RE: Evidence of Priority

RESPONSE DEADLINE
FEBRUARY 3, 1992

Dear Claimant:

The Notice(s) of Claim identified with the number shown above your name on the mailing label has been filed in the Snake River Basin Adjudication (SRBA). The Notice(s) indicate your water usage is based on "Beneficial Use" or a "Statutory Claim". Water rights of this type are established by the historical use of water, dating back to when water was first used for the purpose claimed. **The date of first use, known as the priority date, has not been confirmed by a License, Decree or Permit. The Department will soon conduct reviews &/or field exams for the claims in your area. Since the priority date of a beneficial use water right can not be confirmed by field examination, proof must be provided supporting the priority date you have claimed.**

The Department will not recommend the Notice(s) be decreed by the court as claimed if no evidence of a priority date is submitted.

Please find enclosed a computer printout of your Notice(s) and the pamphlet entitled "Evidence of Priority". The pamphlet describes the types of evidence required and suggests which documents will fulfill this requirement. I direct your attention to the two sections entitled "What Kind of Evidence is Required" and "Some Examples of Documents Which May Be Evidence of the Priority Date".

Please submit the required evidence supporting the priority date(s) by **February 3, 1992**, referencing all documents with the corresponding Notice number(s). If you have any questions not covered by this letter or the enclosed pamphlet, please contact this office.

Respectfully submitted,

Allen Merritt, P.E.
Water Rights Supervisor

RECOMMENDATION NOTES

From: Vikie Hancock 

9/28/00

Regarding: Claim 43-11257

This claim is a split portion of beneficial use claim 43-10204 filed in 1989 by Chloe White. This claim represents original water right license 43-2120 filed by Kidman and Yonk in 1912 for the irrigation of 18 acres close to their respective homesteads.

It is not known why Ms. White filed this as a portion of a beneficial use claim in 1989. During a meeting with me in July of 2000 she was of the opinion that she needed to preserve the priority date of this right, which would have been sacrificed in the combined right. She did not recall why she had filed a combined right for 50 acres based on two licenses that, together, gave her a right to irrigate 58 acres. She did not believe that the irrigated acres had been reduced, however they had been moved. From my conversation with Ms. White, I believe that there was some confusion on her part as to what claims she was filing in 1989.

Based on the information available to me, I believe that the elements of the original license 43-2120 can be recommended, with an accomplished transfer of place of use. The place of use was moved from 3 acres in the NESE Sec 30 and 15 acres in the NWSW Sec 29 to 18 acres in the SESE Sec 19, all T16S R23E. The original 18 acres, close by the two old homesteads, is no longer irrigated, according to Ms. White.

This right also represents an accomplished change in point of diversion upstream of the original. The place of use is part of a field that was expanded in 1950 by Ms. White's father, Chester Bullers, using water from a stream that was once known as South Cottonwood, but is now officially an unnamed stream. This right is limited to the irrigation of 18 acres within the 79 acre permissible place of use.

Regarding: Claim number VARIOUS Fred Bullers Trust

Chloe White came into the office to discuss the various claims and issues regarding irrigation on the ranch she owns with her brother in Junction Valley. She had not yet received my letter and exhibits sent to her July 11, 2000, so the first thing she did was read a copy of the letter in the claim file, and look over the GIS exhibits also in the file.

Chloe has been in the process of documenting the history of her father's ranch for some time now. There are many archeological sites from Indian activities, and the Applegate Cutoff of the California Trail cut through the valley as well. She has amassed the homestead patents of the various settlers and subsequent deeds documenting the history of ownership of the various portions of the ranch. I believe that she is interested in preserving the actual record of development on the ranch and that the observations she related to me in regard to the dates of first water use and the locations of water use are correct to her best knowledge. The trust is also in the process of reconstructing some of the irrigation works and may possibly need to transfer some of the water as they are attempting to restore some habitat or may want to use water to irrigate the old cemetery. According to Chloe, one of their problems involves the spring sources of the unnamed streams, as there has been much degradation by cattle.

