RE: Evidence of Priority

RESPONSE DEADLINE
FEBRUARY 3, 1992

Dear Claimant:

The Notice(s) of Claim identified with the number shown above your name on the mailing label has been filed in the Snake River Basin Adjudication (SRBA). The Notice(s) indicate your water usage is based on "Beneficial Use" or a "Statutory Claim". Water rights of this type are established by the historical use of water, dating back to when water was first used for the purpose claimed. The date of first use, known as the priority date, has not been confirmed by a License, Decree or Permit. The Department will soon conduct reviews &/or field exams for the claims in your area. Since the priority date of a beneficial use water right can not be confirmed by field examination, proof must be provided supporting the priority date you have claimed.

The Department will not recommend the Notice(s) be decreed by the court as claimed if no evidence of a priority date is submitted.

Please find enclosed a computer printout of your Notice(s) and the pamphlet entitled "Evidence of Priority". The pamphlet describes the types of evidence required and suggests which documents will fulfill this requirement. I direct your attention to the two sections entitled "What Kind of Evidence is Required" and "Some Examples of Documents Which May Be Evidence of the Priority Date".

Please submit the required evidence supporting the priority date(s) by February 3, 1992, referencing all documents with the corresponding Notice number(s). If you have any questions not covered by this letter or the enclosed pamphlet, please contact this office.

Respectfully submitted,

Allen Merritt, P.E.
Water Rights Supervisor

RE: PROOF OF PRIORITY

DATE 1-10-92

NAME OF PARTY

CHARLES WARD

(office visit)

He and his wife came in to resolve the priority letter before the February 3RD deadline. The date on the water right as claimed is the same as the Decree right A43-00274. Mr. Ward said this is the same water right under both numbers. He suggested we come up there and look at the layout and then we would understand - I told him we would.

This right is either included in the Decree under the WR 43-00274 or it was developed after the Decree. I told them this and explained that perhaps we should resolve the need for priority proof at the time of our field examination.

If it is determined this right was developed after the Decree Mr. Ward should be allowed to submit the required proof of priority at a later date.

It is unclear why this right was filed w/o an complete file review and then the field exam.

[illegible][illegible]

1. This right is limited to the irrigation of 4.0 acres within the place of use described above in a single irrigation season.
2. Rights 43-272, 43-273, 43-274, 43-2558 and 43-10268 when combined shall not exceed the irrigation of 187.0 acres in a single irrigation season.
3. Use of water under this water right will be regulated by the watermaster of State Water District No. 43-C.

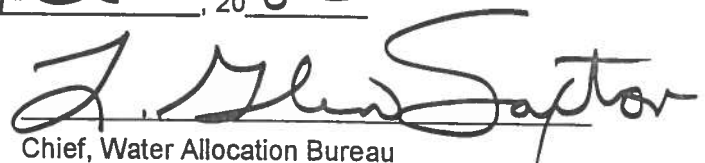

WATER RIGHT NO. 43-10268
As Modified by Transfer No. 69385

CONDITIONS OF APPROVAL

4. The right holder shall maintain a measuring device and lockable controlling works of a type approved by the Department in a manner that will provide the watermaster suitable control of the diversion.
5. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.0 afa per acre at the field headgate for irrigation of the lands above.
6. The quantity of water decreed for this water right for stockwater use is not a determination of historical beneficial use and shall not exceed 13,000 gallons per day.
7. The right holder shall accomplish the change authorized by this transfer within one (1) year of the date of this approval.
8. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
9. Pursuant to Section 42-1412(6), Idaho Code, this water right is subject to such general provisions necessary for the definition of the rights or for the efficient administration of water rights as may be determined by the Snake River Basin Adjudication court at a point in time no later than the entry of the final unified decree.
10. These springs rise in the waste water drain ditch and are used with the waste water to irrigate lands covered under the other water rights listed. Instream use for stockwater is also used.

This water right is subject to all prior water rights and shall be administered in accordance with Idaho law and applicable rules of the Department of Water Resources.

PRE EXAM REVIEW

POST EXAM ANALYSIS

43-272, 43-273 claimed from Cassia Creek on the decreed place of use and an additional forty acre tract (NWSW Sec 21). A portion of that quarter has been licensed for irrigation under 43-2558 (groundwater source).

Basis of recommendation:

I am recommending the Cassia Creek rights from two points of diversion that allows irrigation on both sides of Cassia Creek. The riparian area surrounding Cassia Creek is not irrigated or recommended. Rice Springs water is delivered into the north side delivery system and can irrigate all of the same acres north of Cassia Creek. The ground south of Cassia Creek is currently marginally irrigated. Charles indicated that there have been problems with the shared ditch and that he often does not get any water to irrigate with. The recommended PP/U is for all irrigated acres with the Cassia Creek decreed rights and limited to the irrigated acres within the decreed place of use.

43-274 was claimed for irrigation, stockwater, and domestic uses. The domestic and stockwater uses are not part of the decreed uses and therefore are not recognized under this right.

