RE: RENUMBERING OF SNAKE RIVER BASIN ADJUDICATION CLAIMS
A43-00058, A43-00059, A43-00060, AND A43-00061

Dear Mr Gardiner

Enclosed are the renumbered claims that represent the above original claims. After talking to Nathan on January 4, 1995, I reviewed the above claims and found that they actually represented all of the base decreed right and a portion of another decreed right. They were renumbered to better identify that the claims represent combined rights. Other than the number and a remark explaining why the claims were renumbered, no changes were made to the original claims.

Any information obtained during my field verification of these claims is not reflected in these claims at this time.

If you have any questions please contact me at this office.

Sincerely

Kelly K Christensen
Sr Water Resource Agent

A stackyard in the NESW has been excluded from that q/a and on the NWSE the farmstead, ~~and~~ the road right-of-way, & a small triangular piece of ground in the SE corner have been excluded from the recommendation for that q/a. Ground north of Clyde Creek has been included ~~and~~ in the recommendation although that ground gets water off the Hutchinson property. A portion of the recommended P/U lays south of natural drainage channels and is normally wet. Some argument could be made to exclude those acres however in water from Clyde Creek can reach the ground and the seeps can 'dry up' during the end of the irrigation season thereby requiring irrigation to maintain green vegetation.

I found 2 PIDs. The first PID is located just Northwest of the NW corner of the P/4. Water is diverted into a dirt ditch that runs South along the Property Boundary. Application is flood irrigation. The second PID is approximately 500 ft down stream from the first PID. Water is diverted into another dirt ditch that also is used in a flood irrigation manner.

no individual right exceeds the 1.56 cfs (1" A limit)
therefore no individual right is limited on this basis.
When all 4 rights are combined they are limited to
the 1.56 cfs.

No conveyance losses were calculated as the
ditch length from the P/D to the P/U is only about 100 ft.

Each claim represents a combination of 2 decreed
rights that were for one of the 240 ac tracts. No per right
limit required. However when all 4 rights are comb.
they are limited to the 78 ac recommended P/P U.

ANALYSIS FROM FIELD VERIFICATION MEETINGS WITH ALL THREE CLAIMANTS

SYSTEM 1

According to both claimants, predecessors reached an agreement to split the use of SYSTEM 1 with 43-00232 being appurtenant to the ground currently claimed by Hawker and 43-00230 and 43-00231 being appurtenant to the ground currently claimed by Hutchison. Delivery since that date has been based upon that agreement.

RECOMMENDATION ANALYSIS FOR SYSTEM 1

DECREED RIGHT 43-00232

Based upon §42-1426 and that the changes have been made with the knowledge of other users I accept the changes as an unrecorded transfer that unstacked the decreed rights, with 43-00232 being appurtenant to the property now owned and claimed by Ryan Hawker under A43-00232A. As the use represents all of the decreed right I am recommending that right to be renumbered as A43-00232 and recommended as described in the CVR. Claim A43-00232B is being recommended for disallowal based upon remark code P01 {NO LAWFUL APPROPRIATION SHOWN}.

DECREED RIGHTS 43-00230 AND 43-00231

Based upon §42-1426 and that the changes have been made with the knowledge of other users I accept the changes as an unrecorded transfer that unstacked the decreed rights, with these rights being appurtenant to the property now owned and claimed by Tommy Hutchison. I recognize those rights as valid as described in the CVR.

SYSTEM 2 & 3

Two combined rights systems were decreed to adjoining parcels and were decreed independent of the other system. One system consisted of rights 43-00058 through 43-00061 and the other system consisted of rights 43-00332 through 43-00335. Although not sequential, each individual right under the first system has a corresponding right in the second system with a matching priority date. (see table below)

According to claimants, historically the two systems were under one ownership for some time and operated as one delivery system. When the property was split, the intent was for

the ground now claimed by Gardiner to receive fifty percent of each right based upon priority date and the property claimed by Hutchison receiving the other fifty percent.

SPLIT ANALYSIS BASED UPON THE 50% SHARE AGREEMENT

Total	1.2000 cfs					1.20 cfs

RECOMMENDATION ANALYSIS FOR SYSTEM 2

The original decreed place of use has been split through a sale of that portion of the place of use in sec 31 NESW AND NWSE to Gardiner. The accepted agreement of that sale was that the water rights appurtenant to the 160 acres covered by system 2 and system 3 would be split fifty-fifty

Gardiner's claims for system 2 are claimed within a permissible place of use (PPU) with the rights under system 3. Based upon §42-1426 and that the changes have been made with the knowledge of other users I accept the split as valid as agreed upon between the users and the use within the PPU as an unrecorded transfer.

Hutchison's claims for system 2 are also claimed within a PPU but with rights from system 1. During the field verification interview Tommy indicated that he was in agreement with the 50% split agreement. As his claims filed were filed based upon the system 2 decreed rights but for the entire diversion rates, I am recognizing that those claims represent the combined 50% from the matching decreed rights from system 2 and 3. Those claims are renumbered to better identify that they represent combined rights. Based upon §42-1426 and that the changes have been made with the knowledge of other users I accept the split as valid as agreed upon between the users and the use within the PPU as an unrecorded transfer.

RECOMMENDATION ANALYSIS FOR SYSTEM 3

System 3 was claimed by Gardiner and Hutchison and was verified as valid during the field verification visit. Based upon §42-1426 and that the changes have been made with the knowledge of other users I accept the use within the PPU as an unrecorded transfer. See also the analysis for system 2.

FIELD EXAM ATTACHMENT

orig in
A43-232ADATE: 7-14-94PAGE: 1/AGENT: KKCFILES: A43-00232A00232BATTACHMENT SUBJECT: Historical Use

Three Rights (43-00230, 43-00231, & 43-00232) were decreed to two separate parcels under one ownership. The system stayed under one ownership until sometime around 1975. The then owner (Lew Otley) split the parcel with one of his children receiving All of the Ground in Sec 31 (as identified in the decreed rights) & another the ground in Sec 6. At that time an agreement (verbal) was reached with which split the water rights based upon Seniority dates. The Ground in Sec 31 received 43-00230 & 00231 and the ground in Sec 6 received the 43-00232 right. Apparently water has been delivered in this manner since that date.

The current use is identified as an un recorded transfer of portions of each of the 3 rights. Each claim requires a CØ5. The decree does not identify P/Ds & therefore I am assuming that the existing P/Ds are as decreed. No evidence to the contrary was Found.

Claims A43-00230 & 00231 are recognized as Valid for the ground in Sec 31. A43-00232B is recon. for disallowal for the same ground.

Claim A43-00232A is recognized as valid for the ground in Sec 6 (in full). 43-00230; & 43-00231 were not claimed in full or in part for the decreed P/R in Sec 6.

Info based upon conversations during a 6-27-94 field Exam for Ryan Hawker see Attached notes.
