Re: **ELIGIBILITY OF SOUTH ELMORE IRRIGATION COMPANY LANDS INTO THE WATER SUPPLY BANK FOR HIGH LIFT PUMPERS PROJECT**

The first payment from the Water Supply Bank ("bank") was issued to South Elmore Irrigation Company ("South Elmore") on October 8, 2002, along with a map identifying the eligibility status (eligible, ineligible, or questionable) of the lands after preliminary review by the Department of Water Resources ("department"). The following is a summary of the eligibility evaluation, and of communications with the South Elmore water users regarding the evaluation.

Questionable or Ineligible Fields at South Elmore

Please refer to the attached map for identification of the fields, their eligibility status, and the acreage estimates compiled for the first payment to South Elmore. Note that all of the acreages listed on the map and referred to in this discussion are based on measurements made by the department using infrared satellite imagery from the 2000, 2001, and 2002 irrigation seasons. The fields identified as questionable or ineligible include (see attached map for corresponding field numbers):

1. Since the first payment was issued, 10 acres of the 96.8-acre field in section 1, T05S R06E, have been identified as ineligible based on water right authorization. The status of this field will be reported with the final payment.
2. 25.3 of the total 64.8 acres around a pivot in the NW quarter of section 10, T05S R06E have been identified as ineligible due to irrigation this year. To date, the applicant has not questioned the department's evaluation regarding this field.
3. 193.8 acres and the adjacent 70.7 acres in section 11, T05S R06E have been identified as ineligible due to irrigation this year. Property owner, Jack Post has contacted the department and intends to submit evidence documenting a one-time water use for dust control purposes.
4. 123.9 acres in section 23, T05S R06E, have been identified as ineligible since the first payment was issued. These lands do not appear to have been irrigated during the 2000 and 2001 irrigation seasons. The status of this field will be reported with the final payment.
5. 93.2 acres in section 23, T05S R06E, have been identified as ineligible. These lands do not appear to have been irrigated during the 2000 and 2001 irrigation seasons. Additionally, the southern portion of the field, in the SESW forty, is not

authorized by a valid water right. To date, the applicant has not questioned the department's evaluation regarding this field.

6. A total of 19.4 acres of a half pivot in section 22, T05S R06E, have been identified as ineligible due to irrigation this year. An additional 5.4 acres were identified as questionable pending further investigation of whether irrigation took place this year (see discussion below of landowner Sid Wing's explanation of water use).
7. 112.2 acres in section 15, T05S R06E, were identified as questionable based on water right authorization. Since the first payment was issued, 90 of the total acres have been determined to be eligible, and 22.2 acres ineligible (see discussion below of water right history and comments from Sid Wing).
8. A 121.9-acre pivot in sections 15 and 22, T05S R06E, has been identified as questionable based on water right authorization (see discussion below of water right history and comments from Sid Wing).
9. A 59.3-acre half pivot in section 22, T05S R06E, was identified as questionable based on water right authorization. Since the first payment was issued, however, the field has been determined to be eligible for payment (see discussion below of water right history).

Discussion of Water Rights Appurtenant Squaw Creek Farm's Lands

Sid Wing of Squaw Creek Farms is one of the water users in the South Elmore. Squaw Creek Farms owns four of the fields identified above as either ineligible or questionable according to the initial review (field numbers 6 through 9 above). I met with Mr. Wing and adjudication agent Ron Howerton at the State Office on October 24, 2002 to discuss the eligibility status of his lands.

I explained that evaluation of the land eligibility includes verification that (1) irrigation is authorized by a valid Snake River water right, and (2) the eligibility criteria set forth in Memorandum of Agreement ("MOA") No. 1425-02-MA-10-3460 has been satisfied. We further discussed the history and discrepancies of the water rights appurtenant to his lands.

For reference, the water rights appurtenant to these fields include:

- Water Right 2-2269: License with a priority date of February 19, 1964 for a 5645-acre place of use. Transfer no. 4881 was approved October 24, 1996, for the transfer of 100-acres, the creation of a permissible place of use of 6291 acres between rights 2-2269 and 2-2367, and a point of diversion location correction.
- SRBA Claim 2-2269: Filed on December 5, 1989 for a 5628-acre place of use. The place of use identified on the original claim differs from the licensed place of use. The place of use requested on the transfer application did not reflect any accomplished transfers that may have been identified on the original SRBA claim.

