During my conversation with Brad Fowers he said that when no Snake River water is being pumped, water can back up in the canal to this most northern station.

He also related that the current practice is to shut SR pumps off at night and continue to let well run, this allows the water from the SR and well water co-mingles in the canals and holding ponds. When they turn the SR pumps back on in the morning both types of water are in the canal system.

Brad says another common practice is how they use the well in the early and late season irrigation. The well is a primary source prior to the season turn on of SR pumps and a primary source after season turn off of the SR pumps.

DESCRIPTIVE SUMMARY

This is Little Valley Mutual Irrigation Company's motion for leave to file late objections to water right claim 57-02202 filed by J. R. Simplot Company.

MOTION

Little Valley Mutual Irrigation Company (Little Valley) hereby moves for leave to file late objections to water right claim 57-02202 filed by J. R. Simplot Company (Simplot).

ARGUMENT

Little Valley and Simplot have conducted negotiations and informal discovery regarding their dispute as to the ownership of the well water right claimed by Simplot in subcase no. 57-02203A. Little Valley and Simplot agree that water right 57-02203A is owned by Little Valley and has been used as a supplemental water source for delivery to all the lands served by Little Valley, rather than only those lands identified in Simplot's Notice of Claim. Little Valley, Simplot, and the Department of Water Resources are in the process of obtaining the information and preparing the pleadings necessary to change the identity of the claimant and the place of use, and resolve subcase 57-02203A by stipulation.

Water right 57-02202 is a second water right for the same well. As a result of the aforementioned negotiations and discovery, Little Valley and Simplot recognize that 57-02202 is also owned and used by Little Valley as a supplemental water source for delivery of water to the lands served by Little Valley. This information was communicated to the Water Master for Basin 57, Fritz Haemmerle, at the March 22, 1996 status conference in Subcase No. 57-02203A.

If the Court grants this motion, Little Valley anticipates that the resulting subcase will be resolved by stipulation in the same or similar manner that Subcase No. 57-02203A is being resolved.

Filed herewith is Little Valley's proposed Objection.

Dated this 25th day of March, 1996.

DESCRIPTIVE SUMMARY

This is Little Valley Mutual Irrigation Company's motion for leave to file late objections to water right claim 57-02202 filed by J. R. Simplot Company.

MOTION

Little Valley Mutual Irrigation Company (Little Valley) hereby moves for leave to file late objections to water right claim 57-02202 filed by J. R. Simplot Company (Simplot).

ARGUMENT

Little Valley and Simplot have conducted negotiations and informal discovery regarding their dispute as to the ownership of the well water right claimed by Simplot in subcase no. 57-02203A. Little Valley and Simplot agree that water right 57-02203A is owned by Little Valley and has been used as a supplemental water source for delivery to all the lands served by Little Valley, rather than only those lands identified in Simplot's Notice of Claim. Little Valley, Simplot, and the Department of Water Resources are in the process of obtaining the information and preparing the pleadings necessary to change the identity of the claimant and the place of use, and resolve subcase 57-02203A by stipulation.

Water right 57-02202 is a second water right for the same well. As a result of the aforementioned negotiations and discovery, Little Valley and Simplot recognize that 57-02202 is also owned and used by Little Valley as a supplemental water source for delivery of water to the lands served by Little Valley. This information was communicated to the Water Master for Basin 57, Fritz Haemmerle, at the March 22, 1996 status conference in Subcase No. 57-02203A.

If the Court grants this motion, Little Valley anticipates that the resulting subcase will be resolved by stipulation in the same or similar manner that Subcase No. 57-02203A is being resolved.

Filed herewith is Little Valley's proposed Objection.

Dated this 25th day of March, 1996.

This form is used to report the stipulated elements of one water right under state law or one water right acquired under federal reserved water right. Submission of this form will not automatically result in the issuance of a partial decree. The Presiding Judge or Special Master will conduct any hearing necessary to determine whether the facts, data, expert opinions and law support the issuance of a partial decree for the water right.

The parties agree that the Snake River Basin Adjudication Court has jurisdiction of the parties and subject matter to enter a partial decree for this water right; and they have been served with sufficient process, according to the law, and that they have appeared, prosecuted and defended their positions with regard to this water right dispute.

Instructions For Use

Elements where there has been no objection should be listed exactly as they appear in the director's report. The statement as to an uncontested element shall state "as recommended in the director's report."

Contested elements that are the result of an objection filed with the court shall be accompanied by a statement fully describing all facts, documents, expert opinions and law which support the element of the water right (attach additional pages if necessary).

WATER RIGHT NUMBER:

IDWR and the parties stipulate that the correct water right number for this right is 57-02203. It is not 57-02203A.

