AFFIDAVIT

I Shirley Hitt, residing at 300s. 335w. Rupert, Idaho 83350,
Do hereby swear and affirm that the well located; NW/4, SE/4,
NW/4, Section: 18 Twn:13s Rng:27e, was dug by myself and my
brother Grant during the first of the year 1946. That we then
installed a Parma Water Lift pump powered by a Farmall "H"
tractor and driven by a flat belt. That the water was pumped
by this means until converted to electricity.

I can remember this date because my brother Grant had just
returned from World War II , that ended in 1945.

Shirley B. Hitt
Signature

State of Idaho.
County of Minidoka

Subscribed and sworn to me this 4th day of Feb 1992.

RE: Snake River Basin Adjudication SRBA Claim
Mr. Rodney Hall of Malta, Idaho
Cassia County

Dear Mr. Chapman:

In response to your letter of May 26, 1989 and the reasons given therein for the late filing of the above mentioned Adjudication claims.

This letter is a denial of Extension of Time for the filing of the above referenced Notice of Claims to a Water Right. The original filing deadline for the claims is June 8, 1989. The extension is denied on the basis the claimant has not shown diligence in preparing these claims.

This extension is denied under the authority of §42-1409 (10), Idaho Code.

Signed this 1st day of June, 1989.

RE: Evidence of Priority

RESPONSE DEADLINE
FEBRUARY 3, 1992

Dear Claimant:

The Notice(s) of Claim identified with the number shown above your name on the mailing label has been filed in the Snake River Basin Adjudication (SRBA). The Notice(s) indicate your water usage is based on "Beneficial Use" or a "Statutory Claim". Water rights of this type are established by the historical use of water, dating back to when water was first used for the purpose claimed. **The date of first use, known as the priority date, has not been confirmed by a License, Decree or Permit.** The Department will soon conduct reviews &/or field exams for the claims in your area. Since the priority date of a beneficial use water right can not be confirmed by field examination, **proof must be provided supporting the priority date you have claimed.**

The Department will not recommend the Notice(s) be decreed by the court as claimed if no evidence of a priority date is submitted.

Please find enclosed a computer printout of your Notice(s) and the pamphlet entitled "Evidence of Priority". The pamphlet describes the types of evidence required and suggests which documents will fulfill this requirement. I direct your attention to the two sections entitled "What Kind of Evidence is Required" and "Some Examples of Documents Which May Be Evidence of the Priority Date".

Please submit the required evidence supporting the priority date(s) by **February 3, 1992**, referencing all documents with the corresponding Notice number(s). If you have any questions not covered by this letter or the enclosed pamphlet, please contact this office.

Respectfully submitted,

Allen Merritt, P.E.
Water Rights Supervisor

HISTORY OF ORIGINAL WELLS 1,2,3, &4

In response to your letters, I will give you as complete a history of the referenced well as is possible. The people involved in digging the early wells are now dead.

In the 1920's, 1930's, 1940's, and early 1950's the water table in the southeast corner of the NW 1/4, SW 1/4 of section 20 Twsp.13 South range27 E.B.M. stood at about 7 ft, more or less.

The four original were all dug in this corner because this was the highest point of elevation of this farm. Water would gravity flow to any location on the 400 acres. All of the wells discharged into a common ditch and could be used in any combination to irrigate any place on the farm. Also the surface water from Clear Creek and Raft River entered the farm at the southeast corner of the NW1/4 SW 1/4 section 20 Twsp 13S Range 27E.

The wells were dug with a tool called an orange peel. The tool was attached to a wire rope [cable] threaded through the pulleys on a derrick. The tool was raised and lowered by a team of horses and in later years by a tractor.

The tool was lowered into the well with the jaws open. A latch was then tripped. As the cable was tightened the jaws closed gathering material from the bottom of the well. The tool was then lifted from the well and the cuttings were deposited on the ground. This process was repeated until the well was completed.

