Conditions of Approval:

1. R19 The right holder shall maintain a totalizing measuring device of a type approved by the Department as a part of the diverting works.
2. 01Q After specific notification by the Department, the right holder shall measure the diversion or shall enter into an agreement with the Department to determine the amount of water diverted from power records and shall annually report the information to the Department.
3. R64 This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.0 afa per acre at the field headgate for irrigation of the lands above.

4. T07 The right holder shall accomplish the change authorized by this transfer within one (1) year of the date of this approval.
5. T08 Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
6. T09 Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.
7. T19 Pursuant to Section 42-1412(6), Idaho Code, this water right is subject to such general provisions necessary for the definition of the rights or for the efficient administration of water rights as may be determined by the Snake River Basin Adjudication court at a point in time no later than the entry of the final unified decree.

Remarks:

1. General Right 43-10541 is limited to the irrigation of 52.0 acres within the place of use described above in a single irrigation season.
2. General Rights 43-2450D, 43-10539 and 43-10541 when combined shall not exceed a total diversion rate of 1.52 cfs, a total annual maximum diversion volume of 304.0 af at the field headgate, and the irrigation of 229.6 acres.
3. Explanatory Rights 43-10539 & 43-10541 are expansions of Right 43-2450D pursuant to Section 42-1416B, Idaho Code.
4. General Rights 43-2447B, 43-2448B, 43-2450D, 43-10539 and 43-10541 when combined shall not exceed a total diversion rate of 3.61 cfs, a total annual maximum diversion volume of 738.0 af at the field headgate, and the irrigation of 264.0 acres.
5. General Approval of Transfer 66918 does not confirm SRBA Claim 43-10541.

RE: NOTICE OF PLEDGE - NORMAN BROS. - YOUR FILE H-42303

Dear Mr. Kirkland:

The department has reviewed the Notice of Pledge which you forwarded to the department in connection with water right filing nos. A43-02450B, A43-02450D, A43-10539, A43-10541 and 43-07224 as shown by department records. Your letter advises that you have executed a mortgage in connection with the water right filings and you have asked the department to notify you of any future changes in connection with the water right filings.

I have reviewed the specific water right documents in department files and wish to provide the following information to you:

A43-02450B is a Snake River Basin Adjudication claim based on prior license 43-02450B. The claim has been renumbered in department files to A43-02450D. The right provides for the diversion of 1.52 cfs of ground water for the irrigation of 76 acres.

A43-10539 is a Snake River Basin Adjudication claim based partly on an accomplished transfer and partly on the Critical Ground Water Area expansion presumption of section 42-1416B, Idaho Code.

A43-10541 is a Snake River Basin Adjudication claim based on the presumptions of Section 42-1416B, Idaho Code.

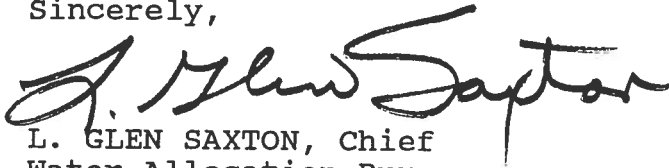

43-07224 is a pending application for permit which has not been approved by the department. The department likely will not approve the application, since it is in the Raft River Critical Ground Water Area.

All of the above described water rights are dependent upon action by the department or the Snake River Basin Adjudication court to determine their validity.

Enclosed is a copy of the Notice of Pledge you forwarded which I have acknowledged receipt of by signing the bottom of the form. The department will file a copy of the Notice of Pledge with each of the water right files you have referenced.

If you have questions, please feel free to contact the department.

Sincerely,

A handwritten signature in black ink, appearing to read "L. Glen Saxton". The signature is fluid and cursive, with the first name "L." being small and the last name "Saxton" being larger and more prominent.

