RECOMMENDATION NOTES

From: Vikie Hancock

8/31/00

Regarding: Claims 43-00047B, 43-00280 and 43-10820

These three claims are decreed rights from Raft River included in the 1928 Jobe Adams Decree.

43-00280 and 43-10820 are decreed to the same 280 acre place of use, and there has been an accomplished transfer of place of use. Water once used in the NENE Section 10 is now applied to land in Sections 11 & 12 of 16S, 25E and in Section 6 of 16S, 26E. It is impossible to state for certain whether the entire 280 acres were irrigated at the time of the decree, but it is more likely that a standard one inch per acre was awarded for this right, which would indicate a very plausible 240 acres. **43-10820** is a combination of decreed rights **43-00278 and -00279**. These rights were both decreed with priority dates of 4-1-1872 and have a specific season of 4-1 to 7-1 each year. They total 4.8 cfs. **43-00280** is also for 4.8 cfs, has a priority date of 1879 and a specific season of 7-1 to 10-1 of each year. Language in the Jobe Adams decree states that the 4.8 cfs diversion rate represented by 43-00280 a part of, and not in addition to, the 4.8 cfs represented by 43-00278 and -00279. My recommendation for these two claims are for a combined total of 4.8 cfs from Raft River for the irrigation of a combined total of 240 acres within a PPU of 389 acres.

43-00047B represents the remaining portion of a right decreed in the Jobe Adams to lots 1, 2, 3, 4, & 5, Section 6, T16S, R26E. Documents in the file show that, between the time of filing of the lawsuit and the time of issuance of the Decree, 2.0 of the 3.82 cfs from Raft River that were included in the Decree were transferred by sale from the place of use. This transfer was not recorded with the department of Water Resources (Reclamation). This claim represents the 1.82 cfs remaining. 43-00047A, claimed by Spencer Brothers, represents the transferred portion. It appears that of the original decreed tracts, it would have been reasonable that believe that 191 acres of those tracts could have been irrigated, as modern GIS methods calculate 166 irrigated acres there in 1987. If 2.0 cfs were transferred from the place of use, roughly 100 acres - at 1 inch per acre - would have been dried up to accomplish the transfer, leaving approximately 91 acres associated with this portion of the right. My recommendation for this claim, therefore, is for 1.82 cfs from Raft River for use on 91 acres within a PPU of 389 acres.

The single point of diversion from Raft River for all three rights is still functional, and the claimant, Roscoe Ward, still uses water from Raft River whenever it is available to fill his rights.

See claim file 43-02411 for maps and memos documenting the permissible place of use for surface and groundwater sources for this ranch.