- Water Right 2-2367: License with a priority date of March 22, 1965 for a 646-acre place of use. Transfer no. 4881 was approved October 24, 1996, for the transfer of 100 acres, the creation of a permissible place of use of 6291 acres between rights 2-2269 and 2-2367, and a point of diversion location correction.
- SRBA Claim 2-2367: Filed on December 5, 1989 for a 326-acre place of use. The place of use identified on the claim differs from the licensed place of use. The place of use requested on the transfer application did not reflect any accomplished transfers that may have been identified on the original SRBA claim.
- Permit no. 2-2345: Water Right Permit with priority date of January 15, 1965 and a 320-acre place of use. Proof of beneficial use was filed January 12, 1976. A licensing amendment is required to change the point of diversion prior to licensing the permit.
- SRBA Claim 2-2345: Filed on December 5, 1989 for a 160-acre place of use. The place of use identified on the claim matches the acres identified in the licensing examination, but differs from the permitted place of use. The permit will require an amendment prior to licensing. However, the permit applicant has since filed an affidavit to change the location of the place of use entirely from that identified in either the permit or the claim. It should be noted that the new place of use requested by the permit applicant, and the lands described by the permit and the claim are all authorized under water rights 2-2269 and 2-2367.
- Water Right Application 61-7735: Filed on April 29, 1997 for groundwater use on 360-acres. The application is being held pending changes in the Mountain Home Groundwater Management Area.

Field no. 6:

In the case of the half pivot in the northeast quarter of section 22, T05S R6E, the department measured a total of 59.7 acres proposed for entry into the bank. Portions of these lands (34.9 acres) were found to be eligible for payment. However, 19.4 acres were determined to be ineligible based on evidence that irrigation of the lands had taken place during the 2002 irrigation season. The final 5.4 acres were identified as questionable pending further investigation of whether they had also been irrigated this year. Mr. Wing noted that he intended to irrigate only 60 acres of the field, however the sprinkler pivot rotated further than anticipated. He stated that watering had taken place on the lands identified as ineligible and questionable, and that he would accept the findings of 34.9 acres eligible for payment.

Field no. 7:

As a result of transfer no. 4881, approved in 1996, 100 acres are authorized for irrigation in the NW quarter of section 15, T05S R06E under water rights 2-2269

and 2-2367. The field entered into the water supply bank program is measured at 112.2 acres in the NW quarter and the NWNE quarter quarter of section 15, T05S R06E. There aren't any valid water rights authorizing irrigation in the NWNE quarter quarter, and only 90 of the measured acres in the NW quarter are authorized under the transfer for irrigation (see attached map).

SRBA claims in the name of South Elmore, filed in 1989, did not recognize irrigation use in the location of this field. Moreover, 1987 NAPP photography indicates that the field was not irrigated at that time. It appears that the 1996 transfer was filed after the claims to authorize irrigation on at least a portion of this field. Transfer processing memorandum no. 15, dated June 3, 1991, indicates that an approved transfer will amend an existing SRBA claim. Therefore, the place of use defined in transfer no. 4881 amends the corresponding claims.

Mr. Wing stated that he was not concerned with the eligibility of the portion of land in the NWNE quarter quarter of section 15. He should, however, be notified of the final number of eligible acres after the reduction.

Field no. 8:

The pivot, in the SW quarter of section 15 and the NW quarter of section 22, T05W R06E, is not currently authorized by a valid water right or an SRBA claim. Sid Wing noted that his understanding when he bought the property was that transfer no. 4881 was being filed to move water rights to this field. I explained that 100-acres had been moved to cover part of field no. 7 through the transfer, and that the transfer application did not cover any of the acres associated with field no. 8.