RE: Evidence of Priority

RESPONSE DEADLINE
FEBRUARY 3, 1992

Dear Claimant:

The Notice(s) of Claim identified with the number shown above your name on the mailing label has been filed in the Snake River Basin Adjudication (SRBA). The Notice(s) indicate your water usage is based on "Beneficial Use" or a "Statutory Claim". Water rights of this type are established by the historical use of water, dating back to when water was first used for the purpose claimed. **The date of first use, known as the priority date**, has not been confirmed by a License, Decree or Permit. The Department will soon conduct reviews &/or field exams for the claims in your area. Since the priority date of a beneficial use water right can not be confirmed by field examination, **proof must be provided supporting the priority date you have claimed.**

The Department will not recommend the Notice(s) be decreed by the court as claimed if no evidence of a priority date is submitted.

Please find enclosed a computer printout of your Notice(s) and the pamphlet entitled "Evidence of Priority". The pamphlet describes the types of evidence required and suggests which documents will fulfill this requirement. I direct your attention to the two sections entitled "What Kind of Evidence is Required" and "Some Examples of Documents Which May Be Evidence of the Priority Date".

Please submit the required evidence supporting the priority date(s) by **February 3, 1992**, referencing all documents with the corresponding Notice number(s). If you have any questions not covered by this letter or the enclosed pamphlet, please contact this office.

Respectfully submitted,

Allen Merritt, P.E.
Water Rights Supervisor

- The right holder shall maintain a totalizing measuring device of a type approved by the Department as a part of the diverting works.

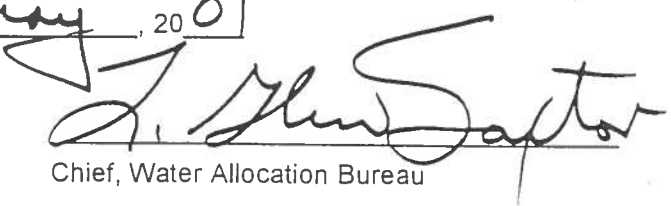

WATER RIGHT NO. 43-2450D
As Modified by Transfer No. 66918

CONDITIONS OF APPROVAL

6. After specific notification by the Department, the right holder shall measure the diversion or shall enter into an agreement with the Department to determine the amount of water diverted from power records and shall annually report the information to the Department.
7. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.0 afa per acre at the field headgate for irrigation of the lands above.
8. The right holder shall accomplish the change authorized by this transfer within one (1) year of the date of this approval.
9. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
10. Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.
11. Pursuant to Section 42-1412(6), Idaho Code, this water right is subject to such general provisions necessary for the definition of the rights or for the efficient administration of water rights as may be determined by the Snake River Basin Adjudication court at a point in time no later than the entry of the final unified decree.

This water right is subject to all prior water rights and shall be administered in accordance with Idaho law and applicable rules of the Department of Water Resources.

Data Submission for Estimating Well Pumping Capacity

This form is for documenting historic flow rate from a well based on available information including: flow measurements, pump curves or specifications, system characteristics such as motor horsepower, depth to water, discharge pressure, and irrigation system characteristics. The department is attempting to quantify the maximum rate of flow diverted and put to beneficial use in the years prior to November 1987.

If you have any questions regarding this data request, please contact either Scott King (208) 327-7897 or Cindy Bird (208) 327-5450. You may also dial the adjudication hotline (1-800-451-4129) and ask for Scott or Cindy. If you prefer to discuss these questions with us instead of completing the form, your call is welcomed. We can also be contacted by e-mail at sking@idwr.state.id.us and cbird@idwr.state.id.us

1) Rate of Flow measurements: _____ (cfs or gpm)

Please give approximate date, person or entity performing measurement, description of measuring device and any other applicable data. Examples may include measurements made as part of an energy efficiency survey, which are often provided as a service through your electric utility.

2) Pump characteristic curves or specifications: Please include copy of pump curve, or state designed pumping capacity, rated flow and head, and approximate year of pump installation. Other helpful items may include the pump manufacturer, model number, and number of stages.

3) Pumping system characteristics:

Diversion rate can be determined by using power, pumping lift, discharge pressure, and estimated pumping efficiency. If the system has changed over time, you can provide information for several system configurations.

