RECOMMENDATION NOTES

From: Vikie Hancock

1/18/01

Regarding:

43-254B, 43-12922, 43-12929, 43-12930, 43-12931 Surface Water
43-2284, 43-2304B, 43-2394B, 43-2455B, 43-4238B Groundwater

The above claims represent the remaining portions of claims split by an ownership change, Pierce to C Bar Cattle Company. Pierce retained 31 acres surrounding his farmstead, which is located more or less in the middle of the original place of use.

The original filings claimed six wells and one point of diversion on Raft River with a co-mingling of water that included two holding ponds and a common sprinkling system. After the purchase by C Bar Cattle Company, it was determined that the C Bar Property was irrigated from 4 wells that were not connected to two wells located on the Pierce property. I have therefore deleted all but two points of diversion for groundwater on the above Pierce claims.

It is not specifically known what changes, if any, were effected to continue delivery of water from Raft River to the Pierce 31 acres. It is assumed that the claimed point of diversion from the river is used to convey water to the property, however. Field exam done by agent Frank Hitchcock in 1994 documented the diversion and man-made channel that conveys water to the original place of use.

When combined, the above claims are limited to the irrigation of 31 acres and a diversion rate of 0.02 cfs per acre.

See Claim file 43-254B for documentation, and also claim file 43-12926 (C Bar Cattle Company) for additional information regarding 1928 decreed surface water rights. See claim file 43-2455A (C Bar Cattle) for documentation regarding stockwater use.

RE: Snake River Basin Adjudication (SRBA)
Splitting of Claim 43-10798

Dear Mr. and Mrs. Pierce:

The above Adjudication claim was filed by you in 1989 to assert your claim to several Raft River Decreed rights with a common priority date. The claim was originally claimed under the identifying number of 43-00030, but was later renumbered to 43-10798 to more accurately reflect that it was the combination of more than one water right. This claim was then split into two portions, 43-10798A and 43-10798B, when you sold the majority of your property to C Bar Cattle Company.

During recent investigation of the Pierce and C Bar Cattle claims in the SRBA, I have discovered that, although the six decreed water rights combined within 43-10798A and B do share a common priority date, they have different seasons of use and different uses. When you filed the original claim, you sacrificed the full season use and lumped them all into one claim with a short season of April 1 to July 1. Although I am aware that currently Raft River is probably not available after July 1, it may not be wise to give up the right to use the full season water should conditions ever change.

In addition, two of the rights included as irrigation rights were actually decreed for year round stockwater. These two rights, 43-443 and 43-444 were listed in error as irrigation rights by the Department on Transfer number 2505 in March 1975, which as you recall, was filed to add a point of diversion to a number of decreed surface rights.

To correctly recommend the above claim in the SRBA, it was necessary to split both your portion, 43-10798B, and C Bar Cattle Company's portion into three different claims. They are summarized below, with the use and season of use noted. Also find enclosed copies of the new claims for your records. I have noted on each that they represent replacements to claim 43-10798B.

The preliminary recommendations for Adjudication claims in your area are due to be sent to all individual claimants in the next month or so, but I wanted to give you an advance notice of this substantial change in the above water right. If you have any questions or concerns please don't hesitate to contact me here at the office.

Sincerely,

Vikie Hancock
Sr. Water Resource Agent
