RE: Snake River Basin Adjudication (SRBA)
Splitting of Claim 43-10798

Dear Mr. Robinson:

The above Adjudication claim was filed by John A. Pierce in 1989 to assert his claim to several Raft River Decreed rights with a common priority date. The claim was actually originally claimed under the identifying number of 43-00030, but was later renumbered to 43-10798 to more accurately reflect that it was the combination of more than one water right. This claim was subsequently split into 43-10798A and 43-10798B portions when you purchased a major portion of Mr. Pierce's property.

During recent investigation of the Pierce and C Bar Cattle claims in the SRBA, I have discovered that, although the six decreed water rights combined within 43-10798A and B do share a common priority date, they have different seasons of use and different uses. When Mr. Pierce filed the original claim, he lumped them all into one irrigation claim with a short season of April 1 to July 1, however two of the claims had seasons of use which extended into October. Although I am aware that currently Raft River is probably not available after July 1, I feel it may not be wise to give up the right to use a full season of water should conditions ever change.

In addition, two of the rights included as irrigation rights were actually decreed for year round stockwater. These two rights, 43-443 and 43-444 were listed in error as irrigation rights by the Department on Transfer number 2505 in March 1975, which was filed to add a point of diversion to a number of decreed surface water rights in the area.

To correctly recommend the above claim in the SRBA, it was necessary to split both your portion, 43-10798A, and Mr. Pierce's portion into three different claims. Your claims are summarized below, with the use and season of use noted. Also find enclosed copies of the new claims for your records. I have noted on each that they represent replacements to claim 43-10798A.

The preliminary recommendations for the Raft River portion of claims in the Adjudication are due to be sent to all individual claimants in the next month or so, but I wanted to give you an advance notice of this substantial change in

the above water right. If you have any questions or concerns please don't hesitate to contact me here at the office.

Sincerely,

Vikie Hancock
Sr. Water Resource Agent

split into 43-12926, 43-12927 & 43-12928
SOURCE - RAFT RIVER**

The above claims are based upon 1928 Jobe Adams decreed rights from Raft River. Claims 43-254 and 43-10798 were split into A and B portions in a 1990 real estate transaction between Pierce and C Bar Cattle Company.

43-171C & 43-178G are portions of rights which were decreed appurtenant to the same place of use. Decreed right 43-178 was identified and decreed as floodwater. As such, it allows more than 1 inch per acre for the decreed tracts. C Bar Cattle Company's portion of that right is 100 acres and corresponds with their portion of right 43-171.

Claim **43-10798** was originally filed by Jack Pierce as 43-00030 and included decreed rights 43-030, -032, -443, -253, -254, -255 and -444. As they are described in transfer 2505, 43-030 and 43-032 were also appurtenant to the NWSE Section 19. Only 10 acres on the west edge of this $\frac{1}{4}$ $\frac{1}{4}$ are now owned by successor in interest C Bar Cattle Company, and it appears from 1962 and 1968 aerial photos that the acreage irrigated within this 40 was the east 30 acres. At some point after T2505 in 1975, the east 30 acres of the NWSE Sec 19 was evidently conveyed from Jack Pierce to Dale Pierce (and subsequently to Thornton). Original claimant Jack Pierce asserted his claim to the entire portion of decreed rights 43-030 and 032, however there is no information as to when an accomplished transfer of water from the east 30 acres may have occurred. Neither Dale Pierce, or current owner of the east 30 acres in NWSE Sec 19 Thornton, have asserted a claim to any portion of these rights. I am recommending the claim as filed, but suspect that a valid right to the entire amount does not belong to C Bar Cattle Company.

In 1990, an ownership change split right 43-10798 into A and B portions. After review of this right, it was determined that a further split of each portion was also necessary to accurately recommend the decreed rights combined within.

- An error occurred in transfer 2505 that identified .093cfs for irrigation that was originally decreed for stockwater under right 43-443, and .231 cfs for irrigation that was originally decreed for stockwater under right 43-444. IDWR subsequently noted the error on right 43-444, but made no such note of 43-443 in the database. The errors were perpetuated in SRBA Claim number 43-10798 which listed a diversion amount of 6.807 for irrigation.
- Claim 43-10798 included decreed rights with different seasons of use.

It was necessary to split each portion of right 43-10798 into three portions. 43-10798A, in the name of C Bar Cattle Co, was split into the following rights:

43-12926 Portions of decreed rights 43-032 and 43-253 combined into one claim with a season of 4/1 to 7/1.

43-12927 Claim based upon decreed right 43-255 with a season of 4/1 to 10/1 with the appropriate combined limits applied to 43-253, as decreed.

43-12928 A year round diversion amount of 0.29 cfs for stockwater based upon decreed rights 43-443 and 43-444 included with 0.77 cfs from decreed right 43-030 for full season irrigation use.

SEE SRBA CLAIM FILE 43-12926 FOR COMPLETE DOCUMENTATION OF THE NECESSITY FOR THE ABOVE CHANGES.

There are overlapping places of use for the Raft River decrees (see T2505), and in addition, not all acres within each tract were historically irrigated at the time of the 1928 decree (see 1962 aerial photos). The SRBA claims identify use of water from Raft River upon acres in Sections 20, 24 and 25 to which the rights, as recorded, are not appurtenant. In the course of my review, aerial photos from 1962, 1968 and 1987 were analyzed. There is no indication that any accomplished transfer of place of use has occurred, as more acres within the decreed place of use are under irrigation in the 1987 photos than in the 1962 or 1968 photos.

A 1994 field exam found the claimed point of diversion in section 20 T14S, R27E and a manmade channel conveying water to the perimeter of the farm and the ponds identified in the claims. A June 2000 filed exam further verified that, as original claimant Jack Pierce stated, surface and groundwater are mingled in a common sprinkling system to irrigate the entire place of use. A permissible place of use including both surface and groundwater would be appropriate, given this irrigation system. An expansion claim for the use of Raft River water is needed if the claimant wishes complete coverage from surface water on his entire place of use in a single irrigation season.

In cases where the season of use was identified in the Jobe Adams decree, that season of use has been recommended in the SRBA. In cases where no season of use but irrigation season is indicated, the current IDWR standard is being recommended.

Duplicate Claims:

The following claims, and their corresponding basis claims, were filed simultaneously by original claimant John Pierce, to assert the diversion of Raft River Decreed water from his various wells. In agreement with Department policy at this time, these duplicate claims were disallowed and the water rights recommended as filed with only a point of diversion on Raft River.