We went over a 1987 NAPP photo of the ranch and Chloe pointed out the fields that were dry farmed and those that were historically irrigated. Much of the ranch has been in Brohm grass and rye grass in the past, and some of it is meadowland irrigated by sub-waters from the streams and draws. Some of the ranch has been in and out of the CRP. It was determined, however, that there are irrigated acres for which no water right claim had been filed.

Thirty-seven irrigated acres were licensed under **43-2153**, a valid license not claimed in the adjudication, and Chloe filed a claim based upon that license this date. There were two accomplished transfers of licensed rights noted. The 20 acre POU of license **43-2117** was moved from the SWNE Sec 31 north into the NWNE & NENE Section 31. The original POU was no longer irrigated. The 18 acre place of use for water right license **43-2120** (original combined claim filed as 43-10204) in sections

29 and 30 was moved to the SESE section 19. The three acre original POU in section 30 was a garden that is no longer cultivated, and the 15 acres in section 29, just east of the Yonk homestead, have not been irrigated for years. This transfer also represents an accomplished change of source. The place of use of **43-2600** remains basically as licensed, as does the place of use of **43-2599** (original combined claim filed as 43-10204). Three additional beneficial use claims were filed for acres irrigated: **43-11230**, priority date 1950, **43-11231**, priority date 1924, **43-11232**, priority date 1924. Proof of priority documents were submitted at the time of filing. See GIS layouts with claims.

