RE: EXPANSION CLAIM A43-11249

Dear Mr. Wayment,

Enclosed is a new claim for the expansion acres that you are irrigating in Section 29. You have three licensed rights, which cover all but 23 acres. (I have included a map to help you understand where these acres are.) In order for these extra acres to be recommended in the adjudication, you must file an expansion claim. I have provided a copy of Idaho Statute 1416.b, which determines how the elements of these claims are to be recommended. If you wish to make this claim, please sign, have notarized and return to my attention as soon as possible with the fee of \$73.00 (\$50.00 filing fee plus \$23.00 for the 23 acres).

I have also enclosed a NOTICE OF CHANGE IN WATER RIGHT OWNERSHIP form, which should be used if you want to change your claims' ownership to an LLC, as you indicated. Please follow the attached instructions. We will need a copy of the paperwork noting this official change, which includes a legal description of the property and signature authorization.

If you have any questions, feel free to give me a call at the office.

Sincerely,

A handwritten signature in cursive script, appearing to read 'Jeanie', written over a horizontal line.

Jeanie Robertson

TITLE 42
IRRIGATION AND DRAINAGE -- WATER
RIGHTS AND RECLAMATION
CHAPTER 14

ADJUDICATION OF WATER RIGHTS

42-1416B. CLAIM FOR EXPANDED USE IN CRITICAL GROUND WATER AREA -- DETERMINATION OF WATER AVAILABILITY. (1) Within any critical ground water area designated pursuant to section 42-233a, Idaho Code, a claim to the expanded use of a ground water right, which use was expanded in violation of the mandatory permit requirements, may be decreed in a general water rights adjudication if the expansion occurred after the designation of the critical ground water area, before the commencement of the adjudication, and before the date of enactment of this section. The priority date for the right decreed shall be June 30, 1985.

(2) Water shall be deemed unavailable to fill the rights for expanded use, even if decreed in the adjudication, unless the director finds that a management program exists which will, within a time period acceptable to the director, limit the average annual water withdrawals from the aquifer designated in the critical ground water area to no more than the average annual recharge to the aquifer.

(3) Within two (2) years after a decree determining the water rights within a critical ground water area becomes final, but not sooner than four (4) years from the date of enactment of this section, the director of the department of water resources shall make a finding as to whether an adequate management program exists to bring withdrawals into balance with recharge.

(4) If the director finds that an adequate management program to bring withdrawals into balance with recharge does not exist, the director shall order all holders of rights to expanded use of ground water within the area to cease or reduce withdrawal of water until such time as the director determines that withdrawals have been brought into balance with recharge and sufficient ground water is available to resume or increase withdrawals. The director's order shall be issued before September 1 and shall be effective beginning with the following growing season.

(5) For purposes of this section, the following definitions shall apply:

(a) "Expanded use" means an increase in the number of acres irrigated, or other additional use, under a valid ground water right without any increase in the rate of diversion or volume of water diverted.

(b) "Management program" means a program to recharge the aquifer, limit withdrawals from the aquifer or provide surface water supplies for all, or a portion, of the land irrigated with water withdrawn from the aquifer, including any actions designed to bring withdrawals into balance with the average annual recharge to the aquifer.

(c) "Recharge" refers to all processes, natural or artificial, which add water to the aquifer.

(d) "Withdrawal" refers to all processes, natural or artificial, which take water from the aquifer.

(6) The hearing and judicial review provisions of section 42-1701A, Idaho Code, shall apply to any findings and orders issued by the director pursuant to this section.

(7) Nothing contained in this section shall be construed to limit the authority of the director of the department of water resources to administer and enforce any other ground water laws of the state.

The Idaho Code is made available on the Internet by the Idaho Legislature as a public service. This Internet version of the Idaho Code may not be used for commercial purposes, nor may this database be published or repackaged for commercial sale without express written permission.

Prepared by Jeanie Robertson

10/17/2000

Mr. Wayment was in this morning to talk about his expansion claim. We went over the G/S acres and made a few changes. He agreed that he irrigated about 344 acres. Since he has 328 licensed acres, that made the expansion claim for 16 acres. He filed claim A43-11249 for 16 acres as an expansion of 43-0239.

A43-02393 4/29/53 1.78 cfs 130 Ac.

- gis of 1987 photo showed total of 351 ac. irrigated
- 23 extra acres in this area
- needs expansion claim -
- original license shows 2 wells in SESE of Sec. 29, now claim is for one which may be abandoned

R43-02393 4/29/53 1.78 cfs / 520 AF 130/351 pp

A43-10809 11/29/62 2.53 cfs 198 Ac.

- this claim is a combination of 2 licenses:

43-02468 11/30/58 1.6 cfs 80 Ac.

43-02553 10/8/62 0.93 cfs 118 Ac.

- claim could be amended to change priority date to 10, (probably not, field epem says "late proof", pd=11/28/62)

R43-10809 11/29/62 2.53 cfs / 792 AF 198/351 pp
