SYSTEM ANALYSIS (GROUNDWATER)

KUNAU CLAIMS

The current system is a common pipeline tying groundwater and surface water together to irrigate a permissible place of use (PP/U) found to be 405 acres. The groundwater system does not cover all of the ground included in the surface water rights. Two wells exist within this system and they were claimed through three different rights.

Claims A43-02281 and A43-04211 claim the well located in 13S, 27E, Sec 19, NWNW. Claim A43-04209 claims the well in 13S, 27E, Sec 19, SWNW.

ANALYSIS OF A43-02281

This claim matches the licensed right as transferred. A transfer was filed to correctly identify the point of diversion. A season of use of 3-15 to 11-15 was assigned to this right at that time. All of the claimed and licensed plus additional acreage is irrigated; therefore this right is recognized for its licensed place of use of 80 acres. In reviewing the documents in the microfiche, it appears that the system was developed in 1932 (see Proof of Beneficial use) for the licensed place of use. All information also points to only the licensed acres as being irrigated as of June of 1941.

ANALYSIS OF A43-04211

This claim is from the same well as A43-02281 but is for acres in the adjoining section to the west. That claim identifies 67 acres as the place of use. Within the two forties identified as the place of use I found 65 irrigated acres. Those 65 acres includes a dirt access road as part of the irrigated place of use. It does exclude the Raft River Rural Electric easement property.

The claim indicates a 1940 priority date. Circumstantial evidence on microfiche for 43-2281 would indicate that that ground was not irrigated in 1940. Further the licensing field exam would indicate that the capacity for the system in 1941 was approximately the licensed rate (a Parma water lifter rated at 2.00 cfs). The statutory claim states in item 5.B. that there was a hand dug well in 1940 and the well was deepened in the early 1950s. The assumption is that the current 150-hp motor was installed at that time. Based upon the information currently before me, I am recommending this right with a 1955 priority date, and at 1 inch per acre for the additional acres.

The system in 1955 is not known. Currently I found a 150-hp pump operating a sprinkler system. Lifting from 100 ft and against 40 psi would produce approximately 4.80 cfs at 70% efficiency. The combined diversion rates for 43-2281 and 43-42111 are 3.00 cfs. This is less than the theoretical calculation. Recommended rate is $65 \text{ ac} * 0.02 = 1.30 \text{ cfs}$ and the volume limitation is $65 \text{ ac} * 4 = 260 \text{ afa}$.

43-04209

This is the third groundwater right that is tied into the system. This well is located approximately ¼ mile south of the well described above. The original statutory claim described a place of use in the north ½ NW ¼ of sec 19 and the west ½ NW ¼ of sec 18. There is necessarily some overlap with the claimed place of use for 43-02281 based upon the number of acres claimed in the north ½ NW ¼ of sec 19.

		NWNW	NENW
Actual acres	Lot 1	48.8 ac	39.6 ac
Irrigated acres		47.5	39.6
43-02281		30.0	10
43-04211		28.0	40
total claim acres		58	50

Although the NWNW quarter is over claimed by a minimum of 10.5 acres and the NENW quarter by 10.4 acres, the historical overlap of the systems is not known. It is my understanding that the original systems were independent of each other as far as the ditch systems used irrigated different lands. I am therefore recommending the irrigated acres within the claimed place of use less the 40 acres previously recognized under 43-2281 located in the N½NW¼ of sec 19. The found and recommended place of use is 217 acres. This recognizes acre shifting between quarter/quarters from the claimed place of use to the recommendation.

The claimed priority date is 1940, however the statutory claim indicates in item 5.B. that the well was deepened in 1955 and a 100-hp motor installed delivering water to the place of use through a pivot and sprinkler system. Assuming the 100 hp, at 70% efficiency, pumping at 100 ft against a 40-psi sprinkler system the system capacity would be 3.20 cfs. My recommendation is for the 1955 priority date at 3.20 cfs as developed at that time. The recommended volume limitation for this right is 217 ac * 4 = 868 afa. I am not recognizing the earlier priority date as the currently available information would indicate that a smaller diversion rate was perfected at that time (limited info available).