Year	Well pump motor horsepower	Booster pump(s) motor horsepower	Depth to water, pump off (ft)	Depth to water, pump on (ft)	Discharge pressure (psi)

4) Irrigation System:

Please provide description of the water delivery system. State number of lines and birds, nozzle size, and operating pressure(s) of impact-type sprinkler systems; designed rated flow for pivot systems. As above, if various systems have been used through the years, provide year as well. Example:

1963 to 1974 – Well pump open discharges to ditches for flood irrigation using 50 siphons per set. Siphons were 1.5 inch diameter, 5 feet long.

1975 to 1984 – Six wheel lines with 32 birds per line, 5/32 inch nozzles operating at 60 to 70 psi at the sprinklers.

1985 to present – Eight tower center pivot with impact sprinklers and end gun, no corner catcher, designed for 1150 gpm. Also solid set hand lines in corners which operate separate of the pivot, operating a total of 250 birds per set, 9/64 inch nozzles operating at 65 to 75 psi at the sprinklers.

5) Other information:

Please also include any other information that you feel may indicate maximum historic diversion rate for your well.

Property with well was in CRP at the time I purchased it. It remained in CRP program for 10 yrs until 1998.

Re: Proceeding with transfer...

I spoke with Mr. Grush today and told him of my draft recommendations for A43-10539 and A43-10541, essentially granting the acres with no additional diversion or volume amounts. I told him that, if approved, this transfer would likely allow him only 2.17 cfs on his 264 acres, or enough water to run one pivot. He wanted to know how many more acres he would need to dry up in order to have the additional water for both pivots? He is now in the process of deciding whether to continue with this transfer or not. He mentioned having two other transfers in the works where he is drying up corners to move to a dairy and now wonders if he should just move that water to the land in Section 27 instead? He said he would be in next week to talk with someone on this matter...

CC: A43-02447, A43-02448, A43-02450D, A43-10539, A43-10541

FROM: Jeanie Robertson 

This transfer proposes to dry up a total of 35 acres and move .35 cfs each of rights 43-02447 and 43-02448, with a combined limitation of .65 cfs, from lands in Section 15, T13S, R27E. The water appears to be valid from these two rights and available to be moved to the land in Section 27, T13S, R27E.

The problem arises with the land in Section 27, however. There are three claims in Section 27, but the only one with a valid water right seems to be A43-02450D, for 1.52 cfs on 76 acres. There have been some problems with this water right in the past, mostly arising from a transfer (#2595) which was approved to move 2.74 cfs onto 76 acres in a different place of use. The transfer was approved for more than an inch per acre based on information submitted showing the soil types required additional water. There was concern expressed by the Department at the time because only 9.5 acres was designated on 8 different 40-acre tracts. The Department worried that an expansion may occur using the additional water on more than 9.5 acres per tract. It was later determined that an expansion of the place of use had occurred and eventually, after hearings, etc. the transfer was voided. The water reverted back to the original place of use. In 1986, transfer #3227 was approved for 1.52 cfs on 76 acres. (The place of use was two forty-acre tracts in the same general area as previous transfer #2595.)

A43-10539 claims 1.22 cfs on 101.6 acres. This diversion rate appears to be the difference between the 2.74 cfs from transfer #2595 and the 1.52 cfs from transfer #3227. As transfer #2595 was voided and the water reverted back to the original right, this rate cannot be justified. The 101.6 acres can be allowed under **42-1416B** as an **expansion of right A43-02450D**, but with **no additional diversion rate or volume and a priority date of June 30, 1985.**

A43-10541 claimed .62 cfs on 52 acres under **42-1416B**. The acres can be recommended as an **expansion of right A43-02450D**, with **no additional rate or volume of water and the priority date of June 30, 1985.**

If this transfer is approved, it could only allow 2.17 cfs for 264.6 acres. (1.52 cfs from A43-02450D and a combined limit of .65 cfs from portions of rights A43-02447 and A43-02448).

*Additional legal advice is being sought from Deputy Attorney General, Nick Spencer, for the final recommendations of these claims in the SRBA.