For irrigation uses, it was claimed from Warm Creek / Rice Springs on the decreed place of use plus two additional quarters. The decree lists Warm Creek as the source. Added ground is the NENW Sec 20 and the NWSW Sec 21.

In reviewing the 1962, 1968, and 1987 aerial photography there is no clear indication of an irrigation system in the NENW Sec 20.

The NWSW Sec 21, again, was apparently developed under 43-2558 and this use expanded onto that ground.

The stockwater use is claimed in the NENW of Sec 19 and W $\frac{1}{2}$ NW $\frac{1}{4}$ of Sec 21 all that is Blm ground. Remarks in the claim seem to indicate that a pipeline watering system was developed. If so this would indicate a separate system and use (in essence a new claim).

The domestic/stockwater use also appears to be in a pipeline that may or may not be independent of the other stockwater uses. Additional information needed as of 11-27-2000.

Basis of recommendation:

After visiting with Charles Ward, I am recommending this right for the ground North of Cassia Creek and south of the Cassia Creek ditch recommended under the other 2 decreed rights. I am not recommending any irrigation at the spring source. Charles Ward stated that he is the only person that diverts water from this source.

The domestic and stockwater uses were developed through two different systems and at different times. Therefore I have split those uses off this claim and am recommending them as follows.

43-11293 for domestic and stockwater with a 1938 priority date.

43-11297 for stockwater with a 1956 priority date.

The recommendations are based upon information supplied by Charles Ward.

43-2558 is a licensed groundwater right. The field examination was conducted in 1968. The licensed place of use overlaps with the decreed place of use and adds ground in Sec 21. The ground in the SWNW of Sec 21 does not appear to be irrigated. (Possible unrecorded transfer to other ground under the surface water claims?)

The licensing field exam identifies ground on both sides of Cassia Creek as the irrigated place of use but smaller than the ground identified under the claimed place of use for the decreed rights.

Basis of recommendation:

I am recognizing an unrecorded transfer for licensed acres in the SWNW of Sec 21. The recommended PP/U exceeds the licensed acre total, therefore I am recommending this right with a place of use limit of the licensed acreage.

43-10268 is a beneficial use claim for wastewater and "spring" water for use on ground already covered by the licensed and decreed rights. Evidence of priority pending investigation. Delivery system not clear. For additional information see the narrative from Steve Clelland dated 1-10-1992 describing some of the system and its operation.

