A43-10605 cont.

- will recommend this right as an expansion of license 43-02414 for 32 acres with a 6/30/1985 priority date and no additional diversion rate or volume per -14166 ($3.1 \div 230 \text{ Ac.} \times 32 \text{ Ac.} = 0.43 \text{ cfs}$)

R43-10605 6/30/1985 0.43 cfs 32/230 pp4

A43-10606

- was claimed as a combination of portions of several old decrees with the same priority date
- split into three new claims to show varying seasons of use (43-11283, 43-11284, & 43-11285)
- recommended to irrigated acres in original decreed PO4

A43-10607

- was claimed as a combination of portions of several old decrees with the same priority date
- split into two new claims to show varying seasons of use (43-11286 & 43-11287)
- recommended to irrigated acres in original decreed PO4

A43-10608

- also claimed as a combination of portions of two old decrees with the same priority date
- no specified season of use (no need to split)
- high water, so not included in limiting remark of 0.02 cfs per acre when combined

Claimed = 240 ac.
GIS = 230 Ac.
Lic = 198 Ac.
EXP = 32 Ac.

A43-02414 12/8/1954 3.1 cfs 198 Ac.

- well licensed in SESE of Sec. 18
- claim for 2 wells (SESE & SENE)

R43-02414 12/8/1954 3.1 cfs / 792 AF 198/230 pph

A43-10605 4/1/1944 1.75 cfs 240 Ac.

- claims both wells (SESE & SENE)
- remarks state that right was developed when the well in the SENE was developed
- two permits were filed originally

G24176 6/6/1953 first identified well in SENE, but later was amended to well in SESE as other had caved in

G25318 12/8/1954 identified well in SESE and was eventually licensed under 43-02414

- since license was already issued to well in SESE, other permit (G24176) was canceled (1963)
- '62 & '68 aerial photography show only 181 irrigated acres (although license was for 198 acres)
- only Evidence of Priority submitted was an affidavit for 1991
- Scott's memo (7/17/2000) shows there are still problems with well in SENE and says it is not hooked up since the 1980's (according to statements) then only 10 h.p. ^{pump}
- if some additional Evidence of Priority were submitted, perhaps a small diversion rate (0.6 cfs theoretical from Scott) could be recognized under this right, but since the permit was canceled in 1963 - it's doubtful

This table suggests a possible method of splitting rights that were combined at claims taking, and a possible assignment of diversion rates to the splits.

Hutchinson's rights are limited by Transfer No. 5140.

Nye claimed 4.88 cfs with a priority date of 12-12-1911 and a season of use of 3-15 to 11-15 under A43-10257. Additional claims could be filed for a maximum of 6.466 cfs. The amounts shown in blue represent Nye's (Harper's) share of each of the rights.

The amounts shown in red were not claimed by the claimant. An additional claim or claim(s) will be necessary to claim the unclaimed amounts.