I also noted that application for permit no. 61-7735 for groundwater use was filed by Squaw Creek Farms in 1997 for irrigation of this pivot, and adjacent lands to the south (120 acres in the SW of section 15, 160 acres in the NW and 80 acres in the N1/2SW of section 22, T05W R06E). The application is being held due to the Mountain Home Groundwater Management Area. ***Please note: none of the lands described above are covered by a valid water right. It appears that all of these lands were irrigated in 1987 and most of the lands, excluding some pivot corners, were irrigated in 2000. Due to participation in the IPCO Buyback Program, none of the lands were irrigated in 2001. However, the pivot immediately south of Field no. 8 was irrigated during the 2002 irrigation season without a valid water right.***

I explained to Mr. Wing that transfer no. 4881 was based on a change requested and approved by South Elmore Irrigation Company. Had the transfer not been filed, it might have been possible to amend the SRBA claims according to any accomplished transfers that may have occurred prior to 1987. I notified Mr. Wing that based on available information, field no. 8 would not be eligible for payment from the Water Supply Bank. We further discussed the possibility of filing a transfer to clarify the water rights for field no. 8 and the adjacent lands with the understanding that this would not satisfy the eligibility criteria for participation in the Water Supply Bank program for this irrigation season.

Additional possibilities discussed since the meeting with Mr. Wing (Steve Hannula of ERO has been researching the South Elmore water rights as Sid Wing's request, and has been in contact with the department), include filing an enlargement claim to cover lands that were served by the South Elmore Irrigation Company prior to 1987. Though the total acres irrigated with the company's water rights would increase, the diversion rate and annual volume would not change.

Please note, in filing an enlargement claim, it would be important to identify whether South Elmore water was used to irrigate the lands described. The applicant identified Mountain Home Irrigation District water as the only other water right appurtenant to the lands on application for permit no. 61-7735. There are also maps in the application for transfer no. 4881 that identify some of the lands as being in the CRP from 1989 to 1998.

Field no. 9:

The 59.3-acre half pivot in the SE quarter of section 22, T05S R06E, was identified as questionable at the time of the first payment because there was a discrepancy between the licensed water rights 2-2269 and 2-2367, permit no. 2-2345, and the corresponding claims. Given that the transferred rights now represent the claims, the field will be identified as eligible for the final payment.

After discussing the status of each field, Sid Wing stated that he would like to pursue further review of the eligibility of field no. 8. I told him that I would communicate his concerns to my supervisors. He asked that I inform him of any additional possibilities, as he would like to notify his attorneys and ERO Consultants of his situation and of the status of South Elmore's water rights with respect to his lands. Since that time, Steve Hannula, of ERO Consultants has been researching South Elmore's water rights and has communicated with me regarding this recent review.

Subject: RE: Enlargement Question

Ron and Cynthia,

I have had an opportunity to review the information you submitted to me. The issue presented is whether IDWR can recognize a particular enlargement claim by South Elmore Irrigation Company ("South Elmore") in the SRBA. After researching the issue further, I have concluded that this question is best dealt with in two parts: First, does the 1996 transfer preclude IDWR from recommending the enlargement claim? Second, if the transfer does not preclude IDWR from recommending an enlargement claim, is there currently sufficient evidence in the file for IDWR to recommend an enlargement claim in the SRBA. The answer to both of these questions is no.

I have taken the following timeline from Ron Howerton's memo dated January 15, 2003 and modified it slightly:

- 1975: Licensed rights 02-2269 & 02-2367 did not include field #8.
- 1987: NAPP photography from 1987 shows that field #8 has been developed.
- 1989: SRBA 02-2269 & 02-2367 claims did not include field #8.
- 1989: Land went into CRP.
- 1996: IDWR transfer 4881 (02-2269 & 02-2367) amended the SRBA claims and did not include field #8. However, condition of approval stated that approval of this transfer does not preclude the opportunity for review of the water right(s) in the ongoing Snake River Basin Adjudication. Also a memo in the transfer file per reviewer Lori Graves said that "Rather than to hold up this transfer per SRBA review, only the acres specific to this transfer were reviewed and verified so that the processing could proceed. Dated 7/22/96. (Acres were transferred from and to tracts that were separate from field #8).
- 1997: Application permit 61-7735 for groundwater states that the only water on these applied for lands were Mountain Home District water. (Not Snake River) *** Mountain Home Irrigation District indicates that to their knowledge they have never served the lands of field #8.