The location of well # 1 is about 150 ft. west then 50 north of the southeast corner of the NW 1/4 of SW 1/4 section 20 Twsp13S R 27 EBM. On this well 2 x 4 lumber and iron wagon tires were used to construct a casing. A wagon tire was placed in the hole. Pointed 2 x 4s were then stood on end around the outside of the wagon tire. A second wagon tire was placed on the outside of the 2 x 4s to hold them in place. More wagon tires were added as required. As the hole was dug casing would follow. If driving was required, a large mallet was used to drive the casing.

Well #1 was constructed in a 20"x 40" flat-bottomed pit the bottom of which was just above the water table. The top of the casing was driven down to the water level.

The well was completed and in use by April 1, 1921. A Parma Water Lifter pump was installed and was driven with a flat belt powered by a case tractor, model 12-30. The 12 represents drawbar horsepower and the 30 belt horsepower. The well produced a continuous flow of 2 cfs.

Because the wagon tires and 2 x 4 casing was relatively short lived, the well was later replaced by an orange peel concrete cased well located about 10 ft. southwest of the original well. The casing is the same type as that used in # 2.

Well # 2 is located four ft. north and three ft. west of the southeast corner of the NW 1/4 SW 1/4 section 20 Twmsp 135 Range 27 EBM. This well was dug in 1932-33 using the orange peel method of digging. The casing was concrete poured in place as the well was dug. An inside and outside circular steel form was used. Condensed milk cans were used as spacers between the forms. After the concrete had set, the ends of the cans were knocked out to allow water to enter the casing.

As the well was deepened, gravity pulled the casing down the hole. When the casing top was down to ground level, another ring was poured. This process was repeated until the well was finished.

This well was completed and put into service on or before April 1, 1933.

The water was pumped by a Parma Water Lifter pump belt driven by an engine from a wrecked Dodge car. The horsepower of the engine is unknown but was sufficient to sustain production of two cfs.

Well # 3 is located five ft. northwest of the southeast corner of the NW 1/4 SW 1/4 section 20 Twsp 135 Range 27 EBM. Well #3 was dug by the same method as well # 2. It was completed in time to go into production on April 1, 1940. An Economy pump was installed. It was driven by a 10 hp electric motor and produced a sustained 2.5 cfs.

Well # 4 is located 353 ft. west and 30 ft. north of the southeast corner of the NW 1/4 SW 1/4 section 20 Twsp 135 Range 27 EBM. This well was dug by the same method as well #2. It was completed and went on line on April 1, 1947. The pump is of unknown make and was driven by a 7.5 hp electric motor. It produced a sustained 1.2 cfs.

Well # 2 is partially filled but is available for inspection. Well # 4 still has the pump in it. It is partially filled and is available for inspection. Wells # 1 and 3 are completely filled but can be dug out with a back hoe for inspection if necessary.

OBSERVATIONS:

Exact depths of the above wells are unknown but range between 30-40 ft.

Wells -- General profile

0-6 or 8 ft.--heavy silt

6 or 8 ft.- 40 ft.--coarse gravel

Lift was 20 ft. or less

An observer could see the water flow into the casing from the south side and out the north side.

Over the years the amount of available surface water in Raft River decreased due to increased diversions in Utah, and the construction of Lynn Reservoir in Utah. Increased diversions Clear Creek in Utah totally eliminated the available water from Clear Creek.

Also, a severe drought occurred in 1933-34.

The only way to keep irrigating was to dig more wells.

To the best of my knowledge based on the information I have been able to gather, the preceding is a true and correct statement of the history of original wells 1,2,3, and 4.

By the early 1950s more drought had occurred, and the U.S. Department of Agriculture subsidized the drilling of more wells in the Raft River Valley. This resulted in drying up the shallow wells 1,2,3, and 4 and the Raft River which was a spring-fed stream.

The water table also declined and shallow orange peel wells were replaced with deeper drilled wells. The shallow wells 1,2,3, and 4 were combined into three wells now known as wells 1,2, and 3. Combined production of the four original wells was 7.7 cfs.

This well [43-4019] is within 15 ft. of well #1 in the history. As nearly as can be determined, the motor size was 30 hp and production was 2 cfs.

