RE: B02 Preliminary

Within this packet are a few water rights with chicken scratchings on them. Some of these scratchings may represent valid corrections to legal descriptions that if fixed would avoid an objection by BLM. We haven't been able to write them up pretty because, for all we know, the Dir Rpt may come out before we could make them pretty.

1. Describe the portion of the proposed recommendation with which you disagree (e.g. priority date, period of use, source):

Disagree with description of the place of use.

2. Describe the changes you wish to make in the proposed recommendation:

Add the following to the place of use for wildlife and irrigation:

T66 R6E Sec. 02 SESE - 32 acres

Sec. 03 NESE - 12 acres SWSE - 1 acre

NWSE - 28 acres SESE - 18 acres

3. Give a brief explanation as to why you disagree with these portions:

The acreage listed in #2 above were inadvertently left off of the claim filed in 1990. Adding the above described acres to the Place of Use will make the

claim and recommendation consistent with license issued on July 1, 1975, and with the amended claim. The current use of the water right.

I AGREE with this proposed recommendation, no changes need to be made.

Dear Sir:

This agency has begun to review the claims for water rights filed for the Snake River Adjudication. A part of that review requires a check of recorded water rights that are not claimed. The enclosed claim form describes a water right that is apparently used on your land although you may be unaware it exists. A claim has not been filed to date for this water right.

If you believe you hold this water right, please return it with a \$10 filing fee after signing the form before a notary public. Should you have any questions about this matter, please contact me.

Thank you for your cooperation and assistance in the adjudication.

License of Water Right No. 02-7004 Priority Oct. 19, 1967 Amount 18.0 cfs

THIS IS TO CERTIFY, that the State of Idaho, Department of Fish & Game
of Boise, Idaho, has complied with the terms and conditions of Permit
No. 02-7004 issued pursuant to Application for Permit dated October 19, 1967,
and has submitted proof to the Department of Water Resources on January 31, 1973,
that he has applied water to a beneficial use; an examination by the Department indicates that the works have a
capacity for the diversion of 18.0 cfs of water from the Snake River,
tributary to the Columbia River, and that the permit holder has applied to a beneficial use and
established a right to use water as follows:

Beneficial Use	Period of Use	Rate of Diversion	Annual Volume

Subject, however, to the condition that no more than 18.0 cfs of water be diverted at any one time, and
that the amount of water so diverted and to which such right is entitled and confirmed is for the purpose
aforementioned and is limited to the amount which can actually be beneficially used and shall not exceed

Dear Keith:

Re: Permit No. 02-7004

We have evaluated your recent proposal to issue a water right license for 8.68 cubic feet per second of water at our C. J. Strike Wildlife Management area. We wish to retain our present license for 18 cfs.

It is true that the 9.32 cfs of water for irrigation has not been used to irrigate an agriculture crop. However, this water is being used to maintain aquatic vegetation in and adjacent to the duck ponds. We consider the production of this type of vegetation equal to an agriculture crop. We are in the process of developing a Canada goose management plan for that immediate area and the extra water will be needed to maintain an adequate water supply.

Both pumps have been installed and used extensively the past few years. However, the smaller pump recently broke down and we are in the process of making the necessary repairs.

Again, we ask that the permit be reissued for 18 cfs of water as originally licensed.

Sincerely,

IDAHO FISH AND GAME DEPARTMENT

Re: Permit No. 02-7004

Idaho Fish & Game Department
Attn: Mr. Joseph Greenley, Director
Statehouse Mail

Dear Mr. Greenley:

Our letter of August 6th was apparently misleading concerning the reason for not proposing a water right license for the pumping of 18 cubic feet per second of water from the Snake River at C. J. Strike Reservoir.

Your original permit, No. 02-7004, was issued for 8.68 cfs of water for wildlife propagation and storage for wildlife propagation purposes, and 9.32 cfs of water for irrigation purposes. The total rate of diversion for the two uses is 18 cfs.

However, our examiner found the water being used only for wildlife propagation purposes. Therefore, a license can be issued for only the 8.68 cfs of water originally permitted for that purpose.

