Dear Don:

Regarding my certified water measurement to you dated April 9, 1984 in behalf of Little Valley Mutual Irrigation Company, I find that in addition to State water right permits 02-7030, 02-7068, 02-7221 and 02-2443 there is one other water right which was originally filed on the Bruneau River which should be included as now being diverted from the pumping plant owned and operated by Little Valley Mutual Irrigation Company for lands within the boundaries of the project. This water right (02-2442) should also be included under the measurements made April 9, 1984. The original water permit number was 51-2179 and was filed originally in the name of Merle Hoagland.

If there are any questions, please don't hesitate to call.

Dear Dave:

Regarding my certified water measurement to you dated April 9, 1984 in behalf of Little Valley Mutual Irrigation Company, I find through the Swan Falls litigation that one additional water right permit should be included as being measured on September 27, 1983. Apparently because of a number of changes this permit was overlooked but application for permit #02-2443 should be included in the certified water measurement for proof of beneficial use for Little Valley Mutual Irrigation Company. Therefore, the measurement of 59.06 cfs covers state water right permits 02-7030, 02-7068, 02-7221 and 02-2443.

If there are any questions, please don't hesitate to call.

SUBJECT: Certified Water Measurement
Little Valley Mutual Irrigation Company

I personally measured the flow produced by the Little Valley Mutual Irrigation Company river pumping station on September 27, 1983. The river station is situated in the back waters of C. J. Strike Reservoir and is composed of five, 600 horsepower units, pumping into a single 32 inch diameter penstock. Approximately 75 to 100 feet from the pumping station an additional 16 inch diameter penstock is connected to the 32 inch penstock and runs to the canal heading.

The flow was measured in the 32 inch penstock upstream from the 16 inch connection using a Collins air/water manometer under standard operating conditions after the pumps had been operating for several hours. The pumps at the river station are as follows:

1. 600 horsepower, I. D. #53-1638-50, U. S. hollow shaft.
2. 600 horsepower, I. D. #C608183887, U. S. hollow shaft.
3. 600 horsepower, Serial #J1427455, U. S. hollow shaft.
4. 600 horsepower, Serial #J1427346, U. S. hollow shaft.
5. 600 horsepower, Serial number missing, U. S. hollow shaft.

Operating pressure during the test was 105 psi at the measuring point. The total flow produced for the measurement was 26,509 gallons per minute or 59.06 cfs. Little Valley Mutual Irrigation Company operates under state water right applications 02-7030, 02-7068, and 02-7221. This measurement is provided to the Department of Water Resources as a certified water measurement for proof of beneficial use for irrigation of the lands within the project.

If any questions arising regarding this measurement, please contact Sherl L. Chapman, 410 S. Orchard, Suite 144, Boise, Idaho 83705.