This well [43-4020] was originally developed as a replacement for part of the original wells 1,2,3, and 4. The water table continued to decline, and the well was deepened. A new pump with pressure bowls was installed.

This well[43-4021] is not one of the four original wells discussed in the historical introduction. The land and well were part of another farm.

	Wr P/D					Φ	License & Statutory Claims				
								License totals only	526 ac	633 ac PP/U	
I am recommending 633 acres as the permissible place of use. Of that place of use, 526 acres were irrigated with 7.86 cfs. 633 acres at one inch per acre requires 12.66 cfs							Rate at 1" per acre = 12.66 cfs Licensed <u>7.86 cfs</u> Difference 4.80 cfs				
The system has been modified many times over the years with the specific capacity of an individual well going up and down for various reasons. The best information is that the system had the capability to deliver 1" per acre by 1963 (mandatory permit statutes). Historical pumping capacity is currently not available for the statutory claims. Lacking any data, I have recommended the statutory claims on a percentage basis for the balance of the diversion rate exceeding the combined licensed rates up to one inch per acre based upon my understanding of the historical irrigated place of use. The recommended place of use consists of 633 acres which includes all groundwater rights and previously decreed surface water rights. The surface water rights are 43-145 and 43-324											
Different system ↓↓											
43-2306A	P/D					⊖	License, Claimed as B/U			0.80 cfs	0.80 cfs

Claims 43-04119, 43-04120, & 43-04121 identified wells 1 thru 4 as the point of diversions for each claim. The original statutory claims identified each claim with only one well as shown in the table above. The basis of the adjudication analysis starts with the use as identified in the statutory claims and then expands based upon additional information as provided by the adjudication claim and owner. The 400 acres claimed under the statutory claims are represented by Raft River water under 43-00324 for ground in Sec 19 & 20 and Cassia Creek

water under 43-00145 for the ground in Sec 18. Neither acres by quarter/quarter or total acres are given in the Jobe Adams decree.

ANALYSIS BY INDIVIDUAL CLAIM

43-04119 identified **well # 1** as the original source with a priority date of 4-1-1921. Charles Pulsiphor submitted an affidavit in 1948 and an additional 3 affidavits were submitted in 1981, with the statutory claim, that indicate that Charles Pulsiphor drilled the well in 1921 and then put it to beneficial use that year. The 1948 affidavit identified a place of use of approximately 240 acres. The subsequent affidavits enlarged the claimed place of use to 400 acres. The original well was an 'open pit' lined with orange berg. Hall indicated that the well water was delivered to the place of use via a parma water lifter and a gravity ditch system. The well and delivery system has changed several times over the years. Currently there is a 100-hp motor on the well. See the table above for rate and acre limitations.

43-04120 identified **well # 3** as the original source with a priority date of 4-1-1941. Affidavits submitted with the statutory claim indicate that the well was drilled in 1940 and that beneficial use first occurred in 1941. At this time the original delivery system is unknown. When 43-02373 was licensed, this well was included in the P/D listing. The licensing field exam identified a 10 Hp motor and a layne-bowler pump with 8 inch discharge on the well and that the delivery rate was 1.68 cfs. Hall identified the 4 quarters to the west and north of the well location as the original place of use. I believe that the current motor on the well to be 100 Hp. See the table above for rate and acre limitations.

43-04121 identified **well # 4** (in Section 18) as the original source with a priority date of 4-1-1957 (on the claim itself). The affidavits indicate that the well is in Section 20. I believe that the affidavits are incorrect and that the claim form itself represents what the affidavits were identifying. Affidavits submitted with the statutory claim indicate that the well was drilled in 1957 and that beneficial use first occurred in that year. The original pumping system was not identified in the statutory claim or the attached affidavits but the affidavits identified the diversion rate at 1.20 cfs. Hall identified the NE¼ of sec 18 as the original place of use. I am therefore recommending this claim for the found 40 acres and at 0.80 cfs (one inch per acre). The statutory claim and the adjudication claim identified 400 acres as the place of use. This well was also part of 43-02424.