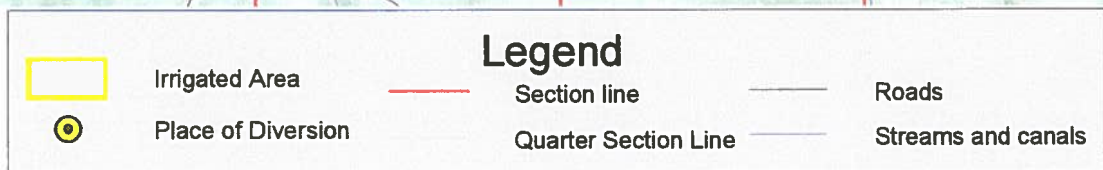

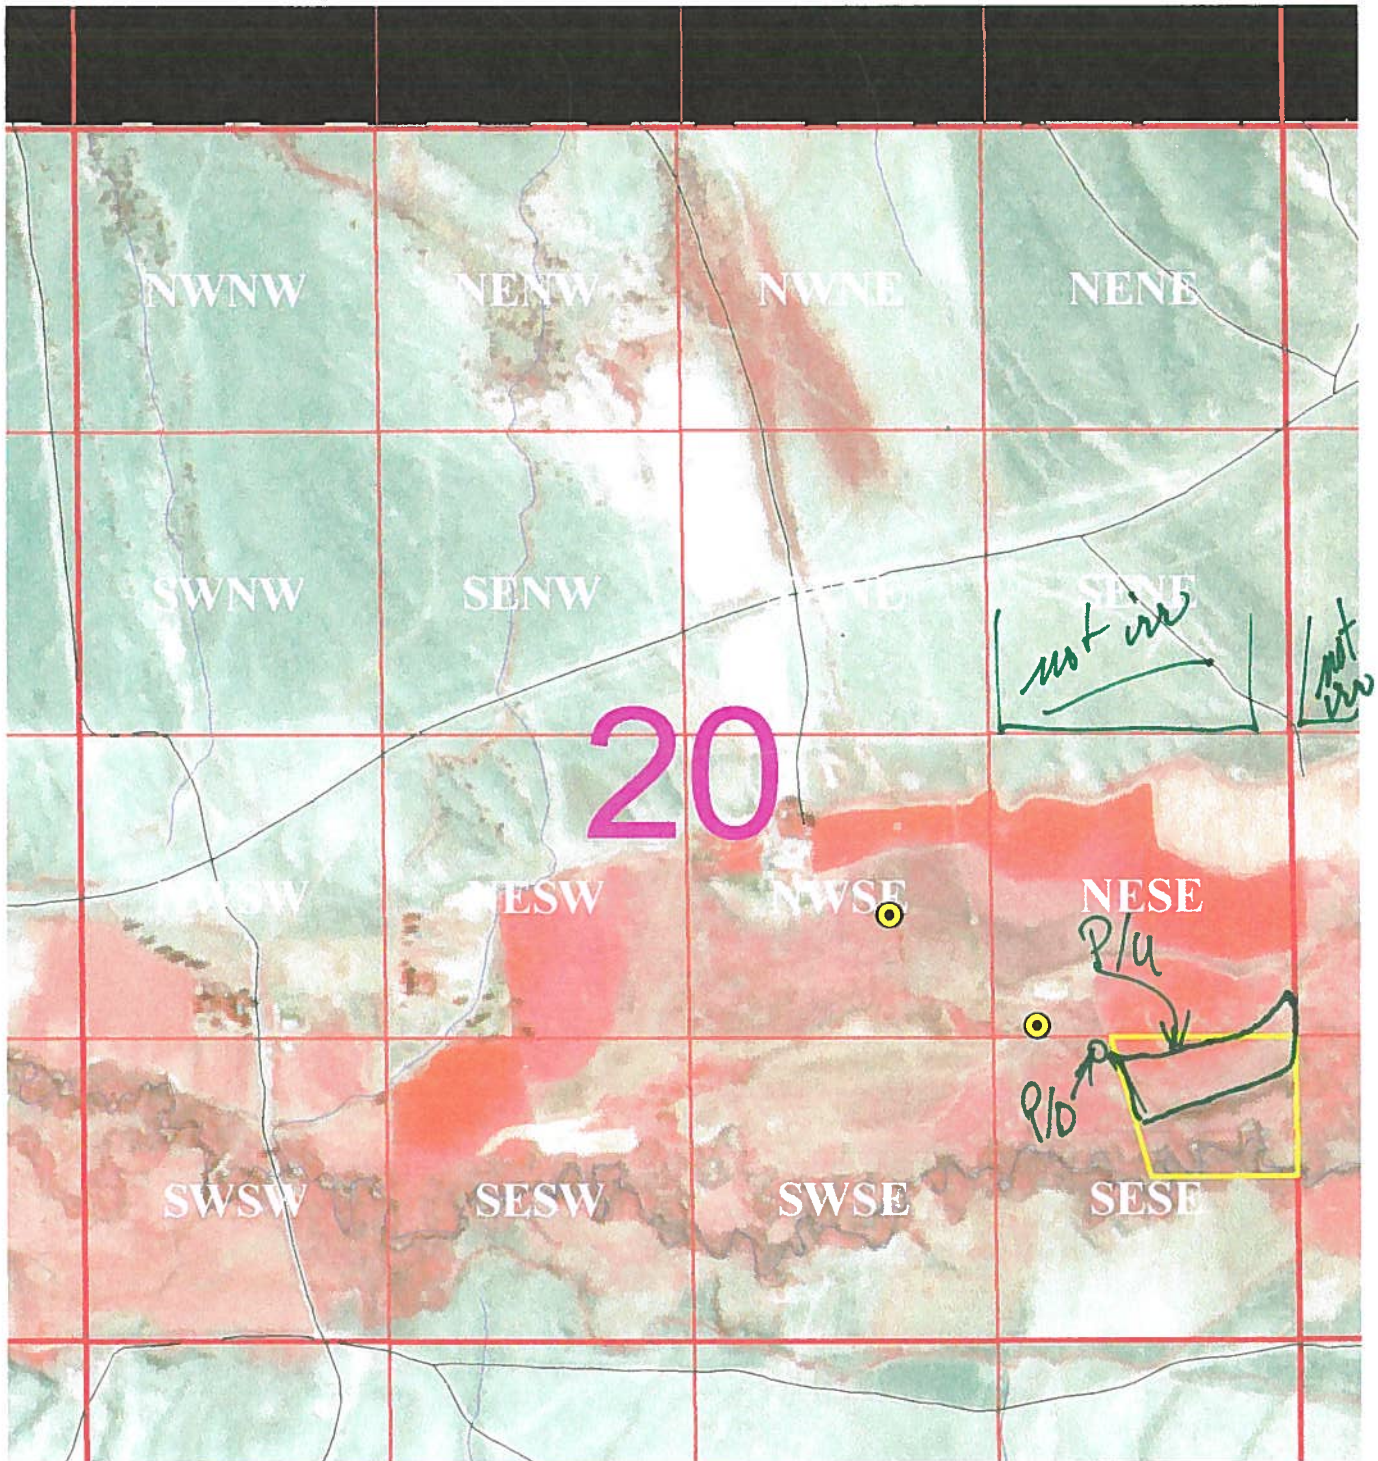

Basis of recommendation:

I am recommending the spring water source only. As the waste water is from the other rights recommended on this PP/U and is being reapplied onto ground within the same PP/U. After visiting with Charles Ward and reviewing the place of use in ArcView with him, I am recommending 4 acres as being irrigated with the spring water at 1½ inch per acre (recommendation is less than 5 acres). The recommended place of use is for 4 acres within the PP/U north of Cassia Creek.