We again propose to issue this license as shown in our August 6th letter, a copy of which is enclosed for your convenience.

Please let us know within 10 days, if you are still in disagreement with our finding.

Sincerely,

Dear Mr. Fleenor:

In reference to your letter of August 6, 1974, the Fish and Game Department had its second pump pulled for repair. Repair was found to be impractical and bids are presently outstanding for purchase of a replacement pump.

It would be appreciated if issuance of the Permit could further be delayed to grant time for purchase and installation of the replacement pump to provide evidence of beneficial use of water in the amount of 18 cfs. Both pumps have been in operation on the project, and it is unfortunate that inspections have been made at inopportune times.

Thank you for your cooperation.

Gentlemen:

A representative of the Department has made a re-examination of the works covered by your Permit No. 02-7004. Our examiner's report indicates that the second pump has not been installed and, therefore, the Department proposes to issue a water right license as follows:

Quantity of water diverted: 9.1 cfs

Source: Snake River

Amount of water that can be recognized as beneficially used under Idaho law: 8.68 cfs

The maximum quantity diverted shall not exceed 6,450 acre feet per year.

Point of diversion: SW $\frac{1}{4}$ NE $\frac{1}{4}$, Sec. 2, Twp. 6 S, Rge. 6 E, B.M.

Beneficial use: Impoundment & storage and wildlife propagation within the N $\frac{1}{2}$ NE $\frac{1}{4}$, NW $\frac{1}{4}$, Sec. 1; S $\frac{1}{2}$ NE $\frac{1}{4}$, NW $\frac{1}{4}$ NW $\frac{1}{4}$, S $\frac{1}{2}$ NW $\frac{1}{4}$, SW $\frac{1}{4}$, Sec. 2; NE $\frac{1}{4}$ NE $\frac{1}{4}$, S $\frac{1}{2}$ NE $\frac{1}{4}$, NW $\frac{1}{4}$ NW $\frac{1}{4}$, S $\frac{1}{2}$ NW $\frac{1}{4}$, N $\frac{1}{2}$ SW $\frac{1}{4}$, SE $\frac{1}{4}$, Sec. 3; NE $\frac{1}{4}$, N $\frac{1}{2}$ NW $\frac{1}{4}$, Sec. 4; all in Twp. 6 S, Rge. 6 E, B.M.

Department of Water Administration

Attention: Bobby D. Fleenor, Assistant Director

Dear Mr. Fleenor:

Reference is made to Water Administration's letter of December 13, 1973 pertaining to issuance of license on Permit 02-7004 and to which the Fish and Game Department does hereby enter protest to the findings stated therein.

In the Department's application for water permit, it applied for 18 cfs of water flow to be pumped from the Snake River by two pumps, one of which was rated to deliver 9.32 cfs and the other pump rated at 8.68 cfs, all of which water was for irrigation by flooding and for impoundment and storage. We thus request that the measured water delivery of the large pump be allowed in full, which delivery was designated by Water Administration as being 9.1 cfs.

The second pump, with the rated capacity of 8.68 cfs, has been operated for delivery of water to this project area for approximately three years. However, the pump was damaged and inoperative during the 1973 season.

In the matter of acre feet of water pumped, the Department in 1973 operated the large pump for a six-month period of time at various times within the year for delivery of 3,300 acre feet of water to the water storage area. With both pumps in operation, it is estimated that approximately 6,450 acre feet of water will be pumped each year. The 1,000 acre feet of water designated in the Department's application refers to capacity of the impoundment area and does not refer to the amount of water that may be pumped into the pond area and returned to the river by overflow or through ground percolation.

~~RECEIVED~~

Mr. R. Keith Higginson, Director
Page 2
December 21, 1973

We respectfully request that the issuance of the water permit be delayed until such time as the pump on the smaller motor is restored and in operating condition, and the permit be issued for approximately 18 cfs of water flow and water quantity in the amount of 6,450 acre feet.

Sincerely,