43-04122 identified **well # 2** as the original source with a priority date of 4-1-1933. Affidavits submitted with the statutory claim indicate that the well was drilled in 1933 and that beneficial use first occurred in that year. The original pumping system was not identified in the statutory claim or the attached affidavits but the affidavits identified the diversion rate at 2.0 cfs. This well is located at the southern end of the recommended place of use and the natural flow for the property is basically south to north. The historical irrigated place of use may have been smaller than the claimed place of use. However, as it is physically possible to irrigate all or nearly all of the claimed place of use under a gravity system from the original well, I am recognizing the currently irrigated acres within the claimed place of use (398 acres).

43-02373 identified **wells 1, 2 & 3** as the original licensed points of diversion. The priority date for this right is 1-25-1952. The license indicated a 291-acre place of use within the 400-acre place of use identified in statutory claims 43-04119 thru 43-04122. The licensing field examination identified the permitted acres as part of the irrigated place of use on item 7 of the report but excluded a significant portion of the permitted place of use on the section grid layout. The E½NW¼ of sec 20 is BLM property and was irrigated at that time, but according to Rodney Hall the effort to obtain ownership of that ground fell through and was therefore excluded from this right. The ground is not currently being irrigated. The NESE of Sec 19 was also excluded from the recommended place of use. Well # 2 is located in the SW corner of that quarter/quarter and according to Rodney Hall, ditches ran both north and east from this well. As the other forty acre tracts 'down hill' from this point were recommended it is unlikely that this tract was dry. Why it was excluded from the recommendation is not clear in the field examination. The same general circumstance exists for half of the NENE of Sec 19 and the SENE of Sec 18. From Raft River east for generally ½ mile the irrigated ground is flat with little slope. Beyond the ¾ mile range the slope increases and that ground is not irrigated.

Based upon the information currently available I believe that the majority of the 400 acre place of use was irrigated prior to the licensing field exam for 43-02373 and can be recognized under the statutory claims.

43-02424 was licensed from **well # 4** and has a priority date of 4-4-1955. The original licensed place of use included portions of the NENE and SWNE of Sec 18 and additional ground in Sec 7. Mr. Hall filed an application

for transfer in 1992. The application was not accepted as Glen Saxton noted that the actual change in place of use occurred prior to 1987 and therefore could be recognized through the adjudication process. The change was to move the irrigation from the ground in Sec 7 to ground in the W½NW¼ and the NWSW of Sec 17

ANALYSIS OF A43-10636 WITH A CLAIMED PRIORITY DATE OF 4-1-1946

This claim claims all 5 points of diversion but identifies only 45 acres in the W½NE¼ of Sec 18 as the place of use. As filed, this claim represents a combination of the following rights 43-2306 (a portion), 43-04117 and 43-04231.

43-02306 was licensed with a priority date of 2-5-1948. The claimed priority date is 4-1-1946. Evidence of priority supporting the 1946 date was submitted. This right was licensed for 85 acres at 1.70 cfs. The licensed place of use was split through an ownership change for a portion of the property in 1979. Hitt retained 40 acres and 0.80 cfs and Hall obtained 45 acres and 0.90 cfs. Subsequently the Hitt property was purchased by Hall (change of ownership submitted in 1999) but was placed in the name of Valley River Farms LLC and is recommended as 43-2306A. It is not recommended within the permissible place of use covered by a majority of the Hall claims.

This claim (43-10636) is being recommended for the 45 claimed and previously licensed acres that were identified in the original license 43-2306. The statutory claims identified in the original claim are not recognized under this right. I am recommending the 4 wells identified under the other rights but not the well recommended under 43-2306A. That well was owned by Hitt until the 1990s and was not part of the Hall system at the commencement of the adjudication.

Claims identifying Sec 18 NENE as the place of use.

The statutory claim **43-04117** shows a priority date of 4-1-1952 as the date that water from **well # 5** was applied to 15 acres in the NENE of Sec 18.

