NOTE TO FILE

From: Vikie Hancock

3/10/00

Regarding: Claim number – VARIOUS Arimo Corp.

Doug Freestone, Arimo Ranch Mgr came into the office on March 8th, 2000 to discuss the various Arimo claims to surface and ground water. Issues discussed related to the following claims: **A43-00222, -00315, -10649 and -10650.**

Both Raft River and Cottonwood Creek were listed as source for the above four claims, which were filed by the predecessor in interest of Arimo Corp. I had investigated all the above claims, which are all based upon either old Jobe Adams Decrees or old licenses, and discovered that the only historical mention of Cottonwood Creek as a source was in right number 43-00222. In 1936 transfer #149 added the pod on Cottonwood in Section 12 that is still used today, and showed conveyance for irrigation to the west side of Raft River in section 7, as today. It also indicated a point of diversion from Raft River in section 18 that conveyed water to the east side of the river. I told Doug that I thought it may be better to delete Cottonwood Creek as a source on all but claim A43-~~00222~~ ⁰⁰²²² so that the entire diversion amount allowed by the other claims could be taken from Raft River and used on the east side of the stream. Since approximately 60 acres were irrigated exclusively from Cottonwood Creek, and no water from Cottonwood was conveyed to the east side of Raft River, 60 inches could be dedicated to those acres from the one decreed right and not split off from all four rights.

Doug agreed that recommending all the water from Raft River to the east side of the river in sections 6 and 7 would reflect the true usage of the water represented by the above claims. He also agreed that the place of use on the GIS layout dated 2-23-2000 accurately represented the acres irrigated by Cottonwood Creek in 1987, however they currently probably irrigate more acres in the SENW and less acres in the NENW Sec 7.

The actual point of diversion on Cottonwood Creek remains as claimed in the SENESW Section 12 T15S, R26E. Surface ditches convey water to a small pond and subsequently the place of use.

The actual point of diversion on Raft River has been moved post 1987 from the claimed location to the SWSWNE Section 7, where it is diverted by pump and pipeline into the combined sprinkler system.