In 1996, South Elmore sought and was granted a transfer for water right nos. 02-2269 & 02-2367. However, field no. 8 was not included in the place of use for this transfer. The question arises whether or not South Elmore should now be precluded from claiming that these two water rights were enlarged prior to 1987 to include field no. 8. Generally, IDWR treats transfers as binding upon claimants. However, where a particular issue is not directly addressed in a transfer and a claimant is able to present additional evidence to IDWR that the transfer does not accurately represent the historical use of water, IDWR can consider the evidence when

preparing recommendations in the SRBA. As it relates to water right nos. 02-2269 & 02-2367, the transfer did not investigate any acres other than those that were to be dried up and where the new irrigation was to take place. Furthermore, IDWR's NAPP from 1987 indicates that the field no. 8 was in fact irrigated in 1987. If the applicant can submit additional evidence to support that the land was irrigated prior to 1987 (for example, an affidavit from the previous land owner or a farm employee), then IDWR should evaluate this additional information and consider it in its recommendation.

This leads to the second part of my analysis. Presently, the claimant had not submitted sufficient evidence for which IDWR can recommend an enlargement claim. If South Elmore should desire to file an enlargement claim, South Elmore will also need to be prepared to present evidence showing from what source was this land watered because there is conflicting evidence in the file as to whether or not this land was irrigated under water right nos. 02-2269 & 02-2367 or with ground water. Thus, before IDWR can make a recommendation on any enlargement claim, additional evidence will have to be presented to IDWR.

If you have any questions or would like to discuss, please contact me.

WHOM WITH: Cynthia Bridge Clark

WATER RIGHTS: Transfer 4881 (02-2269 & 02-2367)

SENIOR AGENT: RON HOWERTON

DATE: August 5, 2003

NARRATIVE:

I have been asked to do a review of a pre-pre recommendation of the above water rights. The information is needed, as per Cynthia Clark from the Allocation Section at 1301 IDWR office is gathering and preparing information for putting portions of South Elmore Irrigation Company lands water from the Snake River into the water bank.

This preliminary claim review is not intended for making a recommendation. It will serve to provide the Allocations Section with guidance to do the water bank request.

The issue before me is whether South Elmore Irrigation Company may file an enlargement claim for a particular field identified as field # 8?

Field # 8 is described as: T05S, R06E, S15, SESW, SWSW & S22, NENW, NWNW.
(Lands appear to be irrigated on 1987 NAPP)

TIME LINE FOR FIELD #8.

Looks good. You might note that the field does appear to have been irrigated in 1987. I will also fax you a letter from the Mt Home Irrigation District that indicates that to their knowledge they have never served lands in sections 15, 16 or 22 of T5S R6E. I don't know if the SRBA would require additional information from South Elmore documenting the source of water prior to 1987. Lastly, I don't know if you have provided Legal with the Memo I wrote dated November 13, 2002, but if so, please note that it was a draft as it has changed since I sent it to you.

This will be very helpful. Thanks Ron.

RE: Payment #1 for Rental of Water from High-Lift Pumpers, Squaw Creek Farms

Dear Cynthia

This letter is in response to the Idaho Department of Water Resources (IDWR) preliminary review of the acres eligible for payment for rental of water from high-lift pumpers from the Snake River to the Water Supply Bank (Memorandum of Agreement (MOA) No. 1425-02-MA-10-3460). Specifically, this letter addresses questions of eligibility regarding the Squaw Creek Farms LLC portion.

Background

Squaw Creek Farms LLC (Sid Wing) filed an application to lease a water right to the water supply bank on June 7, 2002 pursuant to the MOA. This information was then compiled with the other South Elmore Irrigation Company's (SEIC) participants into a single application that was received by the Department on June 27, 2002.

In addition to other lands, Mr. Wing described 102.8 acres in Sec 15, T5S, R6E and 26.8 acres in Sec 22, T5S, R6E as being part of the land he intended to dry up during the 2002 irrigation season. The GIS estimate of this particular field totaled 121.9 acres.

