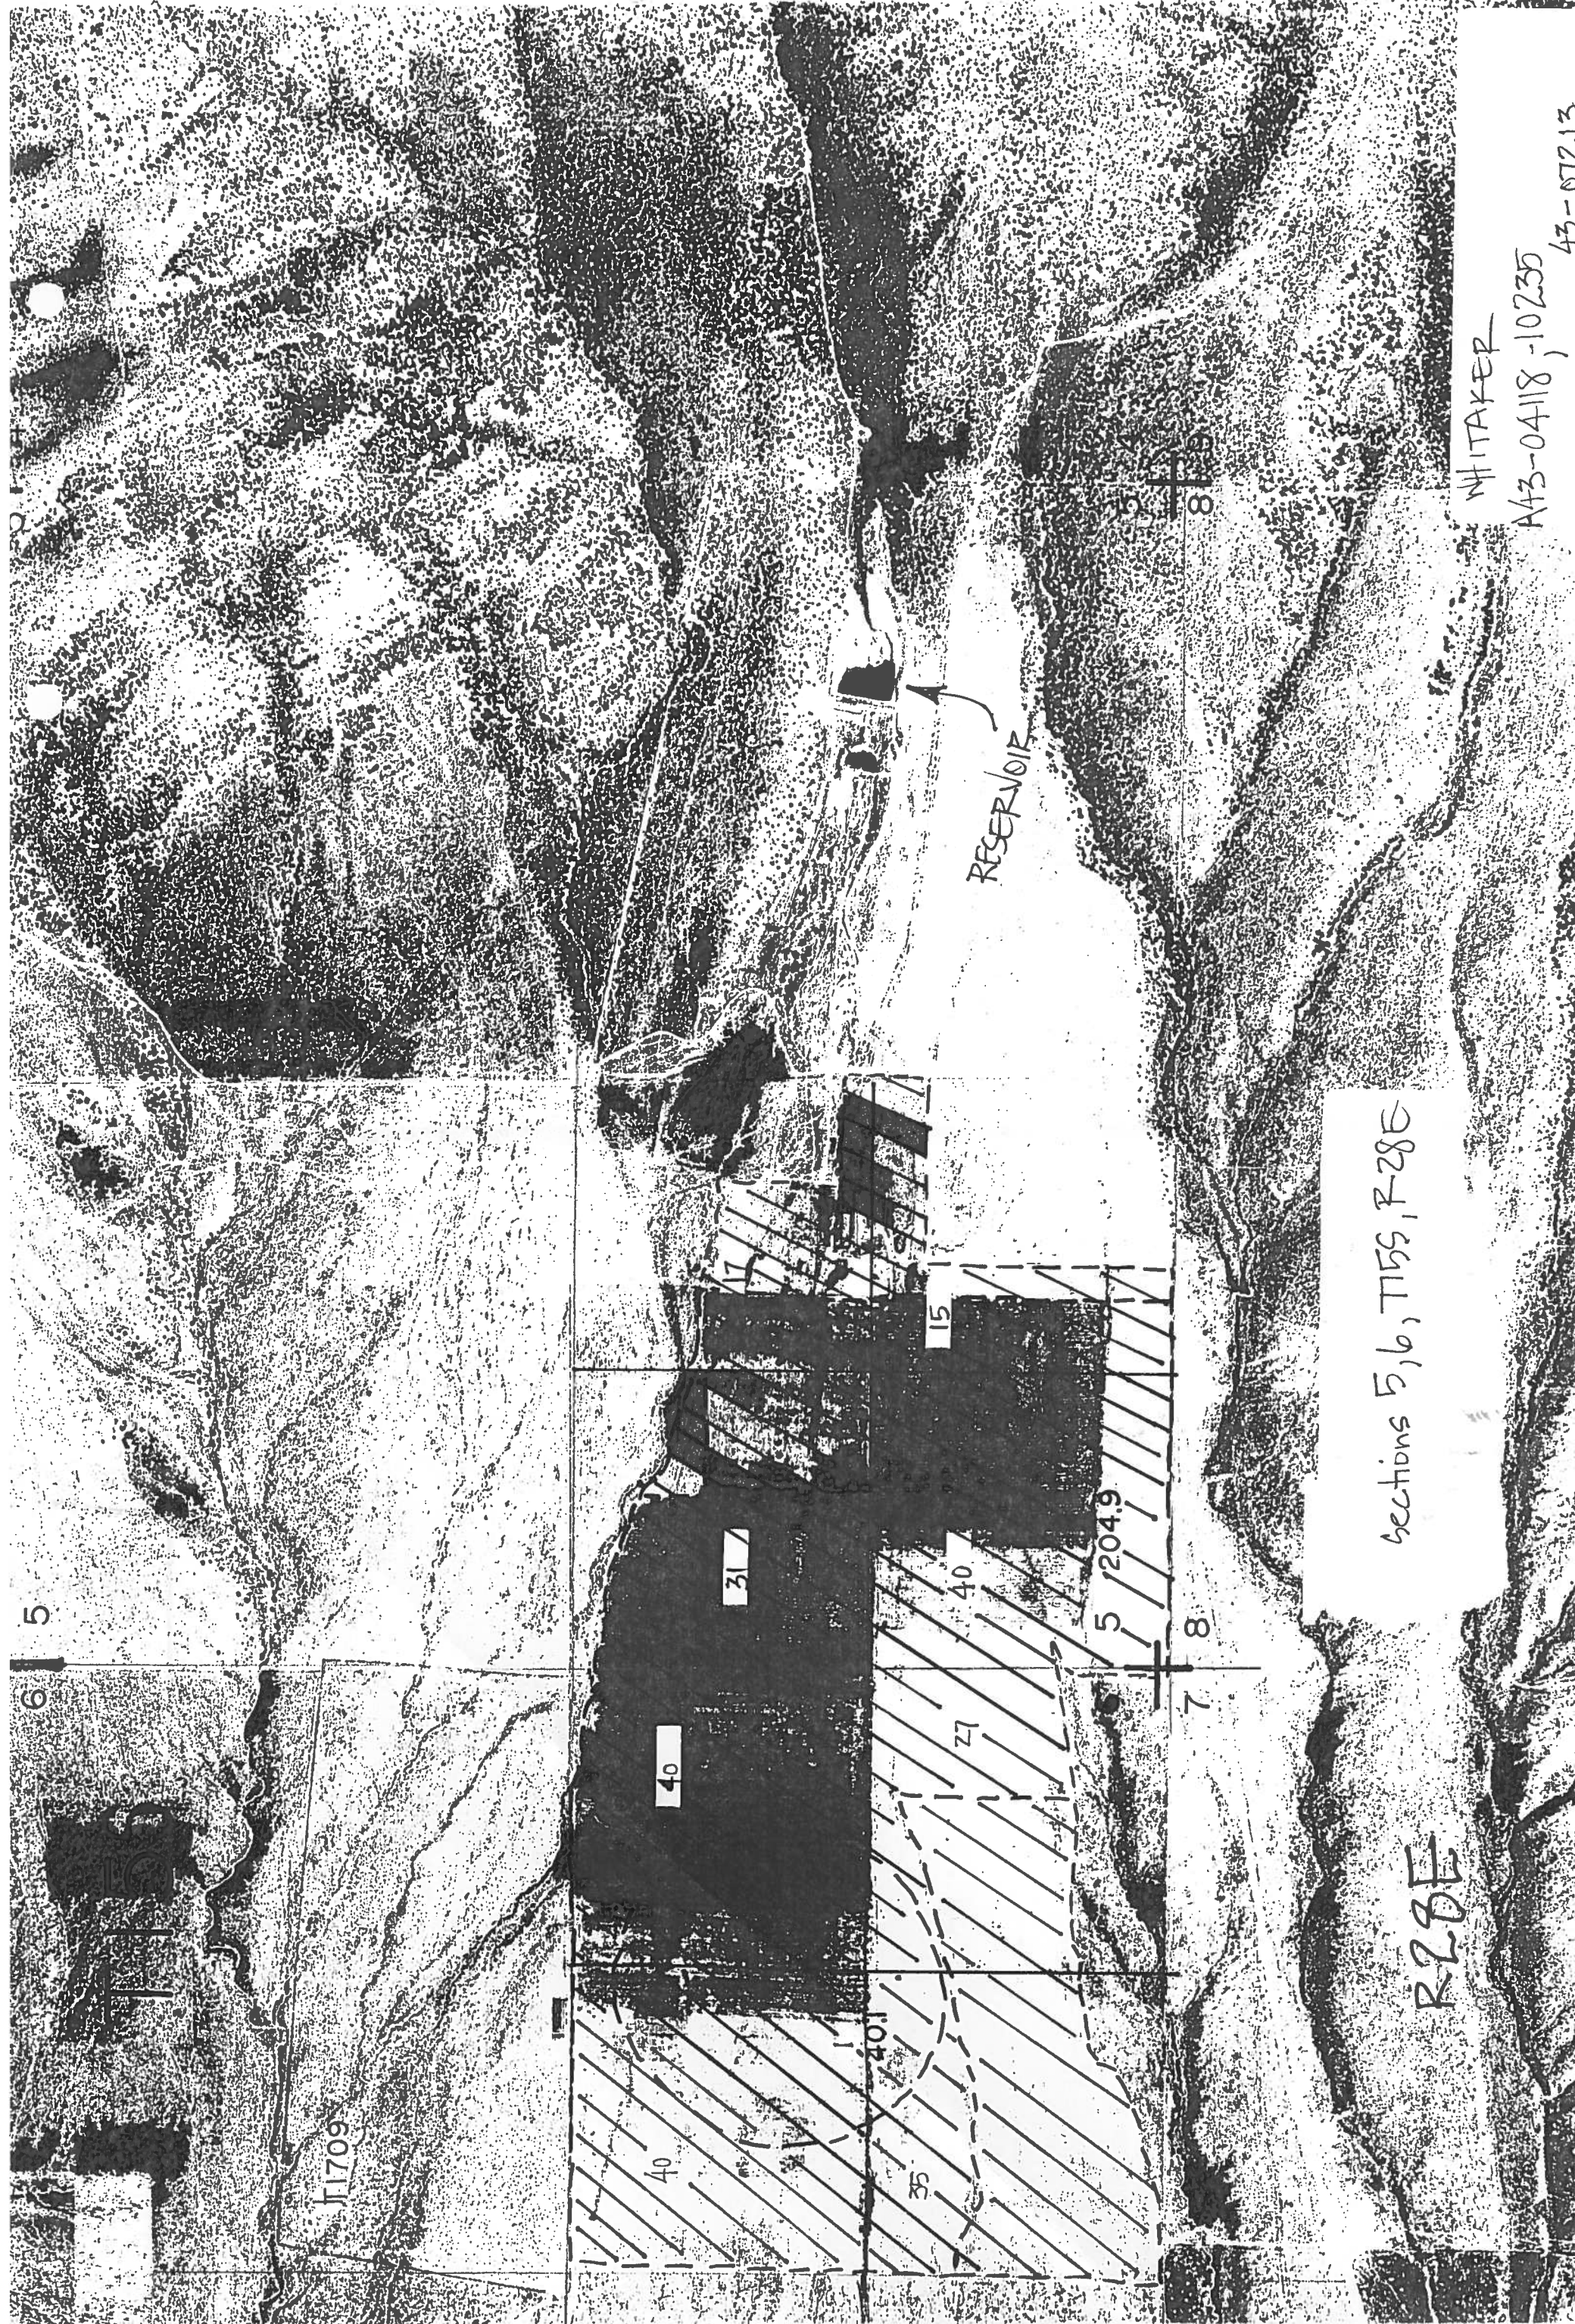

Art and LaRene Whitaker also have a Statutory Claim, (A)43-04118 with a priority date of 01/01/1917, and an expansion claim, A43-10235 with a priority date of 05/01/1983. All three rights call to acres in portions of both Sections 5 and 6, T12S, R28E.

The water for irrigation is from a storage facility, located in the SE $\frac{1}{4}$ of Section 5, on-stream of the Eightmile Creek.

The Whitakers had another permit, 43-07214, with the same priority date as 43-07213. This application for permit was to build up the existing diversion dam to enable the diversion of another 1.0 cubic feet per second (additional to the existing diversion rate). The construction was not completed and the permit lapsed in 05/16/1990.

It appears some of the acres have been irrigated prior to the Proof of Beneficial Use was filed for 43-07213. Because the additional claims are subject to the SRBA Basin 43 Review, the recommendation for this permit will be for 245 acres, with the permitted rate, and the measured storage capacity volume.
