RE: Evidence of Priority

RESPONSE DEADLINE
FEBRUARY 3, 1992

Dear Claimant:

The Notice(s) of Claim identified with the number shown above your name on the mailing label has been filed in the Snake River Basin Adjudication (SRBA). The Notice(s) indicate your water usage is based on "Beneficial Use" or a "Statutory Claim". Water rights of this type are established by the historical use of water, dating back to when water was first used for the purpose claimed. **The date of first use, known as the priority date, has not been confirmed by a License, Decree or Permit. The Department will soon conduct reviews &/or field exams for the claims in your area. Since the priority date of a beneficial use water right can not be confirmed by field examination, proof must be provided supporting the priority date you have claimed.**

The Department will not recommend the Notice(s) be decreed by the court as claimed if no evidence of a priority date is submitted.

Please find enclosed a computer printout of your Notice(s) and the pamphlet entitled "Evidence of Priority". The pamphlet describes the types of evidence required and suggests which documents will fulfill this requirement. I direct your attention to the two sections entitled "What Kind of Evidence is Required" and "Some Examples of Documents Which May Be Evidence of the Priority Date".

Please submit the required evidence supporting the priority date(s) by **February 3, 1992**, referencing all documents with the corresponding Notice number(s). If you have any questions not covered by this letter or the enclosed pamphlet, please contact this office.

Respectfully submitted,

Allen Merritt, P.E.

RE: Snake River Basin Adjudication (SRBA)
Claim Number A43-10602

Dear Doug,

After talking to you about your stockwater claims this afternoon, I realized that it would be possible for you to amend one of your existing claims and avoid paying an additional fee.

The above referenced claim was originally filed for stockwater and an expansion of acres licensed to 43-02532A (your well in the SESE section 22). The source was listed as the well in the NWNW section 25, which was possibly a mix-up at the time of filing as you say you do not water stock from this well. The irrigation usage claimed under A43-10602 was going to be removed anyway because you said you really hadn't expanded the acres irrigated with the 0.04 cfs from the well in section 22. As we discussed, I am planning instead to recommend a permissible place of use for your claim based upon license 43-02432A which will allow you to irrigate the 32 acres anywhere within your irrigated place of use in any one irrigation season, and do the same with the 277 acres licensed under 43-02542.

You can use the enclosed form to amend A43-10602 so that it is a claim for stockwater only, and change the point of diversion to describe the well you say is east of the house and used only for stockwater. Be sure to list the places of use, and make any other changes necessary to correctly describe your stockwater usage; also, your signature will need to be notarized again.

For your reference, I am enclosing a print out of the claim as it now reads. There is no fee associated with amending a claim, and it will also save the department from disallowing this claim for the sole purpose of generating another one. Call if you have any questions, and be sure to have *attention Vikie* on the envelope when you send it back to the office.

Sincerely,

Vikie Hancock
Water Resource Agent

RECOMMENDATION NOTES

From: Vikie Hancock

12/14/99

Regarding: Claim number A43-10602

This claim was originally filed for an expansion of acres under license 43-02532A, and for stockwater. The point of diversion was identified as a well in the NWNW section 25.

After discussing these claims with Mr. Ward on December 10, 1999, it was determined that no expansion of acres occurred, but that his water usage would be accurately described by allowing him a permissible place of use limited to the irrigation of the original licensed number of acres within the irrigation season. The irrigation portion of this claim will therefore be recommended under claim number A43-02532A.

Claim number A43-10602 will be reduced to a claim for year-round stockwater on the POU and from the POD described. As no variable fees were paid for stockwater, this water right will be limited to 13,000 gallons per day. The priority date of 1-15-1962 will be accepted, as it corresponds to the licensed priority date of the well identified as the point of diversion. It is reasonable to assume that stockwatering began on this date from this source even though the licensed use was irrigation only.

Field Exam Notes

Field Exam Date: 12-10-99

Claim No: A43- 02542, A43-02532A, A43-10601, -10602

Agent: Vikie Hancock

This field exam consisted of a meeting with the claimant at his home. There was no actual examination of the place of use or points of diversion. Notations were taken on the GIS print out to show the irrigation system and actual irrigated acres.

Claimant Douglas Ward uses groundwater from two wells and surface water supplied by Almo Water Company to irrigate most of his 320 acres. According to the claimant he irrigates the entire farm. We did not discuss the area immediately surrounding the homes, shed and equipment yard, which I observed was not irrigated.

Groundwater is diverted from a well located in the NWNW $\frac{1}{4}$ Section 25 to a sprinkler system that covers his higher ground. This well was licensed for 1.85 cfs and 277 acres. The place of use has changed somewhat from the POU as licensed because he now typically uses less water from this source in the N $\frac{1}{2}$ NW $\frac{1}{4}$ of section 25, and more water from this source in the NE $\frac{1}{4}$ and SENW $\frac{1}{4}$. Claimant agreed that the total acres irrigated from this well is probably still approximately 277 acres in an irrigation season, but that he changes the configuration of his sprinkler system depending on how much surface water is available from Almo Water Company.

Surface water delivered from Almo Water Company is used to flood the meadows along Almo Creek, which runs easterly through his farm. He also uses water from a well located in the SESE Section 22 to flood the lower ground in the NWNW $\frac{1}{4}$, and the meadows. This water is diverted from the well into Almo Creek, transported southeast in the Almo Creek channel, then re-diverted into a ditch in the NENE of section 26 just west of claimant's property line, and conveyed east to Claimant's POU. The use of water from this well is based upon a license for .04 cfs on 32 acres. Claimant says that this is still an artesian well that is not capped, and is allowed to run all year long. There are other water rights with Adjudication claims on this same well. Tracy Inc/ William Tracy holds all the other rights on the well except for a portion transferred to Arlo Lloyd in Elba. Tracy and Ward rotate the use of the entire flow of the well during the irrigation season. Both have claimed year round stockwater from the well, also.

Doug Ward sometimes incorporates water from the artesian well, as well as surface water delivered by Almo Water Company, into the sprinkler system. He typically does not use groundwater from the well in the NENE section 25 to flood irrigate. Mr. Ward filed expansion claims on both the licensed wells,

claiming that the water from both wells were used to irrigate the entire 320 acres. After discussing his claims and water usage, he agreed that his intention was more likely described as a permissible place of use, with each right limited to the original licensed number of acres within the total 320 acres he irrigates. He felt that would give him the flexibility he needed to adjust his irrigation system when the available water from each source fluctuated year to year.