Ownership

The attached warranty deed shows that Mr. Wing owns approximately 1920 acres, which includes the land in question (Tract IV on warranty deed). Also, based on recent imagery from IDWR, the majority of this land has been regularly irrigated.

Mr. Wing owns 1064 shares of SEIC water as shown on the attached letter. These water shares allow Mr. Wing to irrigate up to 1064 acres of land with SEIC water. Mr. Wing has historically operated his farm within the bounds of his land and within the allocation of his SEIC water shares.

Boundary Dispute

The dispute comes from the boundary definition of the SEIC. In 1996, a transfer was filed with IDWR to move 100 acres of water rights within the SEIC boundary. The entire SEIC boundary was not fully scrutinized for that 1996 transfer and as a result, the land in this current dispute amongst others was not included in the SEIC boundary. This oversight has revealed itself by causing the present situation where this land is

outside of the place of use listed for SEIC and therefore its eligibility to receive payment through the MOA is questioned.

Proposed Resolution to the Problem

To resolve this issue, the following is proposed. The board of SEIC has agreed to adjust the boundary of the irrigation company's Place of Use to include the disputed lands as long as the new boundary does not result in an increase in either the rate of flow diverted or in the total number of acres irrigated under the water right and does not cause injury to other water rights.

The signed letter from SEIC offering this solution is attached. Mr. Wing and SEIC are looking forward to creating a general boundary for their irrigation company in which they can operate and Mr. Wing can receive full compensation under the MOA for the 2002 irrigation season.

If you have any questions, please call Steven R. Hannula.

Steven R. Hannula

RE Changing South Elmore Irrigation Company Place of Use Boundary

Dear Ms. Bridge Clark

Mr. Sid Wing is entitled to the irrigation of 1064 acres from water supplied by South Elmore Irrigation Company (SEIC) as evidenced by the SEIC shares he holds. Mr. Wing has used the water on lands he owns under the water right held by SEIC.

The SEIC has as recently as 1996 met the definition of §42-219(6), Idaho Code, for an irrigation project and now seeks to have the lands irrigated under the SEIC described with a general description as provided in that section. At the same time, SEIC seeks to change its generally described place of use to include lands owned and irrigated by Mr. Wing under SEIC's water right(s). SEIC represents that this change will not:

- Increase the diversion rate under any of its water rights.
- Increase the number of irrigated acres.
- Cause injury to other water users.

Attached is a map showing the historical location of the lands irrigated under the SEIC water right and a boundary delineating the generally described place of use. We are seeking to have the map recognized as the general description of the SEIC place of use as provided in §42-219(7), Idaho Code.

Please call Steven Hannula at 373-7983 if you have any questions regarding this application.

Regards.

CONDITIONS OF APPROVAL AND REMARKS

1. A totalizing measuring device of a type approved by this Department shall be maintained as a part of the diverting works.
2. After specific notification by the department, the right holder shall annually report the amount of water diverted to the department.
3. This right when combined with all other rights shall provide no more than .02 cfs per acre nor more than 4.0 afa per acre for the lands above.
4. Approval of this transfer in no way grants any right-of-way or easement for use of a delivery system owned by person(s) other than the right owner.
5. The change authorized by this transfer shall be accomplished within one (1) year of the date of this approval.
6. Failure to comply with the conditions of this transfer is cause for the director to issue an order to show cause why the approval of the transfer should not be rescinded.
7. Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.
- * 8. Right No. 02-02367 when combined with Right No. 02-02269 shall not exceed a total combined diversion rate of 87.11 cfs.
- ** 9. Right No. 02-02269 is limited to the irrigation of 5,645 acres in the place of use described above in a single irrigation season.
- ** 10. Right No. 02-02367 is limited to the irrigation of 646 acres in the place of use described above in a single irrigation season.

NOTICE OF PROPOSED CHANGE OF
WATER RIGHT NO. 02-02269 & 02-02367

Notice is hereby given that South Elmore Irrigation Co., PO Box 396, Mountain Home ID 83647, has applied to the Department of Water Resources to change the place of use on the following described water rights pursuant to section 42-222 of Idaho Code.