The statutory claim **43-04231** shows a priority date of 4-1-1953 and lists **wells 1, 2, 3, and 4** as the diversion points. The place of use is listed as 34 acres within the NENE of Sec 18. A statement on the statutory claim form indicates that 6 acres in the NE corner of that quarter/quarter is irrigated from a different system.

Claim A43-10636 was amended on 2-6-1992 to delete the claimed 40 acres in Sec 18 NENE. Remarks state that those 40 acres were being claimed under A43-02424. Although the place of use was reduced by 40 acres a corresponding reduction in the diversion rate was not made.

Because both 43-04117 and 43-04231 both specifically identified the NENE of Sec 18 and no other acres the inference is that they should no longer be considered relevant to this claim.
That leaves 43-02306 as the basis for this claim.

Available information does not indicate that all 5 wells were tied together in 1946 nor does the licensing information indicate that there was a combined system as of the field verification conducted on 8-1-1951. Proof of Completion of Works signed and dated 12-5-1950 by Grant Hitt. That proof included a statement that ground on the other side of the river was not watered by this well. The sale and splitting of the water right in 1979 indicates that the lands were to be irrigated independently. Hall did not obtain ownership of the entire licensed place of use until the 1990s.

43-2306

State of Idaho License and Certificate of Water Right

Water License No. 20302

Water District No.

Amount 1.7 Second Feet

Priority February 9, 1941

THIS IS TO CERTIFY that

GRANT B. RITT

of Malta, Idaho

made application for a permit to appropriate the public waters of the State of Idaho, dated February 9, 1940; that Permit No. 20302 was issued under said application; that Certificate of Completion of works, with a carrying capacity of 1.7 second feet, was issued thereunder on December 8, 1950, showing that said works were completed on the 5th day of December, 1950; and that on the 23rd day of February, 1951,

GRANT B. RITT

of Malta

State of Idaho

State Reclamation Engineer

made proof to the satisfaction of the State of Idaho, of the right to use the waters of

a well

(subterranean flow)

for the purpose of irrigation and domestic use

under Use Permit No. 20302 of the Department of Reclamation and that said right to the use of said waters has been perfected in accordance with the laws of Idaho, and is hereby confirmed by the State Reclamation Engineer of Idaho and entered of record in Volume 8 of Licenses at page 4404, on the 22nd day of August, 1951;

The right hereby confirmed dates from February 9, 1940.

The Point of Diversion is located

In the NE 1/4 NW 1/4 Sec. 18, T. 15 N., R. 27 E., Cassia County

That the amount of water to which such right is entitled and hereby confirmed, for the purpose aforesaid, is limited to an amount actually needed and beneficially used for said purpose, and shall not exceed 1.7 cubic feet per second.

Description and location of use

Twp.	Range	Sec.	Acres	No. of Acres	Actual Irrigation
14 N.	27 E.	18	160	160	160
Number of acres Actually Irrigated				160	160

Sec 18 NWNE 35
SWNE 10
SENE 40
85

The right to the use of the water aforesaid hereby confirmed is restricted to the lands or place of use herein described, as provided by the laws of Idaho.

Witness the seal and signature of the State Reclamation Engineer, affixed at Boise, Idaho, this 22nd day of August, 1951.