43-31 & 43-144B (CASSIA CREEK)**43-10554 & 43-4210 (RAFT RIVER)****SYSTEM ANALYSIS (SURFACE WATER)****KUNAU CLAIMS**

All three claims identify a common place of use that includes two separate locations. A change of ownership has been submitted that identifies a portion of the claimed place of use. The 'north' portion of the place of use claimed at 345 acres is identified as being sold to Rodney Hall and Glen Kunau maintains the 'south' portion ownership claimed at 126 acres. No information identifying the desired splitting of the rights has been submitted, therefore the claims are being recommended in Glen's name only.

4-1-1883	3.40 cfs	4-1 to 10-1	471 acres within sections 18 & 19 in 13S, 27E and sections 24 & 25 in 13S, 26E
4-1-1883	3.40 cfs	4-1 to 10-1	13S, 27E, Sec 19 Lt 2, W $\frac{1}{2}$ NE $\frac{1}{4}$, SE $\frac{1}{4}$ NW $\frac{1}{4}$

As the claimed information agrees with the decreed information for most of the elements I am recognizing this right as being based upon 43-143.

The point of diversion was not decreed. The claimed place of use is a PP/U that includes the decreed place of use although the claimed place of use for government lots within Sec 18 and 19 are less than the lot acreage found to be irrigated.

Raft River runs south to north through two forty-acre tracts of the decreed place of use. The river channel has been straightened out since 1987. Although some additional acreage may have been added to the system of cultivated ground along the river channel, the number of 'new' acres have not been identified. I found 163 irrigated acres within the original decreed place of use and this is the limitation for this right.

A43-04210

This claim is for Raft River water and is supplemental to other rights. The claim indicates that the water is piped to separate locations. Rodney Hall indicated that this right should be split between Kunau and Hall. As of the date of this review I have not received direction as to how the right should be split.

Evidence of priority was not submitted for this claim. The statutory claim indicates a 1940 priority date but as previously noted the 'southern' portion of the claimed place of use was not irrigated in 1968. Not enough information exists for me to recommend this right at this time.

Dear Mr. Jones:

In reviewing SRBA claims (not yet to the stage of even being in a preliminary director's report), we have discovered private party claims that appear to unintentionally include BLM land. We have field investigated these claimed sites and have found no usage or source as claimed. There are 27 in basin 43 and 4 in basin 45 as follows:

RE: SRBA CHANGE OF OWNERSHIP
A43-04210, A43-10554, A43-00031, A43-00144B

Dear Mr. Hall:

I wanted to confirm our telephone conversation of June 22, 1995. When doing a change of ownership, I verify the property listed as being sold on the warranty deed is the same as the property listed on the water rights claim forms. It was during this process that I found that not all the property associated with the water rights listed above was listed on the warranty deed. Specifically, in Township 13S, Range 26E, Section 24 the SESW and the SWSE tracts and in Section 25 the NENW, NWNE, and the NESE tracts were not shown as having been purchased by you on the warranty deed. I am enclosing two maps showing the difference between the property listed on the warranty deed and the property listed on the water right claim forms.

If you have purchased from Mr. Kunau all the property outlined in blue on the enclosed map, you can do one of two things. You can supply me with a copy the warranty deed showing you as the new owner of the property circled in yellow (on the enclosed map) or you can have Mr. Kunau sign the enclosed Notice of Change of Ownership form where it is highlighted in green. If you can obtain Mr. Kunau's signature, I will not need a warranty deed. Please return the Notice of Change of Water Right Ownership form either with a warranty deed or Mr. Kunau's signature to the above address.

Thank you for helping me straighten this out, Mr. Hall. If you have any questions regarding this matter, please feel free to give me a call at 736-3033.

Sincerely,

Trish Fawcett