WATER RIGHTS AS LICENSED & CLAIMED IN THE SRBA:

No.	02-02269
Basis	License
Date of Priority	02/19/1964
Source	Snake River
Amount	87.11 cfs
Use	Irrigation
Point of Div	NESW, T05S R07E, Sec 28, Lt 2
Place of Use	5645 acres within S Elmore Irrig Dist service area Claimed 5628 acres in SRBA

No.	02-02367
Basis	License
Date of Priority	03/22/1965
Source	Snake River
Amount	12.92 cfs
Use	Irrigation
Point of Div	Same as above
Place of Use	646 acres within S Elmore Irrig Dist service area Claimed 326 acres in SRBA

Applicant proposes to transfer 100 acres irrigation within their service area from N1/2NW, Sec 14, and SW, Sec 23, T05S, R06E to NW, Sec 15, T05S, 06E.

Any protest against approval of the proposed change of water right application must be filed with the Department of Water Resources, Western Region, 2735 Airport Way, Boise, ID 83705, together with a protest fee of \$25.00, on or before August 26, 1996. The protestant must also send a copy of the protest to the applicant.

RE: Transfer Review

After reviewing this transfer, it was found that the SRBA claims did not match the licenses. The water rights involve South Elmore Irrigation Co. service area and use Snake River water as their source. Rather than hold up this transfer pending SRBA review, only the acres specific to this transfer were reviewed and verified so that processing could proceed.

The 100 acres in sections 14 & 23 that the water is being transferred from are currently in CRP and will not be brought back into production. 17 acres are listed for transfer from the N1/2NW, where 71 acres have been claimed and 67 acres have been licensed. This mis-match is N/A since the 17 to be transferred from this tract is less than the both the claimed and licensed acres. The tracts where the other 83 acres are being transferred from in sec 23 were claimed as licensed. CFSA in Mountain Home provided proof of previous irrigation of the 100 acres prior to CRP enrollment. The 100 acres in section 15, where the water is being transferred to, have not been claimed or licensed with Snake River water rights.

Based on the above information, this transfer should proceed in processing.

RE: Snake River Adjudication (Ada Civil No. 73804) - Claims of South
Elmore Irrigation Company

Dear Larry:

The South Elmore Irrigation Company has filed five claims for water rights in the pending adjudication of the mainstem Snake River between Milner Dam and the Idaho/Oregon border. Those claims are numbered 02-2210, 02-2269, 02-2345, 02-2367, and 02-7263.

By phone on Thursday, October 22, 1981, you informed me that you represent a client who owns lands which receive mainstem Snake River waters from the South Elmore Irrigation Company, and that these lands and water are included in the claims already filed by the irrigation company.

This letter is to advise you that the landowner you represent does not need to file an appearance and file a claim to the water which is already covered in the claims' of the South Elmore Irrigation Company. If your client had additional claims to Snake River water between Milner Dam and the Idaho/Oregon border, which were not part of the South Elmore Irrigation Company's claims, then an appearance and separate claim would be in order. Since you have determined that your client has no other claims, then a separate appearance and claim are not necessary.

I represent the Idaho Department of Water Resources in all of its adjudications and would be happy to assist you with any future inquiries you may have.

Sincerely,

JOSEPHINE P. BEEMAN

Dear Mr. Wissel:

During the review of the Adjudication claims (listed above) by Sherl Chapman for the South Elmore County Irrigation Company, an error was noted in the initial payment of fees.

Initial payment of fees should be at least 20% of total payment due with four additional payments due each of the next four consecutive years with a 10% interest charged on the principle and interest balance due. The total acreage indicated in your seven licenses is 9,077, which indicates a balance of \$9,077 in acreage fees and \$350 in claims fees due in the SRBA totaling \$9,427. However, the South Elmore Irrigation Company paid \$70 in the Snake River 2 Adjudication, which is credited towards the SRBA fees for a balance due of \$9,357. Therefore, your initial payment in the SRBA should have been $\$9,357 \times (.20) = \$1,871.40$. As you have submitted \$1,813.80, you must submit at least an additional \$57.60.

Please submit these additional fees by January 6, 1990. If you have any questions or concerns please do not hesitate to contact me.

Regards,

Bruce A. Schuld