Mark E. Kulp

State Reclamation Engineer

43 2306

STATE OF IDAHO
DEPARTMENT OF RECLAMATION
BOISE, IDAHO
REPORT OF ENGINEER

Permit No. 20302

This proof is for Beneficial use In Water District No. _____

1. Name of applicant Grant B. Hitt, Alta, Idaho
2. Source of water supply: Subterranean flow from a well
3. Location of point of diversion: Is in the SE $\frac{1}{4}$ NW $\frac{1}{4}$ of Section 18
T. 13 S. R. 27 E. County of Cassia
4. Describe works as they exist, giving dimensions and capacities of same: Well is 26' deep by 42 inches in diameter. H. equals 7', draws down to 20'. Suction pipe down 24'. Well is located in a shed on the Southwest corner of the House. Size of the shed is 7' wide by 13' 8" long by 6' high. Motor is a 10 h.p. Smithway, 3 phase, 60 cycle, 220 volts, 25 amps., 1745 r.p.m. Serial #58074. Motor is mounted vertical outside the pump house on the West and drives the pump through 4 B belts, size 195".
5. Water is used for: Irrigation and domestic purposes.
6. State whether or not water has been turned into works of diversion: yes
7. List legal subdivisions of lands to be irrigated. If proof is for beneficial use, give exact number of acres under cultivation in each forty-acre tract. (Describe manner and place of use if other than irrigation):
SE $\frac{1}{4}$ NW $\frac{1}{4}$, W $\frac{1}{2}$ NE $\frac{1}{4}$, NE $\frac{1}{4}$ NE $\frac{1}{4}$ Section 18, Township 13 South, Range 27 East, B.M.

(Submit map on attached plat, showing location and details of above description.)

8. What large stream would the water here appropriated finally reach?

Remarks: Pump is a Perma Water lifter with a 1-1/8" drive shaft. Motor is a 240 v. G. E. Serial #30329921. Switches and controls are Westinghouse and Dayton. Water was measured over a 2' cippoletti weir .45'. Allow 100 inches for delivery. T. equals 52° F.

STATE OF IDAHO
Department of Reclamation

Proof of Completion of Works

AFFIDAVIT OF HOLDER

DEC 7 1950
Department of Reclamation

STATE OF IDAHO

County of Cassia

ss.

Grant B. Hitt

being first duly sworn, upon his oath deposes and says:
First: That he is the holder and owner of Permit to appropriate the Public Waters of the State of Idaho, No. 20302, and that his postoffice address is Kalta State of Idaho, Box 28.

Second: That the name of the stream which said water is to be directed is subterranean well

Third: That the point of diversion of said water is in the SE 1/4 NW 1/4 Sec 18, Twp. 13 South, Range 27 E 3rd E. 2600 feet from the NW corner of Sec 18

Fourth: That under the terms and conditions of said permit, aforsaid construction thereunder was required to be completed by February 23rd, 1950

Fifth: That the use for which said water is intended is domestic and irrigation

Sixth: That on the date above mentioned, the works constructed under said permit were aforsaid fully completed and consisted of the following:

I. Kind of works: open well, with 100 inch inch pump, 1 mile of ditch
(Reservoir, dam, ditch, flume, pipe or otherwise)

II. Dimensions of work:

(a) Height of dam feet, length of dam at top feet, length of dam at bottom feet. Material used in construction

(State whether wood, earth, stone or concrete)

(b) Capacity of reservoir acre feet

(c) Size of headgate: Width 2 ft feet, height 1 feet.

(d) Conduit width at bottom feet, width at water line

(State whether ditch, flume or pipe)

feet, depth of water feet; diameter of pipe inches, average grade per mile is feet. Length of conduit is miles.

Seventh: That said works are capable of conducting to the place of intended use 2 second feet of water.

Eighth: That water appropriated under said permit is available for 100 acres of land described as follows: SE 1/4 NW 1/4 Sec 18, Twp 13 S R 27 E 3rd E, NW 1/4 NW 1/4 Sec 18 aforsaid, and 10 acres in NW part of SW 1/4 NE 1/4 Sec 18 aforsaid and 10 acres in NW part of NE 1/4 NW 1/4 Sec 18 aforsaid.

Ninth: That river angles the last two described forty acre tracts, and on account of the lay of the land and the river intervening, this well will not water the remainder of these two forties. a subsequent filing will have to be made from another well, situated across the river from present well.

Grant B. Hitt

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

CLAIM TO A WATER RIGHT

Section 42-243, Idaho Code, any person using or claiming rights to the public waters of Idaho for a purpose not applicable to a beneficial use must file a claim with the Department of Water Resources on or before the date specified from this filing are private family domestic uses as defined in Section 42-230(d), Idaho Code. A claim may be represented by a permit, license, decree, adjudicated right, or a previously filed claim.

The filing of this claim does not confirm the water right claimed but failure to file may result in forfeiture of a water right.