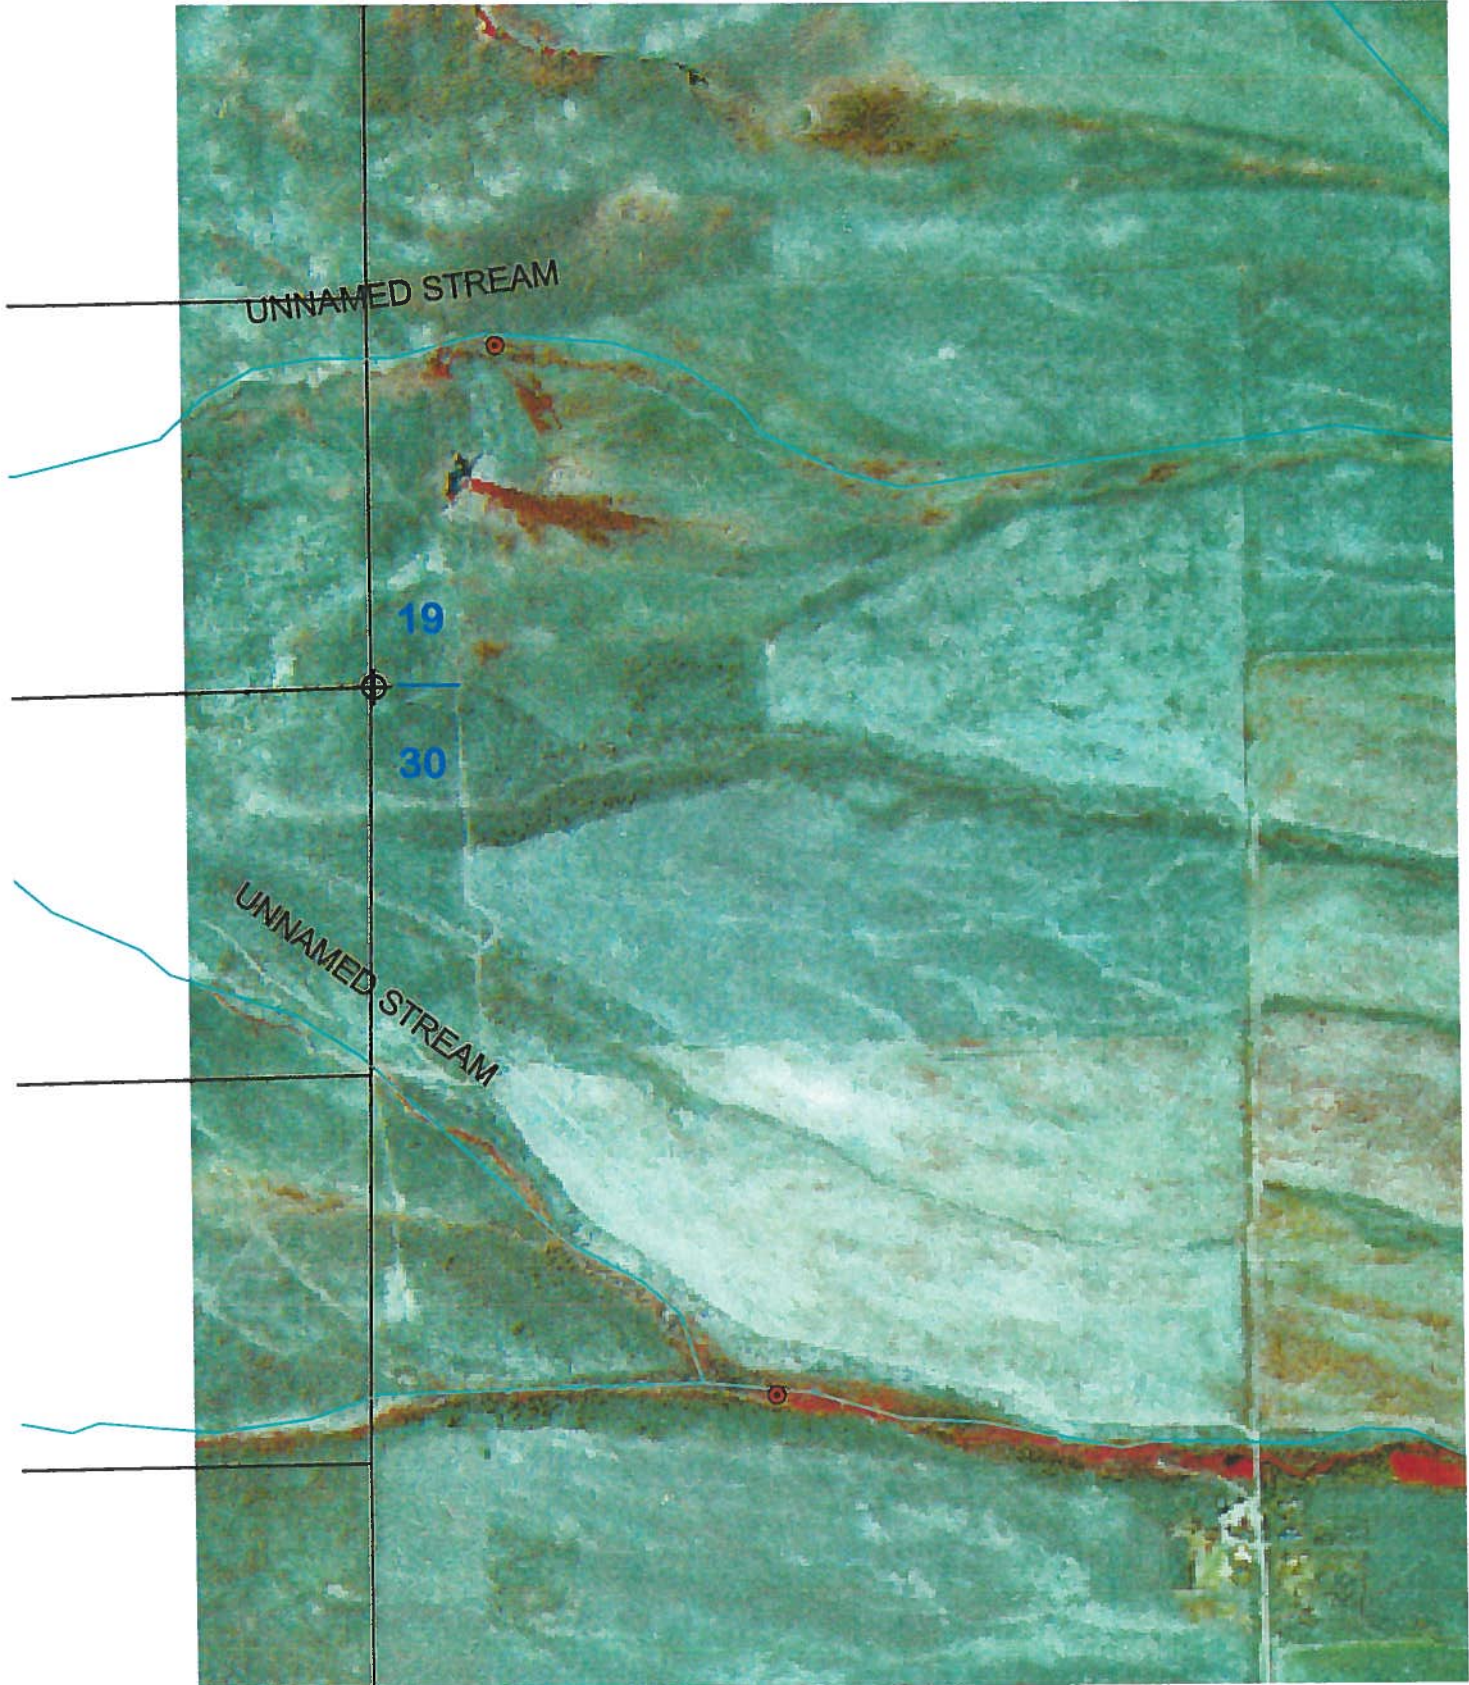

Claim **43-10204** was filed as a combination of license 43-2599 with a priority date 1942, and license 43-2120 priority date 1912. The claim listed a 1912 priority date. In order to preserve the priority date of license 43-2120, the claim will be split with each portion representing the licensed right or licensed right as transferred per IC 42-1425.

RE: Snake River Basin Adjudication (SRBA)
Claim Nos.: A43-02117, A43-02600, A43-10204

Dear Chloe:

As follow-up to our phone conversation of yesterday, I am sending you a copy of a computer generated layout using 1987 NAPP Aerial photos of your ranch. The 1987 photos are used in the Adjudication because, as you are probably aware, the Department of Water Resources was charged by the Idaho Legislature to inventory water uses occurring in the Snake River Basin as of November 1987.

Super-imposed on the layout are the approximate original locations of the four licenses that you have based your Adjudication claims upon. In addition, I discovered a license that, according to our database, was appurtenant to your ranch property but which you forgot to claim. This license is #43-2153, and was issued for 0.74 cfs of Granite Creek for use on 37 acres in the SWNE and SENE of Section 31, as shown. I have included a profile report of this water right as it appears in our database, and would encourage you to file an Adjudication claim based upon this license.

As you can see by the enclosed layout, there are significant acres that you appear to be irrigating that are not covered by any of your current Adjudication claims, nor by any of the old original licenses. I need to meet with you, or your brother, to determine which acres you dry farm and which acres you irrigate. It may be necessary for you to file a claim, or claims, for a water right based upon *beneficial use* to assure that all the acres you have historically irrigated have water rights associated with them. You mentioned that a court decision gave your ranch a right to all the water in Granite Creek, but a water right includes an amount of water and a specific number of acres the water can be applied to. At this time, only a small number of the acres you own have any water rights filed upon them.

