4128 ACRES TOTAL

If the 4,128 acres is split into multiple ownerships, the water right shall be appurtenant to the 479 acres listed in the last notice submitted to the department unless otherwise provided for in the instrument of conveyance.

This right is limited to the irrigation of 278 acres within the place of use described above in a single irrigation season.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

The department must be notified in writing if a change occurs in the location of irrigated land, prior to diverting the water and must be provided a map showing the location of acres to be irrigated within 40 acre tracts.

Once water is diverted on the new lands, water cannot be used on the previously irrigated lands during the remainder of the irrigation season.

A second crop cannot be grown and/or harvested from the new lands during the same growing season that a crop has been grown on the old land. "Crop", in this case, also includes irrigated pasture.

TRANSFER 3460 CONTAINS PERTINENT INFORMATION.
Name change by DB 9/6/2001

The applicant must install, as part of his diversion works, a continuous recording totalizing device that records the total volume of water diverted from the Snake River during the given irrigation season. On or before January 1 of the following year, the applicant shall submit a copy of the volume record to the department.

Violation of any conditions of this transfer is cause for the Director to cancel or modify the transfer. The land owner shall be entitled, however, to designate 479 acres to which the water right shall become appurtenant.

ATTACHMENT B

This application for transfer of water right is unique in that water from a total of 300 acres is to be transferred to a block of land under single ownership comprising some 4,127.99 acres. The intent of this transfer is to allow the owner of this large block of land to irrigate up to 300 acres anywhere within the confines of his property boundaries during any given year. Transfer #3460 has already been approved for 500 of these acres. This transfer is for an additional 300 acres of irrigated land. Because of economic constraints, farm programs, and crop needs, the land irrigated each year may be different than that of the preceding year. It is felt that by applying for the transfer in this format the need for filing an application for transfer each year for lands to be irrigated different than that of the preceding year will be eliminated. If the applicant is required to initiate transfer proceedings each year, it becomes expensive as well as burdensome for both the applicant and the Department of Water Resources. The applicant agrees to provide any data or tabulation of acreage the Department may require upon request showing the lands irrigated each year if necessary. Applicant has no intent to irrigate more than 800 acres each year and feels the application for transfer in this manner creates greater flexibility for both the applicant and the Department of Water Resources. Any additional data requested will be provided.