Rodney Hall

Chem No. 43-4117

STATE OF IDAHO

Section 42-225a, Idaho Code

CLAIM TO A WATER RIGHT

Under the provisions of Section 42-225a, Idaho Code, a person may file a claim to a right to use water which has been established by diversion and application to beneficial use. The filing of this claim does not confirm the water right but will serve for information purposes only. It may, however, become the basis for future adjudication of the water right by the Court.

Notice is hereby given that Rodney Hall
(name of claimant)

Malta, Idaho _____, claims a right to the diversion and beneficial use of
(mailing address)
the public water of the State of Idaho

The extent and nature of said claim is as follows:

- (1) Describe source of water: (name of stream, lake, spring, etc., or ground water) Ground Water
_____, tributary to _____.

- (2) Describe the purpose for which the water has been used and the time during the year when you have used the right claimed:

Amount	<u>.3 cfs</u>	Use	<u>Irrigation</u>	Period of Use:	From	<u>3-15</u>	To	<u>11-15</u>
Amount		Use		Period of Use:	From		To	
Amount		Use		Period of Use:	From		To	
	(cfs, gpm or a/f)		(dom, irr, stock, etc.)					(both dates inclusive)

- (3) Total quantity of water claimed: .3 cfs cubic feet per second, or _____ acre feet per annum, and/or _____ gallons per minute.

- (4) Priority claimed (the date water was first applied to beneficial use) April 1, 1952
- A claim is not acceptable on a ground-water source with a priority later than March 25, 1963 or on a surface-water source with a priority later than May 20, 1971. An exception to this rule is that a claim may be filed on domestic use from a ground-water source.

- (5) A) Point of diversion: (give location of point where water is diverted from its source)
SE ¼ NW ¼, Sec. 18 Twp. 13S Rge. 27E B. M. County of Cassia
Additional points of diversion:

B) Describe means of diversion of water: (pump and pipeline, well, diversion dam, reservoir, length of ditch and field, etc.) Give sizes and capacities; be as specific as possible. Drilled well, Parma Water lifter pump.
Gravity ditch and irrigation system.

- (6) A) Describe location of use by listing number of irrigated acres within each 40-acre tract in appropriate box. If use is not for irrigation, place an "X" in appropriate box to show location.

[illegible]

Total No. of acres 15

B. If the water is used for other than irrigation, fully describe that use, being as specific as possible: N/A

- 7) If you are claiming water as a member of an organization, list name of organization: N/A

Priority
no evidence
of priority or micro
fiche. KKC
5-10-99

- (1) Remarks Two cubic feet per second was produced by the well at this diversion point. The examination, completed August 1, 1951, confirmed the flow but water was not applied to lands in the NE/4 NE/4, Sec. 18 until the following irrigation season.

Scale: 2 inches equal 1 mile.

Map should show the location of the point of diversion and the place of use of the water by 40-acre subdivisions, section, township and range of the public land survey system.

State of Idaho)

County of Bdca)

Be it known that the undersigned, being duly sworn, deposes and says that he, she, they subscribed the foregoing claim to a water right, together with all attached information, and that the matters and facts therein are true to the best of the affiants knowledge.

AFFIDAVIT

I Martha E. Hitt, residing at 3475 N. Fruitland lane #10
Coeur D'Alene Idaho, 83814, Do here by swear and affirm that
the well located; NW/4, SE/4, NW/4 Section:18 Twn:13s Rng:27e
was dug by my husband Grant Hitt and his brother Shir1 Hitt
during the first part of the year 1946. That they then
installed a Parma Water Lifter pump powered by a Farmall "H"
tractor and driven by a flat belt. That the water was put to
beneficial use by April 1, 1946 and was pumped by this means
until converted to electricity.

I can remember these dates because my husband Grant Hitt
had just returned from World War II, and because my son
Howard was born in 1947.

Martha E. Hitt

Signature

*This is to the best of
recollection*

State of Idaho.

County of Kootenai.

Subscribed and sworn to me this 6 day of Feb, 1992.