This stipulation is intended to resolve any confusion that may arise regarding the proper number for this water right. Both Little Valley Mutual Irrigation Co. and J.R. Simplot Co. filed claims to water right no. 57-02203. To avoid confusion, IDWR designated the claim by J.R. Simplot Co. as 57-02203 and the claim by Little Valley Mutual Irrigation Co. as 57-02203A. In the Director's Report for Reporting Area 2 (Basin 57), IDWR recommended a water right in the name of J.R. Simplot Co. (57-02203) and recommended disallowal of the claim by Little Valley Mutual Irrigation Co. (57-02203A). Little Valley Mutual Irrigation Co. subsequently filed an objection to the recommended disallowal of their claim, thus creating subcase no. 57-02203A. Through the objection and negotiation process, IDWR and the parties were able to address the merits of the dispute and resolve their differences. The concern now is that the proper water right number be assigned to the claimant's water right.

IDWR and the parties agree that the correct number should be 57-02203. This is appropriate for two reasons. First, IDWR has a notice of claim in the name of Little Valley Mutual Irrigation Co. on file for this water right under no. 57-02203. Adding another number (i.e. 57-02203A) to identify the same right would create confusion for those who rely on IDWR's data base. Second, a change in water right numbers would force IDWR to change its recommendation to allow claim no. 57-02203 and disallow 57-02203A. Therefore, for the convenience of IDWR, the parties and those who rely on IDWR's database, the correct number to represent this water right is 57-02203. For these same reasons, 57-02203A should remain disallowed.

NAME OF CONTACT: BRAD FOWERS (LITTLE VALLEY MUTUAL IRRIGATION CO)
PHONE NO: 1-208-845-2574

I. REQUIREMENTS BY IDWR ATTORNEY'S

INSTRUCTIONS PER RICHARD BURLEIGH 2/8/96. PRIOR IDWR ATTORNEY, now with HAWLEY TROXELL ETC. 344-6000.

1. ALL further work should be given to CHARLEY HONSINGER, RICHARD'S REPLACEMENT, items to include are:
 - a. An accurate property description, tracts and irrigated acres identified.
 - b. Any combined use or remark language.
 - c. CONTINUE contact with Charley for additional information and keep apprised of work.
2. May 16, 1996 talked to Charley, he said that the court granted both claims to do the SF5. My instructions now is to make R files for both claims and let him know when done.
3. May 17, 1996, I informed Charley that I had finished the R files per his request May 16, 1996.
 - a. I also asked if I needed to add anything to the work files. He thought that only the SF5 and a profile report would do at this point.
 - b. I also asked about the requirement we were going to ask of Little Valley to amend their 02 rights to match the PPOU recommendation? He said he asked Lynn K and she said that they didn't need to do that now.
 - c. I talked to Jan about this, she felt that it should still be done however, since Lynn said they didn't need to now that I could contact Little Valley's representative Brad Fowers, personally if they don't come forth on their own after the court work has been completed for a couple months.

II. CONTACT WITH BRAD FOWERS

1. Set up field exam meeting on 4/10/96 at 10:00 AM, rescheduled to 1 PM.
2. Instructions how to get to his home;

When coming from the Mountain Home-Bruneau way, look for mile post 69 or 70 there will be a sign for Cove Recreation, look for dirt road on left, turn on it to the South, go about 2 miles to a small cement bridge over their canal, then about 2 miles to the West, then as far as it goes South, his house is the only one in that area.

3. Updated Brad by phone 4/23/96 that I found the same amount of irrigated acres as licensed including the overlaps, no expansion found, only small shifting of acres within the $\frac{1}{4}$ tracts. I said I had made a map for him and after I contact the Departments attorney's, I may be able to send the map copy to him. Also, we then might discuss the amending of the Snake River claims to show the PPOU. He said he couldn't alone decide to amend the claims. I would keep him informed.

III. TIME & WORK DONE

1. Plotted licensed tracts with each license POU on a 1974 ORTHO map (2 Hours) 4/5/96.
2. a. Drove to Marsing, ASCS put map together. (2 Hours) 4/8/96
b. Put $\frac{1}{4}$ lines on ASCS map. (2 Hours)
3. Field Exam 4/11/96; I met with Brad, we reviewed the irrigation system, then I left to look at system and take photos. Returned to Boise at 5:30. (6 Hours)
4. Calculated ASCS acres by fields 4/16/96. (3 hours)
5. Reviewed ASCS VS NAPP maps, determined acres per $\frac{1}{4}$ tract and made a land list, put into PPOU table, 4/17/96. (8 hours)
6. Remarks with combined language determined and additional map work 4/18/96. (8 hours)
7. Converted field photo notes to exhibit findings. 4/19 & 4/23/96. (10 hours)
8. Touch-up ASCS original map and copies to clearly show pumping stations and PPOU. 4/19/96 (4 hours)
9. Continue this write-up and map work. 4/24/96 (6 hours)
10. Made R files for 57-02202 & 57-02203. 4/16/96 (6 hours)