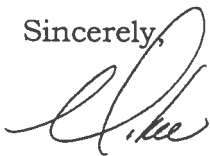

Claims to a water right based upon beneficial use require proof of the date that water was first put to beneficial use. Should you decide to file a claim, some research will be required on your part to provide us with evidence to support the date you claim as date of priority. Typically, on properties this large, the water use is developed over time. For example, one of the licenses in

our file indicates that, at the time of the field exam in 1913, there were a small number of surrounding acres being irrigated by Charles Yonk that were not included in his Application for Permit, therefore not included in the License. It would seem, then, that there were acres already being irrigated in 1913 for which there was no license, and to which a beneficial use claim may apply. On unrelated licensing documents, it is shown that Chester Bullers had intended to develop more acres than actually licensed, indicating that at the time of the field exam in 1942, 168 of the 220 intended acres were not yet being irrigated. It appears that some of those acres were subsequently developed prior to 1987, and a beneficial use claim with a priority date after 1942 may be appropriate.

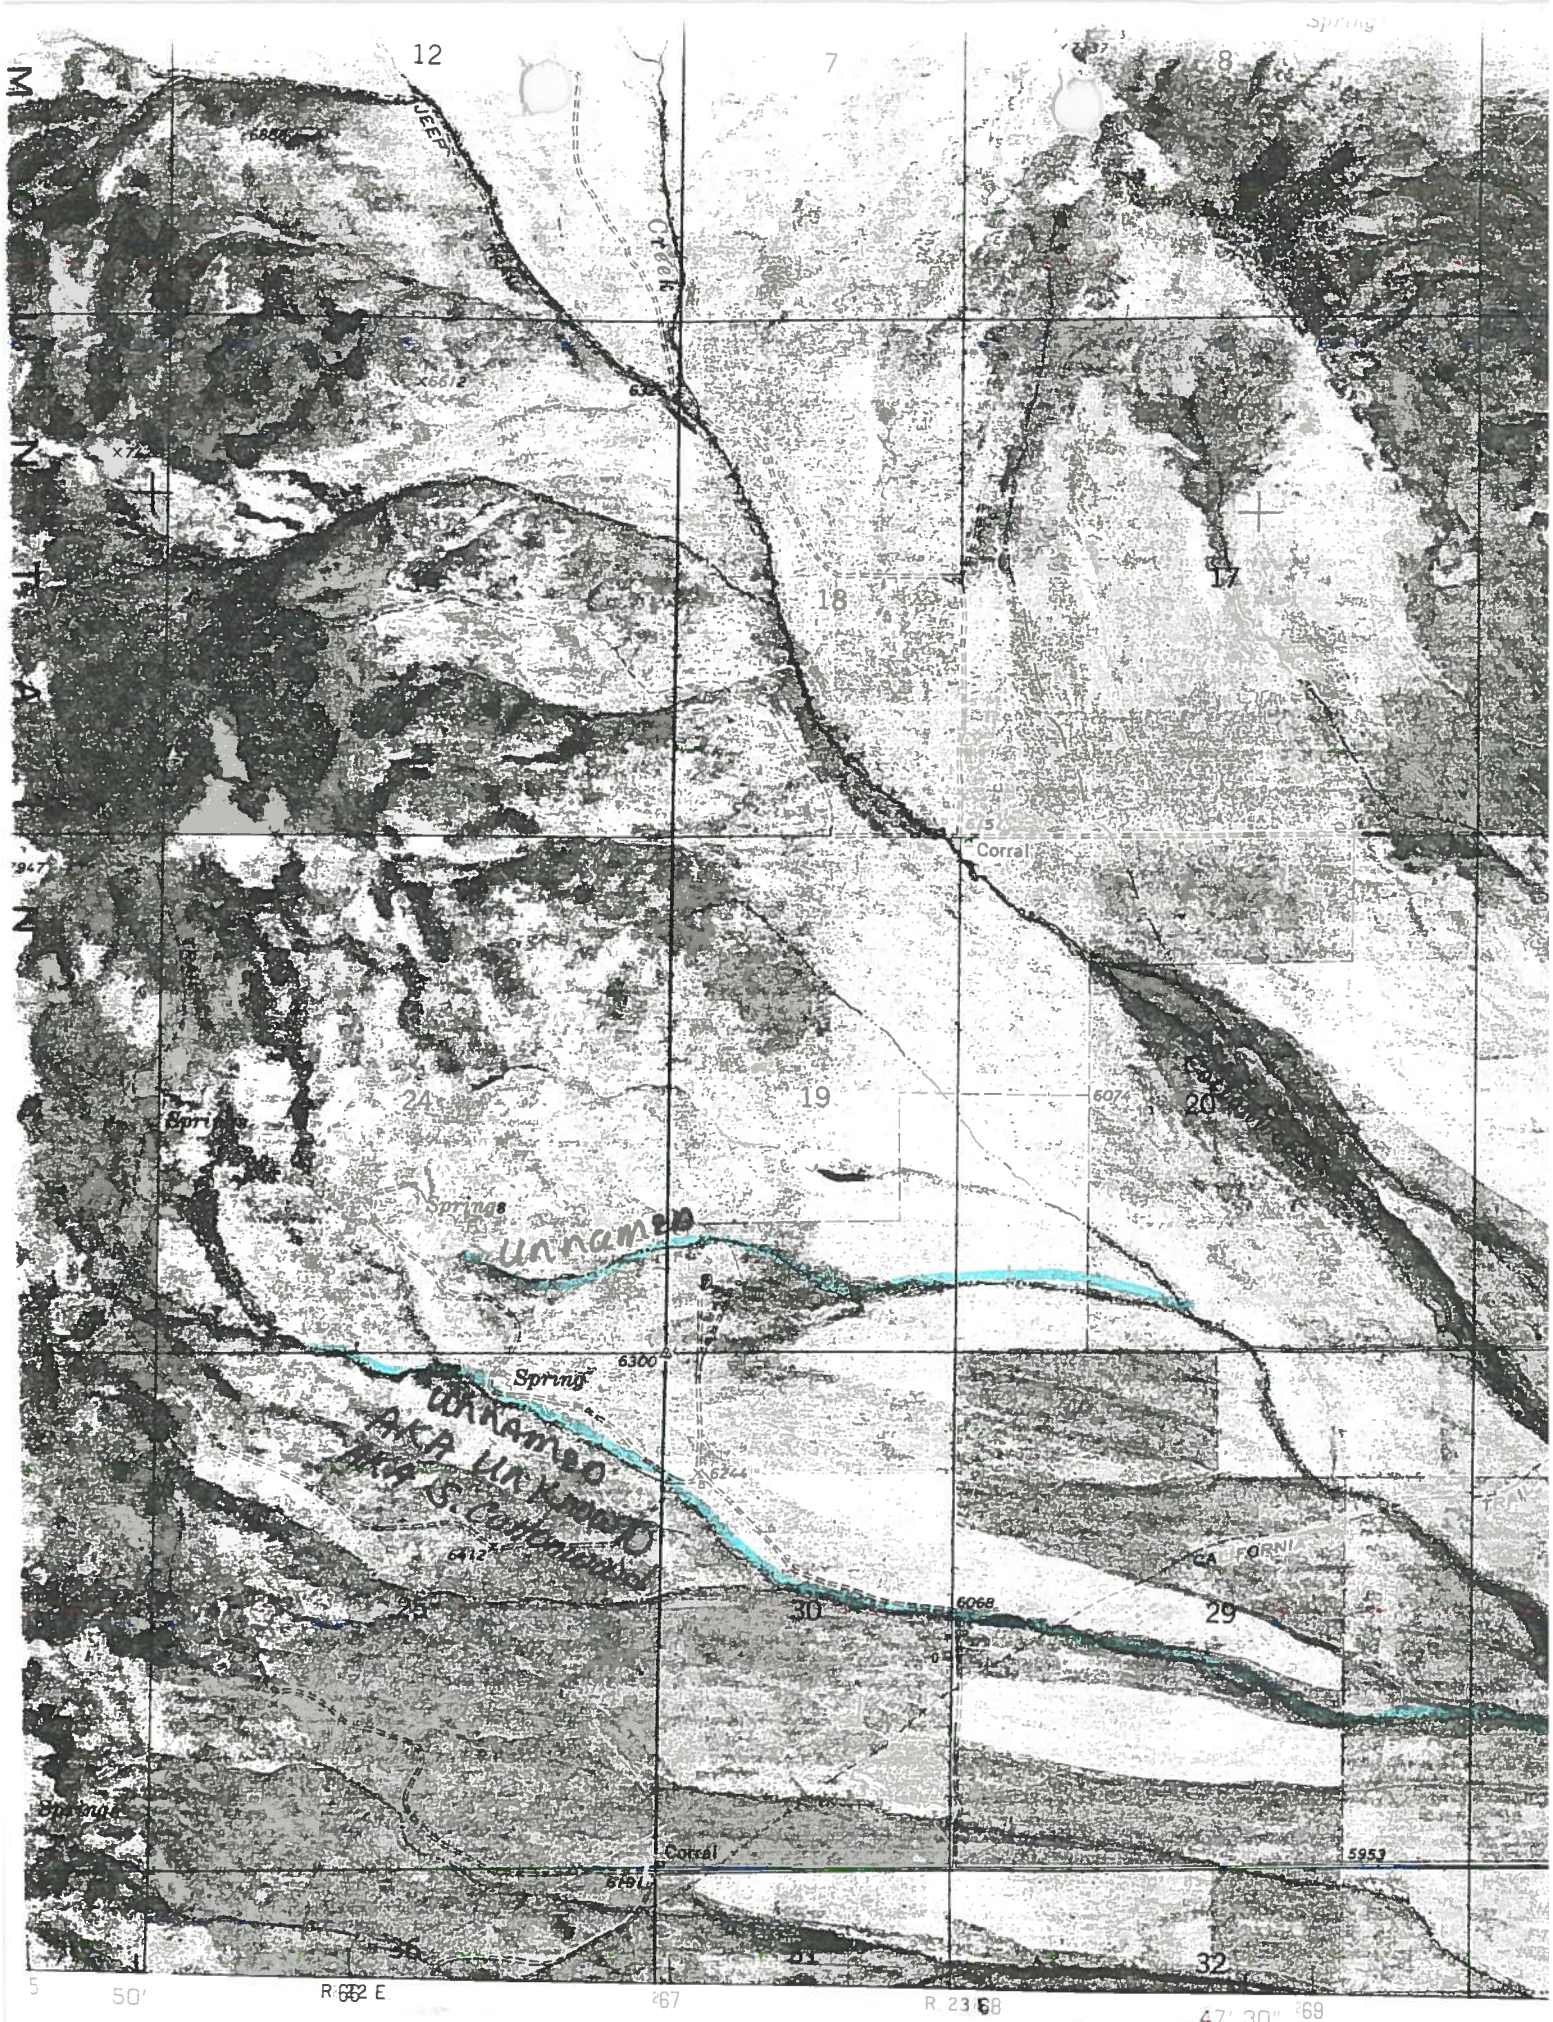

In his 1998 memo to the file, agent Steve Clelland mentioned that you talked to him about a spring that you were in the process of developing but had not yet obtained a water right. Please be aware that only water developed for irrigation before November 1987 and in accordance with Idaho statutes may be claimed for irrigation in the Adjudication. Any subsequent water development must go through the appropriate administrative processes of the IDWR Allocation Bureau if a water right is to be obtained. In addition, any changes in source, point of diversion or place of use accomplished after 1987 must be approved by the Allocation Bureau.

All of the Department's records are available to you, if you need them. I believe your suggestion of meeting first here at the office, and then possibly at the ranch, is a good one. Please let me know when you may be in the area and we can make an appointment to meet. In the meantime, let me know if you wish to file on the unclaimed license, and I can send you the proper forms in the mail. The fees for each new claim are \$50.00 for filing and \$1.00 for each acre claimed for irrigation.

Sincerely,

A handwritten signature in cursive script, appearing to read "V. Hancock", written in dark ink.
