Transfer No. 4521 - Spratling Farms

Employee: Jeanie Robertson

Water Right Agent, Adjudication

I have visited this property several times and confirmed the areas irrigated with ASCS maps and verified the location of the wells. There are two wells located in the NWSE Section 7, one is not in use at this time. The pump has been pulled from this well but they did indicate that they may put it back into use. I support the acres found to be irrigated on the maps and intend to recommend them that way.

SUBJECT: Spratling Farms Transfer App.

FROM: Jim Stanton

DATE: 12-14-94

I am reviewing this transfer prior to advertising. As filed, the transfer showed a well in the NE/SW S. 7, but there is no log or other records of this well. Mr. Spratling was in today with proof of ownership, so I asked him about this. He indicated that the well location was incorrect, and that it is actually east of the well now in use near the center of the section. The mis-located well is not in use now, but will probably be rehabilitated so that it can be put back into service.

The SRBA staff is presently doing verification work on this property. So far, they have looked at the wells and marked the existing P/U on aerial photos. The well locations have been verified. No flow determinations have been made. Pivot corners are in CRP protection now, so would probably be recommended by SRBA. If this transfer is approved, most of the corners would no longer be irrigated. With SRBA work in progress, probably to be completed next summer, I do not plan to visit the property. As long as future irrigation on this farm does not exceed the 1092 acres as proposed, the transfer should not result in expansion of water usage. Water rights are ultimately subject to SRBA findings, of course.

RE: Evidence of Priority

RESPONSE DEADLINE

FEBRUARY 3, 1992

Dear Claimant:

The Notice(s) of Claim identified with the number shown above your name on the mailing label has been filed in the Snake River Basin Adjudication (SRBA). The Notice(s) indicate your water usage is based on "Beneficial Use" or a "Statutory Claim". Water rights of this type are established by the historical use of water, dating back to when water was first used for the purpose claimed. **The date of first use, known as the priority date, has not been confirmed by a License, Decree or Permit. The Department will soon conduct reviews &/or field exams for the claims in your area. Since the priority date of a beneficial use water right can not be confirmed by field examination, proof must be provided supporting the priority date you have claimed.**

The Department will not recommend the Notice(s) be decreed by the court as claimed if no evidence of a priority date is submitted.

Please find enclosed a computer printout of your Notice(s) and the pamphlet entitled "Evidence of Priority". The pamphlet describes the types of evidence required and suggests which documents will fulfill this requirement. I direct your attention to the two sections entitled "What Kind of Evidence is Required" and "Some Examples of Documents Which May Be Evidence of the Priority Date".

Please submit the required evidence supporting the priority date(s) by **February 3, 1992**, referencing all documents with the corresponding Notice number(s). If you have any questions not covered by this letter or the enclosed pamphlet, please contact this office.

Respectfully submitted,

Allen Merritt, P.E.

Dear Mr. Spratling:

As we discussed over the telephone a few days ago, I continued my research into the water rights appurtenant to the land you described for me over the phone. Water rights appurtenant to the land in the W/2, Sec. 17, T11S, R28E, were reviewed both before and after the transfer initiated by Farm Credit Services in April, 1987. The water rights appurtenant to that land include the following:

- 43-2417 - License
- 43-2418 - License
- 43-4060 - Claim
- 43-4061 - Claim
- 43-4062 - Claim

The water right numbers denoted as licenses are for water rights following the statutory procedure for appropriation of water under existing Idaho law. The water rights denoted as claims are those where a claim to water right has been made pursuant to the constitutional method of diversion of water to a beneficial use. This was the ordinary means of establishing a water right for ground water purposes prior to March 25, 1963. After that date, all ground water rights are required to have been established by filing a permit which then goes to license after the construction of the works has been completed. Based on my research, it appears that the claims are valid water rights even though they have not yet been adjudicated which is the last formal procedure before they become a vested water right. That process is presently going on as the Snake River Basin Adjudication but it will be next year before the water right claims under the adjudication process must be filed for Cassia County.

1-17-9.

Based on my review of water rights, the Farm Credit Services transferred to your land water rights in the amount of 1.92 cubic feet per second (862 gallons per minute) for stockwater purposes and 2.85 cubic feet per second (1,279 gallons per minute) for irrigation of 248 acres of land. The well location (point of diversion) for this water is in the SW/4 NW/4, Sec. 17, T11S, R28E, and the transfer was made in April, 1987. All of the water right transfers are identical for each one of the above listed water rights and the total diversion rate for both stock and irrigation are not cumulative, therefore, the 1.92 cfs and 2.85 cfs are the maximum rate of diversion allowed for all of the water rights together.