IV. CONTACT WITH CHARLEY HONSINGER

1. Continue to update Charley Honsinger 4/11/96 and 4/24/96.

V. ACRES CALCULATED

1. I used the ASCS field acre figure to determined each irrigated tract. ASCS doesn't identify irrigated acres per $\frac{1}{4}$, a method of comparing the total acreage shown per the fields by ASCS first, then by comparing the features of the ASCS map and NAPP photo's. Then the field amount was then divided between ASCS identified fields. Because it is impractical for IDWR to identify recommended acres to the 10th acre, I used this round up, round down method. This is a common practice in our licensing procedures. For other $\frac{1}{4}$ tracts a planimeter was used to determine the nearest irrigated acre. I gave benefit of the doubt to rounding up in most cases. One field in the NENW, S22, was identified as part of 53.8 acres by ASCS, this tract belongs to BLM and should not be counted. BRAD FOWERS of LITTLE VALLEY MUTUAL IRRIGATION CO doesn't want this tract counted either. They do not plan to irrigate it again, unless they could acquire the land. Another tract in the NWNW & NENW, S14, was counted as 70 acres, THAT didn't seem to add up, I determined that the field should have been 77 acres. These 7 acres will be counted in addition to what ASCS didn't show.

VI. RECOMMENDATIONS

1. Since the original SRBA recommendation was for 57-02203 in the name of J R Simplot and 57-02203A was not recommended in the name of Little Valley Mutual Irrigation Co, thus, I now recommend THE CLAIM NUMBER 57-02203 to be ASSIGNED TO LITTLE VALLEY MUTUAL IRRIGATION CO.
2. The SRBA claim 57-02202 for the same well, was recommended in the name of J R Simplot and a late objection has been filed to change the ownership in the name to Little Valley Mutual Irrigation Co, thus, in remarks for the claims : 57-02202, 57-02203, A02-02442, A02-02443, A02-07030, A02-07068 and A02-07221 will be included in the remarks if it is that change is approved by the court process.
3. PERMISSIBLE PLACE OF USE RECOMMENDED. The licenses listed above were not claimed in the SRBA as a PERMISSIBLE PLACE OF USE, however, due to the request of LITTLE VALLEY MUTUAL IRRIGATION CO, it has been determined through field inspection and map review that all of the licenses listed are appurtenant to a common place of use. The Snake River rights should be amended to show the common place of use, providing a better description of how the water is used. Each right will be limited to a number of irrigated acres within the PERMISSIBLE

PLACE OF USE.

See ASCS map attachment copy and LITTLE VALLEY MUTUAL IRRIGATION CO PPOU TABLE.

4. The remarks shown on Item VII should be included in 57-02202 too, if the court changes it to LITTLE VALLEY MUTUAL IRRIGATION CO from J R Simplot Company as originally recommended.
5. LITTLE VALLEY MUTUAL IRRIGATION CO should be required to amend their Snake River claims to show the same PPOU.

A primary reason for this is we probably couldn't recommend the large POU without recognizing the fact that the groundwater source could not irrigate the 4189 acres alone.

By requiring LITTLE VALLEY MUTUAL IRRIGATION CO to amend their Snake River claims now, will also serve to show their goal. That was not to show the claimed smaller licensed irrigated area, but to show entire irrigated area. Amending these Snake River rights now, essentially validates their intention.

STATE OF IDAHO)

COUNTY OF ADA)

BART FOWERS, being first duly sworn on oath, deposes and says:

1. I am a shareholder and director of Little Valley Mutual Irrigation Company (the company). I hold shares as an individual land owner and as a partner in Lyle C. Fowers and Sons Farms, a partnership which also holds shares in the company. I became a shareholder in the company on December 31, 1975. My best recollection is that Lyle C. Fowers & Sons Farms became a shareholder of the company during 1980 or 1981. I was president and chairman of the board of directors of Little Valley Mutual

Irrigation Company during 1987, 1988, and 1989. During different time periods, I have also been the secretary/treasurer and vice president of the company.

2. I have observed the company's water diversions and delivery system during each irrigation season from 1976 to the present. During this entire period, the company has delivered irrigation water to its shareholders from two sources. The primary source is the Snake River, from which water is diverted by means of pumps and is delivered to all the lands served by the company through a main canal and several pumps and laterals. The secondary source of water is a well. During this period, the well has been used exclusively by the company to supplement the delivery of water from the river to all the lands served by the company. I have depicted the location of the Snake River and well points of diversion and the location of the canal on Exhibit A attached hereto.

3. I understand that there are two water rights in the well which were transferred to the company by James L. Morrison prior to 1975. These water rights are 57-02203A and 57-02202.

During my conversation with Brad Fowers he said that when no Snake River water is being pumped, water can back up in the canal to this most northern station.

He also related that the current practice is to shut SR pumps off at night and continue to let well run, this allows the water from the SR and well water co-mingles in the canals and holding ponds. When they turn the SR pumps back on in the morning both types of water are in the canal system.

Brad says another common practice is how they use the well in the early and late season irrigation. The well is a primary source prior to the season turn on of SR pumps and a primary source after season turn off of the SR pumps.
